How to quickly open web pages from new tabs on Chrome

1. Download the Quickey Chrome utility

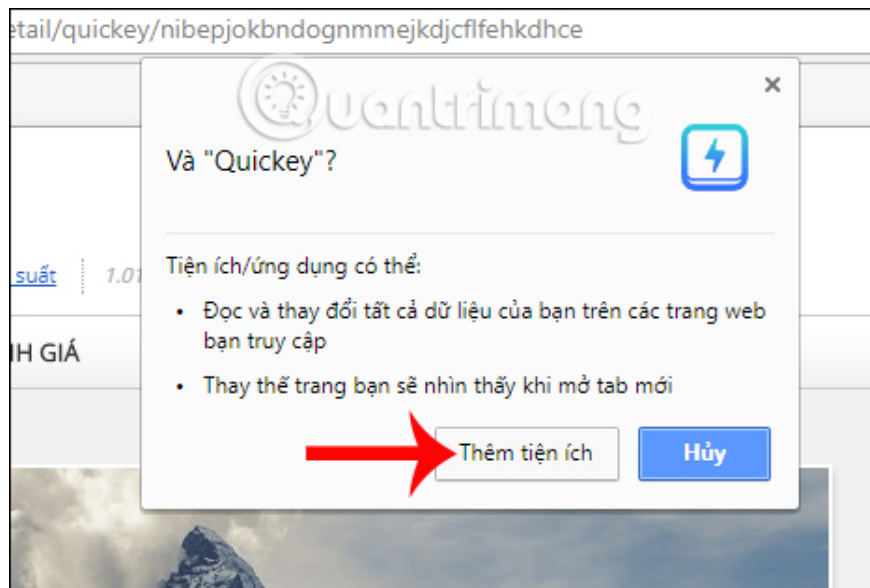

Step 1:

First, click on the link above to access the utility installation link. In the first interface click on **the Add to Chrome button** .

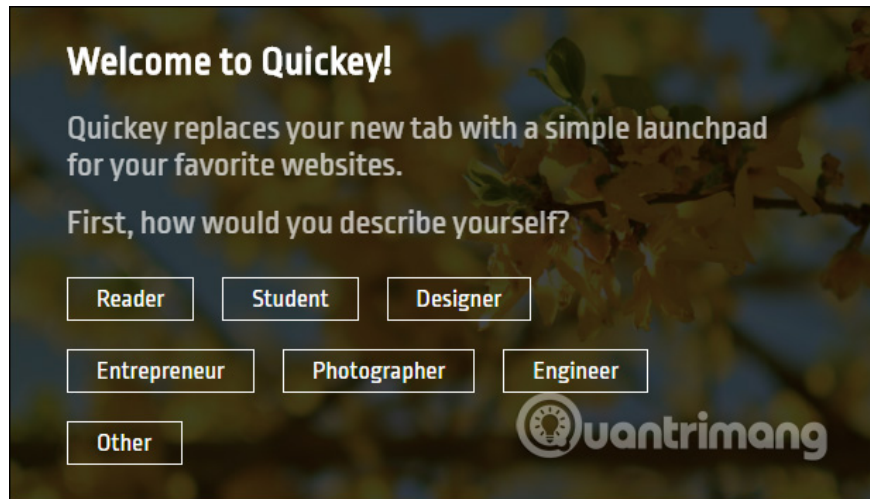

Step 2:

Next, click on the **Add add** button to install Quickey on the browser.

