

# How to play Wifi from laptop on Windows 7, Windows 8 easily

The simplest, most effective method of wifi transmission: You can broadcast wifi directly from windows safely, or you can use more professional software Connectify Hotspot.

## Laptop with LAN network easily turns into a Wifi hotspot

As the title I mentioned. The fact that most laptop devices are equipped with Wifi Card allows us to access the wireless network in any laptop. However, the prerequisite is that where you use the machine must have wifi transmitter. On a small scale like a family, renting a wifi modem is also quite expensive (especially for students).

The special thing is that we can completely **broadcast Wifi from our laptop** through some relatively simple operations, and the quality is not inferior at all. If you do not know the capabilities of a computer, or before you thought it was very complicated and difficult, this article will be very helpful for you!

## 1. When do you need to broadcast wifi?

1. Your room has LAN network, but many computers and do not want to wake up fumbling around, or play on smartphones.
2. Lost network, you have USB 3G, want to share with other brothers to use it (this is a bit mean).
3. Wifi transmitter has many users already, can not connect more (limit). You can catch wifi and broadcast it to others.

### Some tips to use Wifi effectively:

1. Repeat Wifi Wifi - Receive Wifi source and playback
2. How to check who is using your home WiFi 'temple'
3. 5 How to handle exclamated network, catch Wifi showing sign!

## 2. The simplest and most effective way to generate wifi: Use Connectify Hotspot software.

---

This software can be downloaded directly from the homepage with the following link:

<http://www.connectify.me/download-hotspot/>

**Download Connectify** then fill in your mail and download the **Connectify Hotspot Lite** version! This is a free version, limited functionality than the Pro version - Only function Wifi from laptop.

After you have downloaded the file: **ConnectifyInstaller** .exe double click to install. The installation process may require installing Microsoft C ++, just Ok to continue!

After installation is completed, select the software icon on the screen. The interface will look like this:

Connectify 7 Beta is Here!

Switchboard Beta 4 is Live!

The position you need to set:

1. **Wifi name want to play**
2. **Pass wifi**
3. The current network your laptop is using, to broadcast to another device. Maybe plugging in a LAN, or using another wifi, or from USB 3G.
4. Sharing Mode: Broadcast mode - Choose as WPA-2.

Finally just press **Starting Hotspot** to play. Finish by clicking **Stop Hotspot** .

Above I have introduced the free app **Connectify Hotspot Lite** to **play wifi from laptops** used for all versions of Windows. With the Pro version, there will be a few more functions such as security firewall or data sharing between devices, . However, there is a charge or complex unlocking.

Because the purpose is fast, and easy, the free version almost satisfies the needs of everyone. Wish you have more solutions to create a small wireless network with **Connectify** .

### **3. How to play wifi on Windows 7 without software**

---

The wifi transmission from laptop you can do without installing additional software. You can broadcast wifi directly on Windows 7 with a few steps.
