

How to remove BetterAds advertising videos completely and quickly.

Are you experiencing persistent BetterAds video ads appearing on your browser or computer? This could be a form of annoying adware that negatively impacts your browsing experience. In this article, Free Download will guide you through simple and effective ways to completely remove BetterAds.

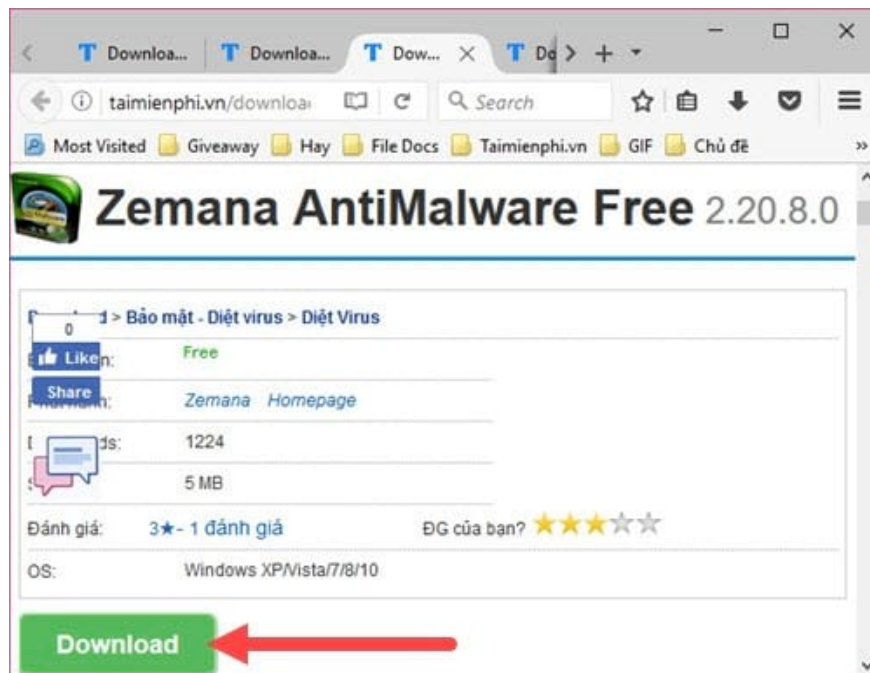

BetterAds are annoying ads on computers. Let's explore with Free Download how to effectively remove these video ads without slowing down your system.

Instructions on how to remove BetterAds video ads.

1. Use Zemana AntiMalware Free

This software specializes in handling computers infected with adware and other types of malware that deeply penetrate the system.

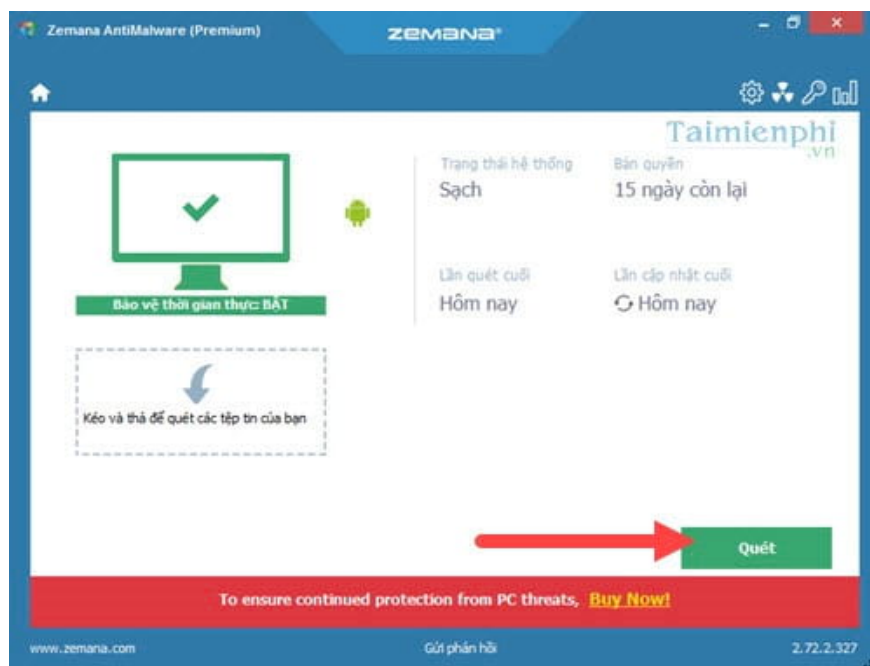

Step 1: Download Zemana AntiMalware here.

