

How to post 360 photos to Facebook

How to post 360 photos to Facebook 360 photos show a lot of details around, helping users to discover interesting things and very beautiful angles. Currently, Facebook has supported users to upload 360 photos to Facebook

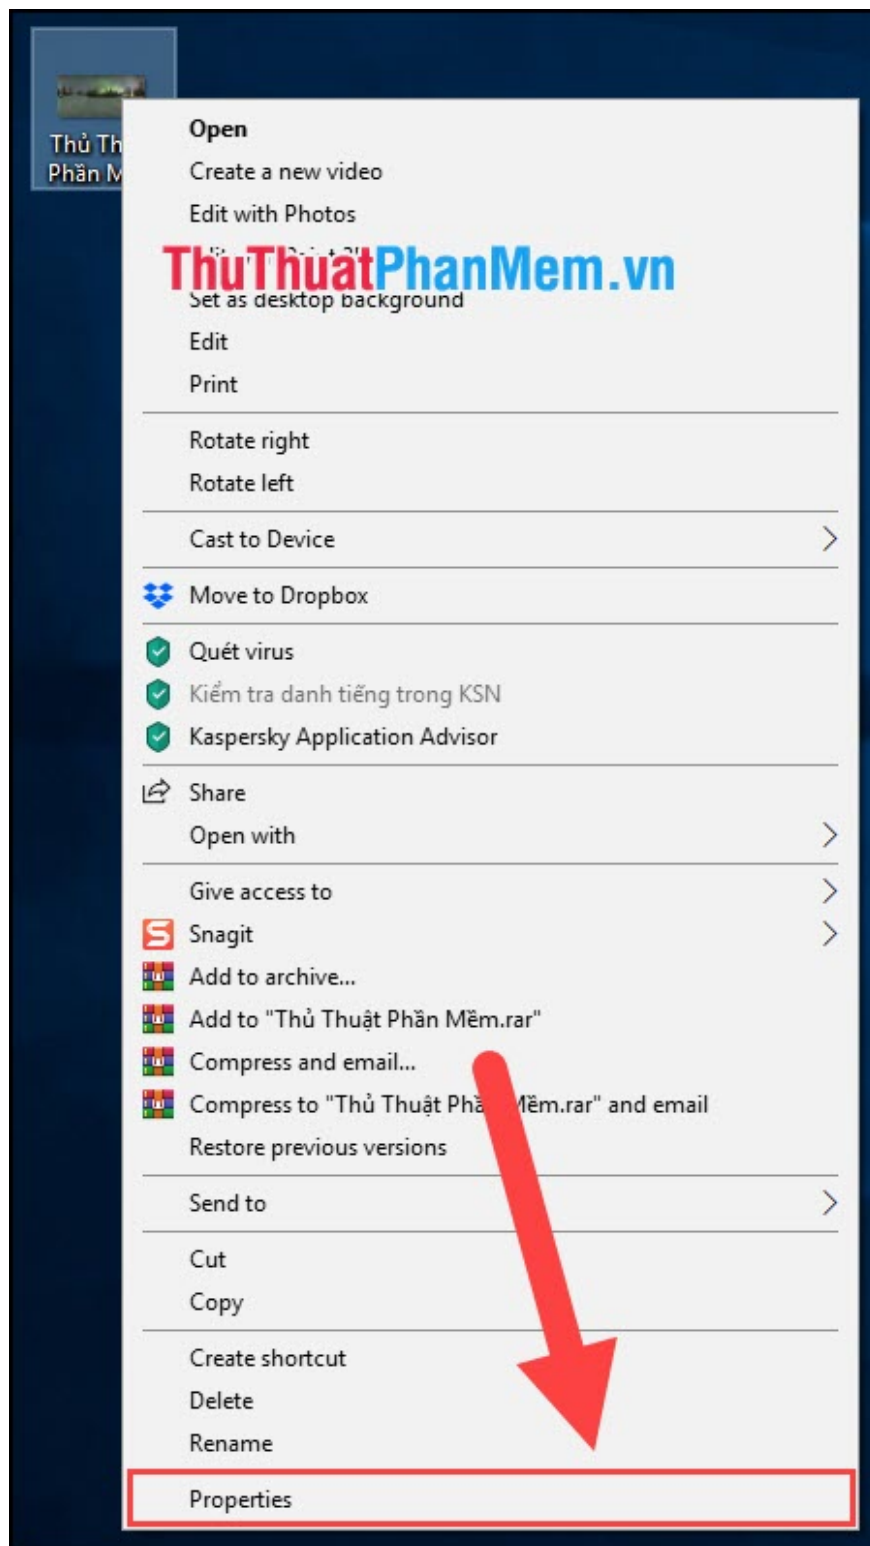

360 photos show a lot of details around, helping users to discover interesting things and very beautiful angles. Currently, Facebook has supported users to upload 360 photos to Facebook, but the algorithm is still not good and has not been optimized, so it is difficult to post 360 photos to Facebook. Today, Software Tips will guide you how to post 360-degree photos to Facebook fastest and most beautiful.

