

How to play video jigsaw on VLC

Right on VLC Media Player, there is a feature for playing puzzles with the currently playing video screen.

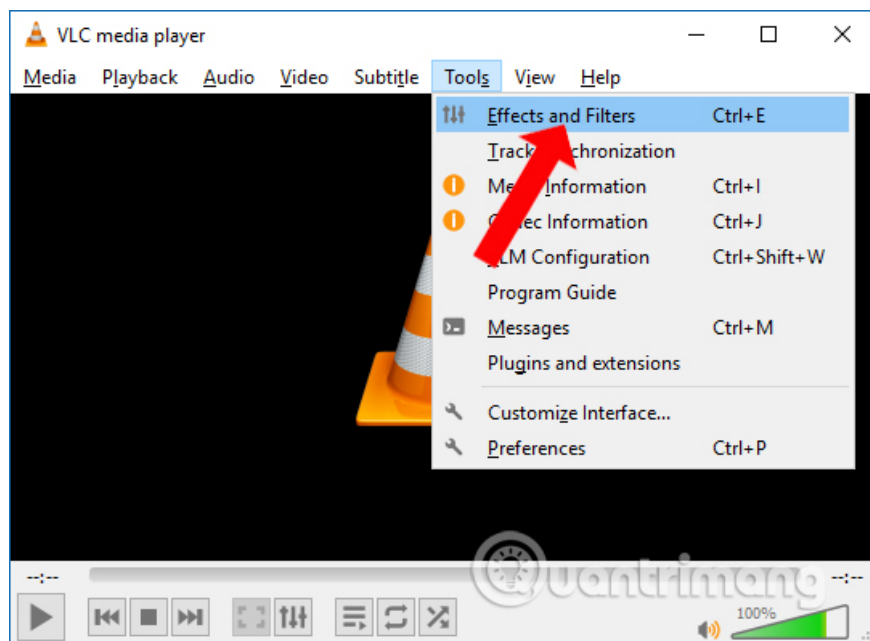

VLC Media Player is the most popular video and audio player application today. Besides, this video playback software also has many useful features such as recording video screen, cutting video or changing video format right on the software. In particular, we can play video games right on VLC Media Player, with the number of custom collages and puzzle pieces taken from the image of the video you are playing. This is a secret feature that is not activated on the software, but the user must edit it in the interface. The following article will show you how to play the puzzle game on VLC Media Player.

1. Advanced tricks use VLC Media Player
2. Instructions for rotating videos are inverted and inclined by VLC Media Player
3. How to record webcam videos on VLC Media Player

Instructions for playing jigsaw on VLC Media Player

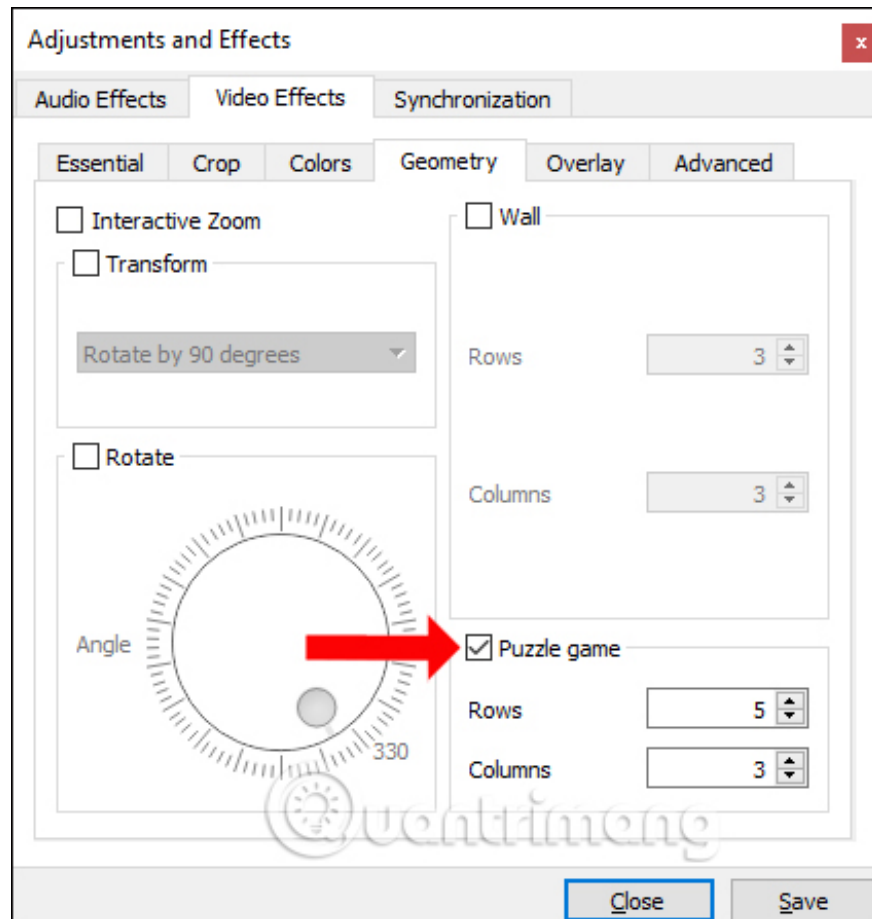

Step 1:

First you open the video you want to play puzzle or open later. Then click on **Tools** and then select **Effects and Filters**.

Step 2:

Switch to Adjustments and Effects interface, click on the **Video Effect tab** and then click on the **Geometry tab** . Then in the content below select the **Puzzle Game** to activate the **puzzle** game on VLC. Next **enter the number of puzzle pieces** into horizontal and vertical columns. Up to 16 users will be allowed to enter. Finally click Close to save.

Going back to the interface we will see the video screen converted to a puzzle game. Now you can try to figure out how to merge on VLC Media Player interface. If you don't want to play the puzzle and put the video back to the default screen, just skip the Puzzle game.

An interesting feature on VLC Media Player software that few people know about. So not only watch videos, or audio on VLC, but you can also entertain with an intellectual jigsaw puzzle, with collages taken from the scene in the video itself.
