

# How to quickly take a screenshot on Samsung A12, A13, and A23

The Samsung A12, A13, and A23 phones are currently among the most popular models due to their affordable price and attractive features. One of the standout features is the screenshot function, which allows users to save important information and documents from their screen.

With the screenshot feature on Samsung A12, A13, and A23, users don't need supporting applications to save ongoing activities and important information on the screen and share them with other users via social media.

## Guide to easily taking screenshots on Samsung A12, A13, and A23

### *How to take a screenshot on Samsung A12, A13, A23 without using an app.*

#### *1. Use the physical screenshot button on Samsung A12, A13, and A23 devices.*

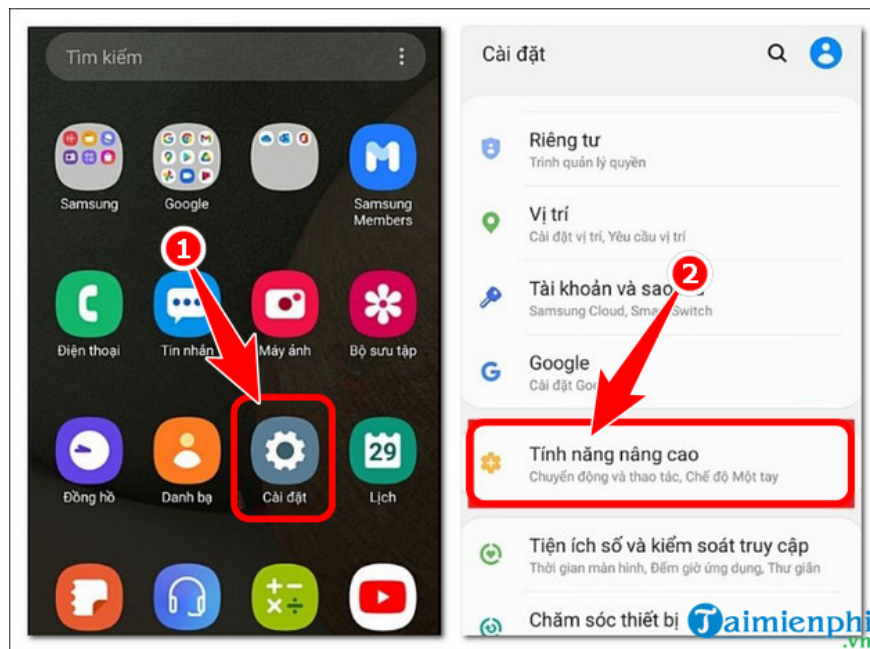

This method is quite simple and used on many different phone models, especially the Samsung A12, A13, and A23. You just need to press both the **Power button** and the **Volume Down button** simultaneously. When the screen flashes, it means you have successfully taken a screenshot.