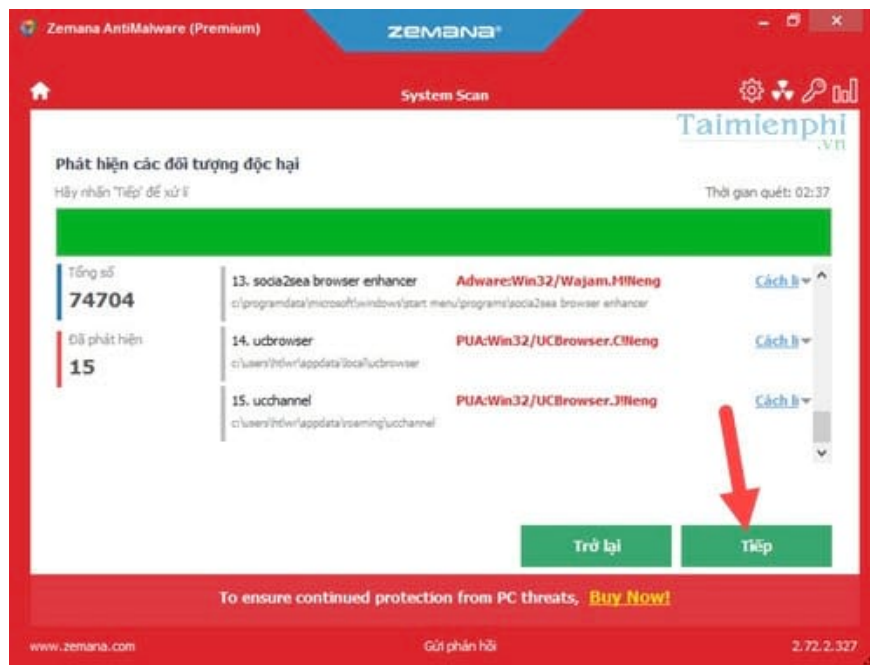

Step 2: Since the software **supports Vietnamese** , you can select Vietnamese as the language during installation if you wish.

Step 3: After installation is complete, open the application and click on **scan** .

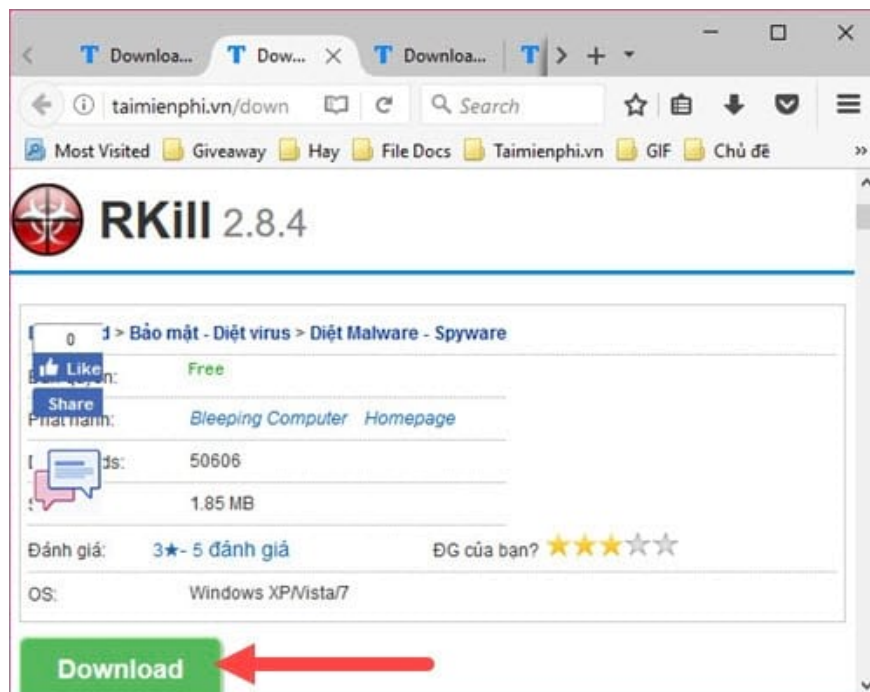

Step 4: Once the scan is complete, click **Next** to proceed with deleting the malicious files, and then **restart your computer** to finish.