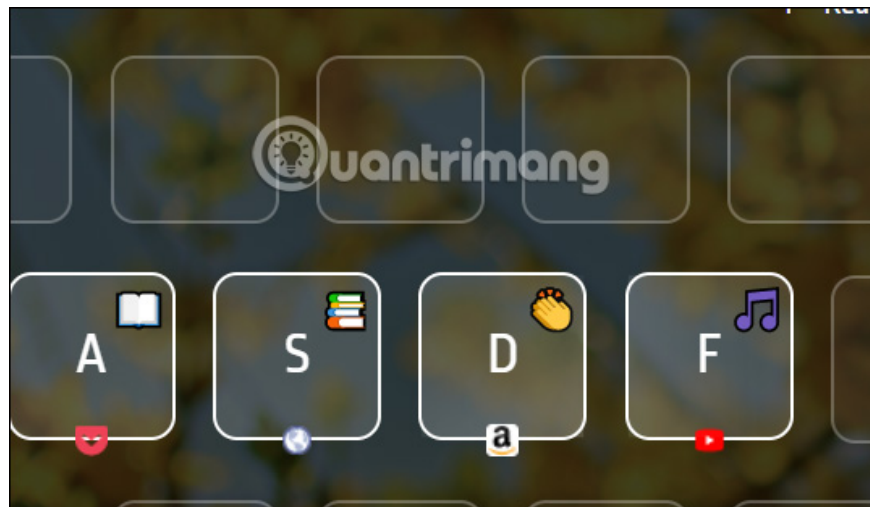

Step 3:

Immediately the browser will be opened 1 new tab with the interface is the theme containing the website is set up shortcuts as the theme Reader, Designer, Egeineer.

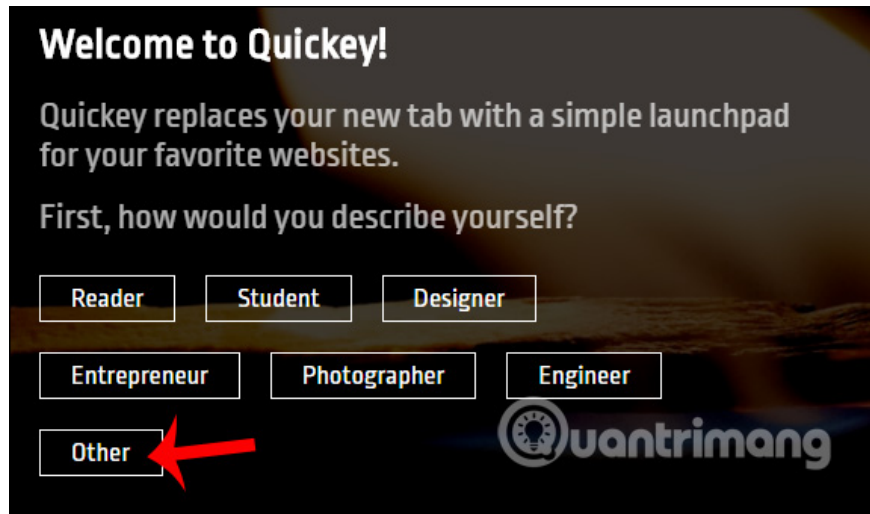

When you try to access a topic, you will see the pre-set shortcuts available with the keyboard interface as shown.

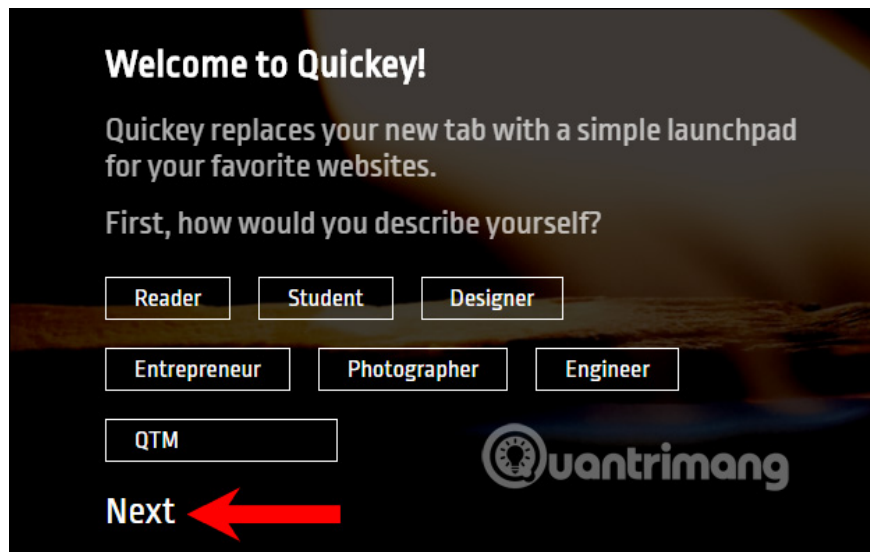

Step 4:

Go back to Quickey's interface. To create a web page theme that contains your own shortcuts, click **the Other button** .

