How to distinguish real iPhone 6 and iPhone fake goods help readers not buy fake iPhone, check if iPhone is genuine?

Currently the fake real phone market is confused, the more new smartphones are, the easier it is to buy fake goods, iPhone 6 is no exception. Let's TipsMake.com learn about how to distinguish real iPhone 6 and iPhone fake goods offline.

1. Quick charging tips for iPhone 6
2. How to test iPhone 6/6 Plus using MLC or TLC memory
3. Guide to distinguish genuine iPhone 7 Plus and counterfeit goods

## Reconcile iPhone series

Each iPhone 6 / 6plus machine has a unique serial number, go to the phone introduction to see the serial number of the device. Then, open the Apple network, enter the serial number to proceed with the comparison. If you can't find this number, please condolence, your phone is fake. Note that you must visit the official website of Apple to compare, not to check other product testing websites that the salon owner recommends.

<a href="#">← General</a>	About

Bluetooth	
IMEI	01 234567 890123 4
ICCID	012345678901234567899
Modem Firmware	7.02.13

## Check the speaker line below the machine

The iPhone 6's lower body is a single speaker hole, while some clones continue to design the iPhone 5s as two rows of loudspeakers, we should note this.

## See the box and manual of the machine

The box of the fake iPhone 6 usually has text and rough images, translucent text, when looking carefully, it will find quite negligent places and the box and manual of genuine machine are delicate and beautiful, the letters and pictures are clear .

## Try connecting to iTunes

No matter what, the fake iPhone system is not iOS, we just need to link iPhone 6 to iTunes on the computer, so we know if it is fake. If the iPhone is genuine, the right corner of iTunes will see the iPhone text displayed.

## Touch ID check

Observe the outside, whether the white color of the Home button and the front glass layer are different in color. Also, you can try using the Touch ID to unlock the view, if the fake item will not be usable.

## Activate the system test

The new iPhone 6 needs to be activated before it can be used normally, you open the phone, see if it displays the activation interface. If there is no need to activate, then it is fake.

## Observe the upper part of the screen

On the genuine iPhone 6 screen, there are only two small holes, but many of its clones continue to follow the design style of Android smartphones, from this small point can be noted to find loopholes.
