Accidentally deleting photos or videos while cleaning up your gallery or moving them on your **OPPO** phone happens quite often. Don't worry if you're in this situation. There are many ways to recover deleted data on your OPPO phone. The key is to apply them correctly. In this article, TipsMake will share some effective **ways to recover deleted photos and videos on your OPPO phone** .

## Tips for recovering deleted photos and videos on Oppo phones

### Article contents:

1. Recover deleted photos and videos on OPPO phones from Google Photos.
2. Retrieve deleted photos/videos on OPPO phones from Local Backup.
3. Recover deleted data on OPPO phones from OPPO Cloud.
4. Recover deleted photos/videos on OPPO phones using Recoverit software.

*Instructions on how to recover deleted photos and videos on OPPO phones.*

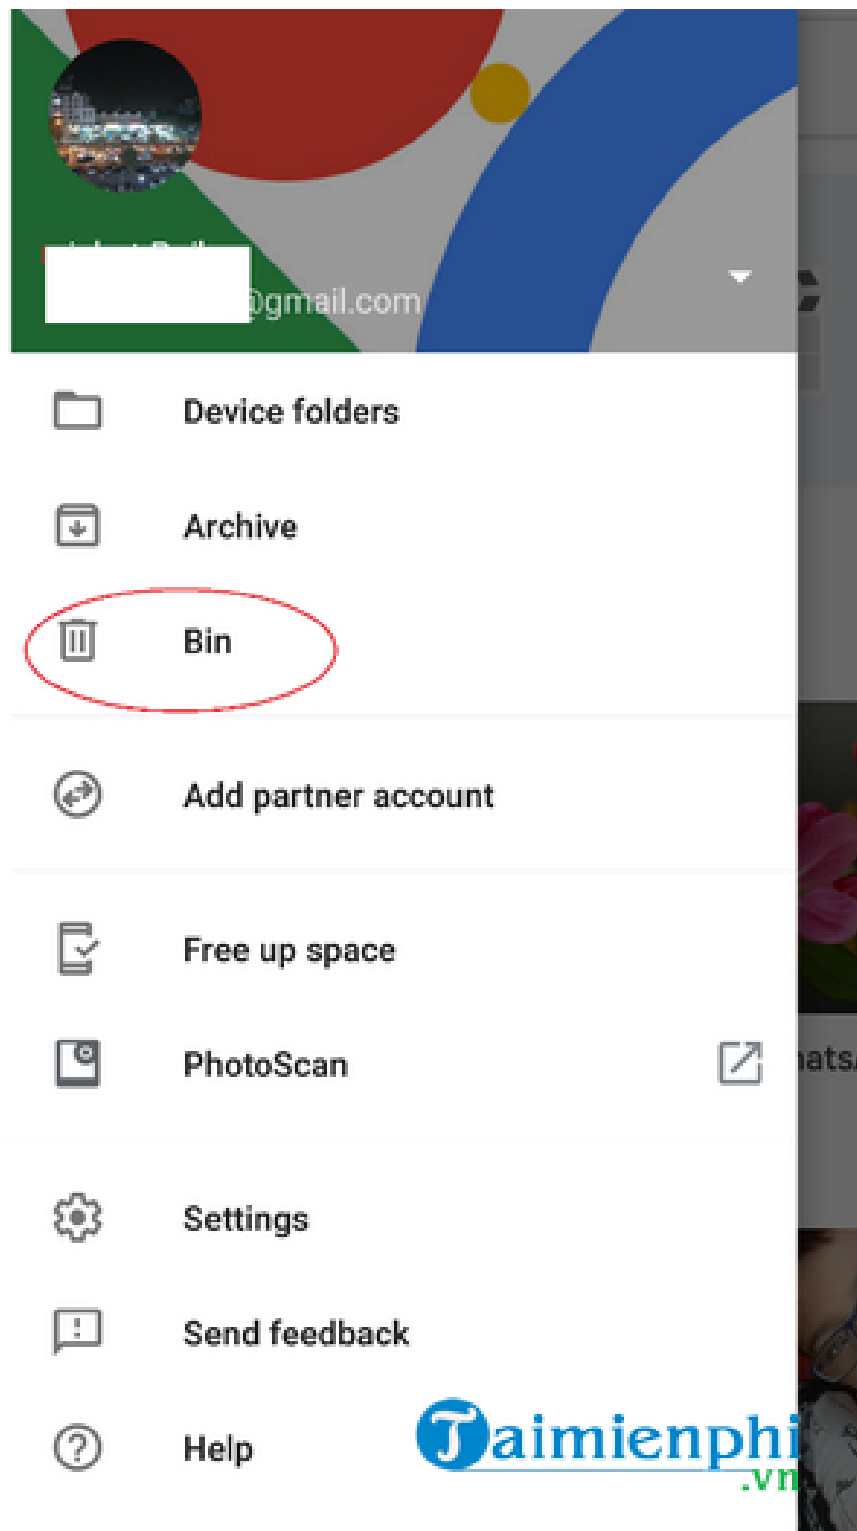

## *1. Recover deleted photos and videos on OPPO from Google Photos*

One of the simplest ways to recover deleted photos and videos on an OPPO phone is through Google Photos. Here, you can see all your images and videos. Photos deleted from your Android gallery may also disappear from Google Photos. But you have an option to recover deleted photos and videos on your OPPO phone from the Trash folder, where the data will remain for 60 days. Here's how:

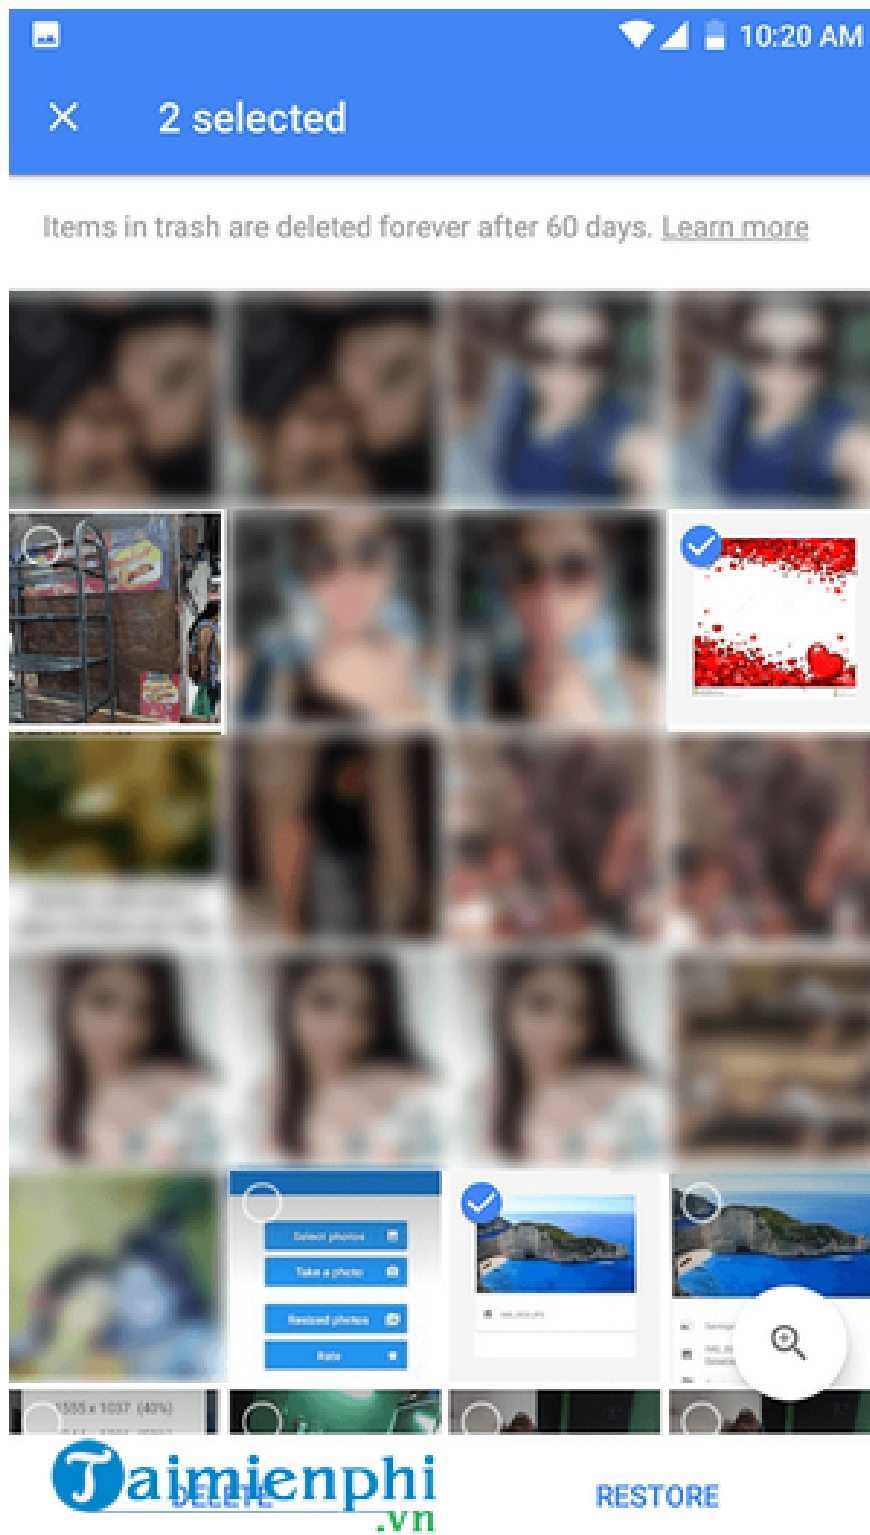

- **Open the Google Photos** app on your OPPO phone.

- Tap **the Menu icon** located in the upper left corner of the screen.
- Select **Bin** or **Trash** .

- Next, tap and hold the photo/video you want to recover.
- Finally, tap the **Restore** button .

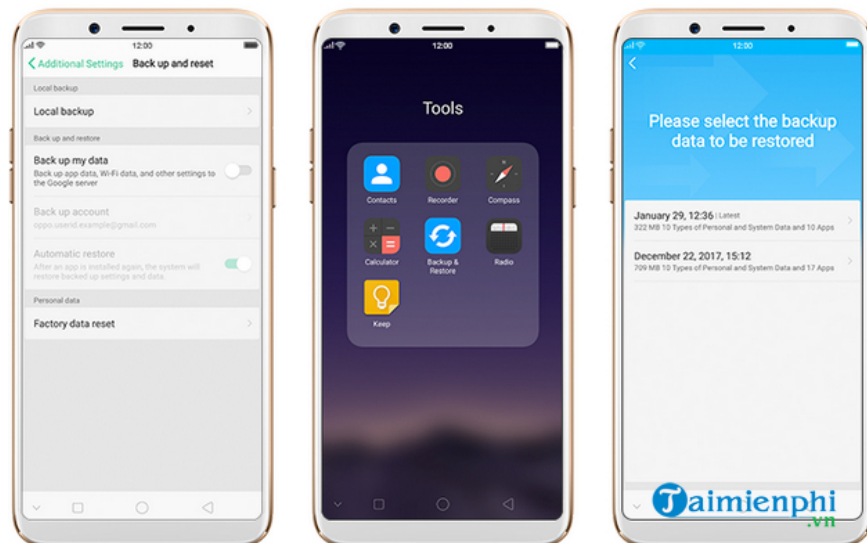

## ***2. Recover deleted photos/videos on your OPPO phone from Local Backup.***

Another way to recover deleted data on an OPPO phone is from a backup on the device. But make sure you've previously backed up all your important things according to their backup schedule.

Steps to recover deleted photos and videos on OPPO phones:

- Go to **Settings > Additional Settings > Backup & reset > Local backup** or **Tools > Backup and Restore** .
- Here, you can find all your data. Select what you want to recover. Then, start the recovery process.

