You use Skype to make voice calls with your partner and you want to record the entire call. Currently Skype has added a recording feature to help users easier in recording voice. So how to use call recording feature in Skype? Let's *TipsMake.com* go find out through the article below.

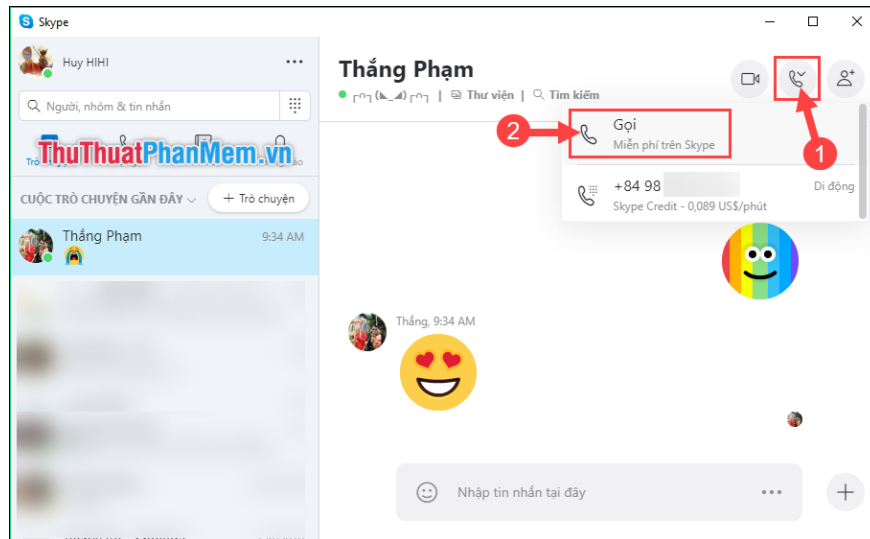

How to record a Skype call on computer

For using Skype on your computer, you open the application and log in to Skype as usual.

Step 1 : Next, go to the profile of the person you want to call.

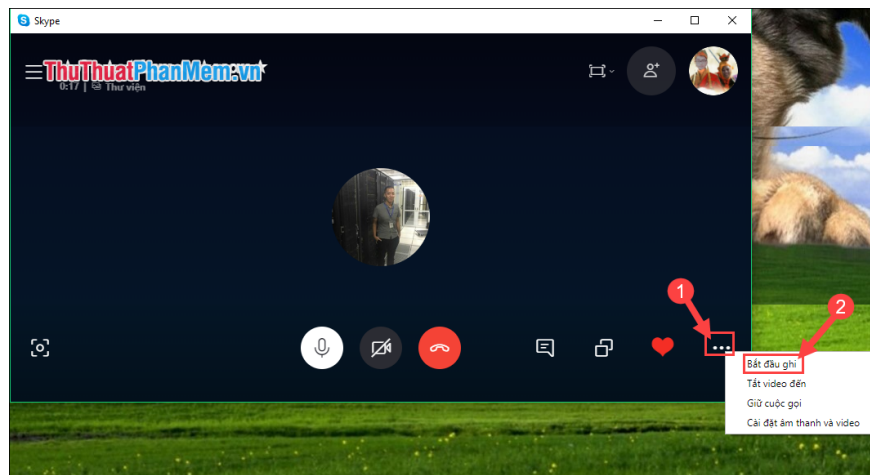

- (1) Select a call sign.
- (2) Select *Free Call on Skype* .

Step 2 : Then at the interface of the call.

(1) *Select the 3-dot icon* in the right corner.

(2) Select *Start recording* .

A recording icon appears that means your call is being recorded.