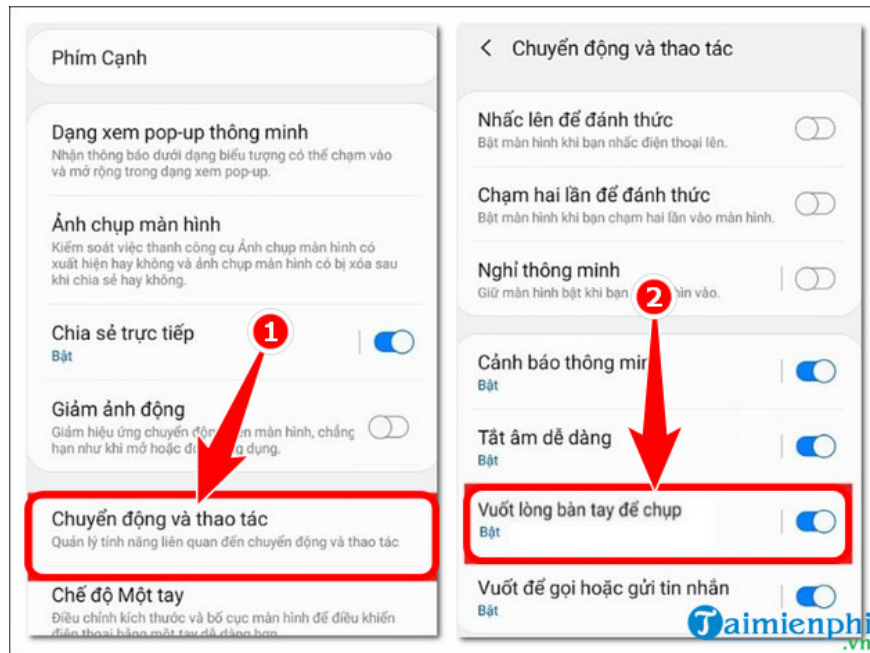

## 2. Take a screenshot on Samsung A12, A13, and A23 using the swipe gesture.

Another way to take a screenshot on a Samsung A12, A13, or A23 phone is to use the palm swipe gesture. However, this method requires you to activate this feature first.

