

How to quickly enlarge text on a Windows computer screen.

Do you find the text on your computer screen too small, making it difficult to work? Instead of changing the resolution, you can increase the font size in Windows for clearer display without affecting image quality.

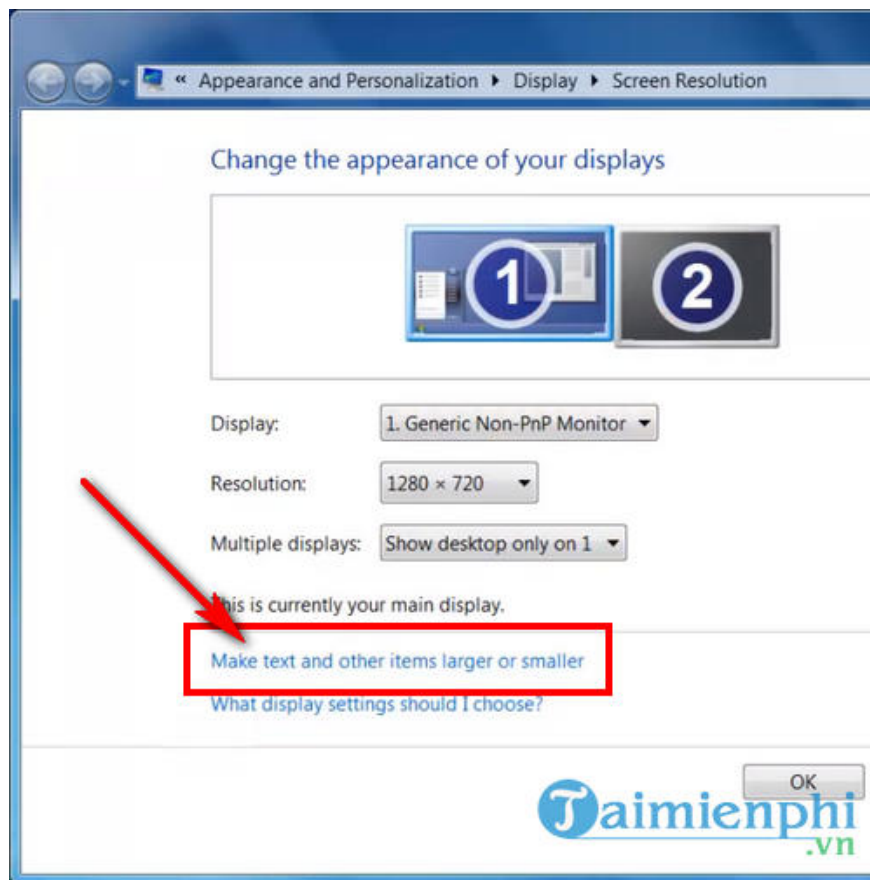

The instructions below will help you enlarge the text on your Windows computer in a simple way that anyone can easily follow.