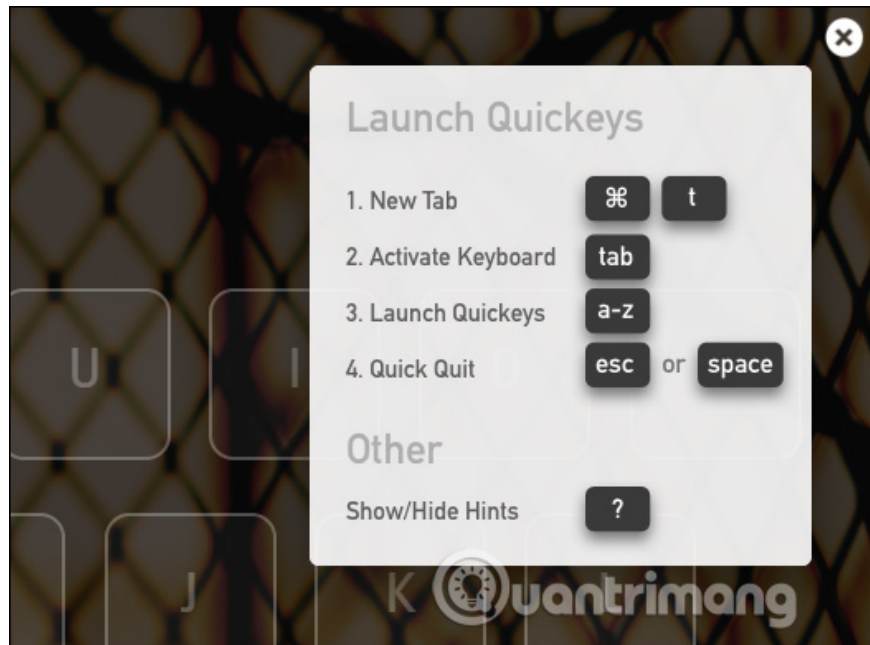

Then enter the topic name for the internal sites and **click Next** .

Step 5:

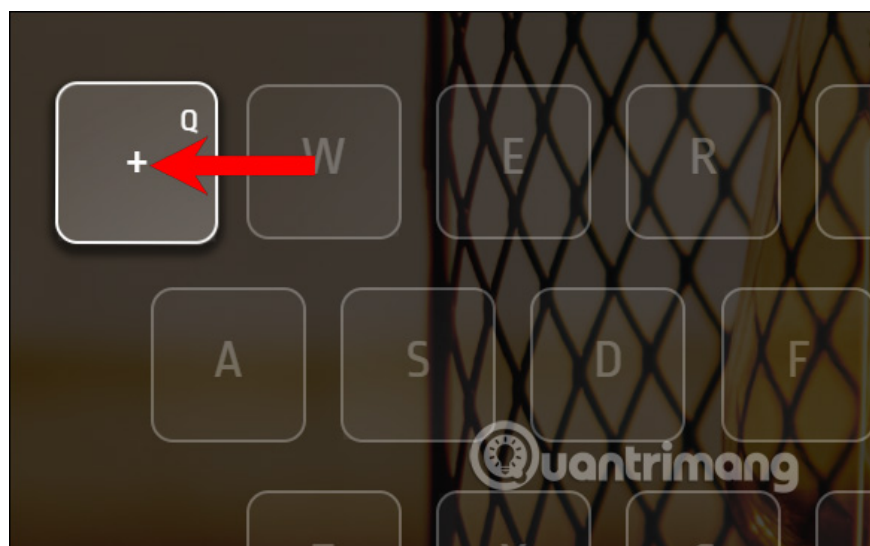

Next appear web page characters with the keys A, S, D, and F available. **Click the 4-character key to turn on the quick opening of the web page on the new tab.** A new tab is opened with a new interface, with shortcuts to be used on Quickey. Shortcuts include:

1. Open a new tab: Windows + T or Command + T.
2. Activate the utility keyboard: Tab.
3. Open website: Keys from A - Z.
4. Close the keyboard interface tab: Esc or Space.
5. Turn on the keyboard shortcut: sign? or press the keyboard icon above the right corner.

