

How to put multiple photos into a PDF file on Windows 10

Suppose you want to share multiple photos with friends. If you want to convert multiple image files to PDF, they can view and download all images in one go, this is the way.

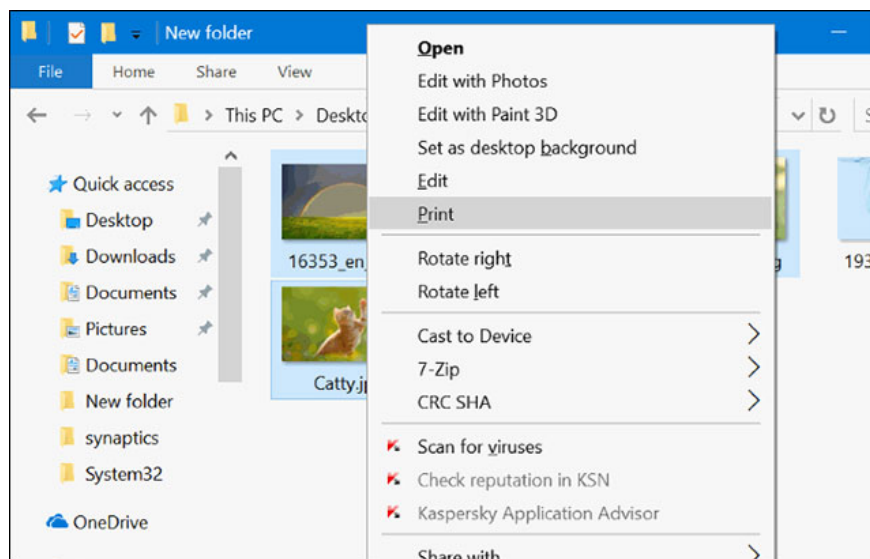

Suppose you want to share multiple photos with friends. If you want to convert multiple image files to PDF, they can view and download all images in one go, this is the way.

There are many software to convert many photos into PDF but instead of using them, right on Windows 10 also has a tool to help you do this. It is the Print to PDF feature, which helps batch transfer photos to PDF with just a few mouse clicks.

Combine multiple photos into one PDF file on Windows 10

Step 1: Open File Explorer and go to the folder containing the image you want to include in the PDF file.

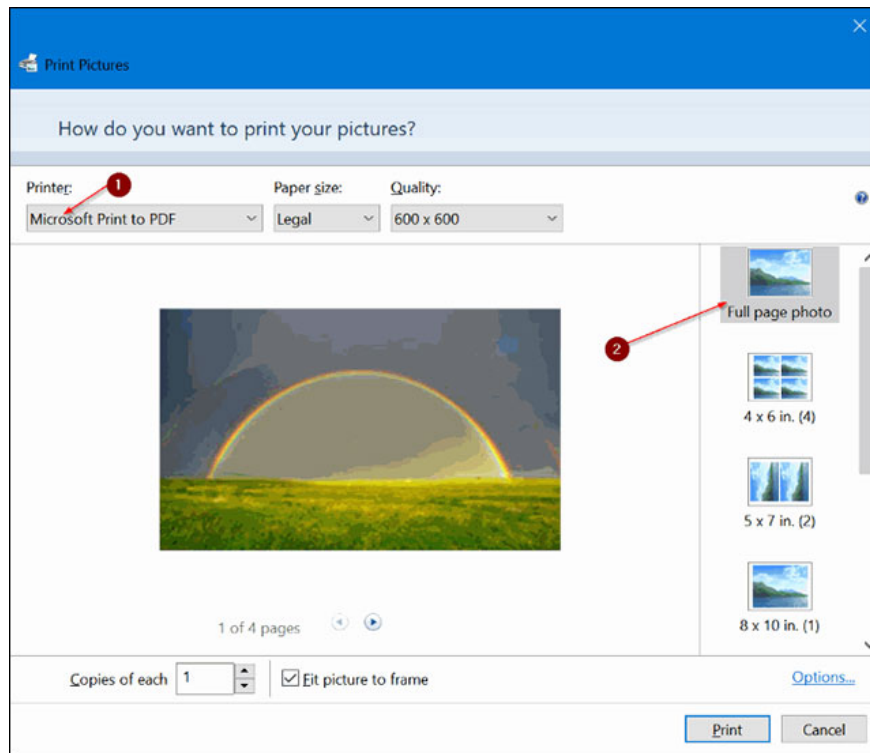

Step 2: Select all images you want to convert into PDF files. To select, hold down the **Ctrl** key while selecting.

Select Print after selecting the image

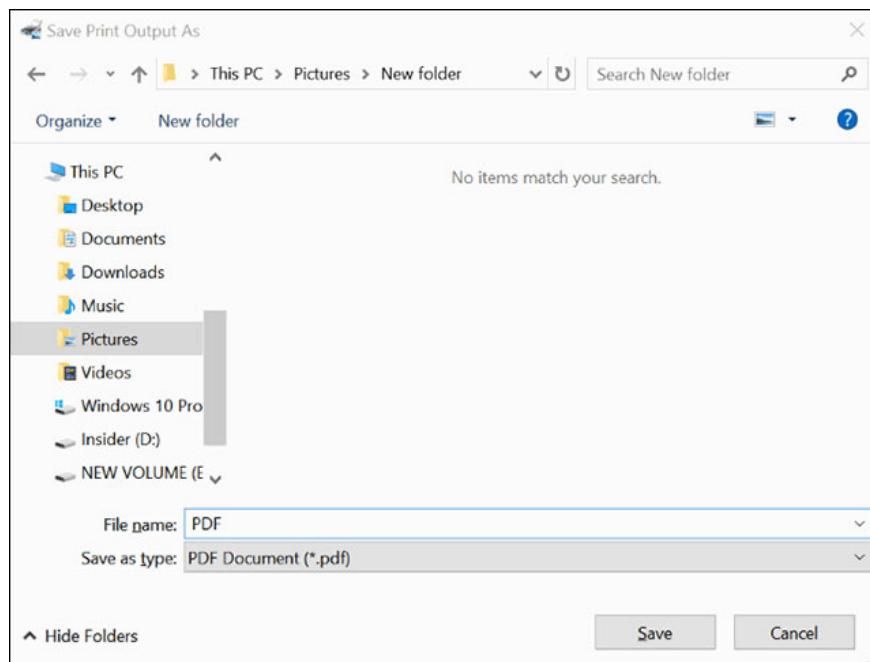

Step 3: Right-click and select **Print** to open the **Print Pictures** dialog box .

Step 4: Select Printer as **Microsoft Print to PDF** , then select the quality, the way (one page per page or multiple images on a PDF page).

Choose how to save the image as PDF

Step 5: Click Print to see the **Save Print Output As** dialog box.

Fill in the name and save the PDF file containing the image

Step 6: Type the name of the PDF file and select **Save** to save.

You can now view all your photos in a PDF file.
