

# How to Reinstall Cydia

In the event that you accidentally delete Cydia from your jailbroken iOS device, you can reinstall the application without having to completely re-jailbreak your device. You can reinstall Cydia either by using Redsn0w on your computer, or...

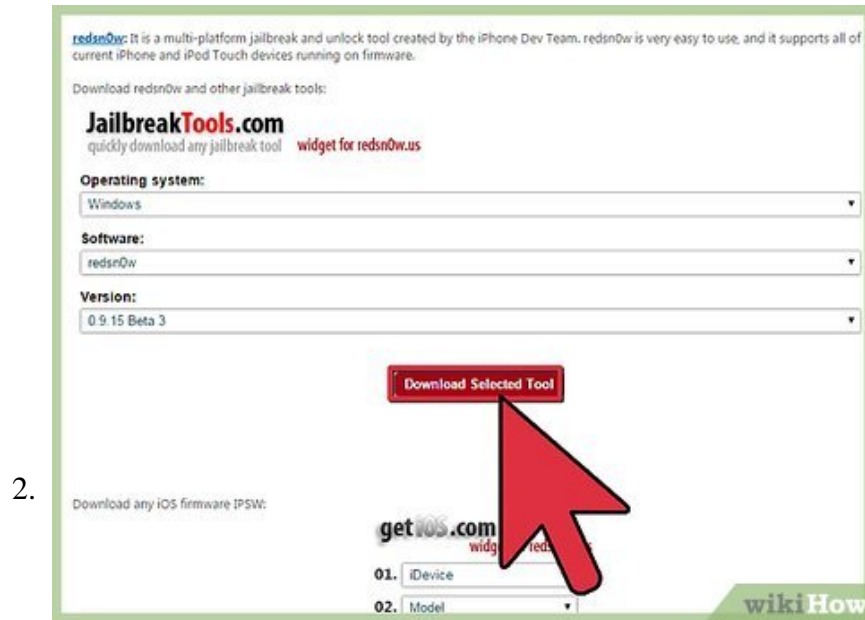

Method 1 of 2:

## Reinstalling Cydia using Redsn0w

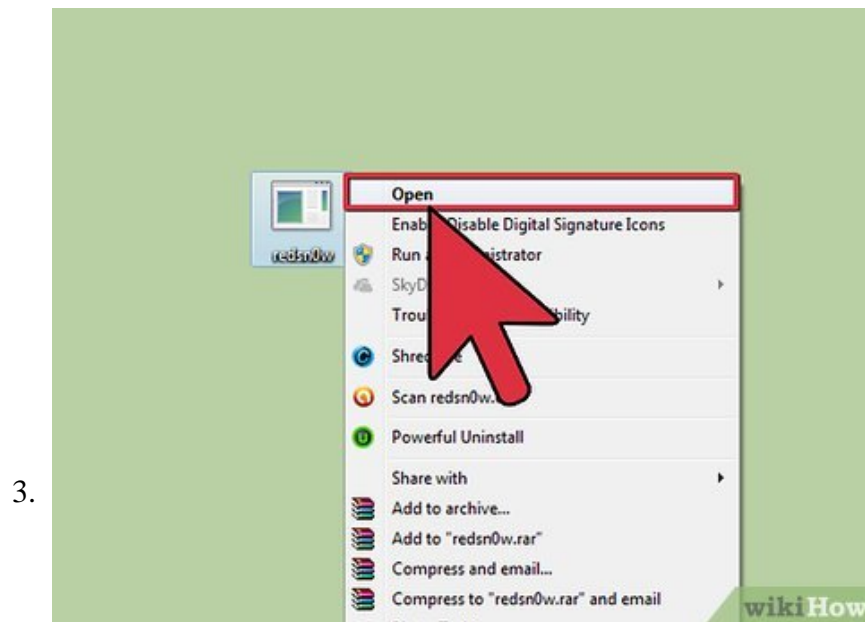

1.

Go to the official Redsn0w website at <http://www.redsn0w.us/2010/03/download-direct-links-jailbreak-guides.html>.