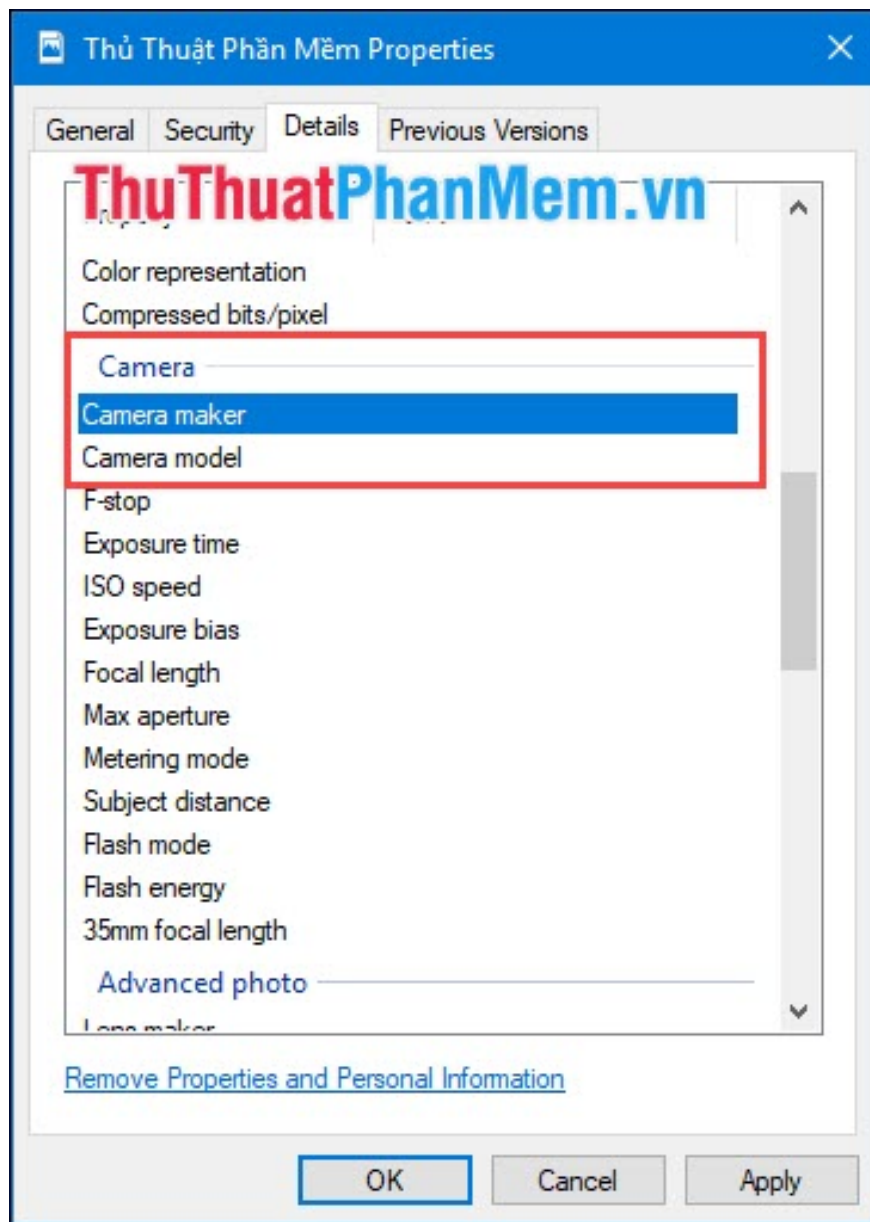

1. Post 360-degree photos to Facebook with your computer

Note: The 360 images you want to upload must have a 2: 1 aspect ratio (Length is twice the width). If it is not the correct 2: 1 aspect ratio, 360 photos will not work on Facebook.

Step 1: you **right click** on the image and select **Properties** .