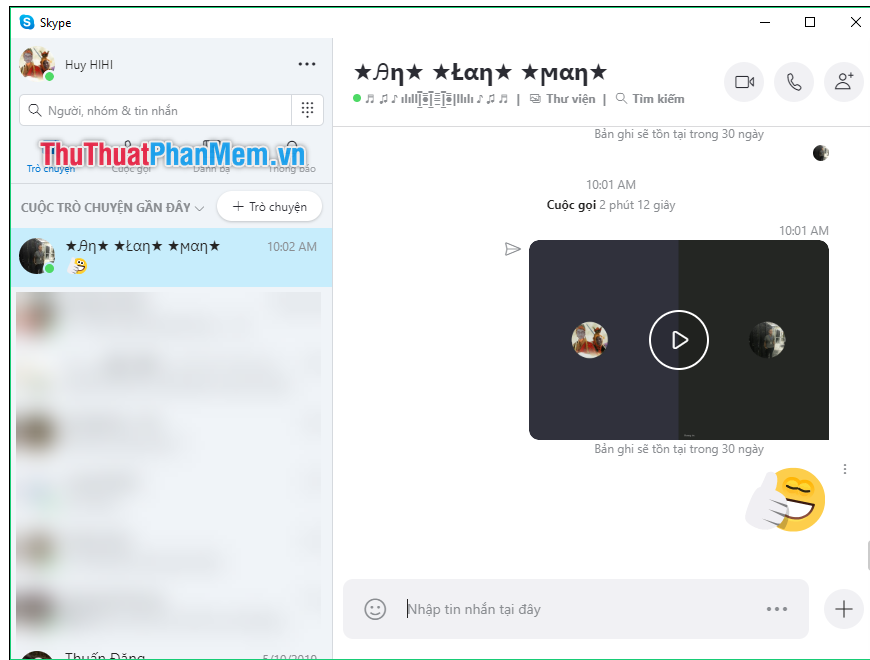

Step 3 : To end the process of recording a call, you can click Stop recording or press the end of the call.

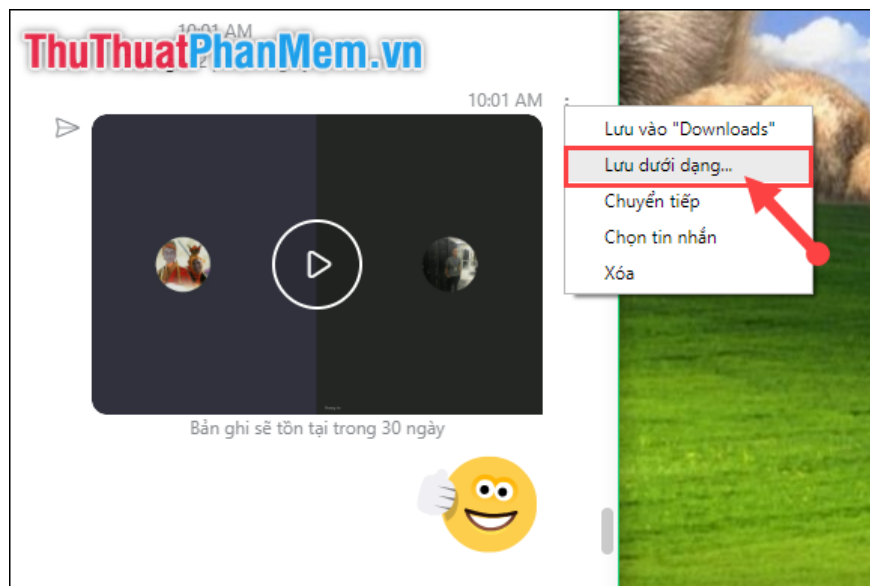

Step 4 : After finishing the call, the recording will be displayed in the chat frame and both you and your relatives / partners will see and use them.

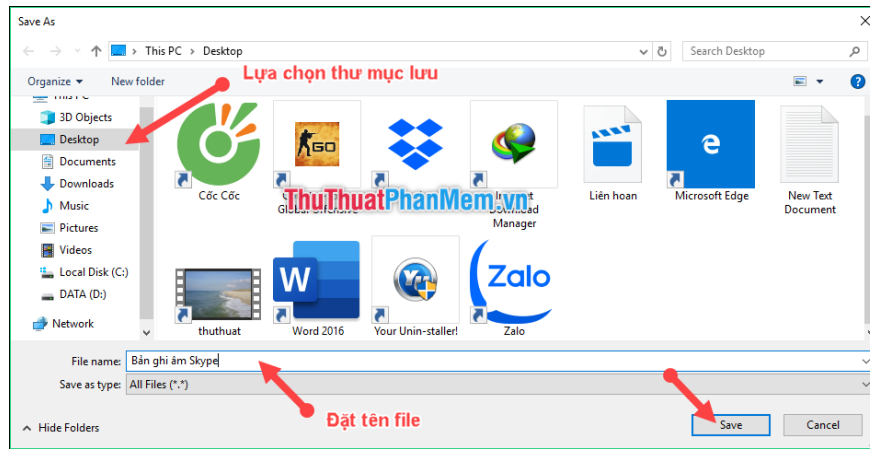

Note: call records will be stored in the cloud for up to 30 days .

