

# How to play the Recycled Team in Truth Arena season 13

If you want more suggestions for this season 13 of Truth Arena Recycle, scroll down below.

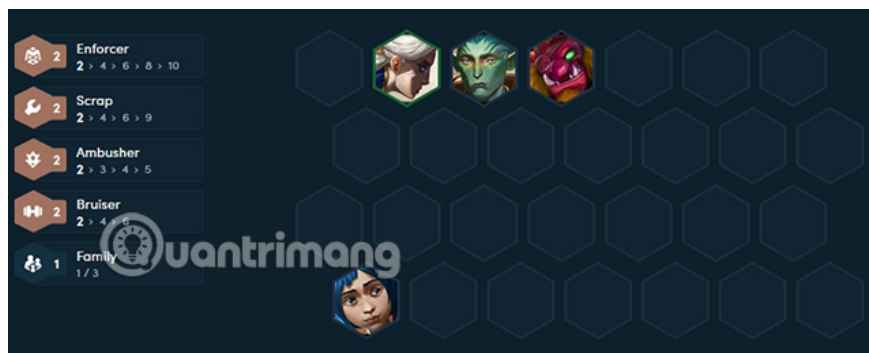

Recycle still uses the complete equipment buff mechanism from DTCL season 6 until now. Unfinished items when in the hands of Recyclers will become complete items, along with that, Recyclers will receive Shields.

Although it has the advantage of self-completed equipment, Recycling does not have additional power buffs in DTCL season 13. If you want more suggestions for Recycling Truth Arena season 13, please scroll down below.

## TFT Recycle Build Season 13

### Early game

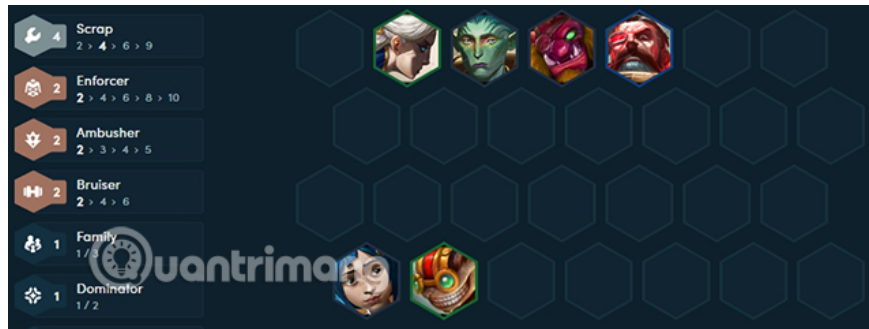

Include Recycled champions combined with early game champions, maybe Steb and Camille to get more buffs. Throw magic items for Powder and start building tank items for Steb, if rolling for Powder, save money from the beginning of the game, don't level up and save money. If you decide to find higher priced champions to be damage dealers, level up to 4 in round 2-1.

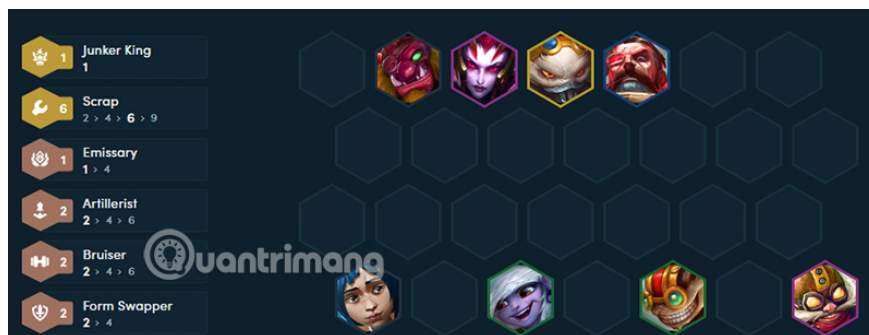

### Mid game

If you choose to roll for Gangplank, level up to 6 on round 3-2, then level up to 7 when possible and save up over 50 gold to slowroll Gangplank to 3 stars at level 7.