Select the option to download and install Redsn0w to your computer.

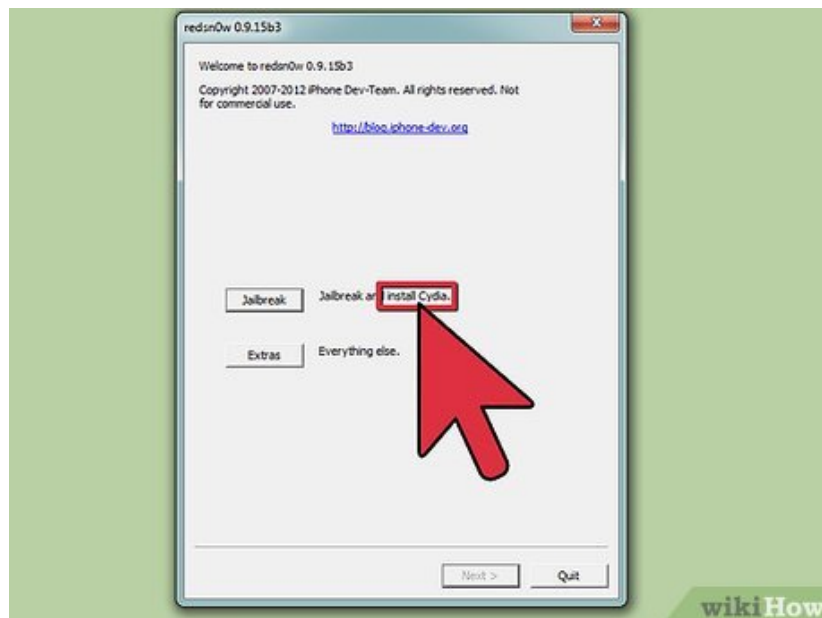

Launch the Redsn0w application after installation is complete.

4.

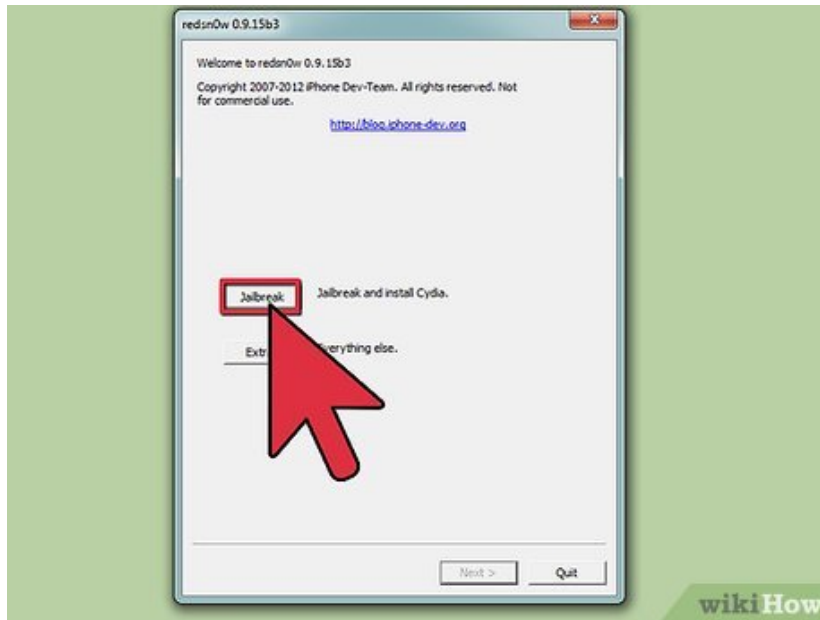

**Connect your iOS device to your computer using a USB cable.**

5.

**Select the option to 'Run' Redsn0w from within the application, and place a checkmark next to 'Install Cydia.'**

6.

**Click on the 'Jailbreak' button.**

7.