Step 5 : To save this recording, put your cursor in the file, then right-click and choose *Save as* .

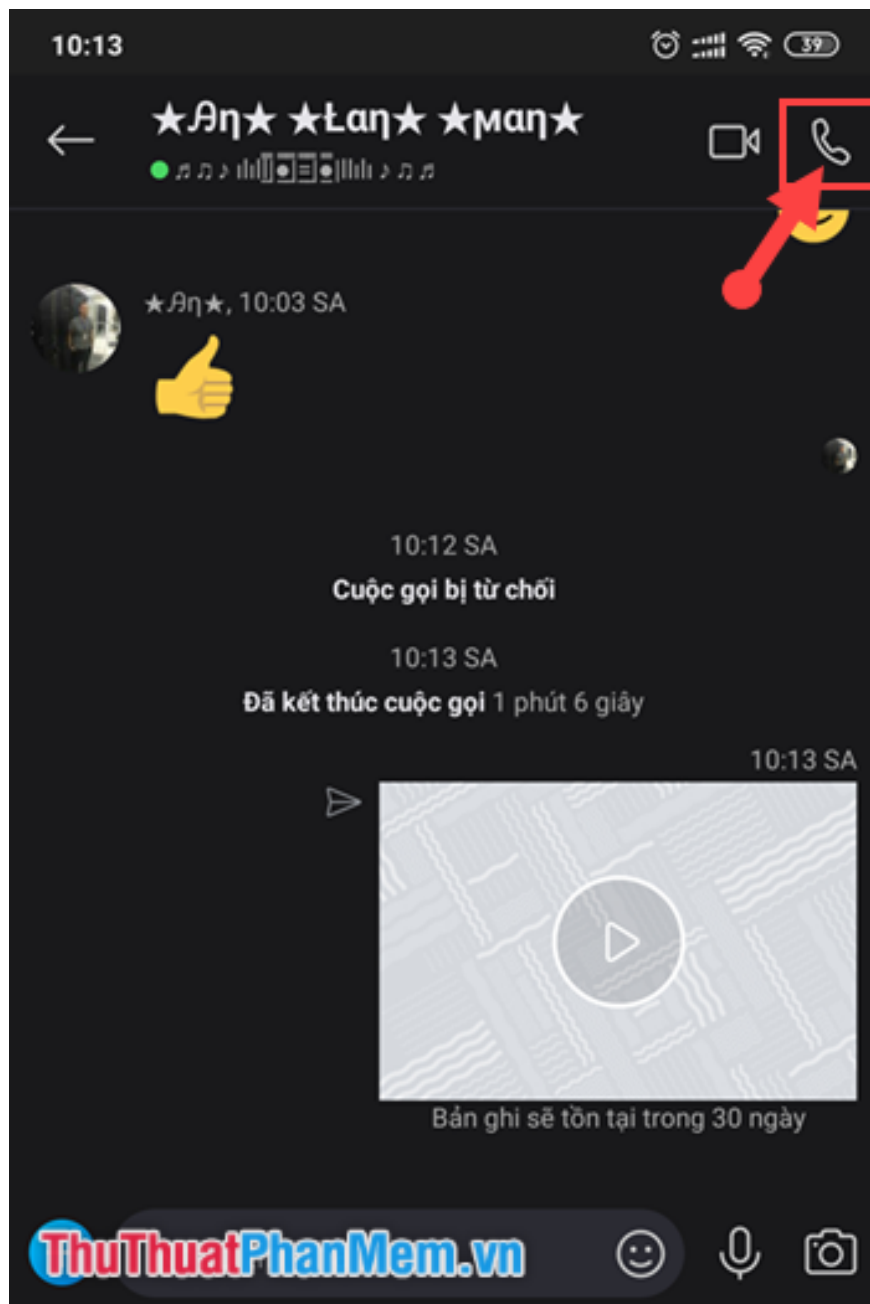

Step 6 : Select the folder to save the file -> Name the file -> click *Save* to finish.

