

# How to play Youtube videos directly on iPhone

Playing live videos is not a new feature on Youtube, even the web version has been around for a long time, but recently Youtube has updated and allows users to play Youtube videos directly on iPhones and other devices. iOS is completely free

Recently, phone users, especially **iPhone users**, have YouTube updated their latest version on their phones, allowing them **to play Youtube videos directly on iPhone** . This feature is quite similar to live streaming on Facebook, but on Youtube you can make money thanks to that broadcast content, but of course, streaming Youtube videos directly on iPhone must be videos that are not subject to **copyright** competition .

Allowing YouTube live video streaming on iPhones will help users access YouTube better. In addition, this is also Google's response to Facebook when they are gradually letting Facebook dominate this fertile market.

## Conditions to play Youtube videos directly on iPhone

- The account was created at least 1 month ago, and has been verified via phone.
- The account must not violate any rules within 90 days
- Broadcasting copyrighted content including videos, news, movies and music will be removed immediately.

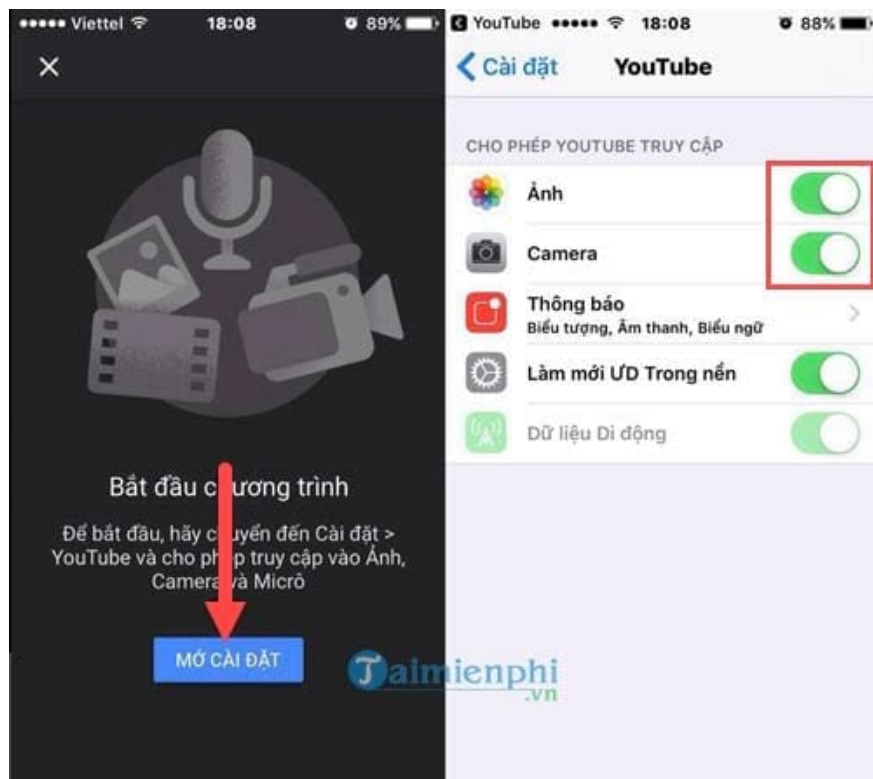

## Instructions for live YouTube video chat on iPhone

*Step 1:* First, readers must make sure that the Youtube version they are using is the latest. If not, you can download **Youtube for iPhone** here.

