When verification ends, we have completed the account registration to be able to use Office 365. Switch to the new page interface, click on the **Office 2016 Install** button to download the installation file to the computer.

After that, users just need to click on the installation file downloaded to the computer. The interface of installing Office 365 on the computer appears.

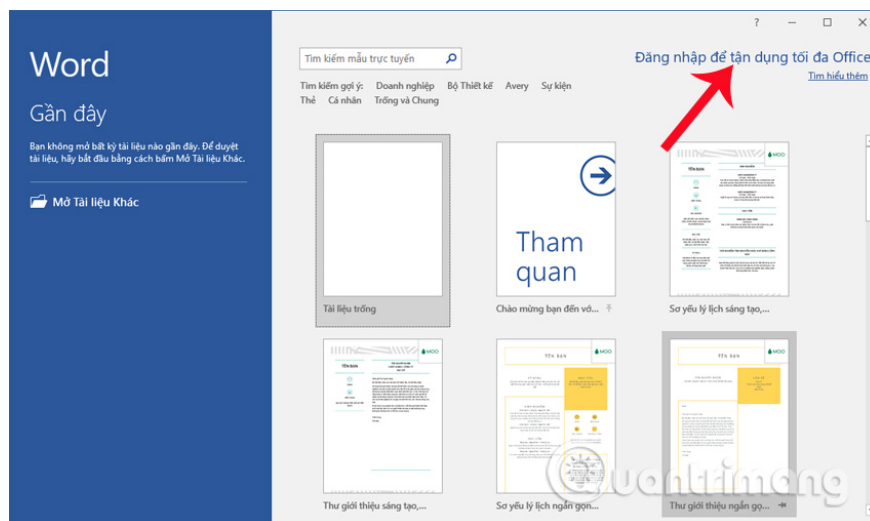

Step 7:

The installation and setup of Office 365 sets will take place shortly thereafter. **Note** , Office 365 will install online so users need to ensure a stable Internet connection and speed.

We will be waiting for this process to be completed to be able to use the Office 365 suite completely free, with full office tools such as Word, Excel, PowerPoint, Outlook, OneNote, Access and Publisher.

After installation is complete, users will **enter the email address of** the university used to register and the password for the account created in the previous step to register for use, as well as receive many other incentives.

Above is a tutorial on how to use and download the free Office 365 suite for Microsoft students and teachers. The registration process is relatively quick, without too many complicated steps. Users only need to prepare email addresses of eligible schools.

I wish you all success!
