

How to reduce image size on Windows 10

To reduce the image size on Windows 10, you can immediately use Photos app without having to use another application.

The image reduction tool now has a lot to choose from. We can use the software installed on the computer, or reduce the image size online. And if the computer is installing the Photos app for the latest version, you can immediately use the image resizing feature.

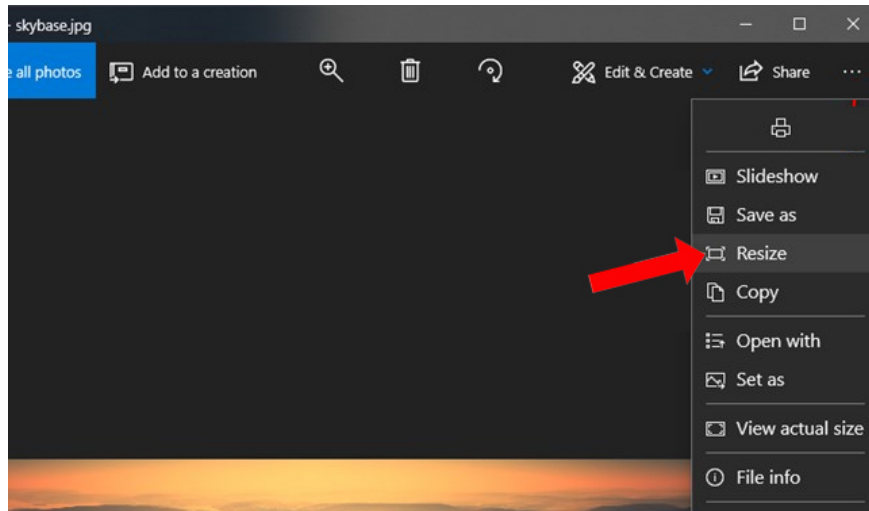

Photos app with a relatively simple image size reduction feature, no image size options, or image cropping. How to use cropping photos on Photos will be included in the article below.

1. Instructions for resizing images in Windows 10 series
2. Instructions to reduce the volume of photos in Photoshop
3. How to change photo size on Fotor online application

Instructions for reducing image size on Windows 10

Step 1:

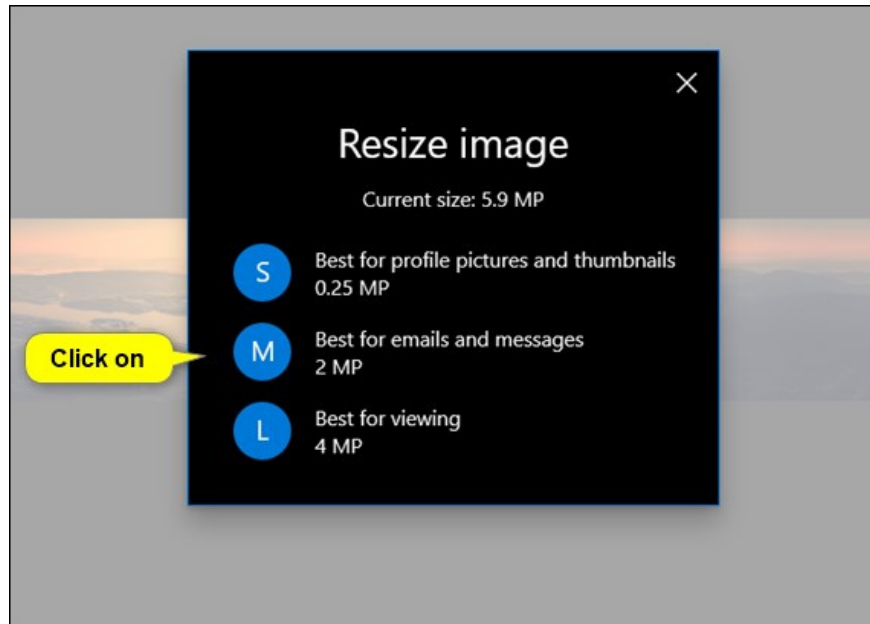

Users open images that want to reduce size with **Photos application** . Then click **the 3 dots icon** and select the **Resize** feature.

Step 2:

Immediately appear Resize images interface. Here the user will only have 3 options to reduce the size of the image. S is the smallest size, 70% lower than the original file, suitable for making profile pictures and thumbnails, M is 50-60% average size compared to the original size, suitable for sending photos via email or message, L is a large size shrink about 20% of the size of the original image.

After selecting the size you want to minimize, you just need to select the image storage folder to finish.

The feature of resizing images on Photos app is very simple, only 3 sizes S, M and L for us to choose from. If you only need to shrink photos at a simple level, you can use the Photos app right away. However, users should note the latest Photos application on Windows 10 with the above feature.