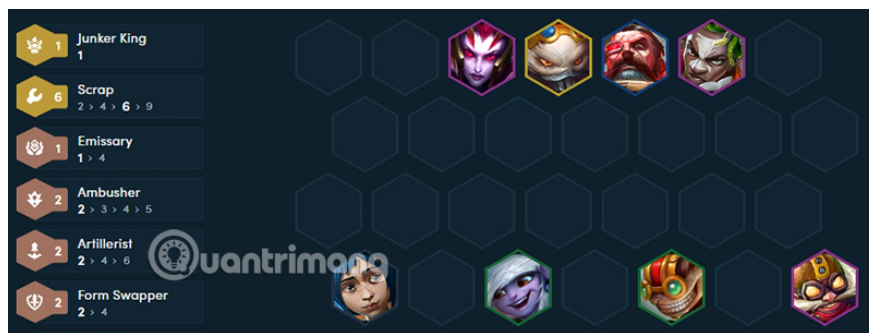

Another option is to get Corki and Rumble late game, skip slowrolling for Gangplank if you want Corki and Rumble. Level up to 8 as fast as you can to get Corki, and for Rumble, take good care of Corki and get Rumble at level 9.

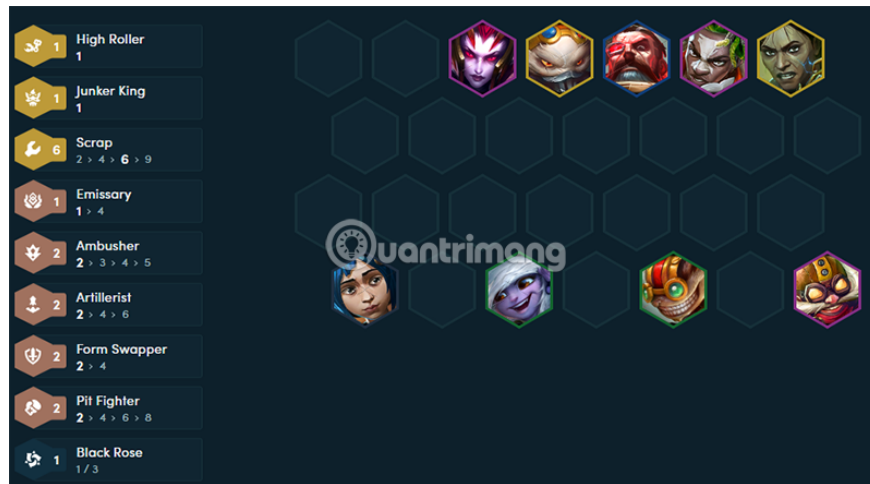

Gathering 9 Recyclers is a bit difficult, so lower your team's standard by 1 level, 6 Recyclers, and use the surrounding champions to add buffs to main damage dealers like Rumble, Ekko, and Corki.

Elise is a great champion to add to your team because she can trigger 2 more traits. She also stuns and deals good damage. So if you see her appearing a lot, add her to your team at level 8 with Corki and Ekko.

If you can jump to level 9, you can add high-cost, multi-star generals to make your team stronger. 5-gold generals sometimes don't add any more clans to your team, but if you see a lot, just throw them all in, who knows, you might be able to add a 3-star, 5-gold general.

## Items for Recycled Champions

Gangplank and Corki have the same physical damage items, Trundle has the tank items. Ekko will need some good support items like Hand of Justice, Lightning Bolt, Jeweled Gauntlet, and Royal Crown. These items are also suitable for Rumble, Rumble only needs Bloodthirster if he wants to heal more. As for the magic items like the one below, you can put them all on Ziggs and Powder.

## Recycling Buff

At the start of combat, Recycler's item components temporarily become full items. Recycler then gains a shield for 30 seconds for each of your team's item components, including full items.

### General Milestone:

1. 2 Recycle: 1 ingredient, gain 25 Shields.
2. 4 Recycle: 3 ingredients, get 40 Shields.
3. 6 Recycle: All components and equipment complete! Get 65 Shields.
4. 9 Recycle: Spawns Light equipment! Gains 70 Shields.

Champions: Corki, Ekko, Gangplank, Powder, Rumble, Trundle, Ziggs.
