

How to print multiple Word pages in one sheet of paper

By default, when printing, you print a page of Word documents on a sheet of paper. But for the needs and purposes of many people, to save or fit the purpose of using the prints, you want to print many pages of Word in a single sheet of paper.

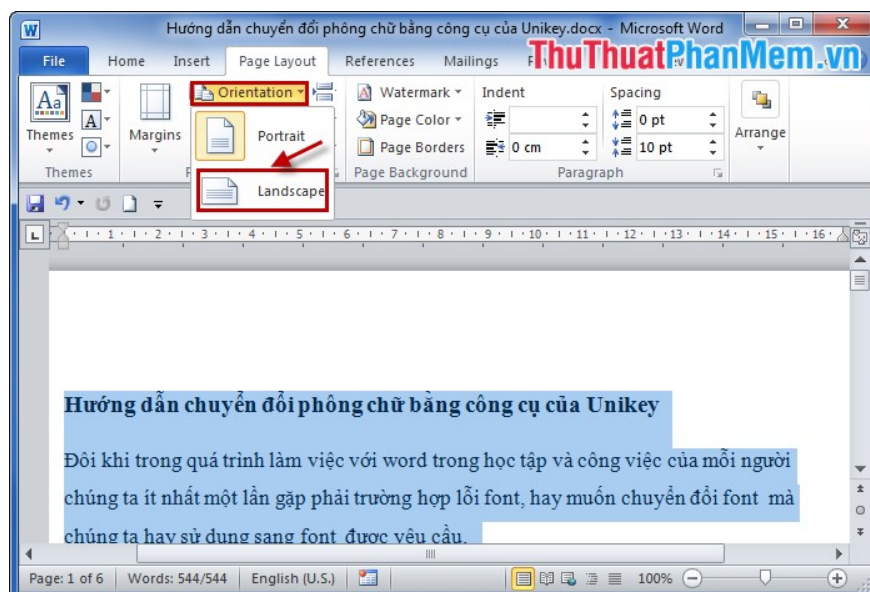

By default, when printing, you print a page of Word documents on a sheet of paper. But for the needs and purposes of many people, to save or fit the purpose of using the prints, you want to print many pages of Word in a single sheet of paper.

You can refer to how to print multiple pages on a sheet of paper in the following article. The article shows how to print multiple pages of a word in paper.

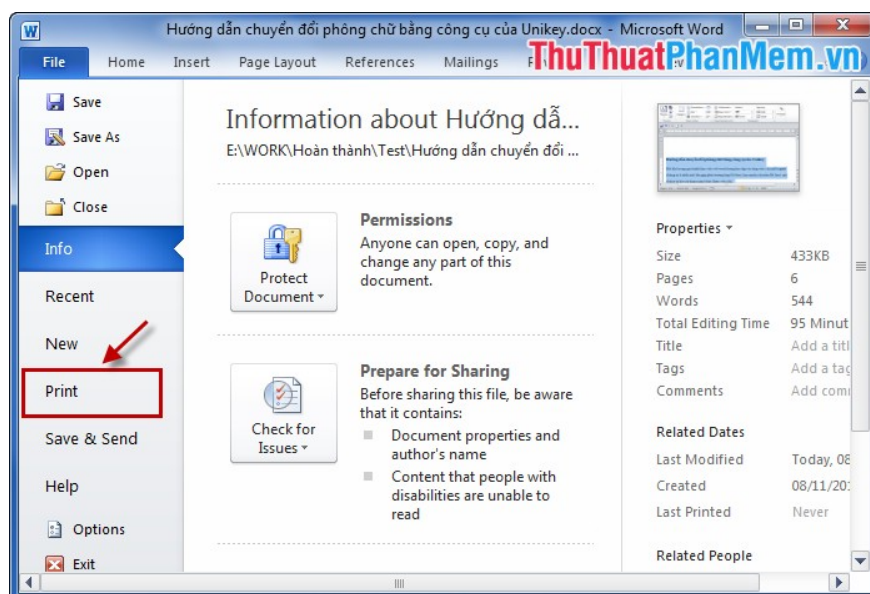

Step 1: Open the Word file you want to print. Go to **File Menu** and select **Open** .