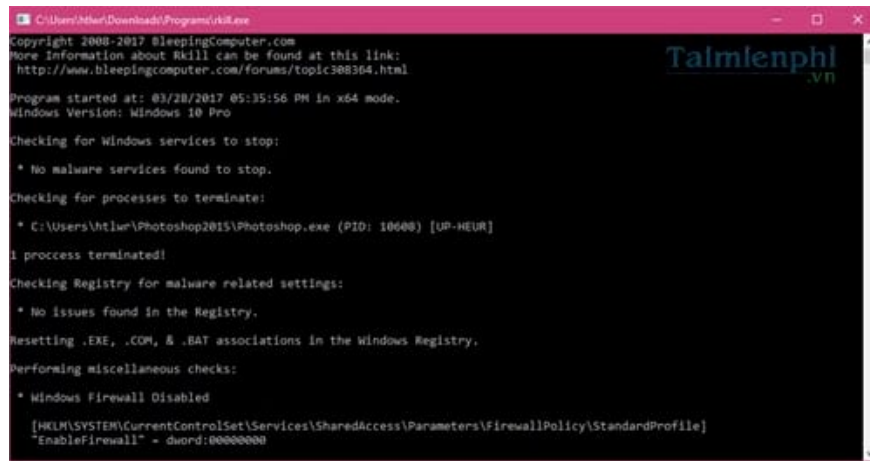

2. Use RKill

When it comes to compactness and efficiency, RKill is the software that meets all those criteria. It requires no complicated installation or multiple selection steps. Your only task is to download RKill to your computer and run it.

Step 1: Download Rkill here.

Step 2: After downloading Rkill, simply click on the software and it will **automatically scan** your system.

```
C:\Users\htur\Downloads\Programs\rkill.exe
Copyright 2008-2017 BleepingComputer.com
More information about Rkill can be found at this link:
http://www.bleepingcomputer.com/forums/topic398364.html

Program started at: 03/28/2017 05:35:56 PM in x64 mode.
Windows Version: Windows 10 Pro

Checking for Windows services to stop:
* No malware services found to stop.

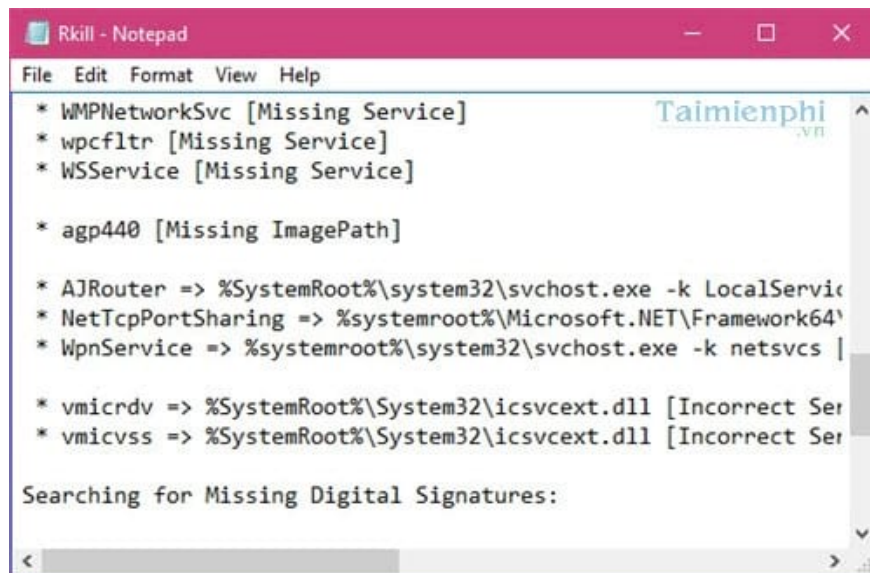

Checking for processes to terminate:
* C:\Users\htur\Photoshop2015\Photoshop.exe (PID: 10600) [UP-HEUR]
1 process terminated!

Checking Registry for malware related settings:
* No issues found in the Registry.

Resetting .EXE, .COM, & .BAT associations in the Windows Registry.

Performing miscellaneous checks:
* Windows Firewall Disabled
[HKEY_LOCAL_MACHINE\SYSTEM\CurrentControlSet\Services\SharedAccess\Parameters\FirewallPolicy\StandardProfile]
"EnableFirewall" = dword:00000000
```