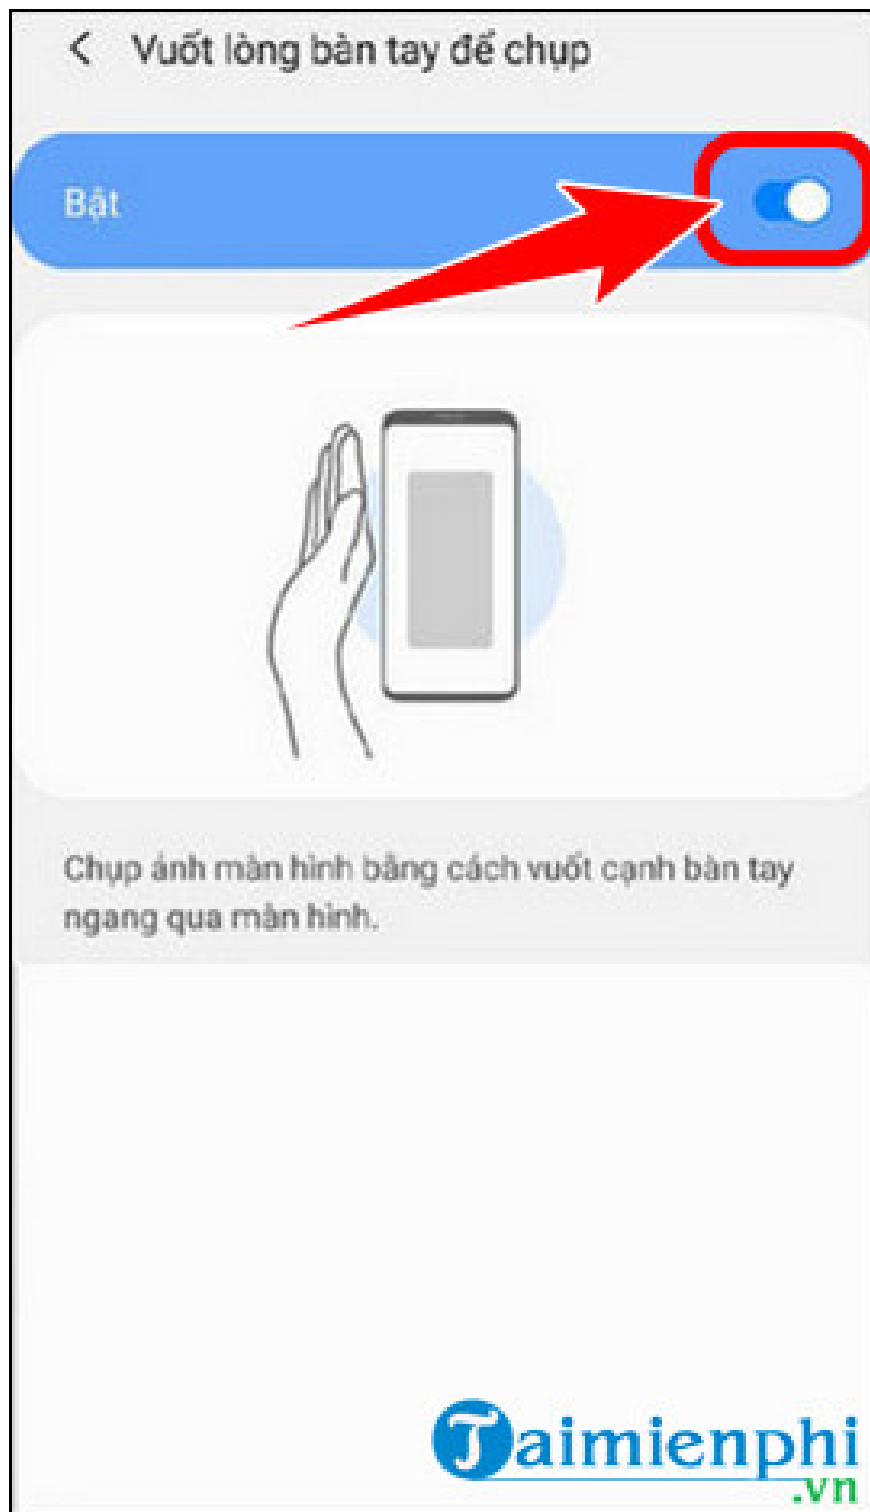

*Step 1:* Click to open **Settings** => **Advanced features** .

*Step 2:* Tap **Convert and manipulate** => select **Palm swipe to take a picture** .