How to increase font size on Windows 7

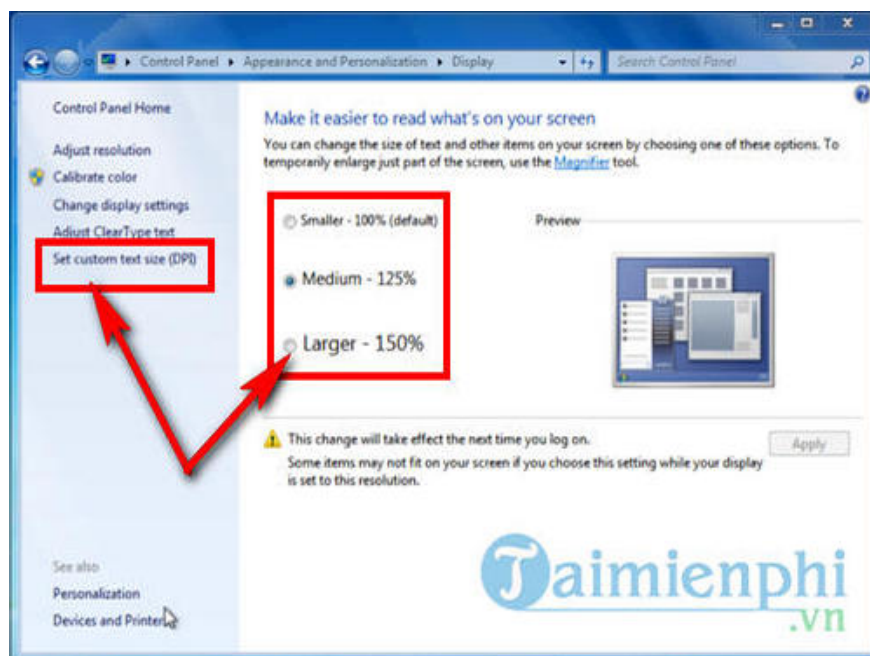

Step 1: Right-click on the desktop, then select **Screen Resolution**.

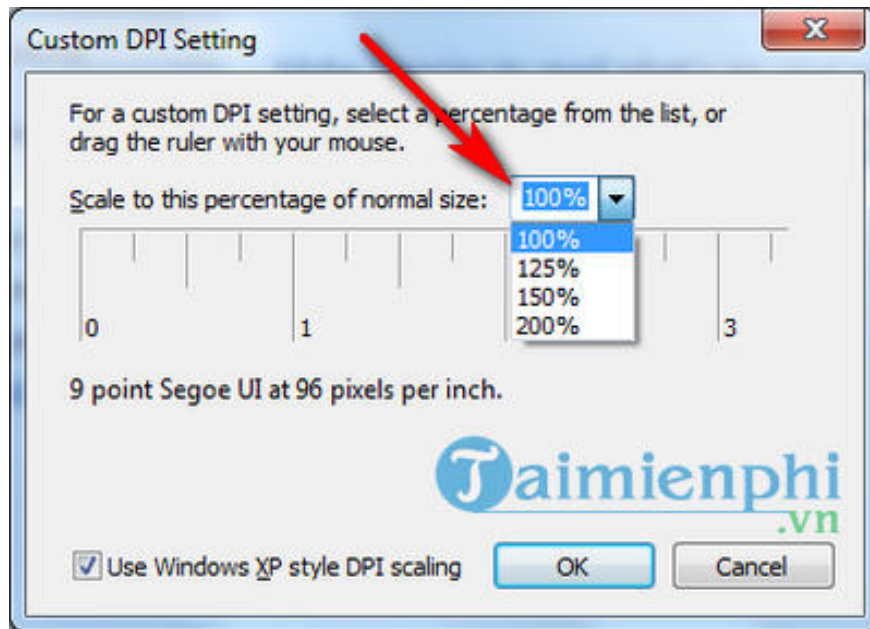

Step 2: In the Screen Resolution settings window, select the option " **Make text and other items larger or smaller**".