Step 3: Next, a notification will appear on the screen; you can click on it to see the scanning status on your device.

```
Rkill - Notepad
File Edit Format View Help

* WMPNetworkSvc [Missing Service]
* wpcfltr [Missing Service]
* WSService [Missing Service]

* agp440 [Missing ImagePath]

* AJRouter => %SystemRoot%\system32\svchost.exe -k LocalService
* NetTcpPortSharing => %systemroot%\Microsoft.NET\Framework64\
* WpnService => %systemroot%\system32\svchost.exe -k netsvcs |

* vmicrdv => %SystemRoot%\System32\icsvcext.dll [Incorrect Ser
* vmicvss => %SystemRoot%\System32\icsvcext.dll [Incorrect Ser

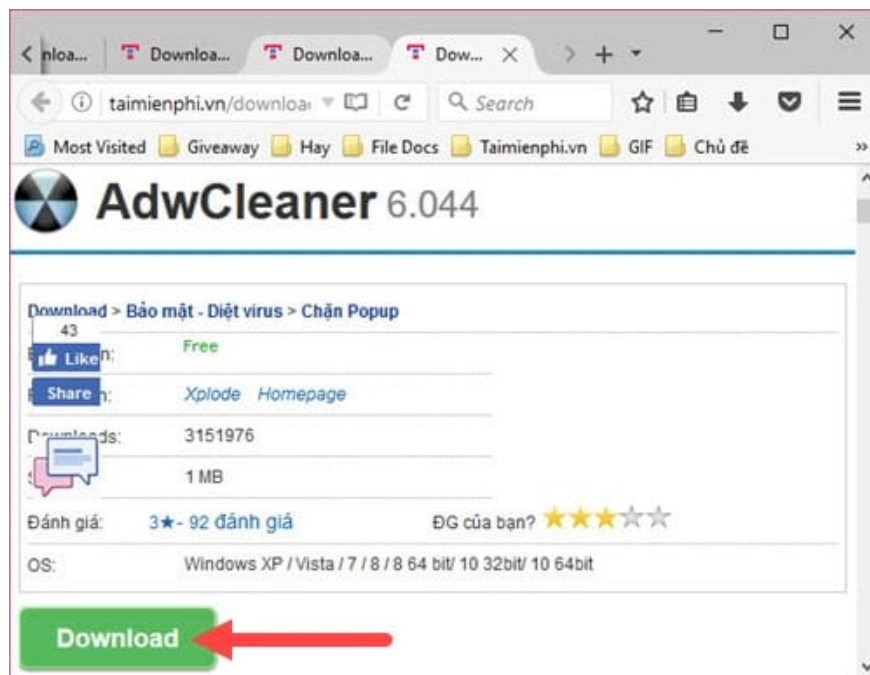

Searching for Missing Digital Signatures:
```

But that's not all; to complete the process, you need to **restart your computer** .

3. Use AdwCleaner

This is one of the most popular software programs for eliminating spyware and adware; no ad will escape AdwCleaner's notice. However, please note that when using AdwCleaner to scan, you should close all programs because AdwCleaner will abruptly shut them down, which can cause software errors.

Step 1: Download AdwCleaner here.

