

How to quickly open the data file with the Notepad editor

If you only handle common text content, without editing, the Notepad software available on your computer will be the first choice. And we can re-open the file with a quicker Notepad than the usual one.

If you often have to edit documents and documents, you will definitely think of Microsoft Word software. However, if the need for text is not much, there is no need to edit the Notepad software right on the computer is the choice of many people. And if you use Notepad regularly, why not try opening the Notepad with Notepad right away when you click the right-click menu file? In this article, we will show you how to add Open With Notepad when you right click to open the file.

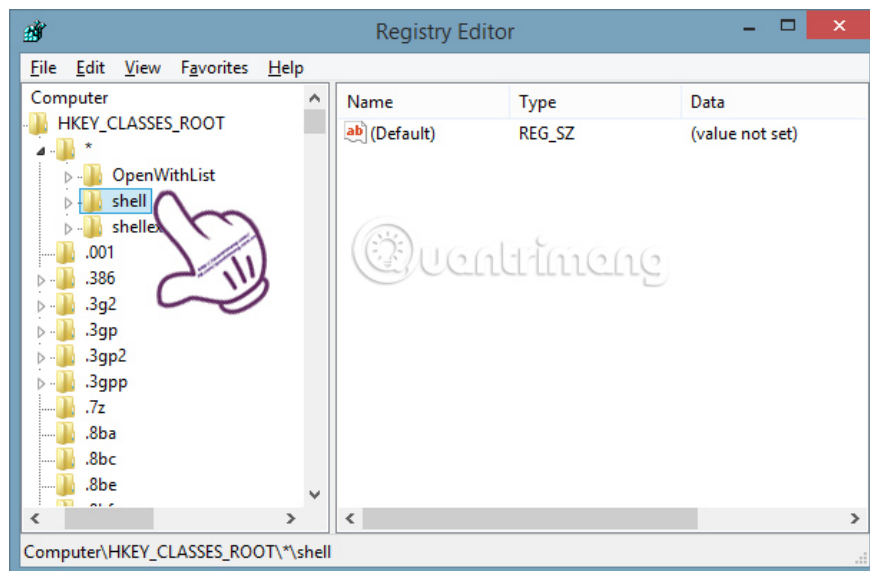

Step 1:

First of all, press the **Windows + R** key combination to open the **Run** window. Then enter the **regedit** keyword and click **OK** to access the Registry Editor.

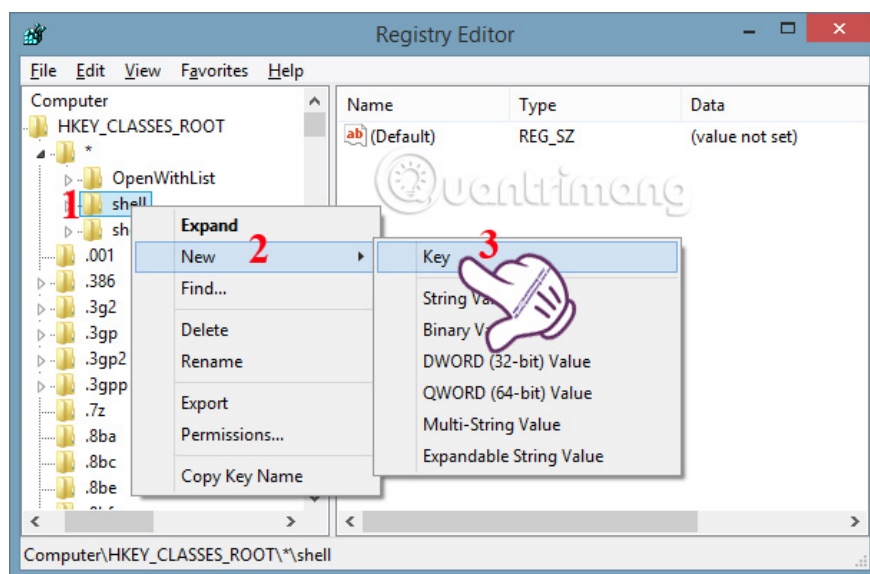

Step 2:

In the **Registry Editor** interface, open the folder under the **HKEY_CLASSES_ROOT** path > * > **shell** .