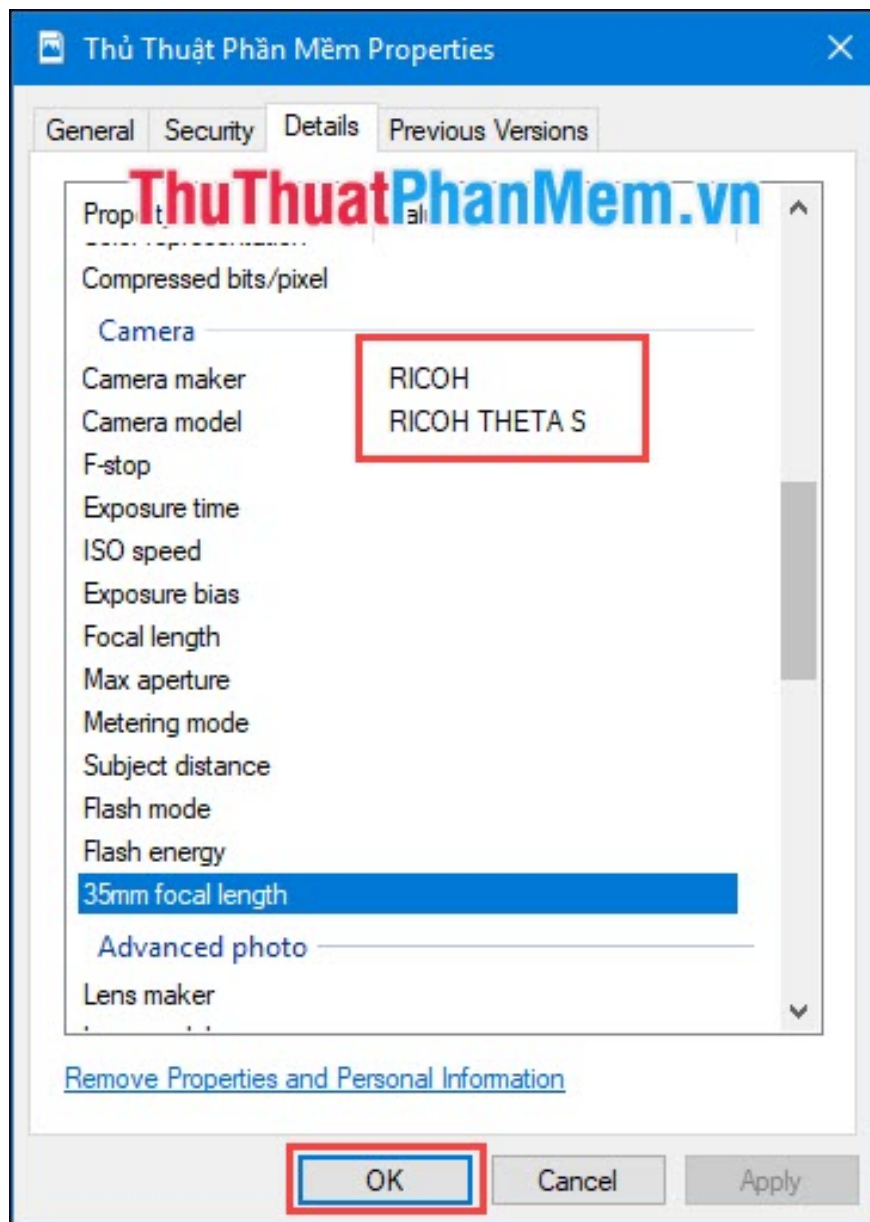

Step 2: Go to Photos **Details** and scroll down to find the **Camera** section . Then you **double click** the line **Camera Maker** and **Camera Model** to change the information.

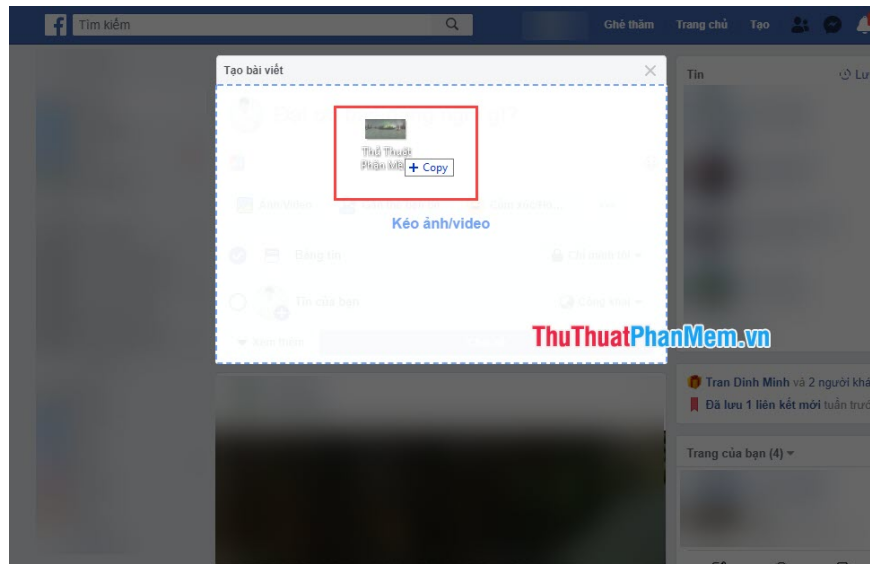

Step 3: You proceed to add the following information commands:

1. **Camera Maker: RICOH**
2. **Camera Model: RICOH THETA S**

Then you click **OK** to apply.