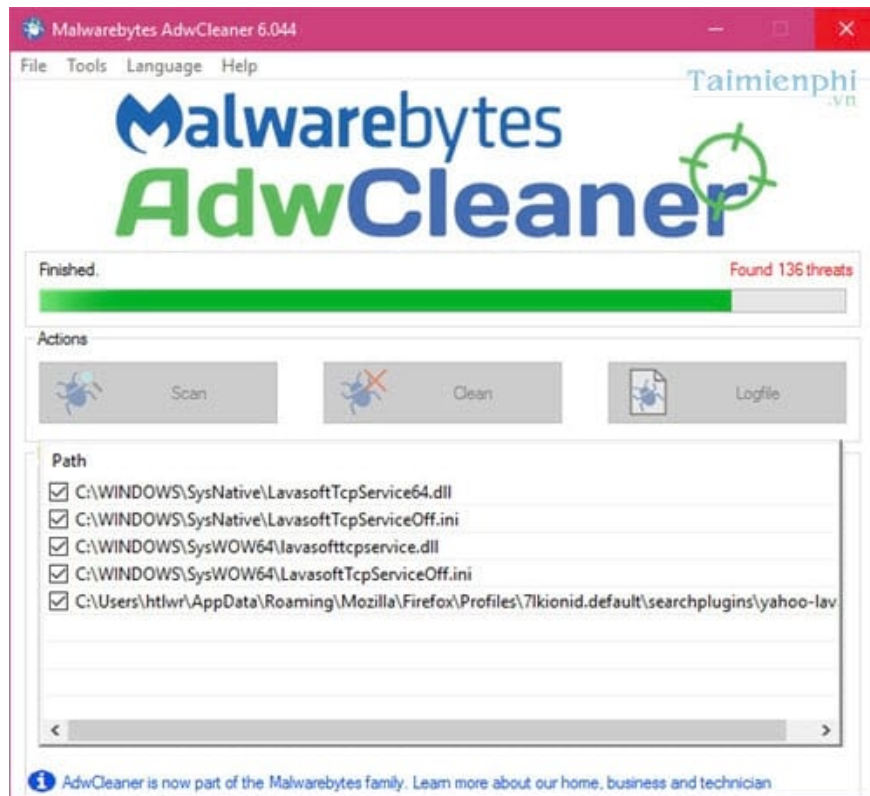

Step 2: No installation is required; simply open AdwCleaner and click **Scan** .

Step 3: Wait for the software to finish scanning, then click **Clean** .

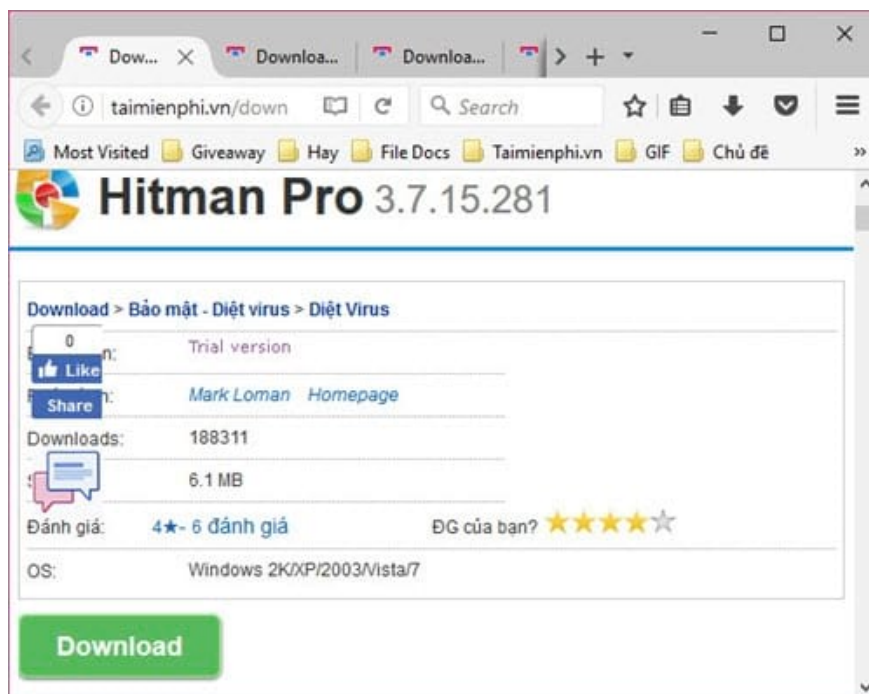

The process of removing malicious ads will take quite a long time, so it's best not to run other programs alongside AdwCleaner.