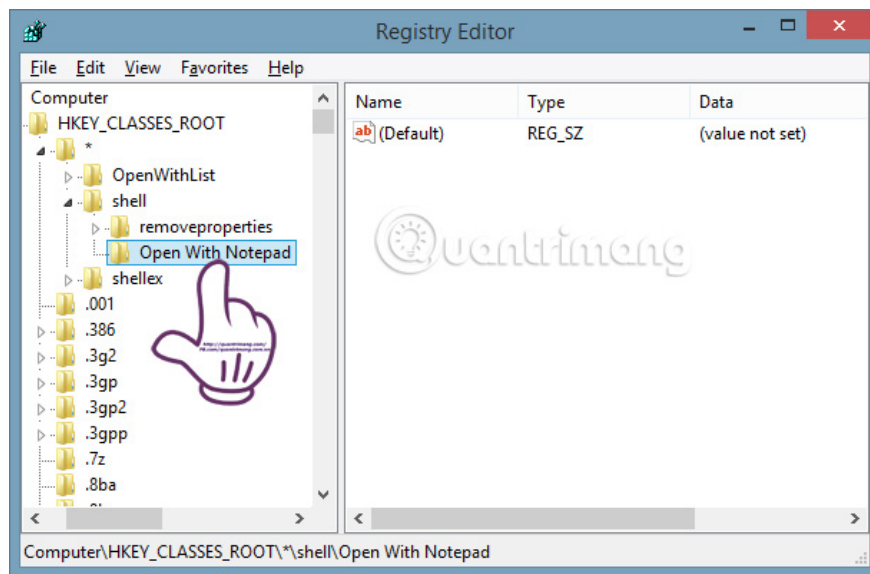

Step 3:

We right- **click** on the **shell** folder and select **New** and select **Key** .

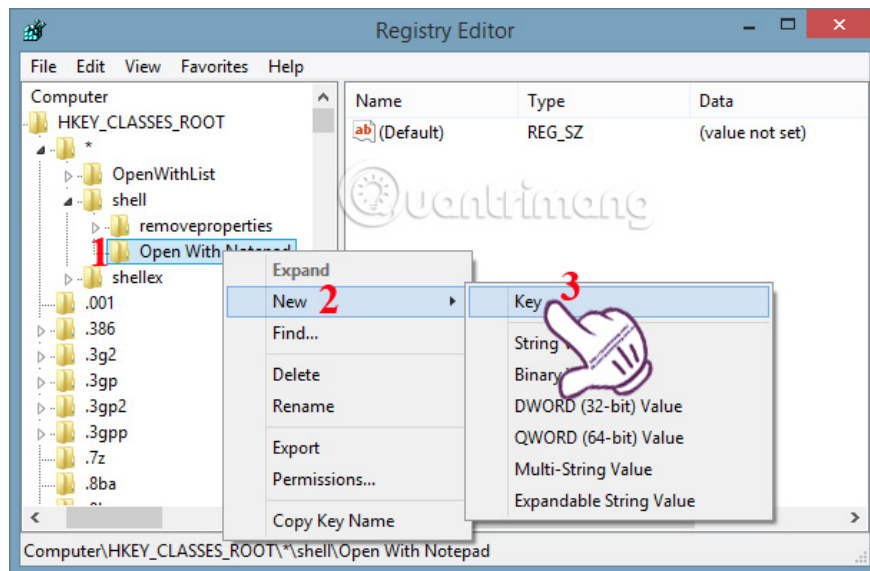

Step 4:

Name this new folder **Open With Notepad** .