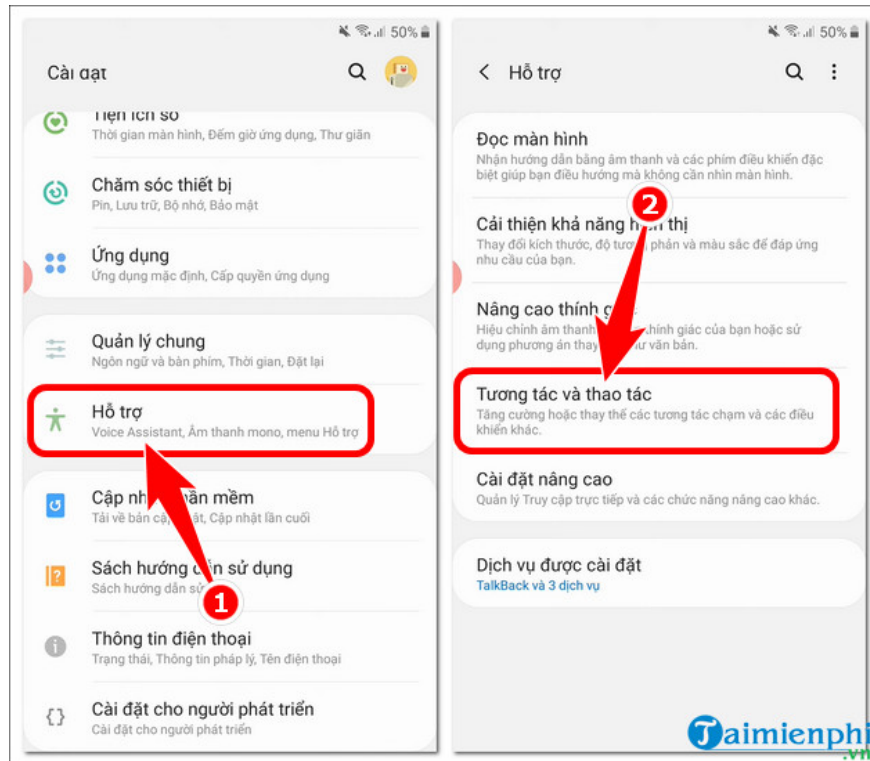

*Step 3: Toggle the "Swipe palm to take a picture" button .*

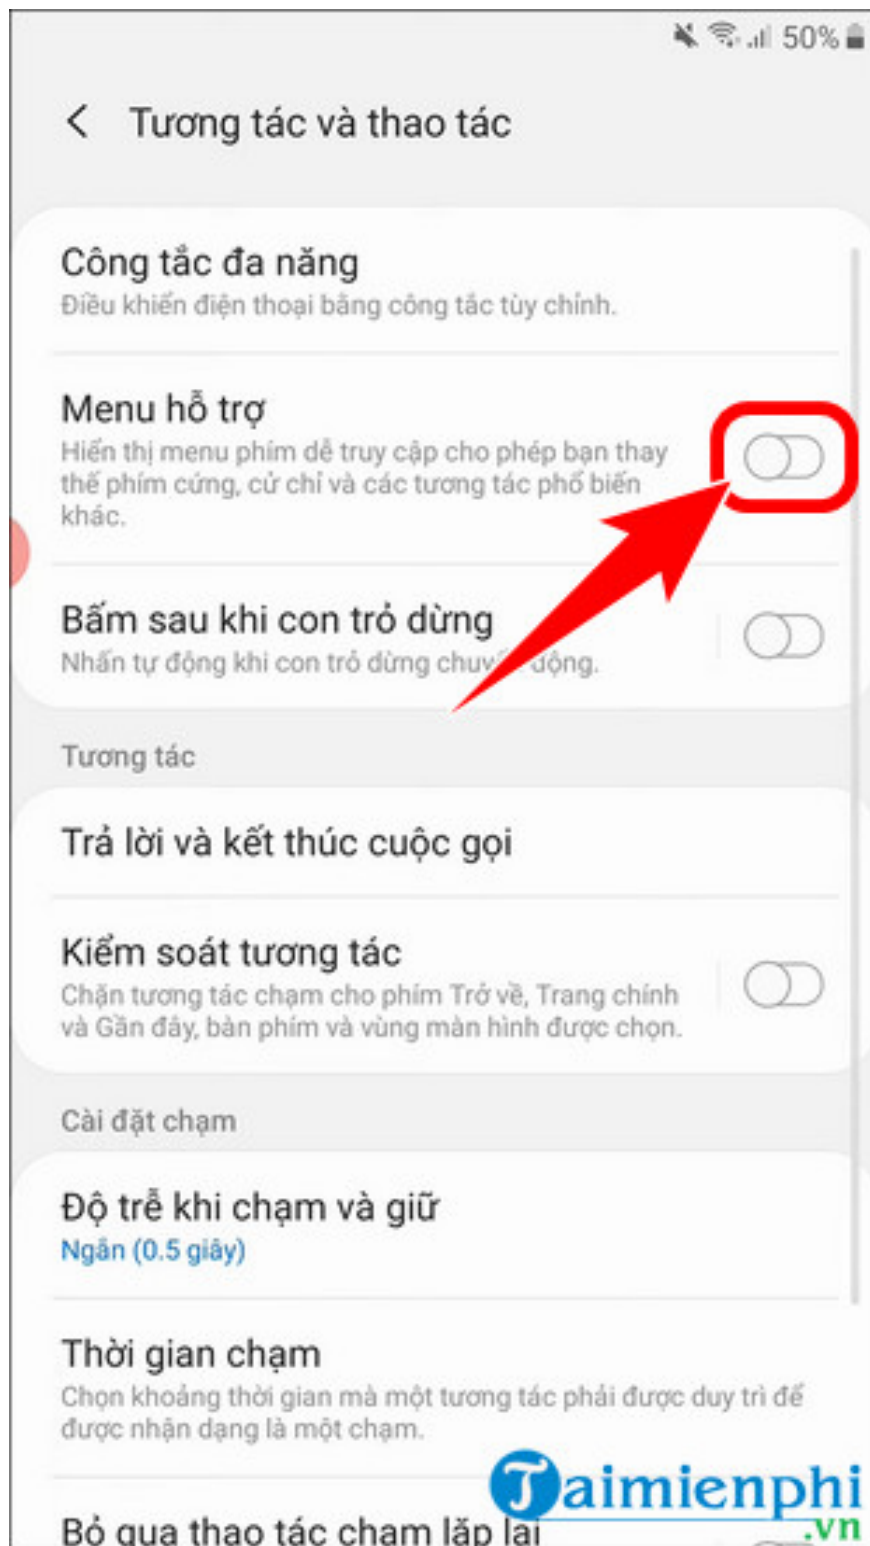

### ***3. Activate the virtual Home button to take screenshots on Samsung A12, A13, and A23.***

Almost all Samsung models integrate a virtual Home button or Assistive Menu, allowing