

# How to Rate Your Images with Stars in Zoner Photo Studio Pro 17

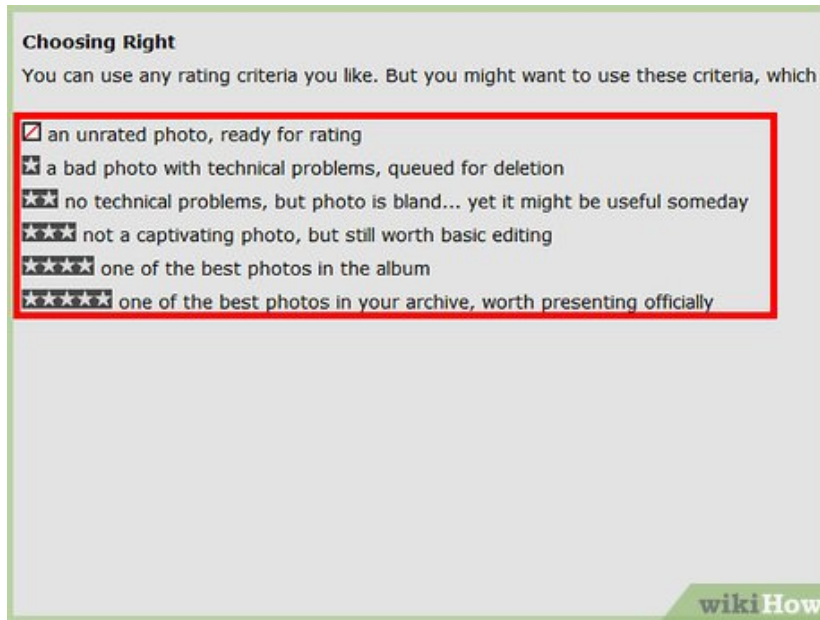

Zoner Photo Studio is a fantastic alternative to . It is affordable for just about any pocket. If you have a lot of images, or are just starting, you will want to organize your images somehow. Try to come up with a system that you will...

Part 1 of 3:

## Small Scale Rating

**Try to come up with a system that you will stick with.** While you *can* change the way you do it, it's easier not having to do it over again.

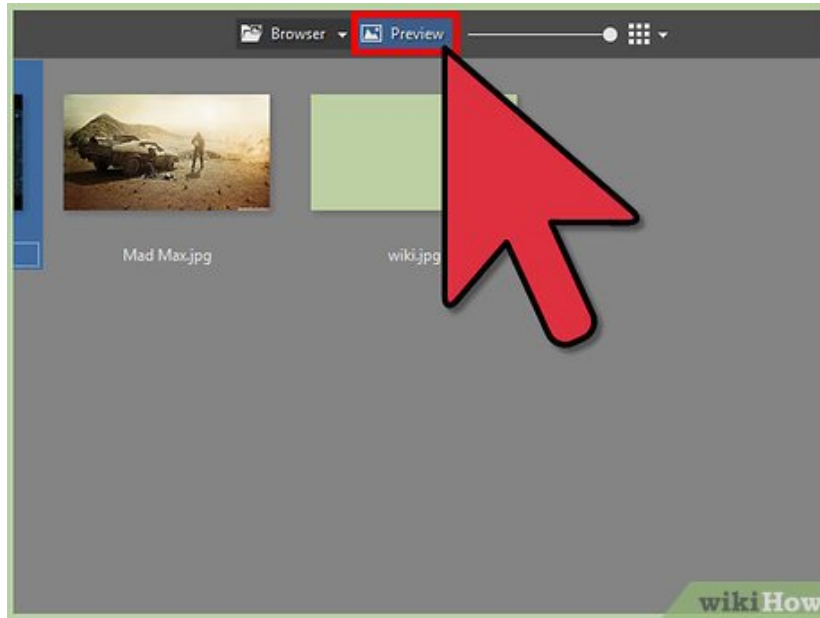

**Understand that you only have five stars to work with.** You could try the following method, suggested by the creators of Zoner Photo Studio.