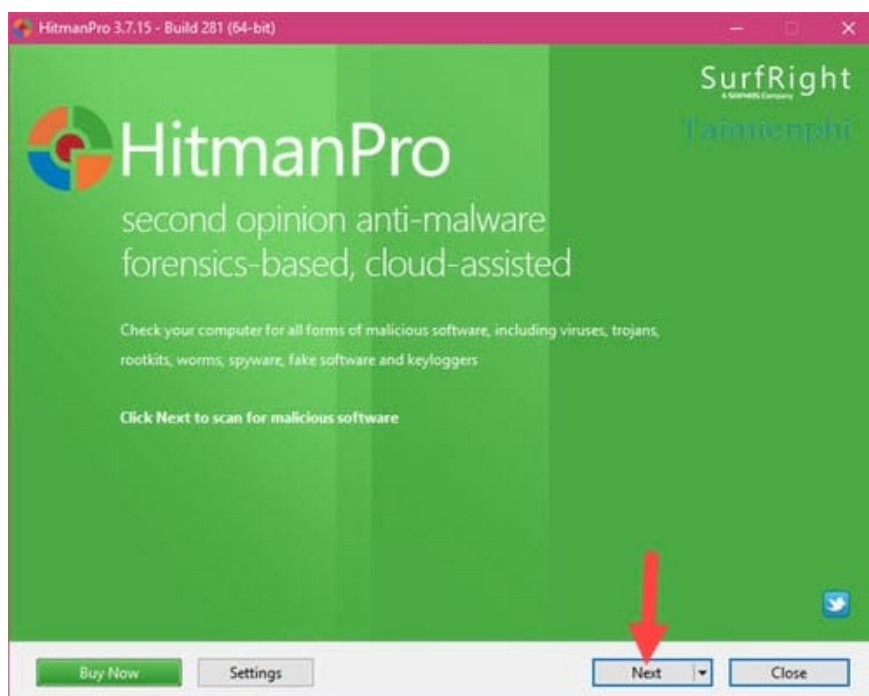

4. Use Hitman Pro

This is the most professional and feature-rich software, capable of eliminating not only spyware and malware but also common viruses and other malicious code very effectively.

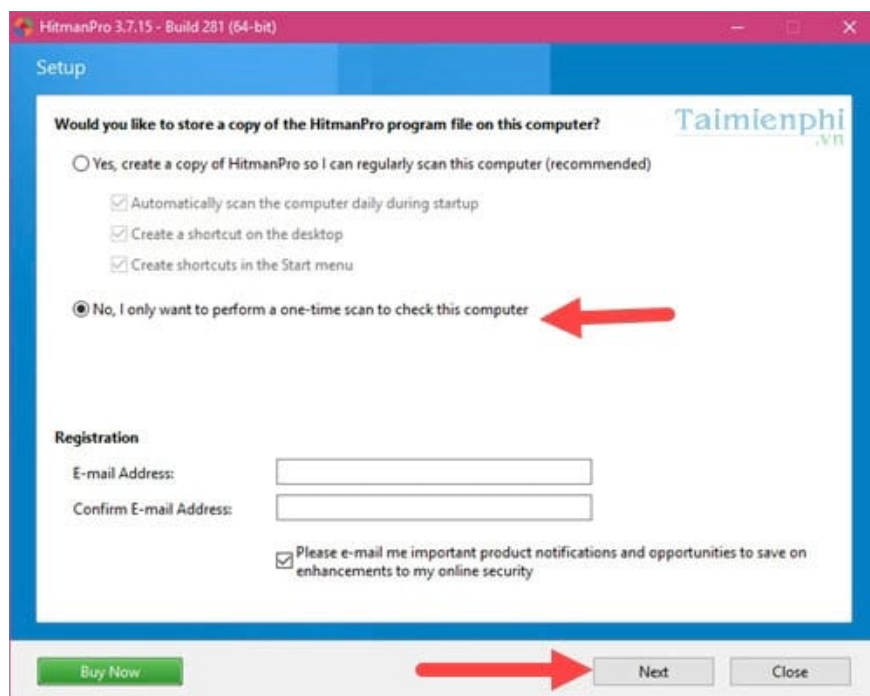

Step 1: Download **Hitman Pro** here.

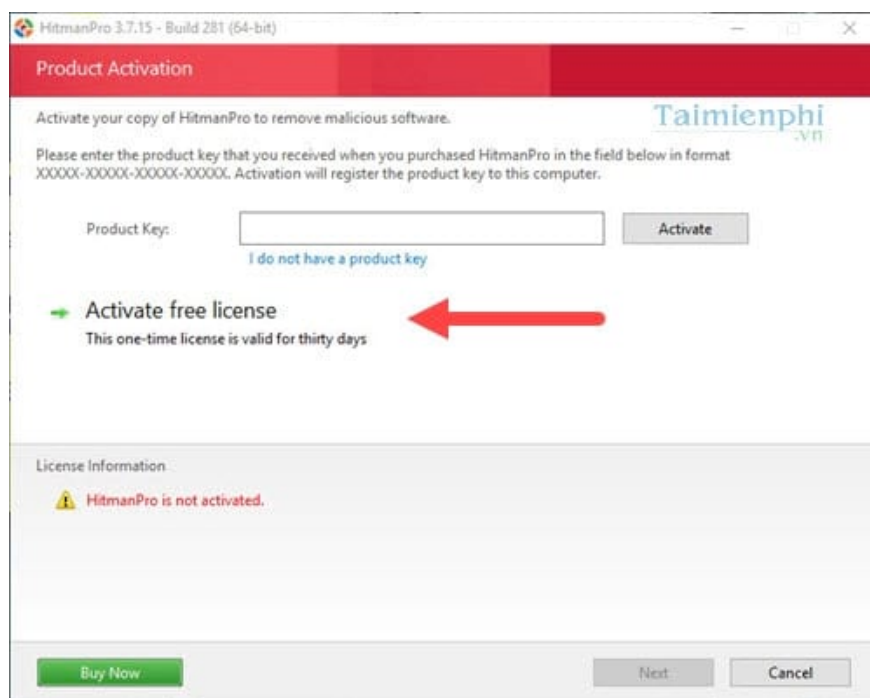

Step 2: Installing Hitman Pro is quite simple; just click **Next** and you're done.