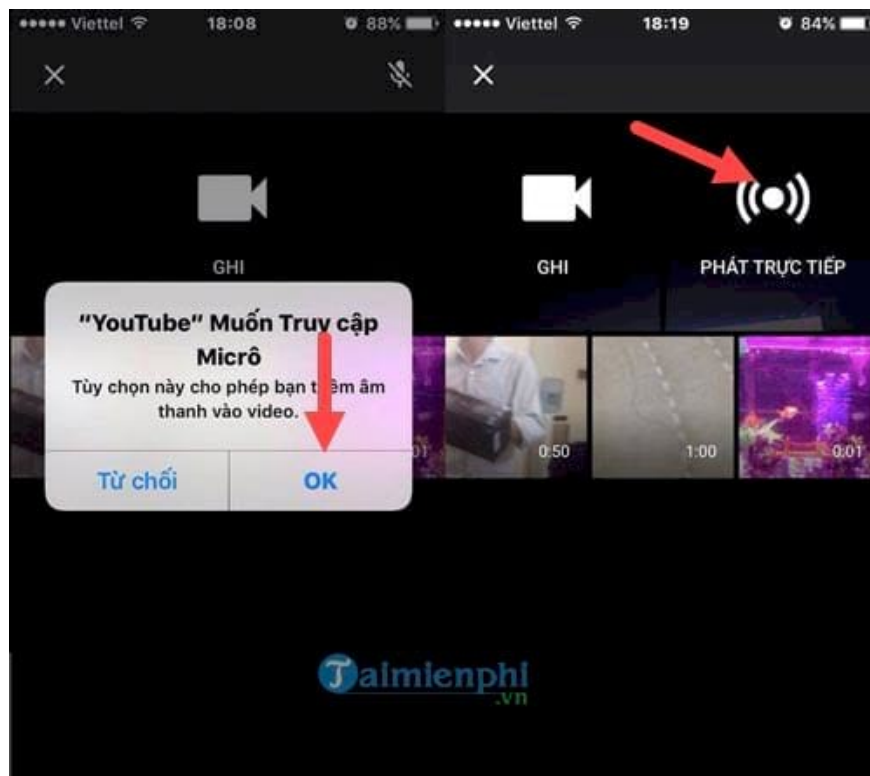

*Step 2:* Next, go to the Youtube application on iPhone and **access the camera image** at the top.

Step 3: Here, if Youtube asks for **permission confirmation** , please open Photo and Camera permissions on your iPhone.

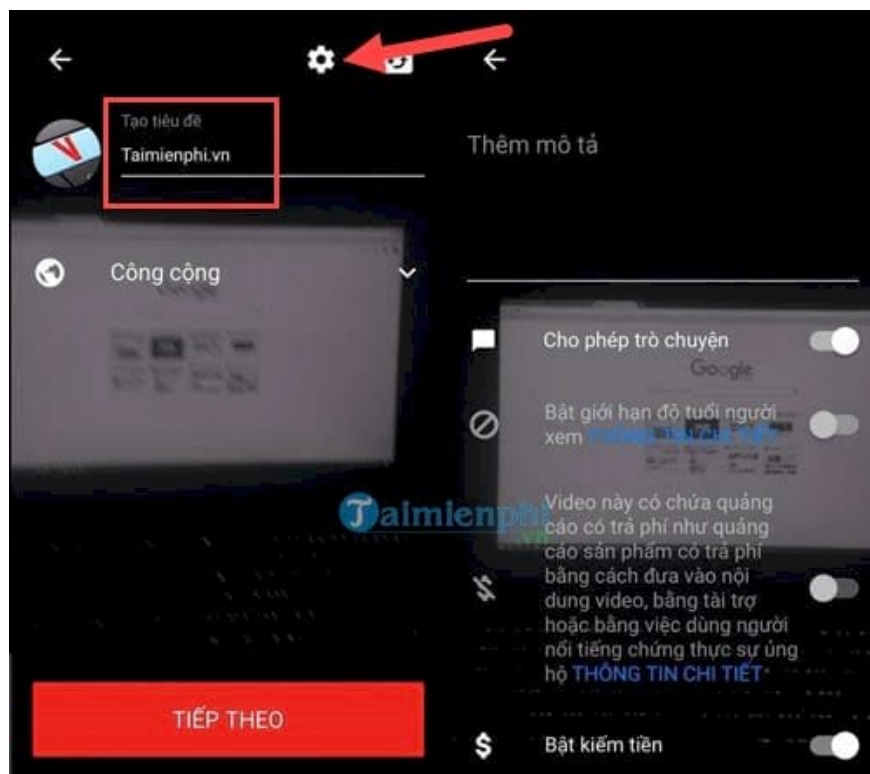

Step 4: Then go back and **confirm Micro access** .

