

How to quickly search on iPhone with Spotlight

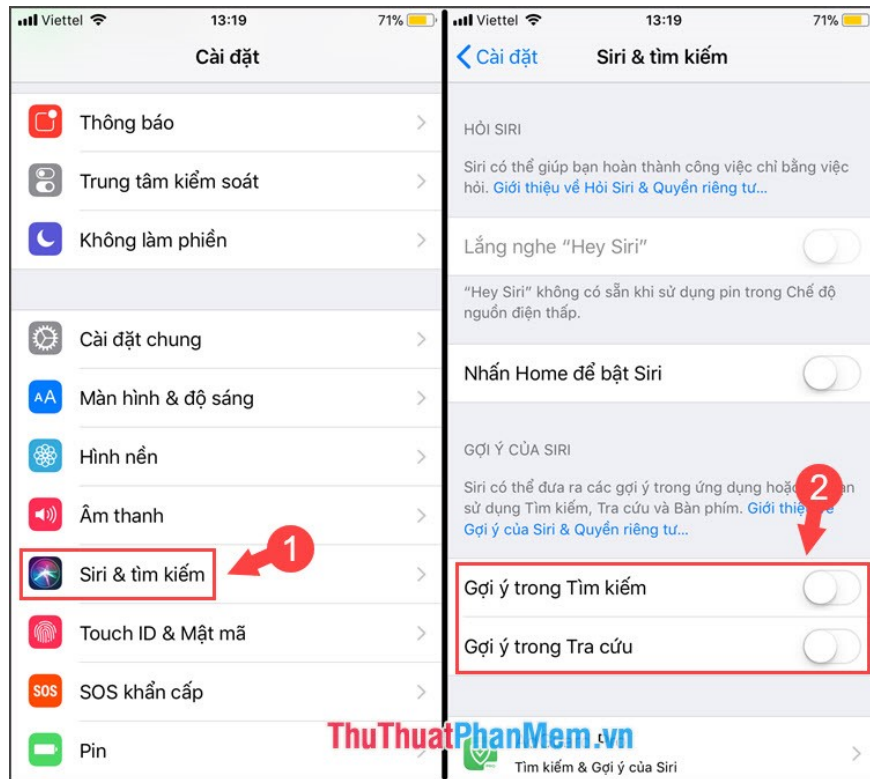

The Spotlight feature on iPhone makes it possible to quickly search for content or settings on your device without knowing where it is located on your phone. Invite you to track how to quickly search on iPhone with Spotlight in the article below.

The Spotlight feature on iPhone makes it possible to quickly search for content or settings on your device without knowing where it is located on your phone. Invite you to track how to quickly search on iPhone with Spotlight in the article below.

