

How to quickly access websites on Microsoft Edge phones

Microsoft Edge mobile browser also has the option to quickly access web pages, by adding a quick shortcut on the home page, similar to how you add a quick shortcut on the Microsoft Edge browser on a computer.

You will then have quick access to the websites you visit often, instead of having to enter the website manually or have to create bookmarks in the browser. The following article will guide you to quickly access websites on Microsoft Edge phones.

How to quickly access websites on Microsoft Edge iOS, Android

Quick start Guide

Add web bookmarks on Edge > Fill in website URL > Save web page.

Detailed instructions

Step 1:

At the interface on the Microsoft Edge browser on the phone, click **the plus icon** to add a new website. Display an interface for you **to enter the website name as well as enter the** website URL to access.

You fill in the information that the browser requires and then click Save below to save this web page. We continue to work with other sites that you want to access quickly.
