How to play Wifi Win 7 - Create a hotspot on Windows 7 Laptop simple and fast. Broadcasting wifi from a laptop is an effective way to share internet connection with devices with poor wifi reception, such as mobile phones or tablets. Or fake

Broadcasting wifi from a laptop is an effective way to share internet connection with devices with poor wifi reception, such as mobile phones or tablets. Or more simply, you want to create a wifi hotspot with your personal touch to share with friends.

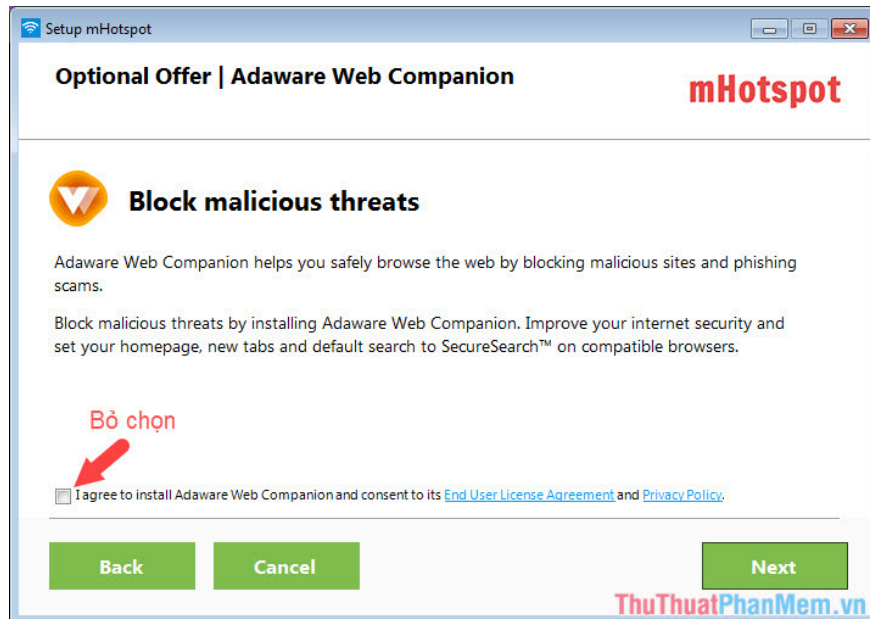

The following article, TipsMake will guide you how to generate wifi for **Windows 7** laptop with **mHotspot** software , a compact tool, free and easy to install. You can download **mHotspot** here:

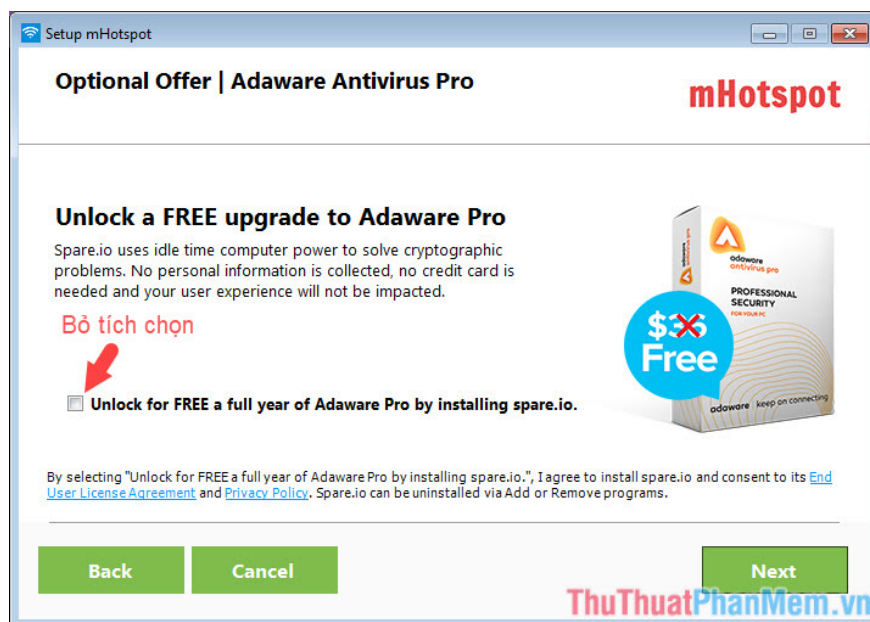

<https://mhotspot.com/download/>

## 1. Install mHotspot

**Step 1:** After downloading you install and do not click **Next** continuously because **mHotspot** automatically installs many other software on your computer. First **mHotspot** will force you to install **Adaware Web Companion** software , uncheck and click **Next** .

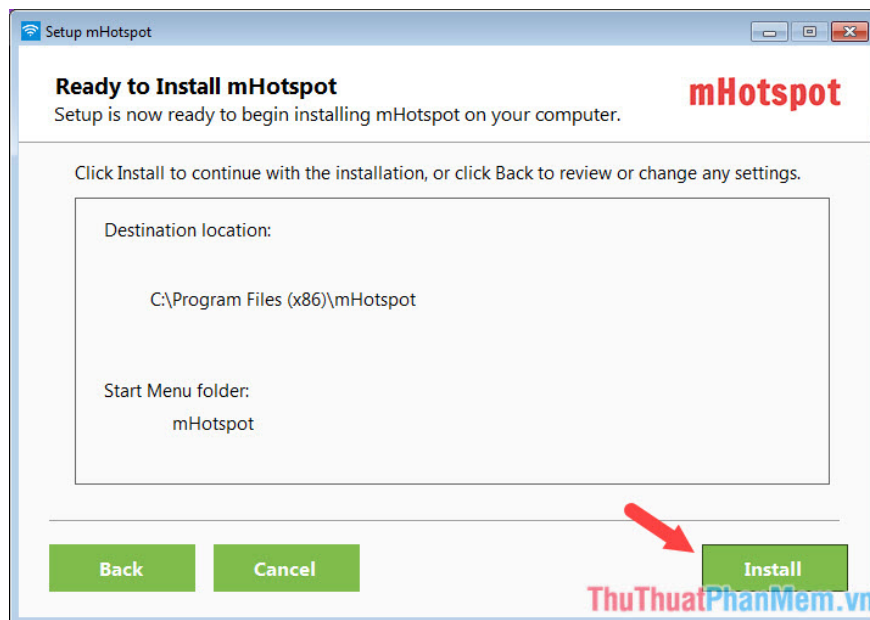

**Step 2:** Next, the software will ask you to install **Adaware Antivirus Pro** , if you do not want to install on your computer, uncheck **Unlock** . and click **Next** .

**Step 3:** And finally, the software will give you suggestions for installing **Avira Free Antivirus** software . To skip this option, click **Decline** to skip.

**Step 4:** At this point, you can safely click Install to install **mHotspot** on your computer.

## 2. Use mHotspot to broadcast wifi on laptop

**Step 1:** After the installation is complete, open up the mHotspot software and set the parameters for your shared Wifi network.

**Hotspot Name:** Name the wifi network

**Password:** Set a network password

**Internet Source:** Set the internet source to share, be it sharing from Wifi (Wireless Network Connection) or wired (Local Area Connection) connection.