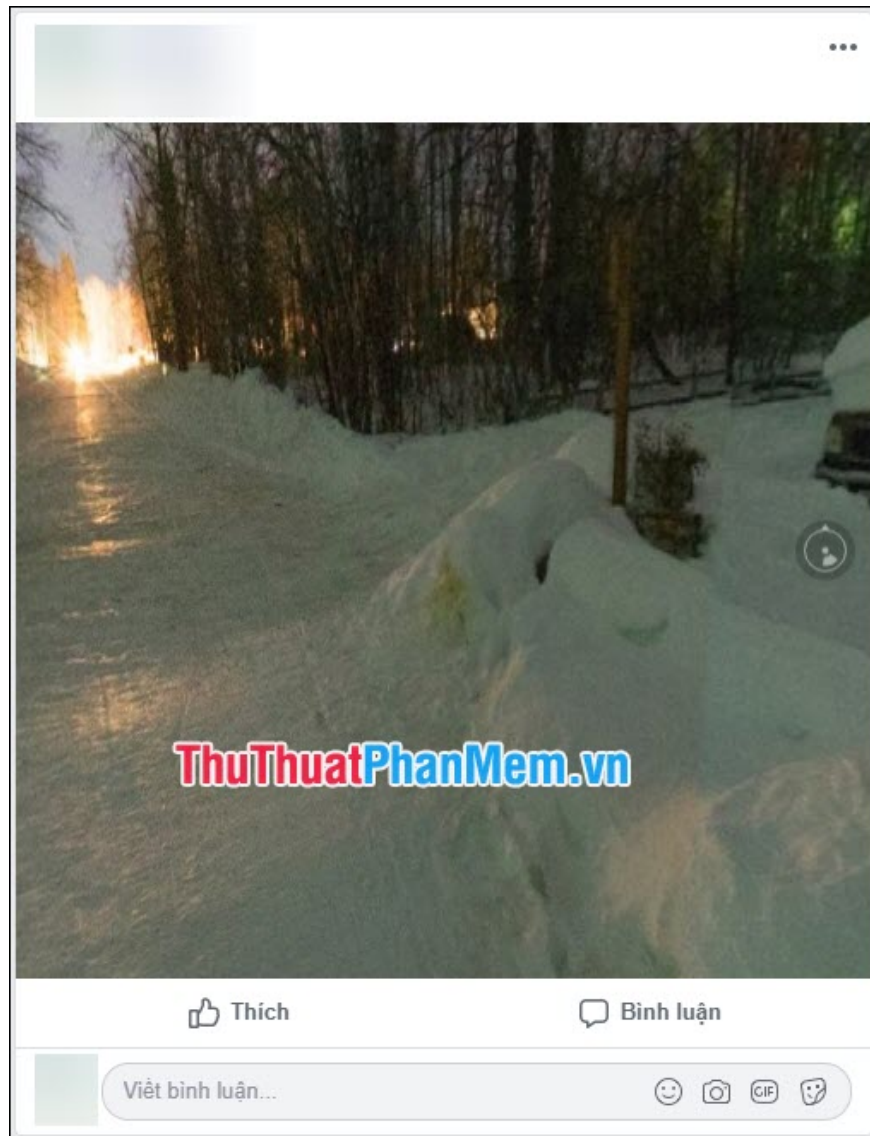

Step 4: Next, you proceed to upload that image to Facebook as usual.

Step 5: At this time, there will be notice that your photo is being uploaded in 360 degree mode.