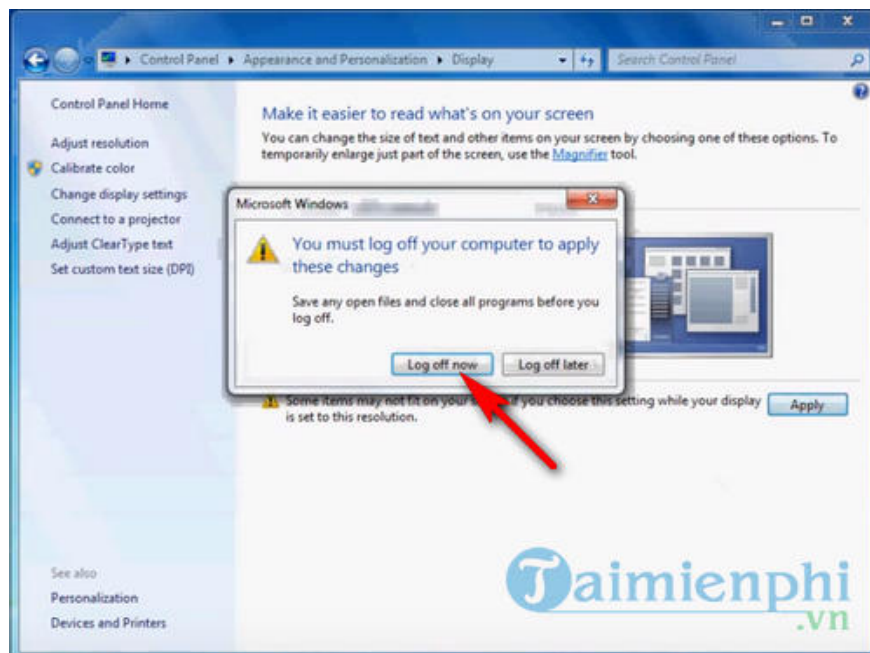

Step 3: Choose the font size from the system's presets (**Smaller** , **Medium** , and **Large**) or customize the font size on your computer by selecting " **Set custom text size (DPI)**".

Step 4: The Custom DPI Setting section offers several options for increasing the size. You can enter the desired size in the dropdown menu under " **Scale to this percentage of normal size**". After making your adjustments, click **OK** to save the settings.

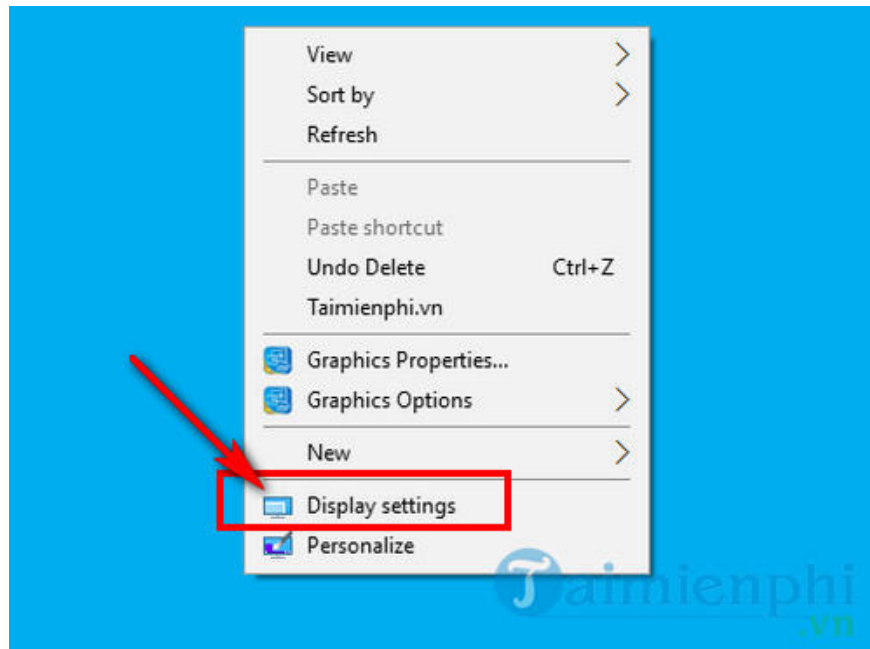

Step 5: After returning to the Display interface, click **Apply** to apply the settings, and you will need to select **Log off now** or **Log off later** for the computer to display a larger font size.

