

How to read the names of Samsung TV series

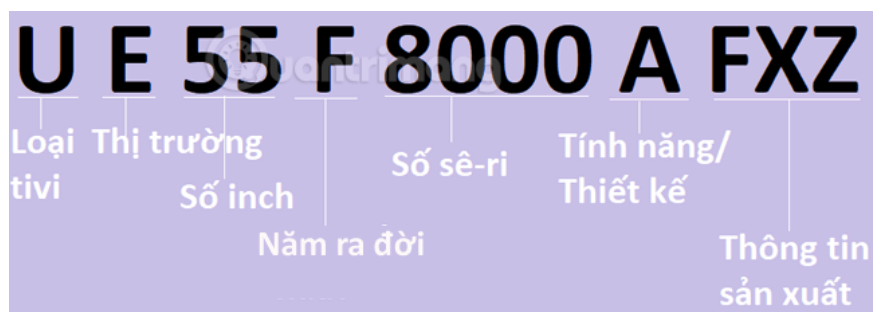

The number of models on Samsung TVs is how to use the code to describe TV products. Once you are familiar with these codes, you can read a lot of TV parameters and details, just glance at its model numbers.

Up to now, Samsung has launched many different types of TVs with outstanding features in image quality as well as smart connectivity. Each model of Samsung TV has its own symbols and not everyone understands the meaning of the numbers and letters appearing in that model. Therefore, the following article will help you identify Samsung TV series more easily, just by looking at the name can know which line belongs to which segment.

The number of models on Samsung TVs is how to use the code to describe TV products. Once you are familiar with these codes, you can read a lot of TV parameters and details, just glance at its model numbers.

TipsMake.com will use the UE55F8000AFXZ model as an example:

1. U = LED
2. E = Product for Europe (in Vietnam, you will see this E is replaced by A - product for Asia)
3. 55 = Screen size (in inches), you can see numbers like 32, 40, 49, 65
4. F = Year of birth model is 2013, this year may be accompanied by another character to describe the resolution of the TV more clearly.
5. 8000 = series.
6. A = Feature or design
7. FXZ = Production information.

Thus, with the example model, you know that this is a Samsung LED television, manufactured for the European market, a 2013 model, 8000 series.

If you have an UE55F8000BFXZ TV instead of the UE55F8000AFXZ, the difference between the two TVs is in the design, such as the frame of the television is different colors, but the other specifications will be the same.

Below is a detailed table of the meaning of the characters of Samsung product models for your reference:

For example:

UE55F8000AFXZ

U

Q = QLED

U = LED

P = Plasma

L = LCD

H = DLP

K = OLED

E

N = North America

E = Europe

A = Asia

55

Inch number of TV

F

Five models were born

Q = 2017 QLED

MU = 2017 UHD
