

# How to remove apps on iPhone with just 2 simple steps

There are many ways to uninstall applications on iPhone, but in this article I will share a very brief trick in just 2 steps, see here!

If you want to perform a more complicated way, please refer to the article how to install and delete iPhone apps. And the method that I am about to show below applies to all iPhone models: iPhone 6, 7, 8, X, even iPhone 11.

## Method 1: Uninstall an application on iPhone

This is how you will uninstall each application.

**Method 1** : Press and hold on the application icon then select 'Delete application'

## **Method 2: Press and hold longer to delete multiple applications**

Click on the icon and hold longer than usual, then the screen will appear more X marks on the application. If you want to delete an application, click on its X mark.

**Step 1** : Click the 'x' on the application you want to delete.
