

# How to remove black strip of YouTube videos on UltraWide screen

When watching YouTube videos on screen UltraWide will appear black, due to the large screen size.

UltraWide screen with a large ratio of 21: 9 provides an extremely interesting experience compared to a 16: 9 screen. Especially when playing games or watching videos on UltraWide screen, the image quality will be much sharper. However, when watching YouTube videos on the browser will display a black strip on the screen, because currently does not support the screen ratio 21: 9. If so, users can install the UltraWideo utility to hide the black space that appears on the video screen. The following article will guide you how to use the UltraWideo utility on the Chrome browser.

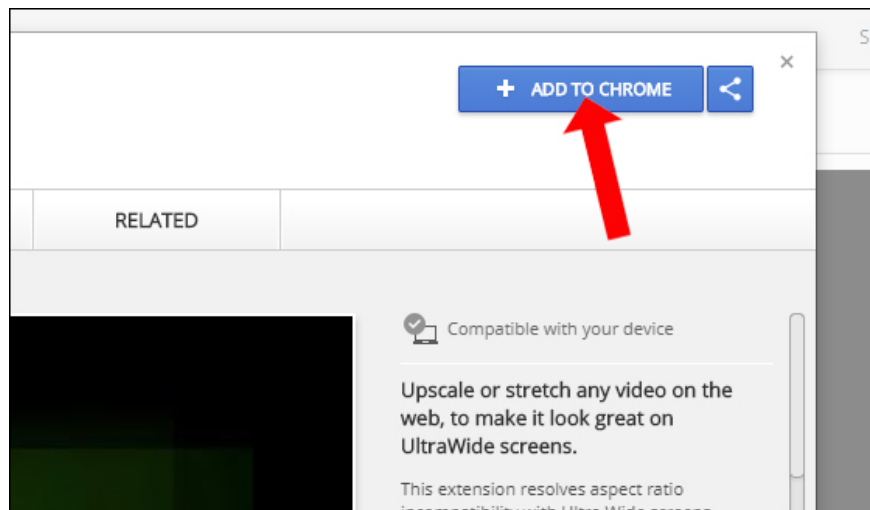

1. How to get a representative video on Youtube
2. Instructions on how to create a YouTube Channel
3. 2 ways to replay, replay YouTube videos automatically

## How to edit YouTube videos on UltraWide screen

### Step 1:

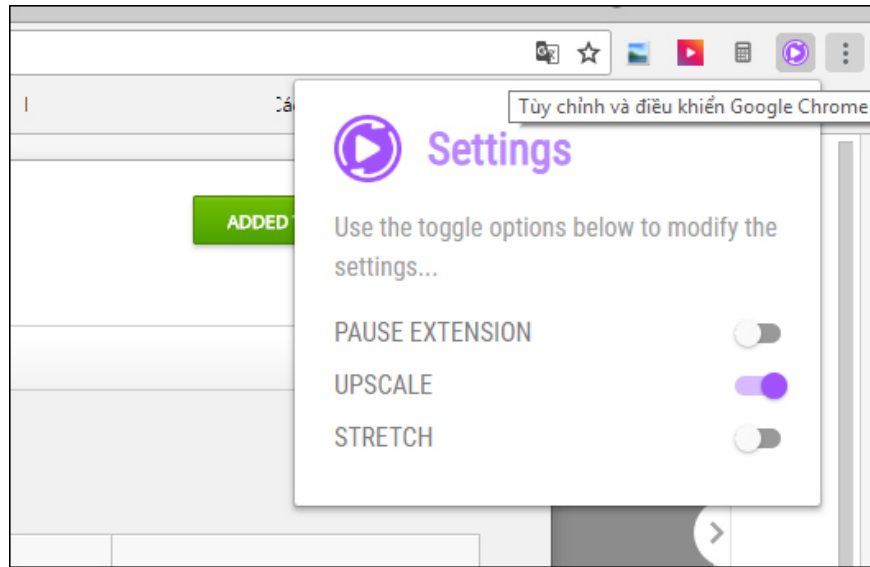

Click on the link below to install the UltraWideo utility on your browser. Click **Add to Chrome** to install the utility.

1. Download the UltraWideo Chrome utility
2. Download the UltraWideo Firefox utility

## Step 2:

Then click on the utility icon on your browser and you will see a list of options, with different options.

**Upscale** is a balanced view that is enabled by default. The video will be close to the two sides of the screen and only a small black frame will appear at the sides.

Stretch is an asymmetric stretch mode.

When you have finished selecting the type, see if you open YouTube videos in full screen mode. To turn off the utility, click Pause Extension.

UltraWide utility not only works on YouTube but also in many websites like Dailymotion, Netflix, Vimeo, . or video players like HTML5 Video. The 2 black bands on the left and right sides of the YouTube screen will be narrowed to the maximum.