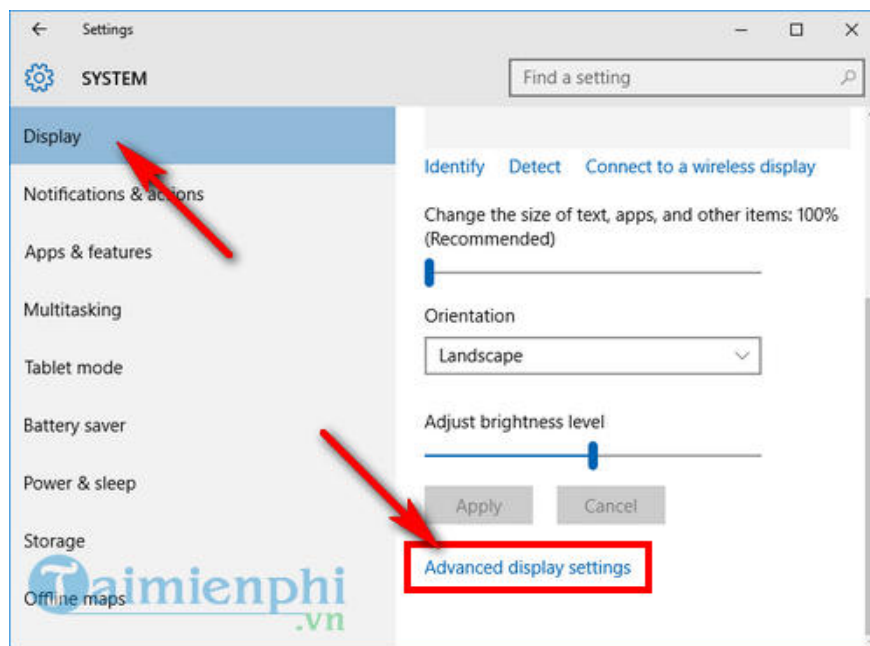

How to enlarge text on a Windows 10 computer

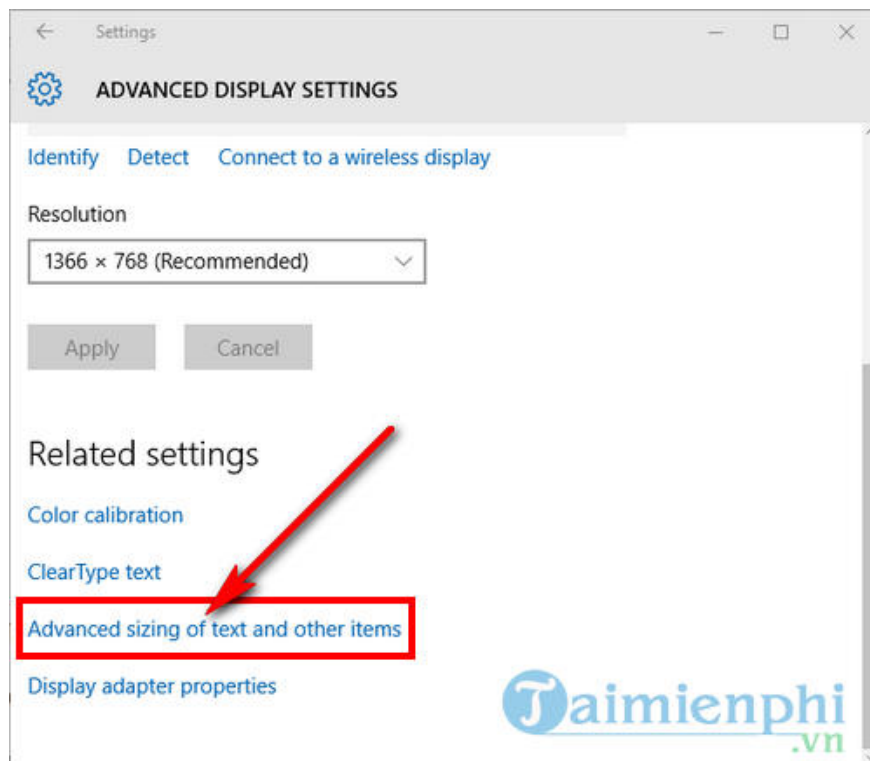

Step 1: Right-click on the desktop and select **Display settings**.

