

# How to reload iPhone ringtones purchased on iOS 11

Restoring purchased ringtones on iPhone and iPad from iOS 11 onwards is quite easy. Follow these steps to do that.

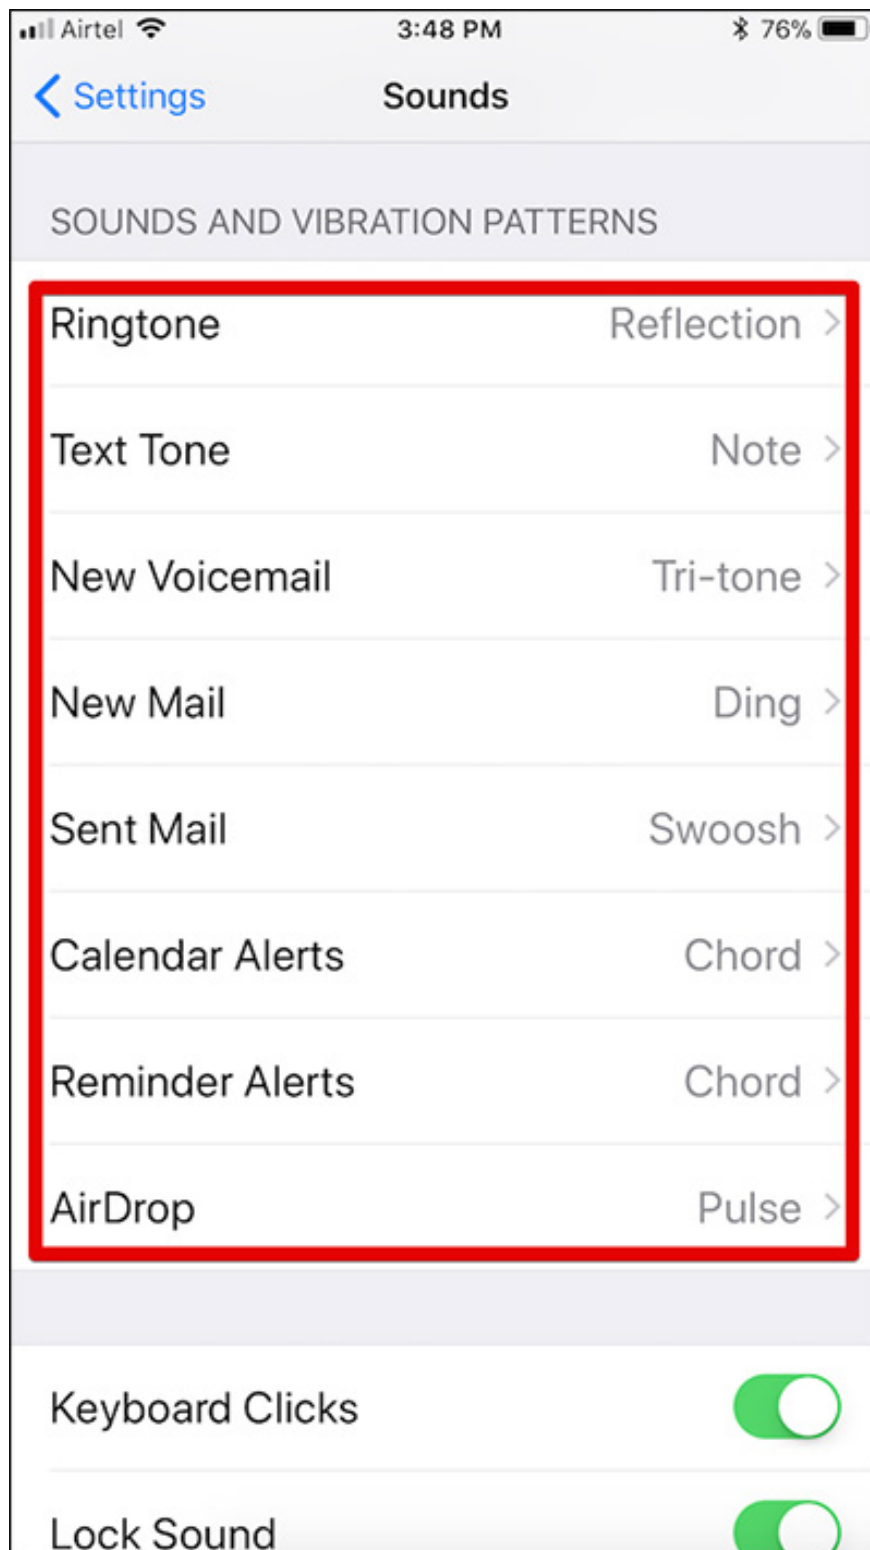

If you accidentally delete a favorite ringtone and don't know how to retrieve it, don't worry too much, especially when you're running iOS 11 on iPhone. Restoring purchased ringtones on iPhone and iPad from iOS 11 onwards is quite easy. Follow these steps to reload the iPhone ringtone purchased from Apple Store.