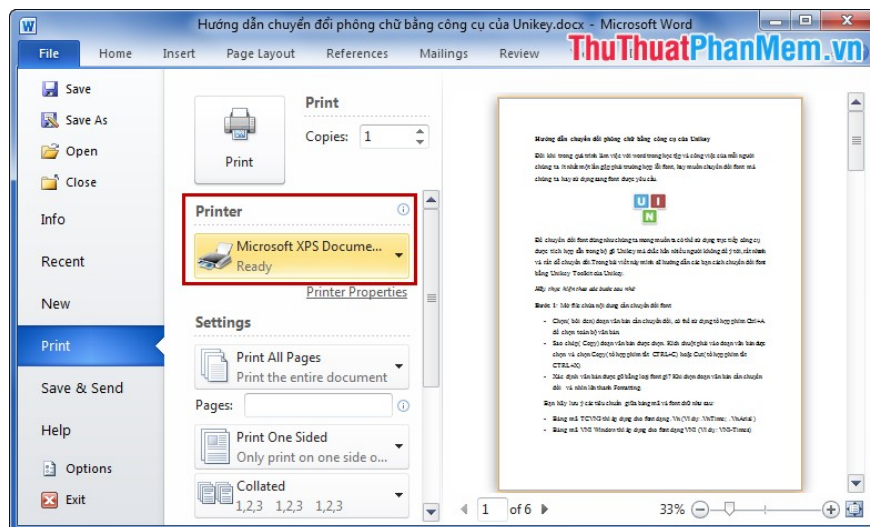

Step 2: You can re-align the text, if you want to print in horizontal format paper, select the paper format in **Page Layout -> Orientation -> Landscape** .

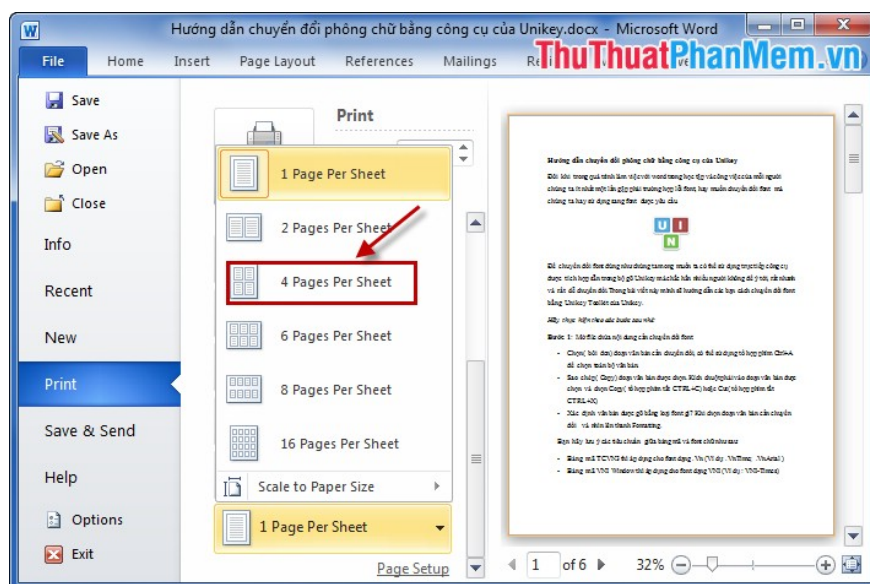

Step 3: Select **File** -> **Print** (or press **Ctrl + P**).

Step 4: In the **Print** dialog box, select the printer in the Printer section (in the article will select a virtual printer).

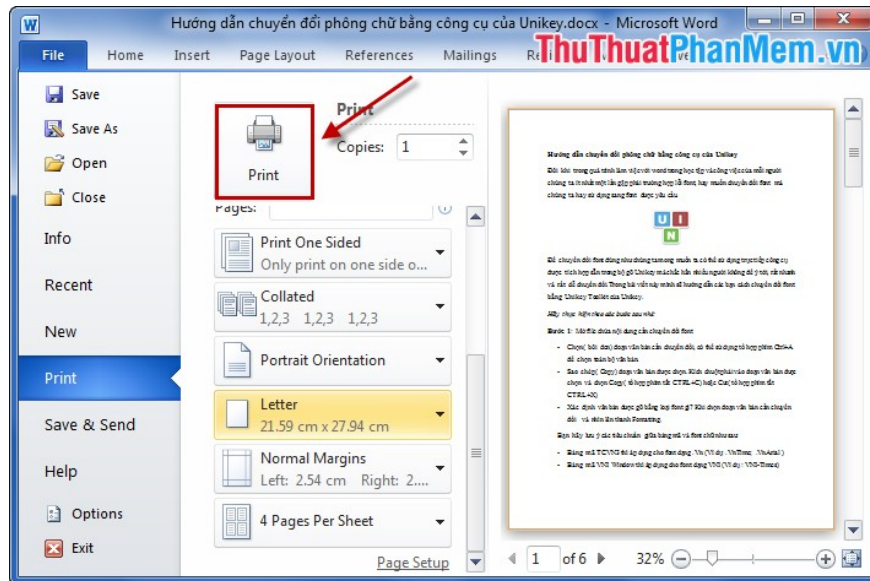

In the **Settings** section, find **1Page Per Sheet**, click on it and select the number of pages you want to print on a sheet.

Also you can customize some parameters when printing.

Step 5: Click **Print** to print.

And the result after printing will be the number of pages you choose above in a paper.