users to perform complex operations without needing the physical Home button. Similarly, you need to activate the virtual Home button to take screenshots on Samsung A12, A13, and A23.

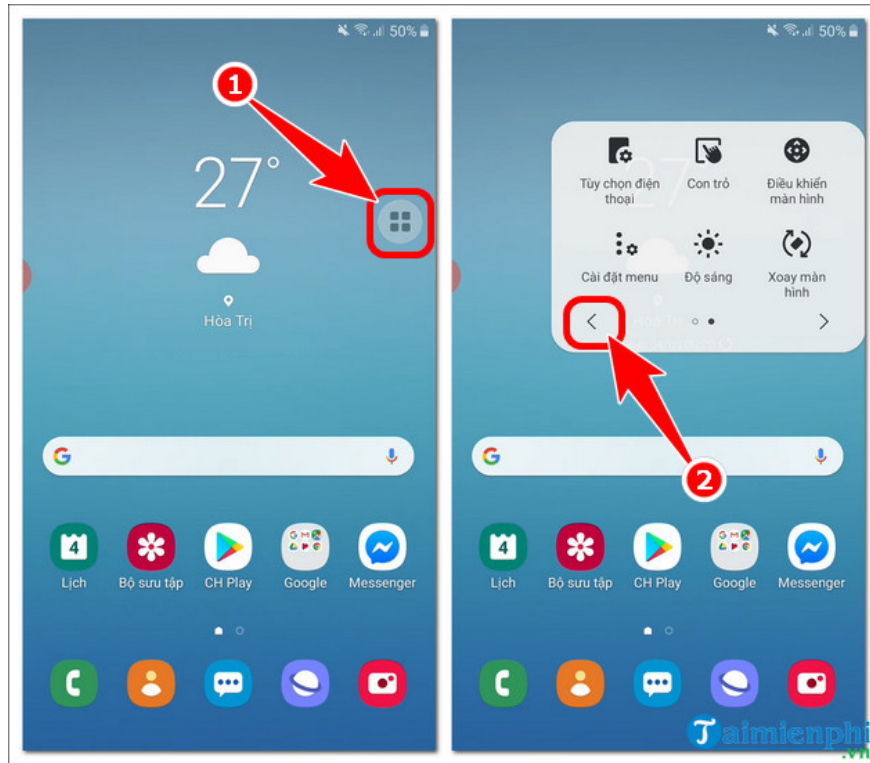

*Step 1:* Open **Settings** => select **Accessibility** => **Interaction and gestures** .