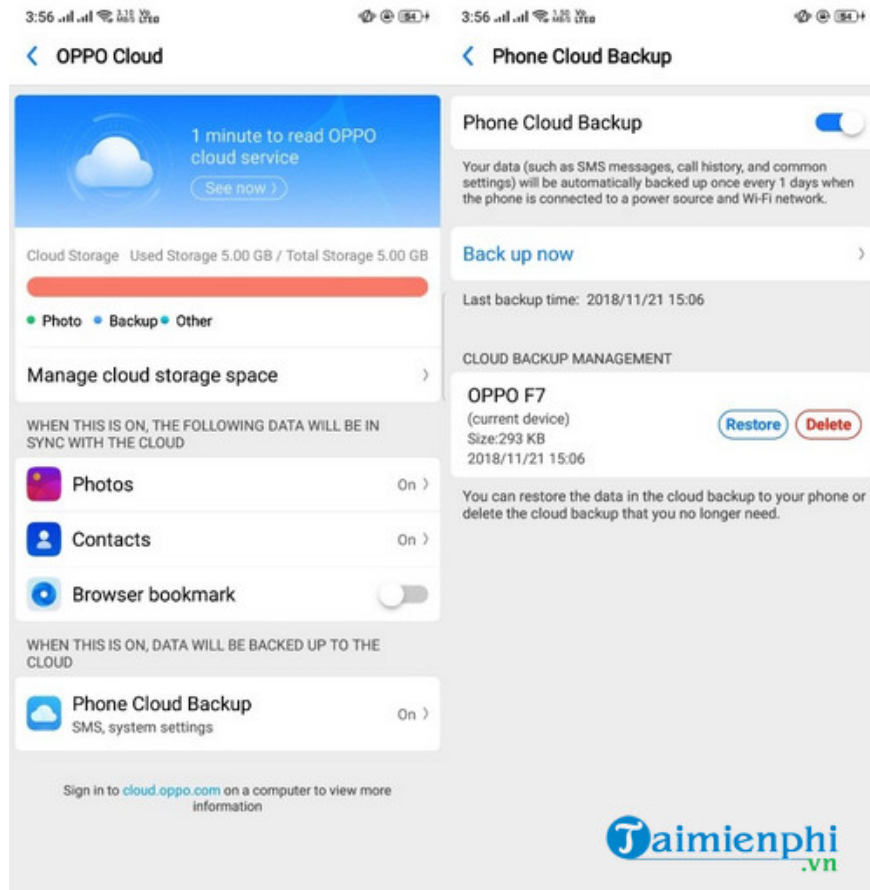

During this process, you need to keep the following points in mind:

- Do not turn the phone on or off.
- After the data is restored, delete any backups that are no longer needed.

### ***3. Recover deleted data on your OPPO phone from OPPO Cloud.***

You probably know that OPPO offers its own OPPO cloud storage service. Therefore, if you use this backup feature to back up your data, then recovering deleted photos and videos on your OPPO phone is easy.

To recover deleted photos and videos on your OPPO phone, simply log into OPPO Cloud and check if the deleted photos/videos are still there. If they are, you can recover them.