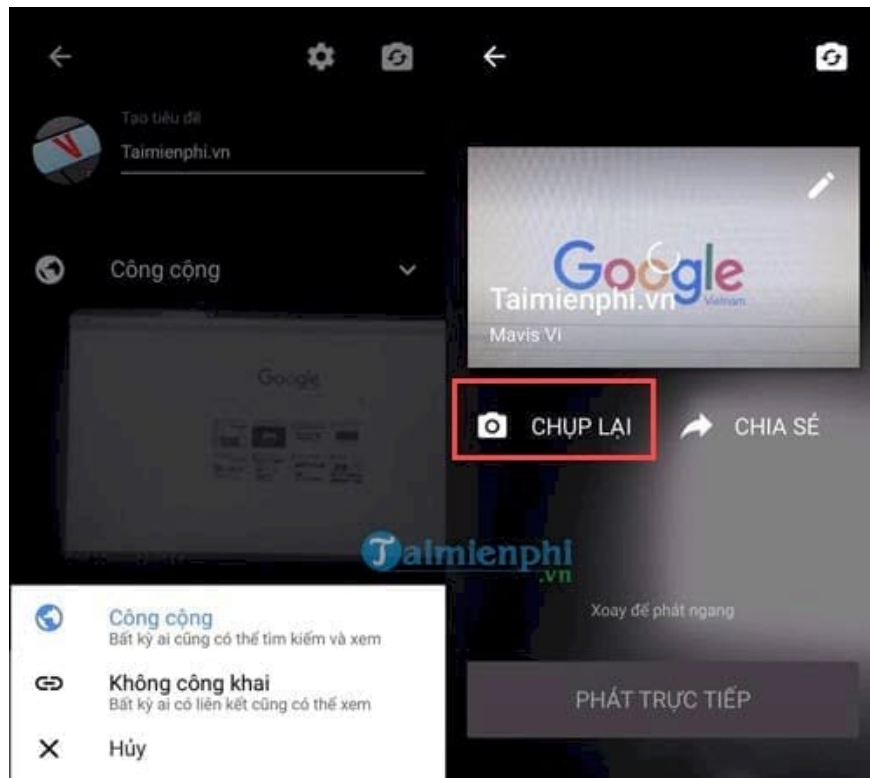

After confirmation is complete, you can click on **live streaming - Live** to start playing YouTube videos directly on iPhone.

*Step 5:* Here you are allowed to name your title, and when you click **Settings** you will be allowed to set additional parameters such as enabling monetization and allowing chat.

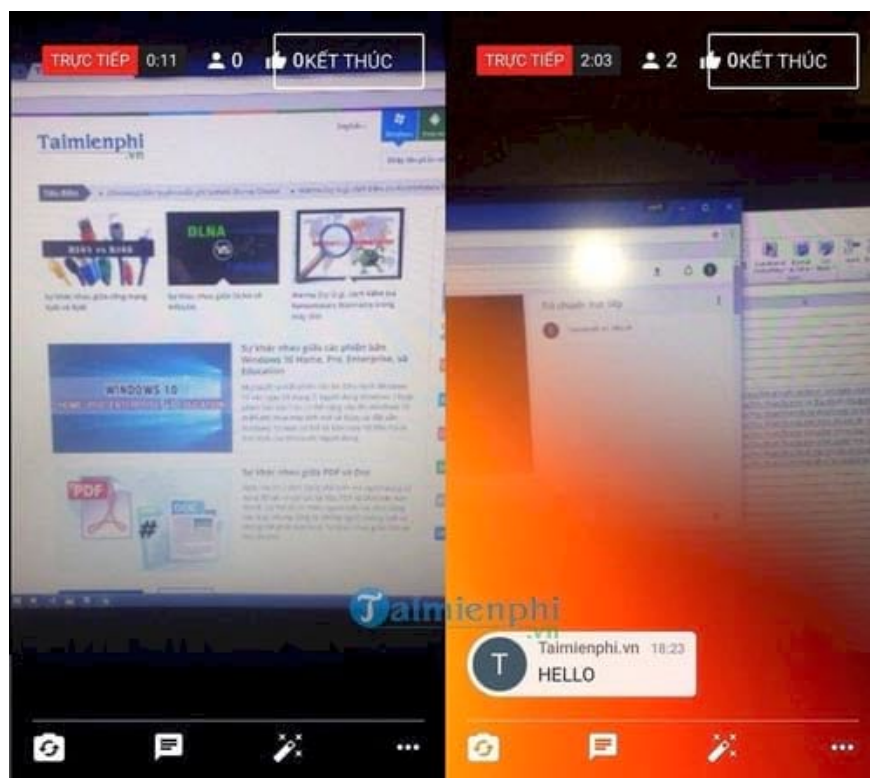

*Step 6:* Below we can understand whether the **broadcast area is public or private - not public** . Once done, click on **live streaming** so Youtube can take a cover photo for you.