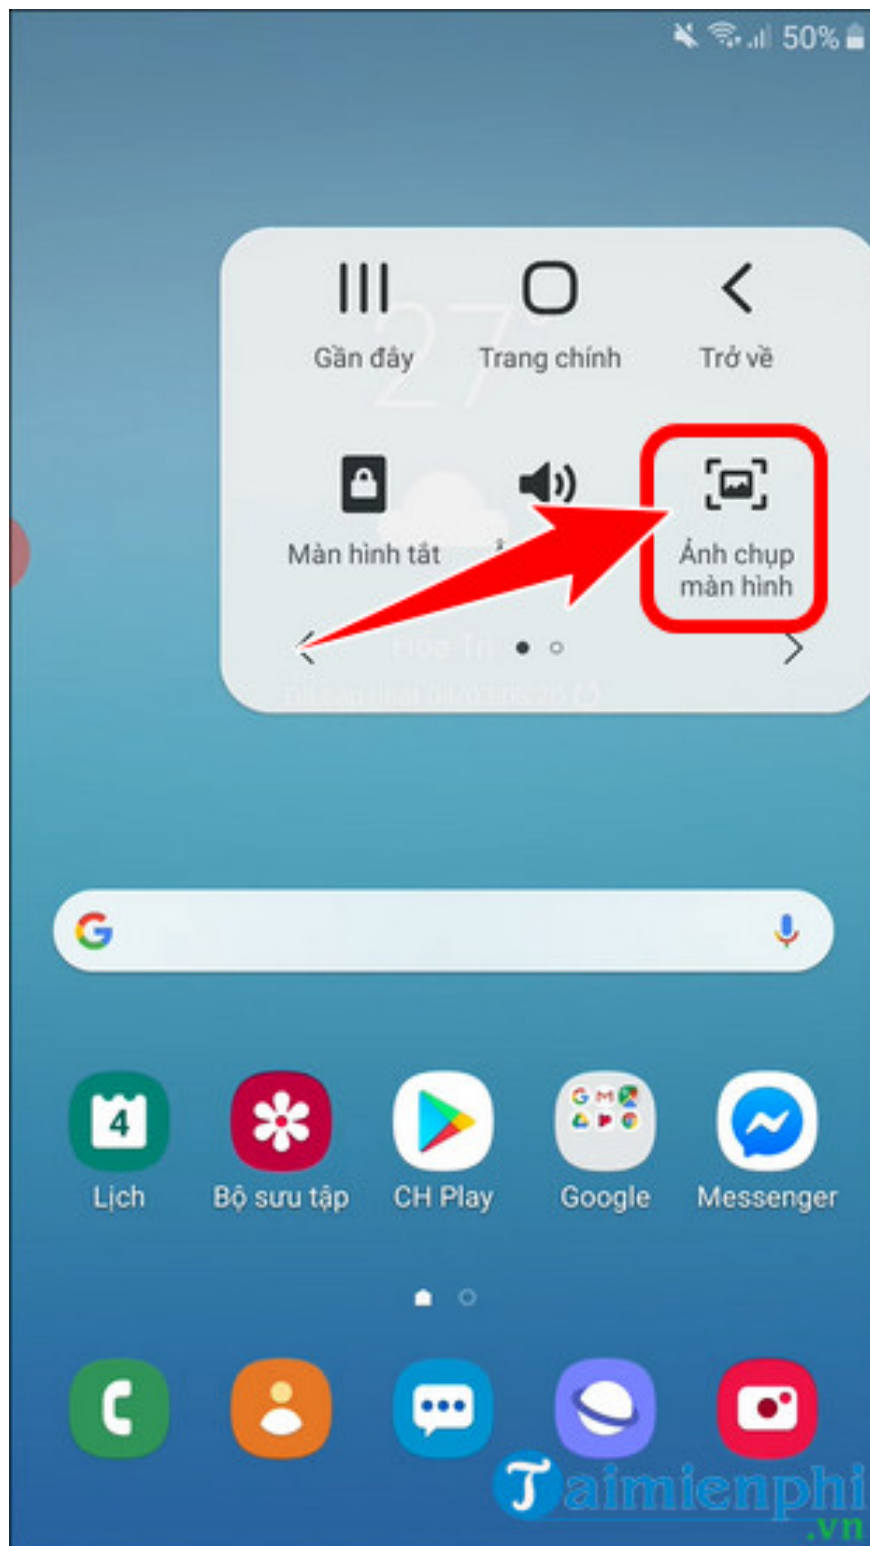

Step 2: Toggle the Assistive Menu on .