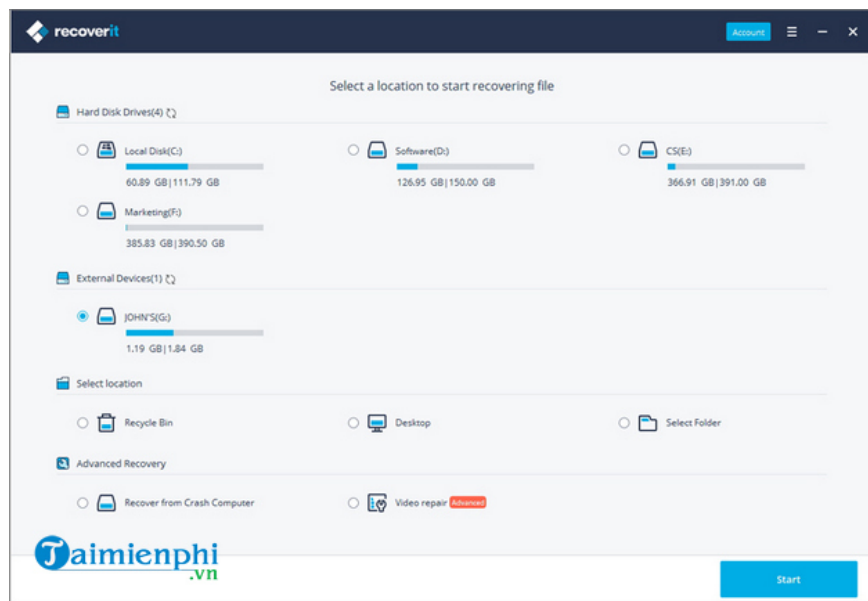

#### ***4. Recover deleted photos and videos on your OPPO phone using Recoverit software.***

To do this, you need to download the Recoverit software to your computer. Then, remove the SD card from your OPPO phone and use a card reader to access the memory card from your computer. Next, follow the steps below.

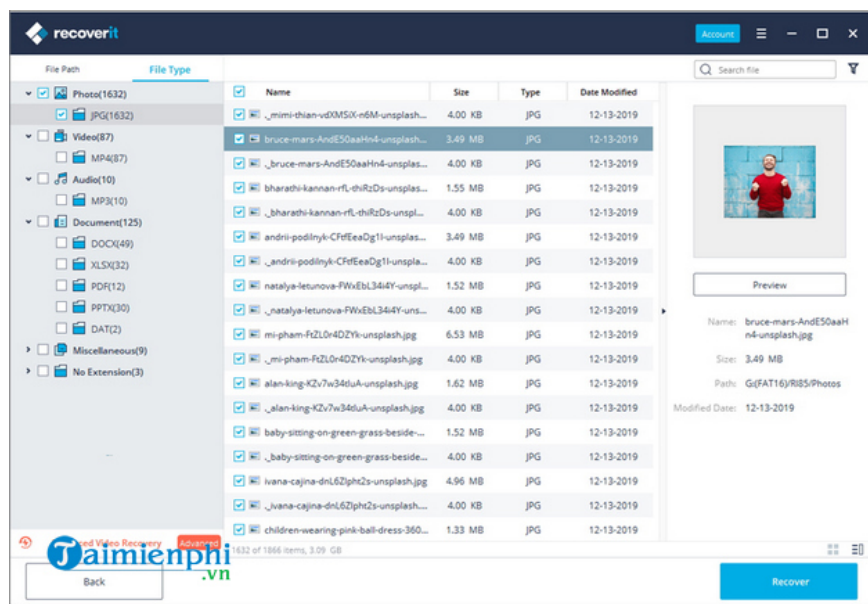

**Download the latest version of Recoverit here:**

**Step 1: Open the Recoverit software.** The program will take you to a window listing all system storage devices, including the connected SD card. Select the SD card in the **External Devices** section . Then, click the **Start button**.

**Step 2:** Your memory card will be scanned. Wait until the scan is complete. The completion time depends on the size of the data. Afterward, the Recoverit tool will list all scanned files in a new window. You can browse through them before recovering to ensure you only retrieve what you need.

**Step 3:** To successfully recover deleted videos/photos on your OPPO phone, you will be asked to select the scanned files you want to retrieve. You can search for files by keyword or browse through all files. After selecting the data to recover, click the **Recover** button . Now, choose a location on your computer to save the selected files and click **OK** in the next window.

**Step 4:** Wait for the recovery process to complete, and you will have retrieved everything you accidentally deleted earlier.

Above are some easy and simple ways to recover deleted photos and videos on your OPPO phone. Alternatively, if you don't want to use a computer, you can search for some highly-rated photo and video recovery apps for Android on the app store to retrieve deleted photos and videos from your OPPO phone. Always remember to back up your Android data regularly so you can recover it anytime in case of unexpected data loss. You can also check out how to recover deleted photos on Samsung phones to retrieve your deleted photos and videos.