How to record a Skype call on your phone

The steps to make a Skype call recording on your phone are almost similar to those on a computer. You perform the following steps:

Step 1 : Click the chat box of the person you want to contact, then click on *the voice call icon* .

Step 2 : In the call interface, click on the icon 3 dots in the right corner of the screen.

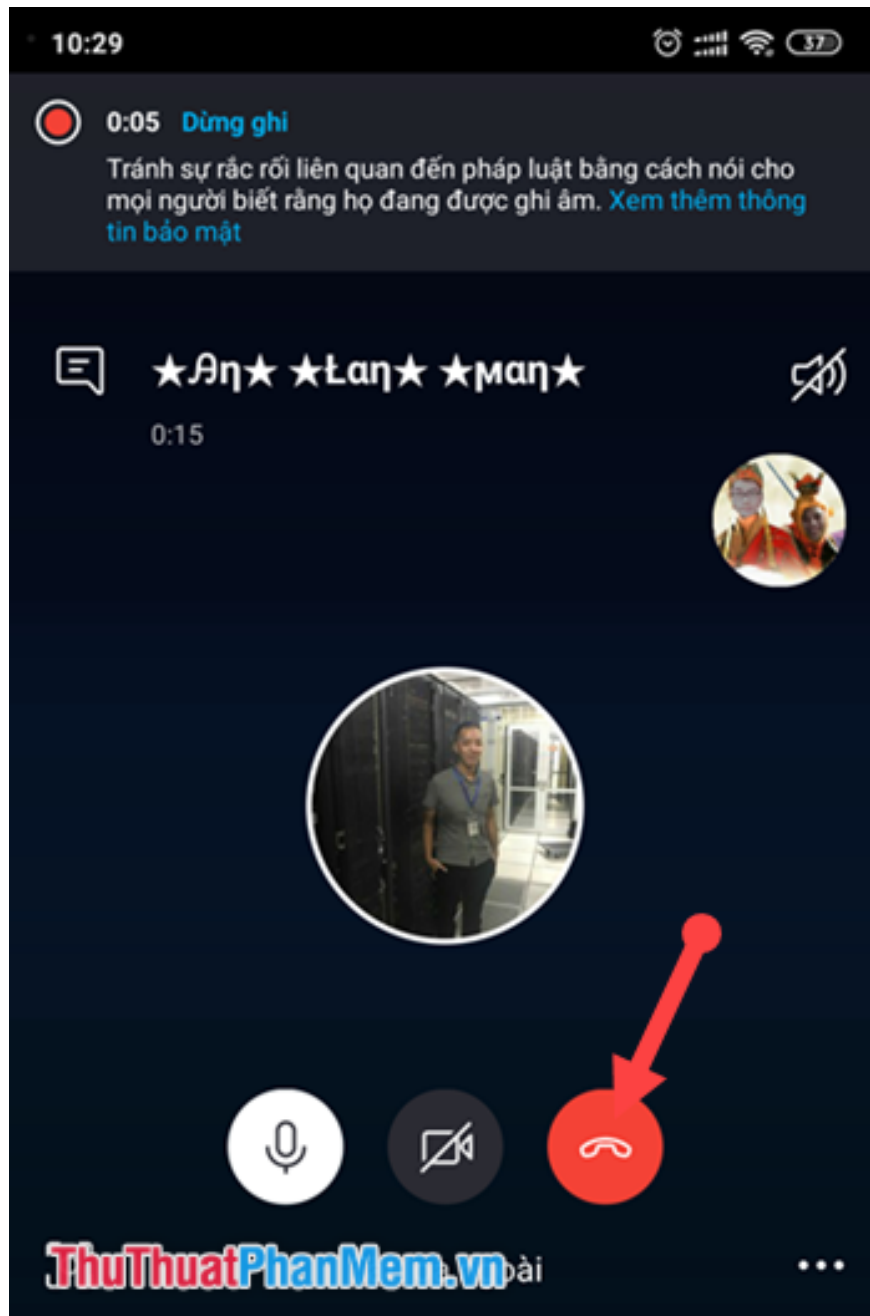

Step 3 : Then click *Start recording* .