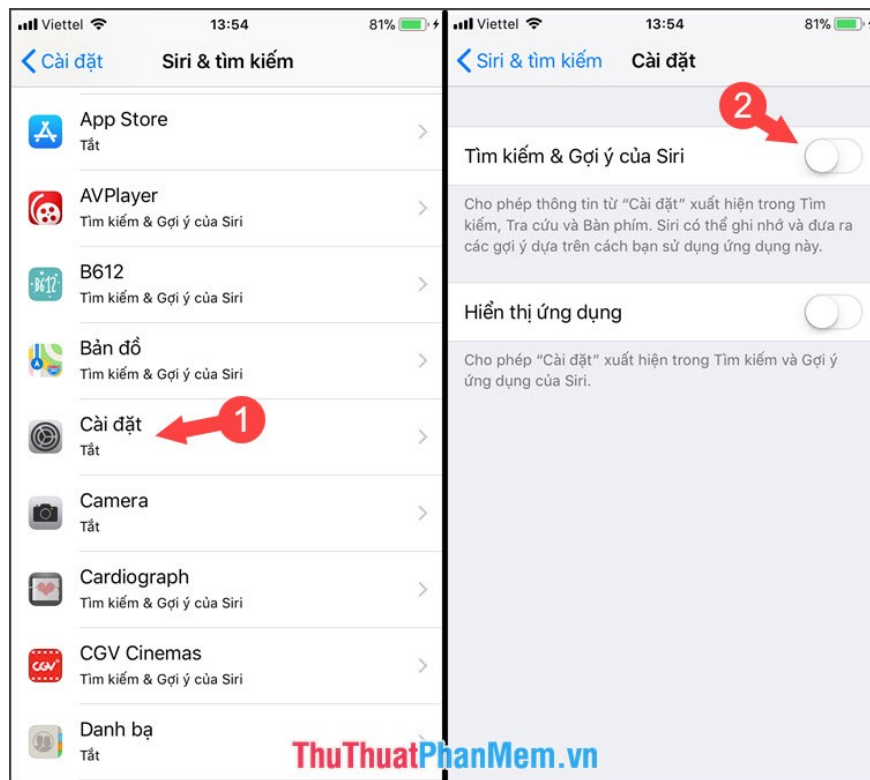

From iOS 11 and later, **Spotlight** search is integrated with **Siri** . To enable this feature, we will do the following:

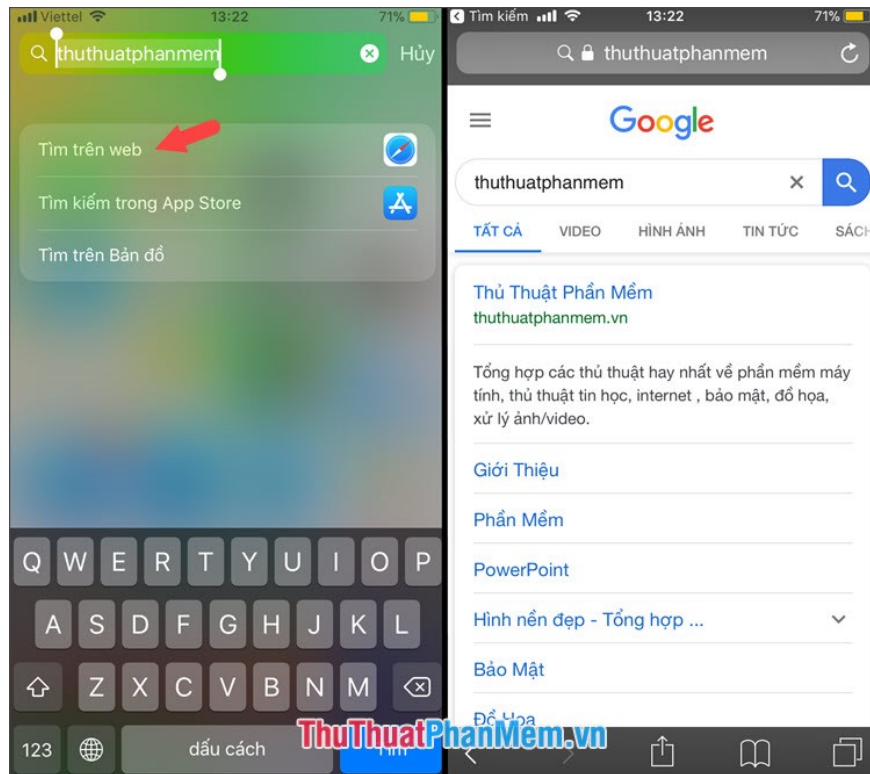

Step 1: Go to Settings => Siri & search => Set the switch to turn on with two items **Suggestions in search , **Suggestions in search** .**

Step 2: You turn on all the items you use often in the section **Siri & Search** . For example, if we want to quickly search for settings in Spotlight, we can touch **Settings** (1) => Set the switch to turn on **Search & Suggestions of Siri** (2) .

Step 3: We start testing the quick search feature with **Spotlight** by touching any application icon in the main menu and swiping down or left until the **Spotlight** search appears. We try searching for " *TipsMake* " in **Spotlight** search and give search suggestions on **Safari** , **App Store** , **Map** . Click on **Search on the web** and **Safari** browser will automatically show you.

Or we can search the **Settings** on **Spotlight** , for example, search for " *brightness* " , we will have the results as shown below.

By searching quickly on iPhone with Spotlight, we can simplify installation steps or quickly find information on the web as quickly as possible. Good luck!
