How to record computer screen Win 7/8

On Win 7 computers, there is still a tool to support recording computer screen videos, which is Steps Recorder or Problem Steps Recorder (PSR).

The laptop screen recordings with sound are as follows:

Step 1: Open Steps Recorder

- Method 1: Press the key combination Win + R, the Run window appears, enter 'psr' in Run and press OK to open Steps Recorder.
- Method 2: Open the Start menu, then search for 'Problem Steps Recorder', then select the software to open.

Step 2: In Steps Recorder, click on the arrow next to the Help button and then go to Settings.

Step 3: Settings can be changed for the screen recording session with the following items:

- Output location: Select default save location
- Enable screen capture: Select No if you want to disable the computer screen capture function.
- Number of recent screen captures to store - The default is 25 screens, so if you need to record more than that, increase this number.

Step 4: After setting up, click the Start Record button or press Alt+A to start recording.

Step 5: After the operations are completed on the screen, press the Pause Record button to pause recording (Alt+U) and Resume Record to continue recording (Alt+S).

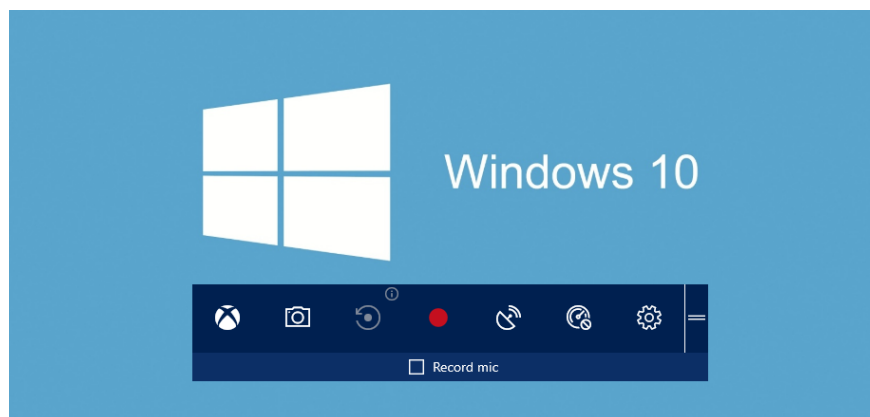

Step 6: To stop recording, click Stop Record or press Alt+O. Finally, name the file and save it.

How to record Windows 10 computer screen video

Method 1: How to record computer screen video using Xbox

Follow these steps to enable this feature:

1. Open the pre-installed Xbox app
2. Set up basic information for first use.
3. Press Windows + G key combination to activate "Game Bar"
4. After the toolbar appears, click the Record button or press the Alt + Windows + R key combination to start recording the application screen. To choose whether to record via the microphone or not when recording by clicking or unchecking Record mic.
5. Use the same key combination Alt + Windows + R or click the Record button when you want to stop recording. The recorded content will be saved in the Captures folder in MP4 format. You go to the path: This PC > Local Disk (C:) > User > PC Name > Videos > Captures.