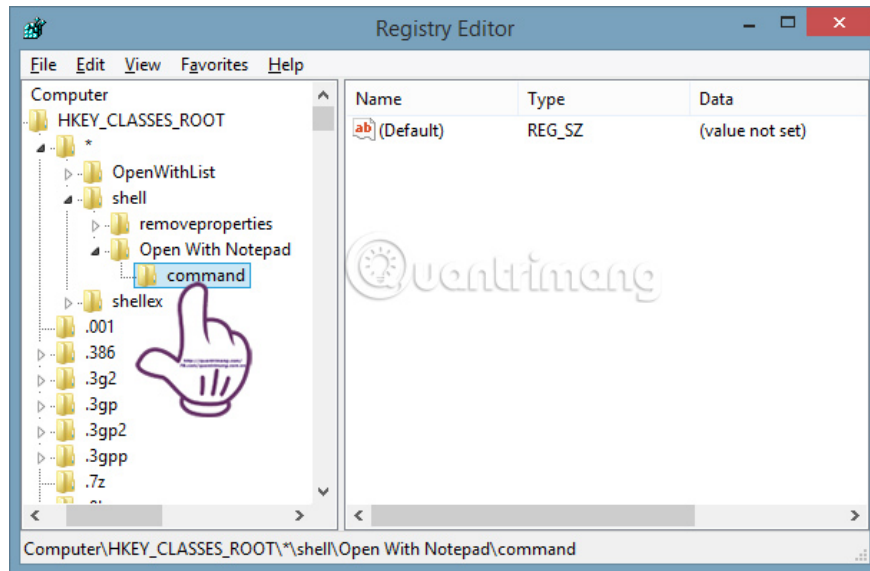

Step 5:

Also at that interface, **right-** click **Open With Notepad** and select **New** and finally select **Key** .

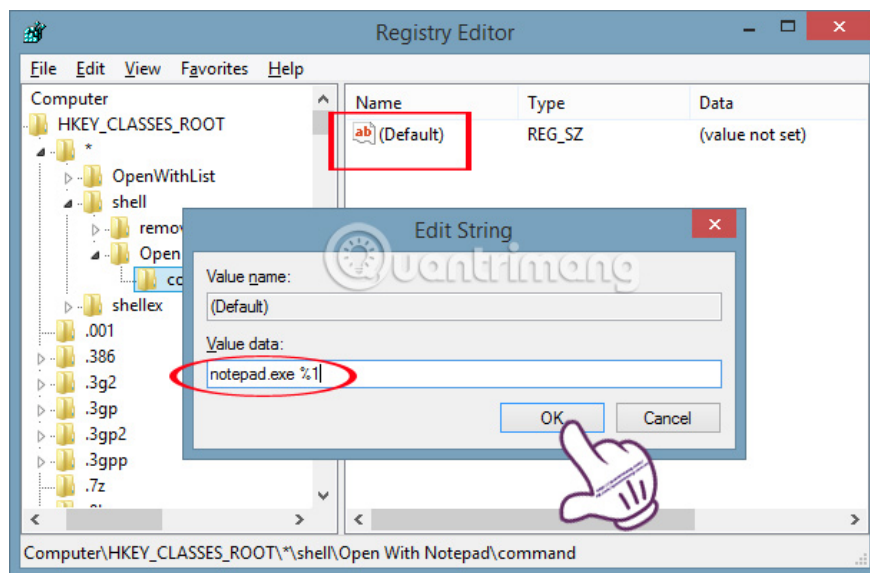

Step 6:

We will name the **command** directory.

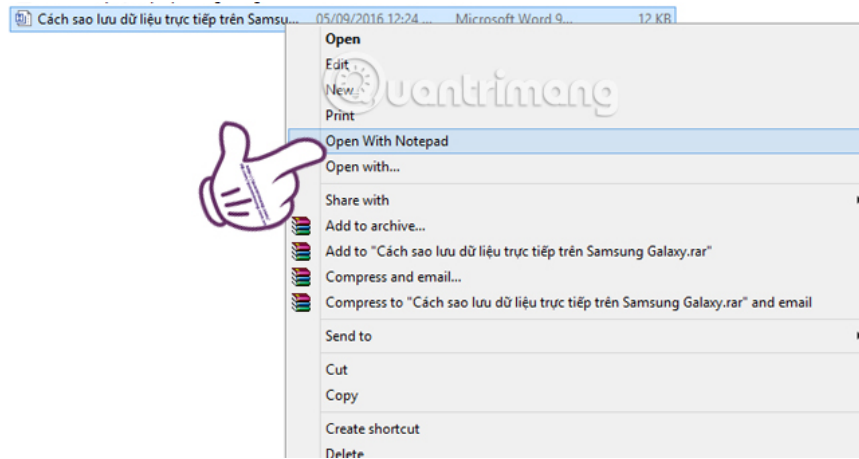

Step 7:

In the **Default** file on the right, you **left click** and enter **Notepad.Exe% 1** in **Value data** as shown below, then click **OK** to save the changes.

Now we try to open the text file or document and right-click will see Open With Notepad appear.

Thus, we can quickly open the document with Notepad immediately when clicking on the right-click menu with the command Open With Notepad. The operations are simple and fast.

Refer to the following articles:

1. Fix the display error and cannot save Vietnamese in Notepad
1. Convert OpenOffice ODT text format into Microsoft Word DOC
1. Remove PDF file password in 3 steps