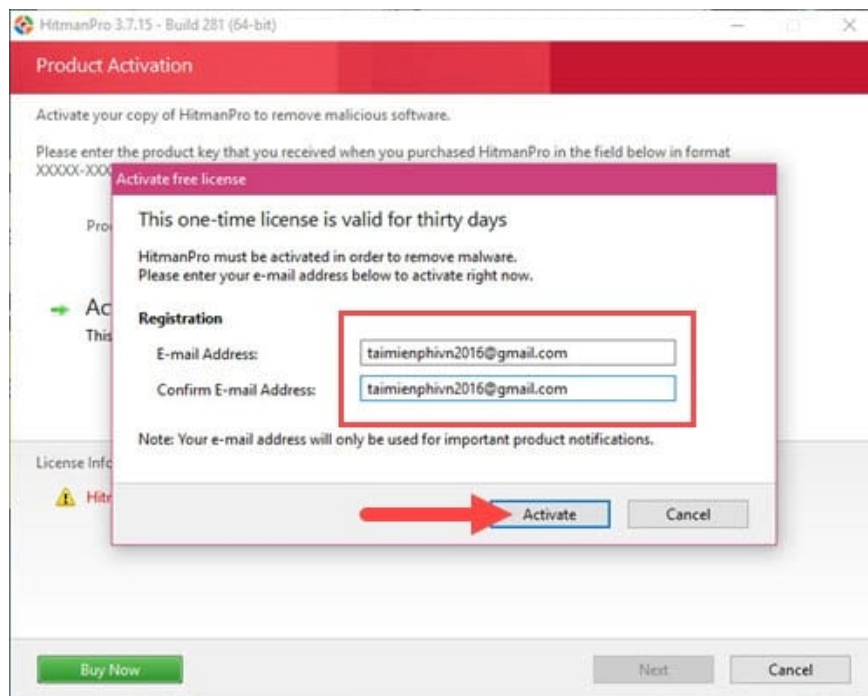

Step 3: This section will ask you to select features for Hitman Pro, including running with the system. Choose **NO** and then press **Next** .

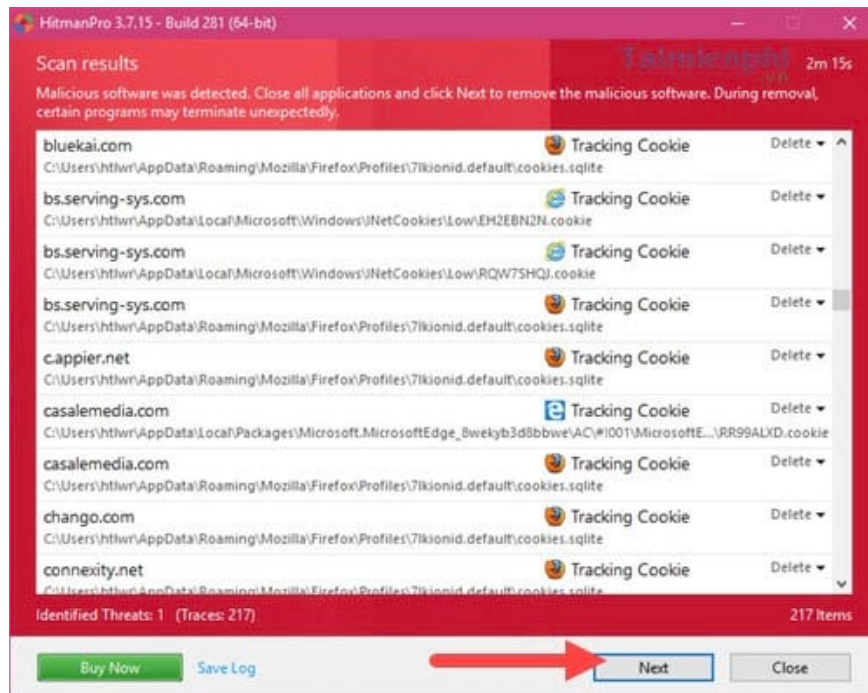

Step 4: Select "**Activate free license**" to activate HitMan Pro's free version. Although free, it's very effective.