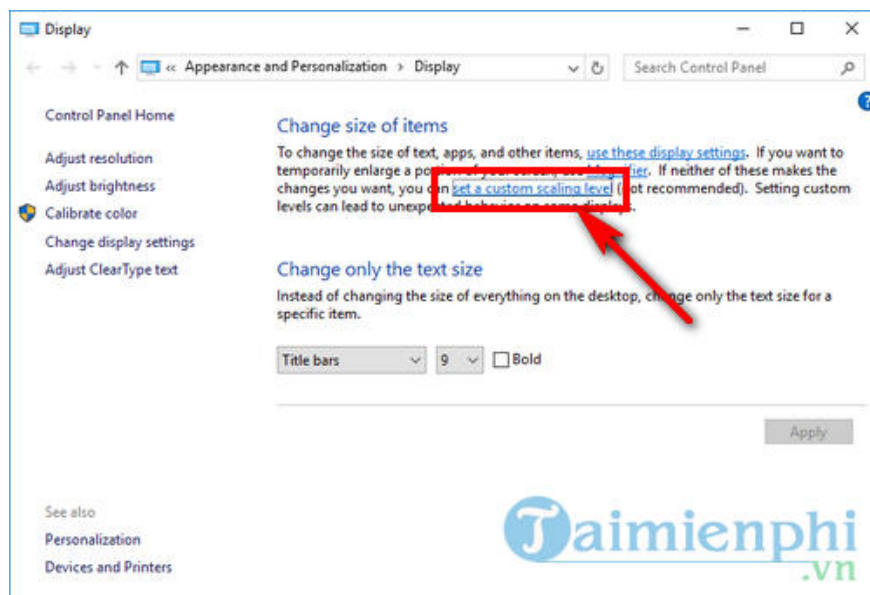

Step 2: On the Display tab, find the **Advanced display settings** option in the right-hand pane.

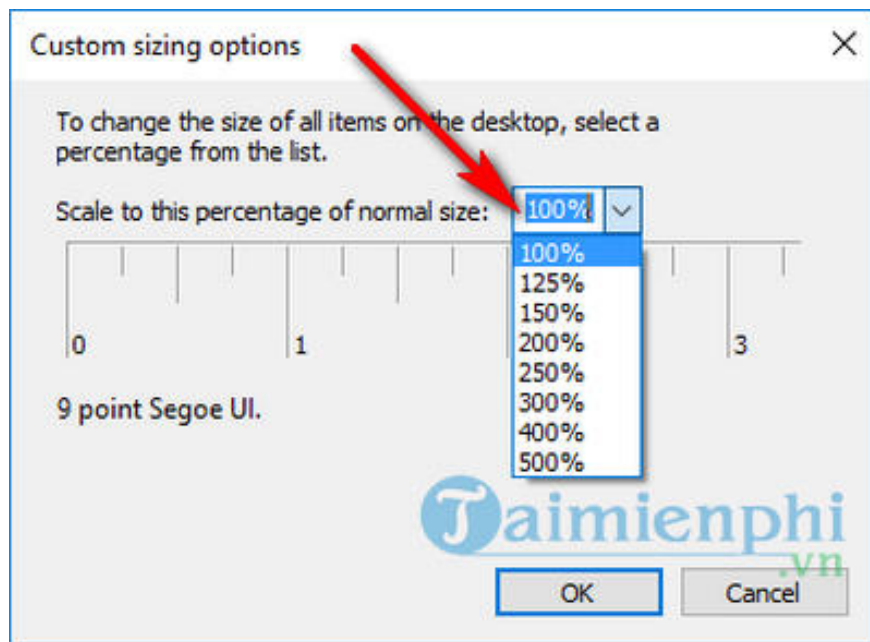

Step 3: Continue by selecting **Advanced sizing of text and other items** to adjust the font size on the Windows screen.

Step 4: Click on the " Set a custom scaling level" option and begin customizing the font size on your Windows computer screen.

Step 5: In the Custom sizing options window, you will have many different font size options to choose from. After setting your desired size, click **OK** to save the settings.

After applying the above methods, you can easily enlarge the text to improve visibility, making it easier to read content on your computer.
