

# How to play Stick Clash game to pass all levels and win

To help players defeat soldiers and monsters at each checkpoint on the map, Taimienphi will guide you on how to play Stick Clash to pass all levels right below.

Stick Clash promises to bring you both an exciting and challenging experience, as you have to lead your stickman army to defeat soldiers and monsters at each checkpoint on the map. Please refer to **how to play Stick Clash** from Taimienphi to overcome all levels.

## *1. How to play Stick Clash game to pass all levels*

To quickly conquer the game Stick Clash, you can refer to other players' tutorial videos on YouTube. These videos will guide you in detail on tactics to help the main character collect maximum power, defeat stronger opponents and achieve high scores.

If you want to pass the levels yourself, you can refer to good tips and strategies from Taimienphi:

### *Understand the rules of the game*

- Stick Clash is a strategy game, you need to know how to control characters to fight enemies.
- You need to build a strong squad by collecting different characters during the game.

## ***Resource Management***

- Upgrade and buy new characters reasonably to optimize team strength.
- Collect enough experience to unlock new levels and upgrade characters.

## ***Time of attack***

- Wait until you have enough force before rushing to attack the enemy.
- If your character has special skills, attack at the right time to deal great damage to your opponent.

## ***2. Introducing the game Stick Clash***

The main objective of the player in Stick Clash is to capture the control points on the map in each level by destroying all the soldiers and the powerful boss. In each level, you will see your position and the enemy groups at different control points on the map. You will have many ways to approach each group of enemy soldiers. Before taking action, you need to carefully consider the numbers on each group of soldiers. These numbers represent the number of soldiers at each control point that you will confront. You should choose to go to the enemy group that has fewer soldiers than your force and after the encounter, the number of enemy soldiers you defeat will be added to your current number of soldiers. That is, if you have 10 soldiers and the first group of soldiers you defeat has 5, after the battle, you will have 15 soldiers to continue to the next control point.