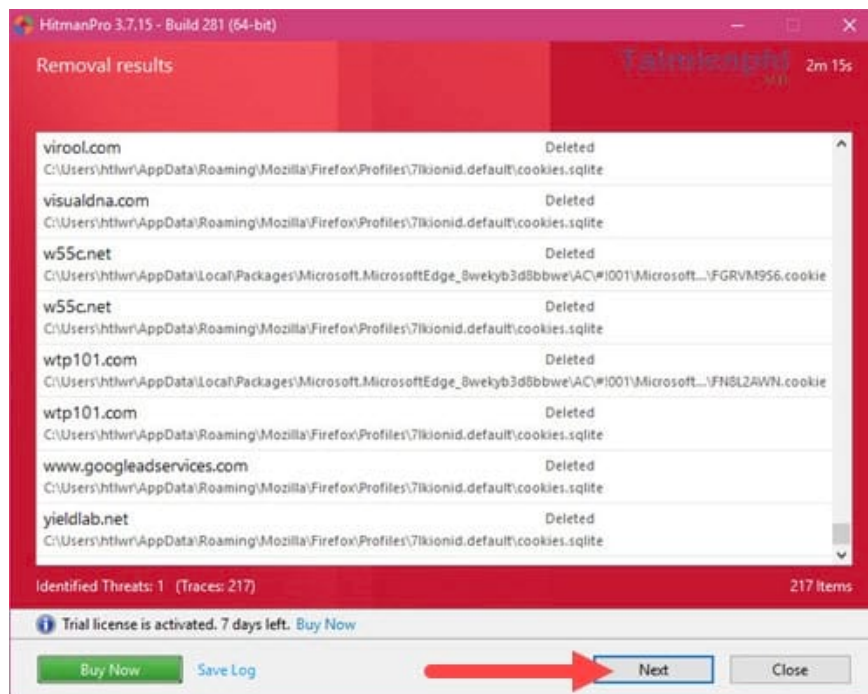

Step 5: Enter your email address twice and then click **Activate** .

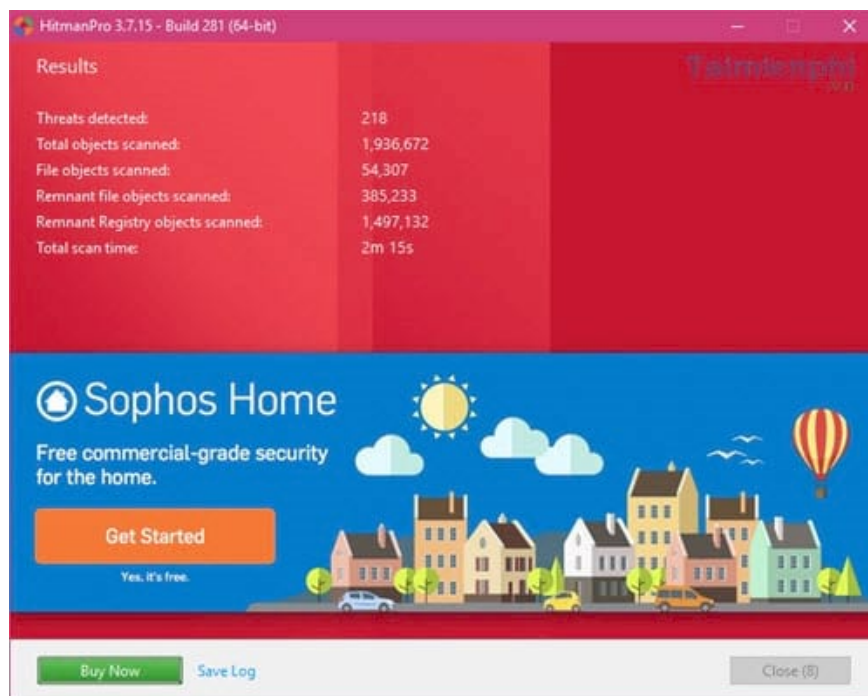

Step 6: The software will then automatically scan your computer for malware. Click **Next** to view the results.

Step 7: All viruses and malware have been removed. Continue clicking **Next** to view the statistics.

Detailed statistics about your computer after scanning for viruses and removing BetterAds advertising videos.

After removing BetterAds advertising videos, your computer will run more smoothly and avoid the risks of adware or spyware. If you want long-term protection for your device, consider using ad-blocking tools and regularly scanning your system to remove malware.