**Step 1.** Open the **Settings** app on your iOS device.

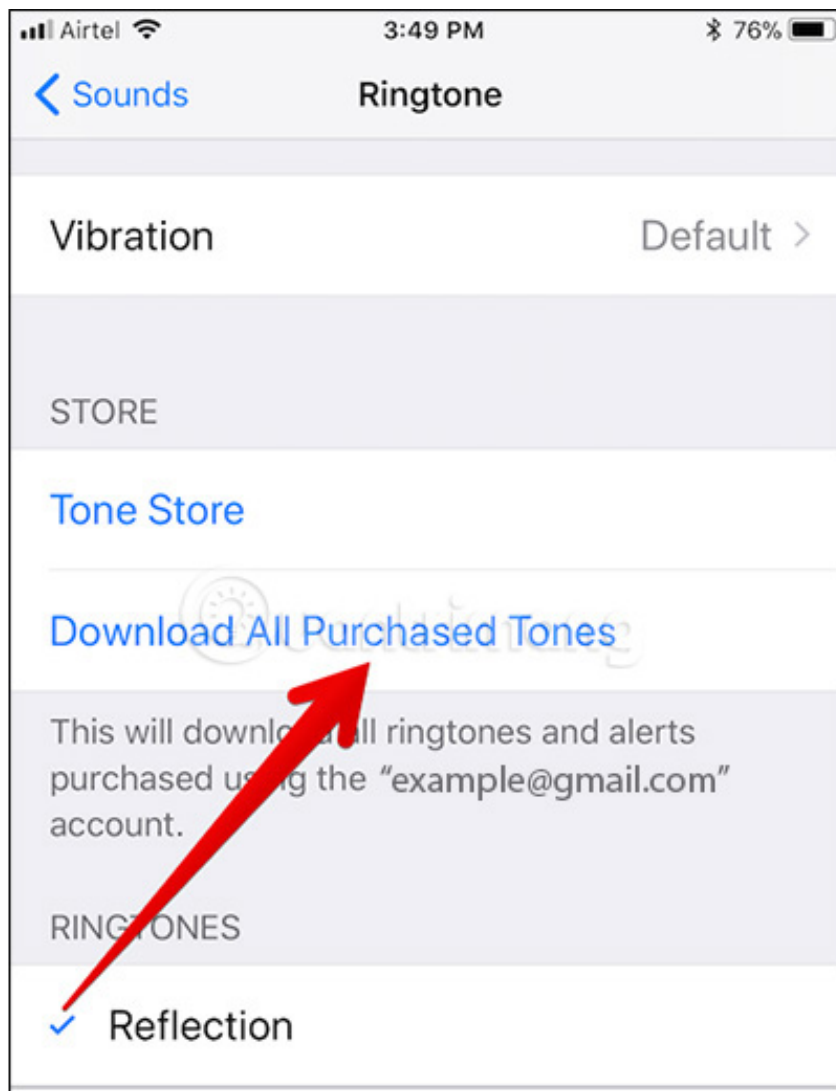

**Step 2 .** Choose **Sounds or Sounds & Haptics**.

**Step 3 .** Next, select a sound type below **SOUNDS AND VIBRATION PATTERNS** .

Find the **Download All Purchased Tones** option and touch it.

Now, iOS will automatically download all the ringtones and tones you have purchased from iTunes.

You will find them in the Sounds or Sounds & Haptics section.

**Note:** You will not be able to reload the purchased ringtone if the owner has deleted it from the iTunes store.

Make the most of these ringtones to customize message notification sounds, ringtones, schedule sounds, new mail notification tones, etc.

With iTunes 12.7, you cannot download applications or ringtones. However, you can still access all previously downloaded ringtones in the iTunes Media folder and can transfer them to your iOS device.