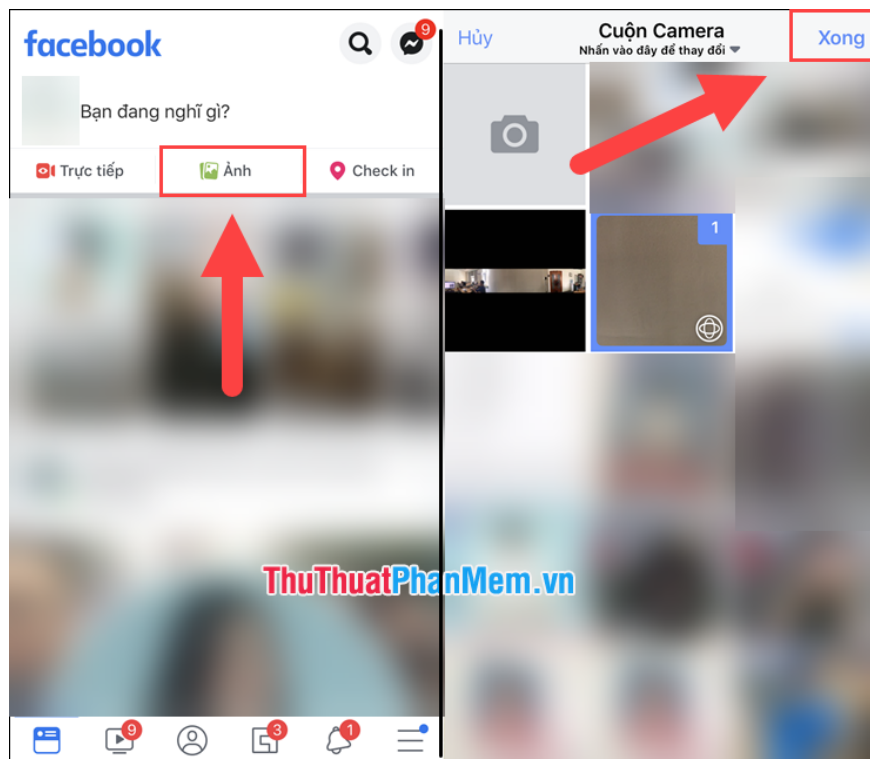

Finally, click **Share** and get the following result:

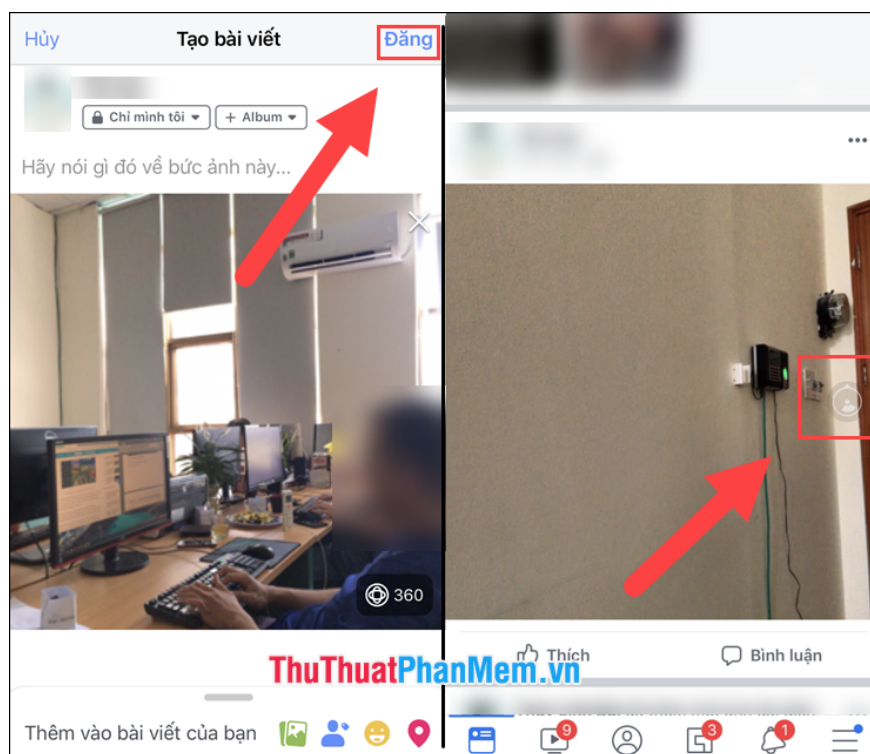

2. Post a 360-degree photo on your phone

On mobile devices, it is much simpler because the algorithm is optimized, all you need to do is select the Panorama / 360 degree image and upload it directly to Facebook to automatically recognize it.

Step 1: Go to the Facebook application and select **Photos** to post. Then you proceed to **select the image** you want to post, 360 photos will have a globe icon in the lower right corner of the image.

Step 2: Then your 360 photos will be uploaded to Facebook. You can share it with your friends to see. With 360-degree photos, Facebook currently only supports 1 image in an article. So if you want to post different 360-degree images, repeat the steps above.

Thus, Software Tips guide you how to post 360-degree photos to Facebook with your computer and phone the fastest and most beautiful. Good luck!