**Wait for Redsn0w to inform you that Cydia has been successfully installed on your iOS device.<sup>[1]</sup>**

Method 2 of 2:

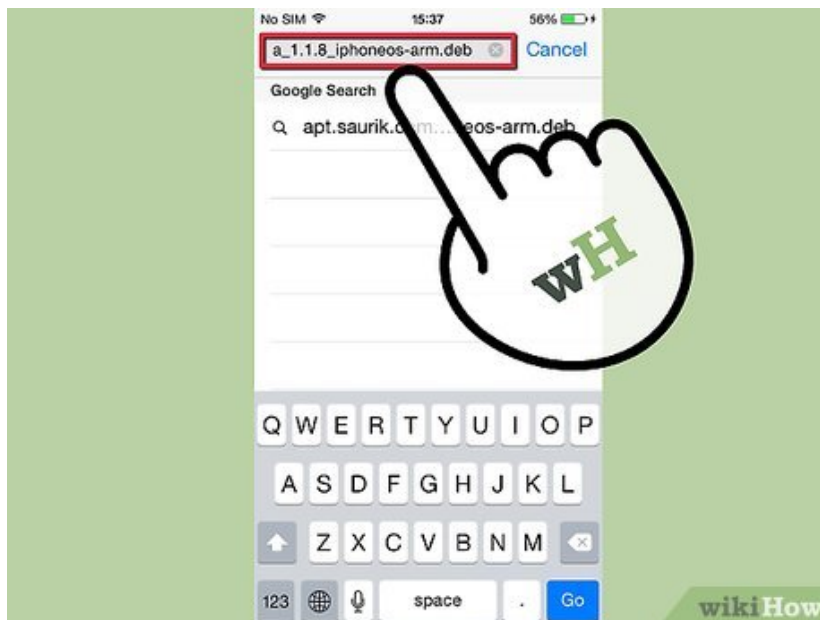

**Reinstalling using iFile**

1.

**Launch Safari on your iOS device.**

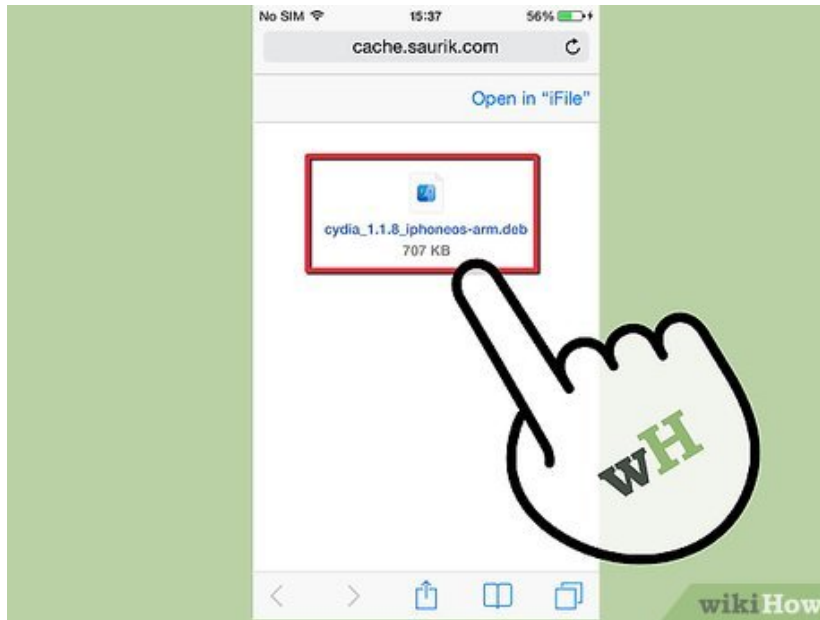

2.

**Enter the following URL into the address bar of Safari:**

[http://apt.saurik.com/debs/cydia\\_1.1.8\\_iphoneos-arm.deb](http://apt.saurik.com/debs/cydia_1.1.8_iphoneos-arm.deb). This link will allow you to install Cydia directly on your device without having to use a computer or other third-party applications.

3.

Select the 'Install' option offered by iFile, and wait for Cydia to complete installation.

4.

Close and restart the iFile application. Cydia will be reinstalled on your iOS device.<sup>[2]</sup>