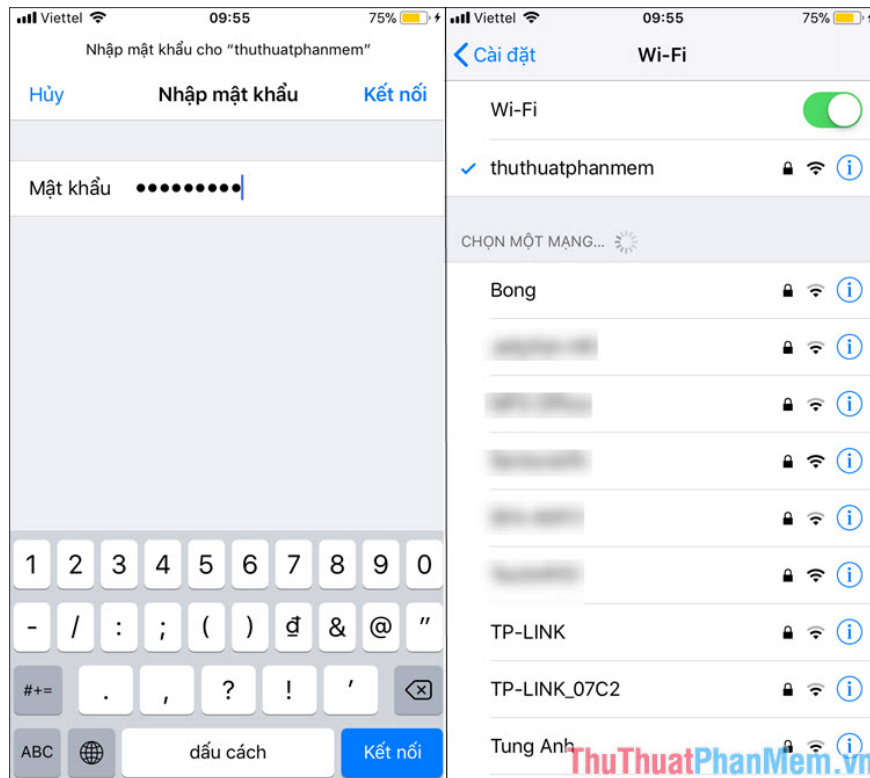

After setup is complete, you click **Start Hotspot** to start broadcasting wifi.

The screenshot shows the mHotspot web interface. At the top, the title bar reads "mHotspot" with standard window controls. The main configuration area includes:

- Hotspot Name:** A text input field containing "thuthuatphanmem" with a red circle "1" next to it.
- Password:** A text input field containing "123456789" with a red circle "2" next to it. Below the field are links for "Hide Password" and "Clear Fields".
- Internet Source:** A dropdown menu set to "None" with a refresh icon to its right. A red circle "3" and an arrow point to this field.
- Max Clients:** A numeric spinner set to "10" with a red circle "4" and an arrow pointing to it.
- Hotspot:** A status indicator showing "OFF" in red text.
- Buttons:** Two blue buttons labeled "Start Hotspot" and "Stop Hotspot".

Below the configuration area is a navigation bar with icons for "Settings" (wrench and screwdriver), "About" (Wi-Fi symbol), and "Rate Me :)" (star). There are also social media icons for Facebook, Twitter, and a question mark, along with a "Refresh Clients" link. A tabbed interface shows "Hotspot" selected, with "Clients" and "News" as other options. The main content area features a large advertisement for "NEON DRIFT by mHotspot", described as "A Neon based fun game". The ad includes two buttons: "Get it on Google play" and "Download on the App Store". At the bottom of the page is a blue banner with the text "ThuThuatPhanMem.vn".

**Step 2:** Open your phone and connect to the Internet with the wifi you've just created to see whether it is.

**Step 3:** Now you go back to **mHotspot** software and click on **Hotspot** as shown below to see information of computers connected to the shared network from your laptop. In addition, you can also monitor the amount of data transmitted via this wifi hotspot.

mHotspot

Hotspot Name:

Password:   
[Hide Password](#) [Clear Fields](#)

Internet Source:

Max Clients:    Hotspot: **ON**

[Settings](#) [About](#) [Rate Me :\)](#)

[Refresh Clients](#)

Hotspot Clients News

Clients connected	1
Data Sent (MB)	0.600
Data Received (MB)	0.258
Total Data Transmitted (MB)	0.858
Upload Speed (Kbps)	0.179
Download Speed (Kbps)	0.230