Step 3: After completion , the **virtual Home button** will appear as shown below. Press the **virtual Home button** => press the **left arrow** .

- Select **Screenshot** .

#### ***4. Use Bixby Voice Assistant to take a screenshot on Samsung A12, A13, A23.***

Those who have used Samsung phones for a long time are already familiar with the Bixby virtual assistant, which helps users perform basic operations using voice commands, especially taking screenshots on the Samsung A12, A13, and A23. You just need to say " **Hey Bixby** " to activate the virtual assistant and then say

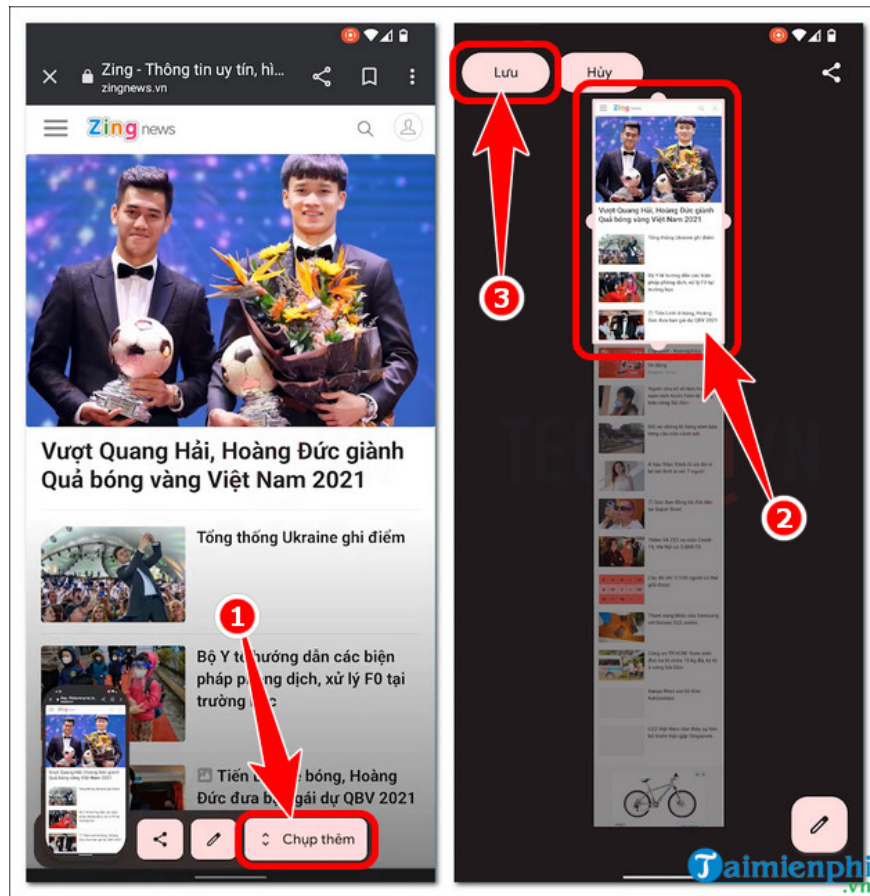

the command " **Take a Screenshot** " and the information on the screen will be immediately saved as an image.

### ***5. Samsung A12, A13, A23 long screenshot capture (page scrolling)***

In addition to the methods above, Samsung A12, A13, and A23 phones, after upgrading to Android 9 Pie, will integrate a feature for taking long screenshots with scrolling.

The steps are quite simple; users just need to perform the same actions as with the physical buttons => select "**Capture More**" => **Adjust aspect ratio** => press "**Save**".

Above are the complete steps to take screenshots on Samsung A12, A13, and A23 without using any supporting applications. Additionally, you can also use these methods to effectively and quickly **capture screenshots on your Samsung A21s** , saving and sharing important information with other users.