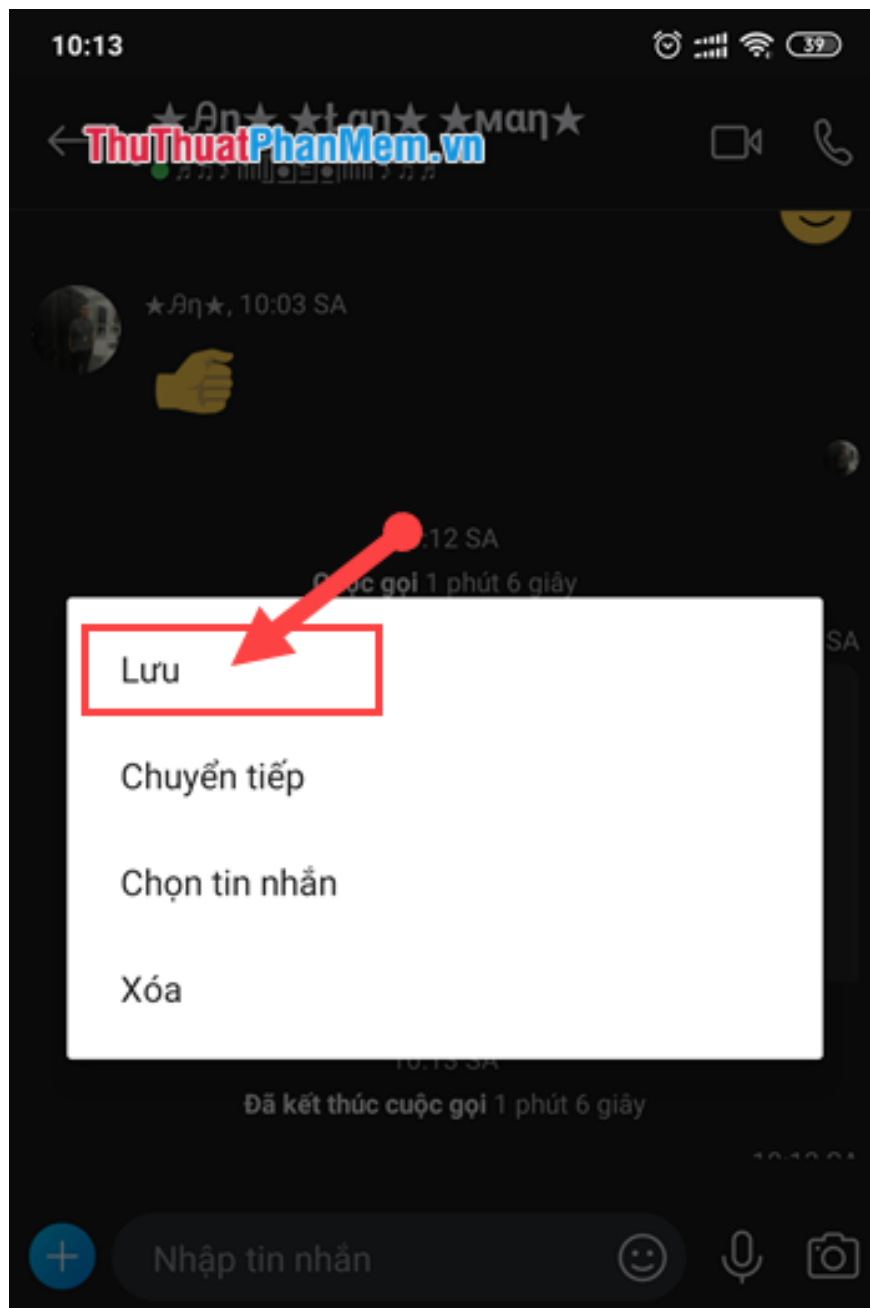

Step 4 : The interface of call recording will appear in the upper corner of the screen.

To end the recording you can select *Stop recording* or *end the call* .

Step 5 : Then you return to the chat frame, press and hold on the recording file to wait for the options panel to appear. Select *Save* to save the video as you need.