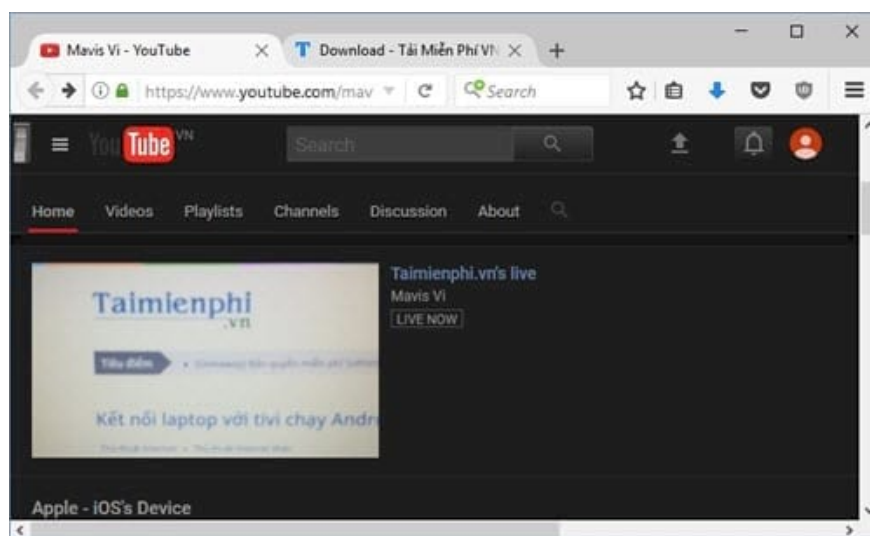

**Note:** If you don't like the cover photo, click Retake to replace it with another photo.

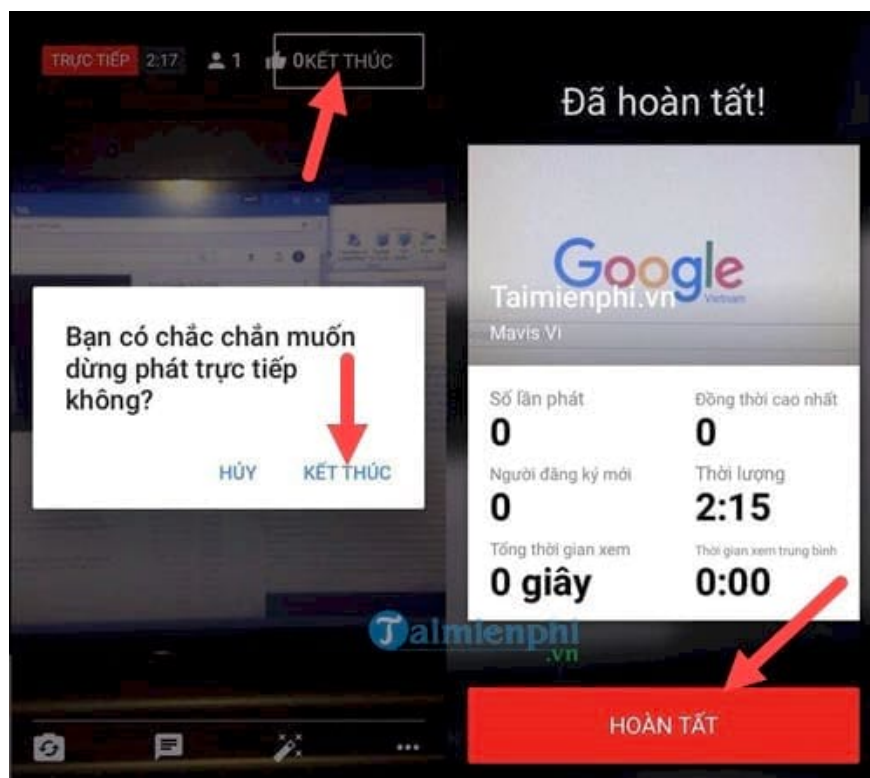

*Step 7:* So you have successfully broadcast live YouTube videos on iPhone. If someone comments or likes, it will be displayed on your live page. Of course you can install these features if you don't want to see user comments.

- Users on the web when entering your channel will also see the video being played, click to watch as usual.

Step 8: To stop playing, click **finish** and then the Youtube system will calculate the number of viewers, registrations and viewing time to let you know. Click **Finish** to close.

So we have completed the live Stream Youtube Video on iPhone, you can play any content you want but remember not to violate copyright content or your account will be banned. Banning live Stream Youtube Videos on your phone and worst of all, your account will be deleted.