1. No stars - An unrated photo, ready for rating
2. One star - A bad photo with technical problems, Queued for deletion
3. Two stars - No technical problems, but photo is bland... yet it might be useful someday
4. Three stars - Not a captivating photo, but still worth basic editing
5. Four stars - One of the best photos in the album
6. Five stars - One of the best photos in your archive, worth presenting officially.<sup>[1]</sup>

**Navigate to the photographs that you will be rating.**

4.

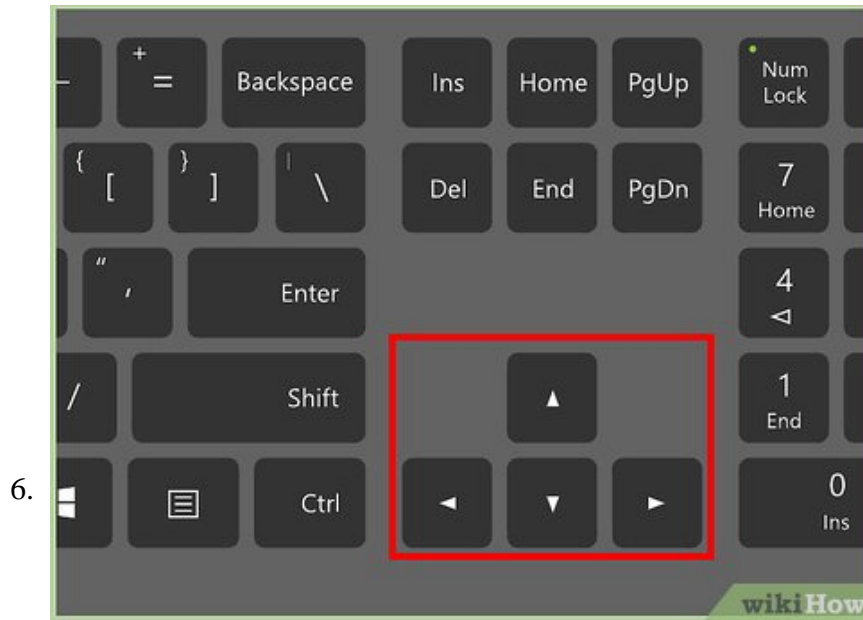

**Switch to Preview, if you are in browser mode.**

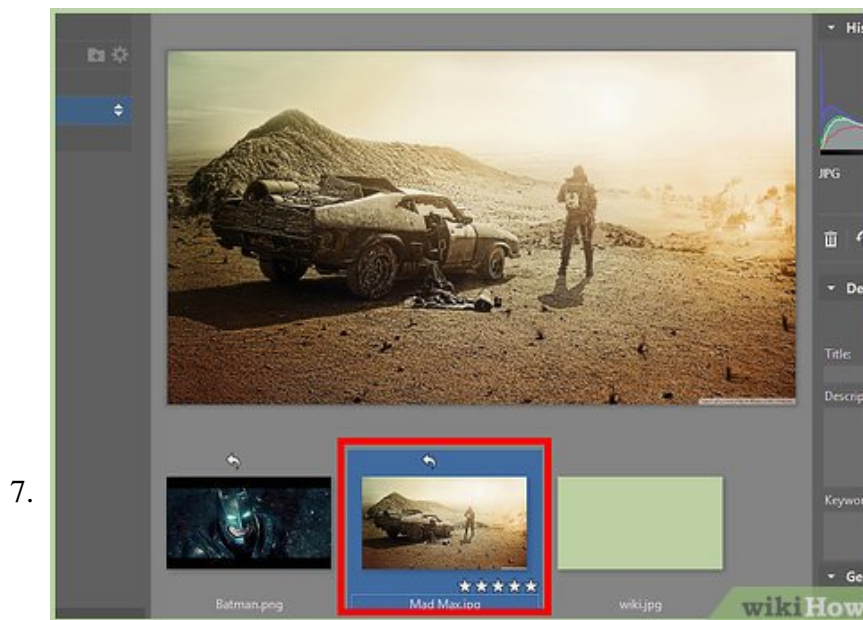

5.