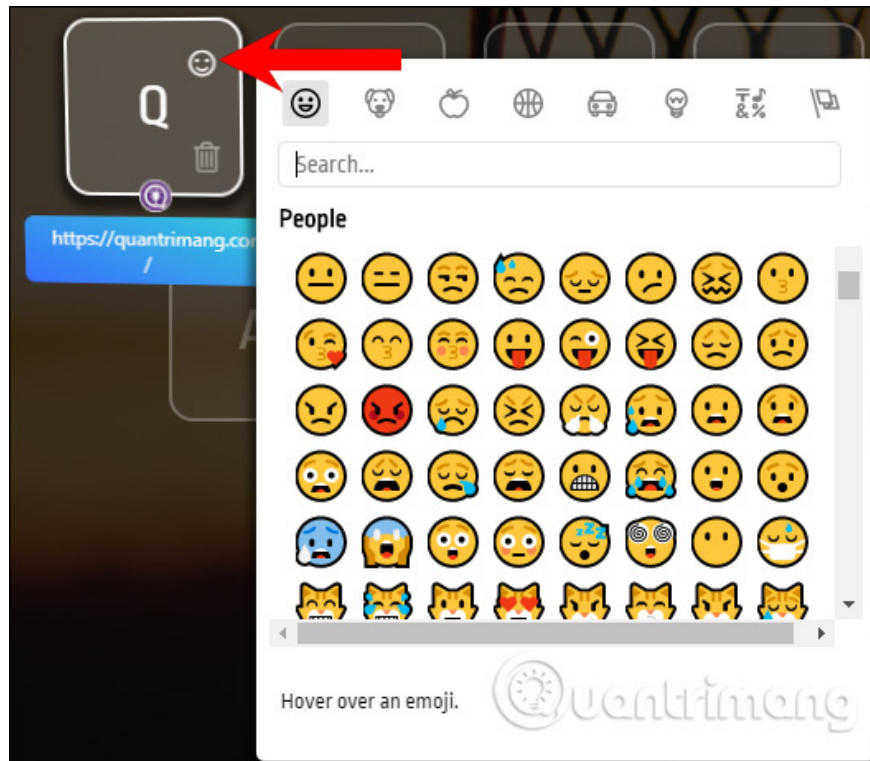

Step 6:

Now try to assign a shortcut to a web page. Click **the plus symbol** in the key character.

Then, **copy the website URL** into the green frame and **press Enter** to save it. Next click on **the smiley** to select the icon for the website. There are a lot of icons to choose from.

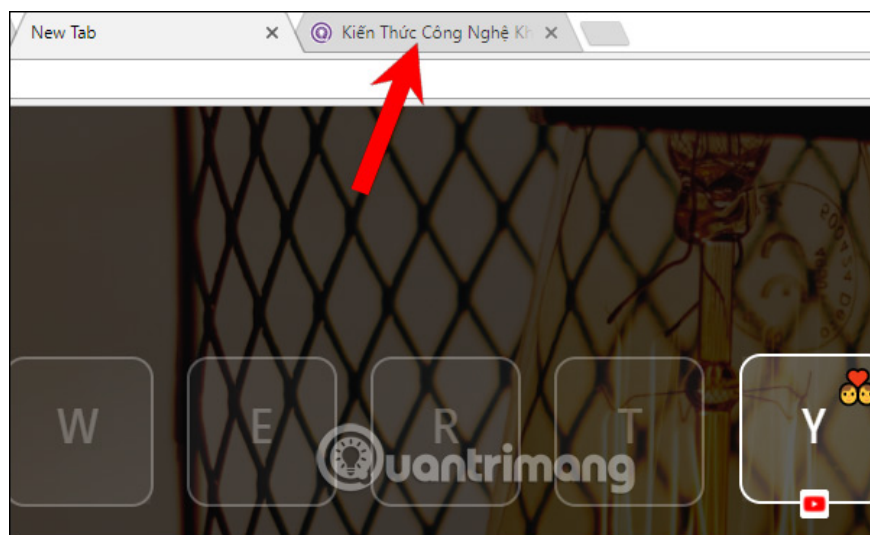

If you want to change to another website click the trash can icon.

Step 7:

We continue to work with other websites. Now try pressing the key character assigned to the site. Immediately the website will be opened quickly in a new tab on Chrome.

In case you turn off Chrome and want to restart the set keyboard mode, press Tab. Immediately the list of established keyboards will appear.

The Quickey utility provides a quick opening of a tabbed web page in the Chrome browser, via the shortcut you have set up. The main interface will be a shortened keyboard, accompanied by a constantly changing wallpaper according to the modes, creating a new look on the browser.

I wish you all success!
