

# How to Record Your Mac Screen Using QuickTime

Screen recording on your Mac lets you record your computer actions, ideal for creating tutorials or archiving your work.

Below are detailed instructions on how to record your Mac computer screen using QuickTime so you can record your work process or install a software to send to others.

## How to record Mac screen with Quick Time

*Step 1:*

First, you open your computer and go to the Application section. Double-click **Quick Time** to start it.

*Step 2:*

The interface window appears, you choose to go to File **and** select **New Screen Recording**

*Step 3:*

After selecting **New Screen Recording**, the Screen Recording dialog box appears. And you record the screen and the work you want. When finished, press Stop.

*Step 4:*

After completing the recording of the work, it will be saved in Quick Time and to save, remember to select File -> Save.

*Step 5:*

A dialog box will pop up asking you to select the name of the job you just finished. Then Save

With QuickTime on Mac, you can easily record your screen to record tutorials or your work. The recorded video will be saved to your computer, and you can share it on platforms like YouTube or social networks.