**Hold your left hand (on a Qwerty keyboard) on the number row numbers, 1, 2, 3, and 4.**

**Move your right hand to the cursor (directional) keys.**

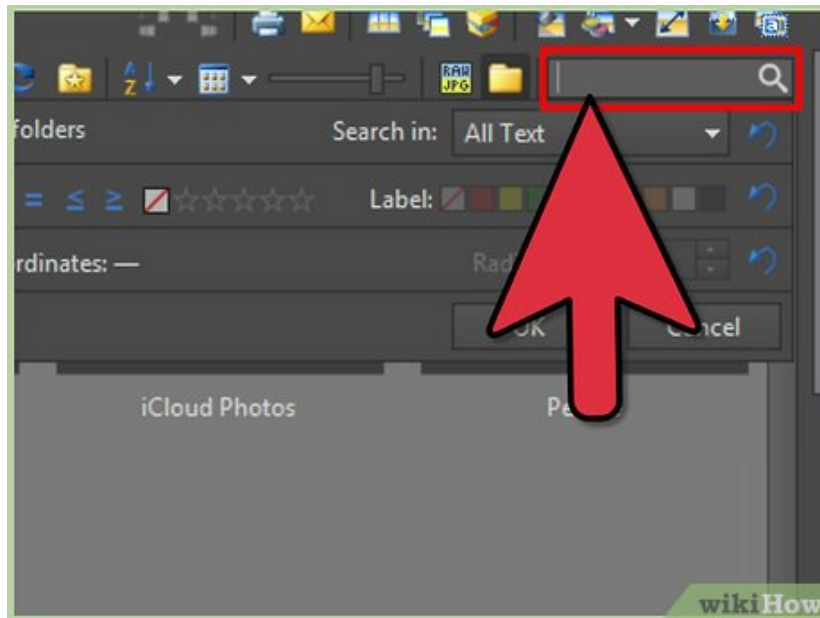

**Move through your images using the directional keys and rating them with your other hand.**

Part 2 of 3:

## **Large Scale Rating**

1.

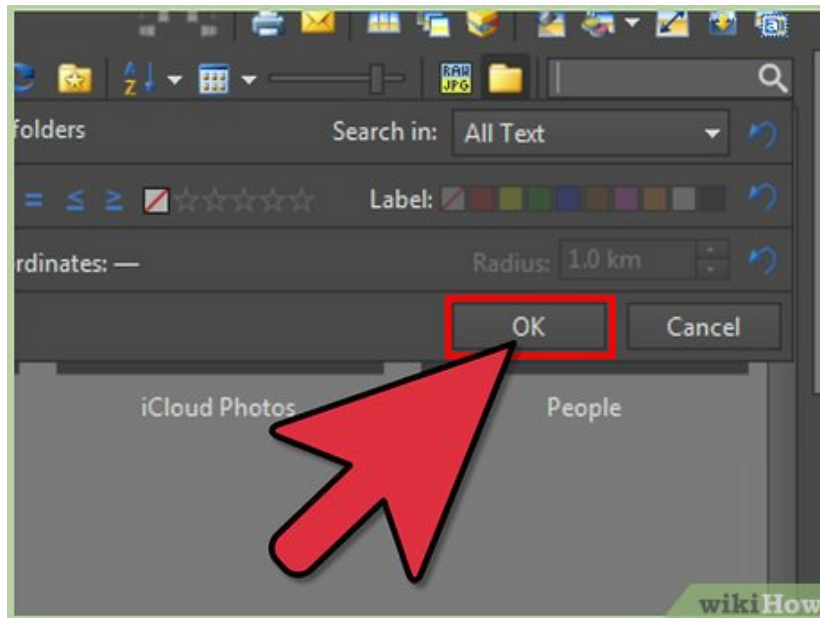

**In the Manager tab, in the Browser view, click in the search box.**

2.

