

How to quickly use iPhone maps from the main screen

We can quickly look up the way home, or quickly use maps on iPhone via Siri Shortcuts.

Siri Shortcuts on iOS 12 is an extremely useful application on this new Apple operating system. Accordingly, the application will create shortcuts for users to quickly operate such as turning off WiFi on the iPhone main screen, or using the YouTube iPhone video download feature, downloading files to iPhone without installing additional third-party applications. 3.

And in this article we will show you how to create map shortcuts that can be used right on the iPhone main screen. Users can use to navigate home, or find their way right away without opening the map application directly like Google Maps or Apple Maps.

Step 4:

Back in the Library interface on Siri Shortcuts you will see the Directions Home shortcut, click on **the 3 dots icon** to enter the address information. First of all we will fill in the home address and include other information.

Below the Show directions section there will be 2 **Map application** and **Mode options** .

With the Map application users will be selected Google Maps or Apple Maps installed on the iPhone. Here I will choose Google Maps due to its simpler and more popular usage. Next choose the type of vehicle to get directions.