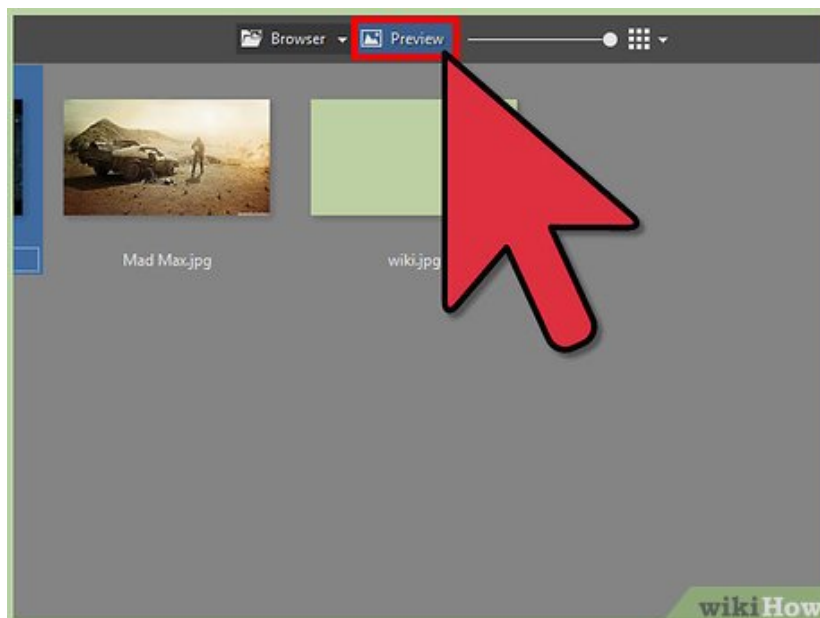

**Check the tick box for "Include subfolders".**

3.

**Select OK.** Now you will see all of the images in the primary folder (My Pictures in this instance).

4.

**Change to Preview** and then rate the images as instructed before.

Part 3 of 3:

## Using the Star Ratings

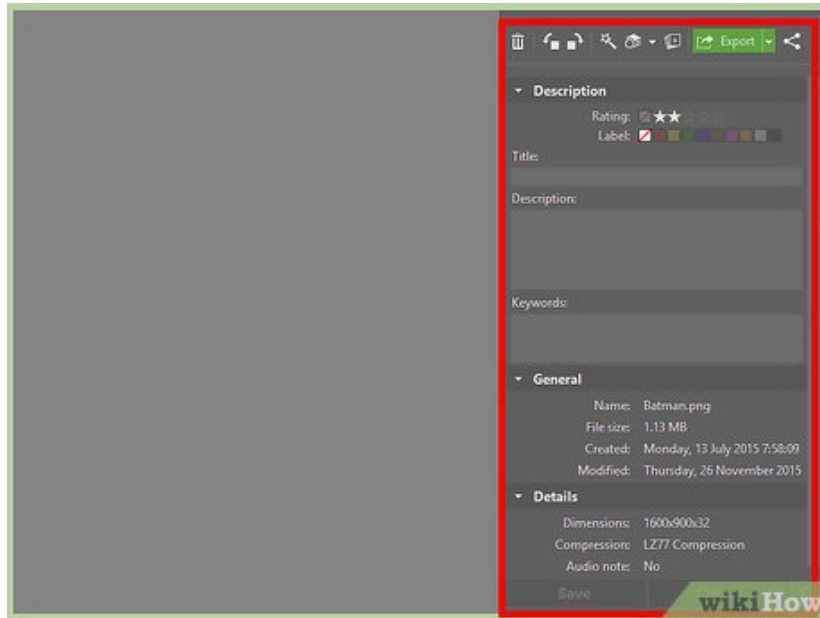

Still leaving the 'Include subfolders' selected, bring up the advanced search options.

Select the "equals" sign and then the number of stars that you want to look at for processing. The example here, uses 2 stars.

3.

**Process them the way you want.** Delete, name, move, etc.
