

# How to Remove Home Button from File Explorer Windows 11

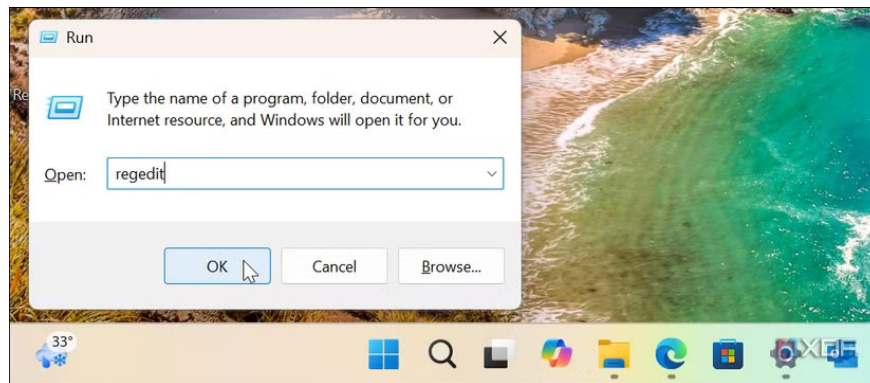

Another feature you might consider modifying is the Home page on Windows 11, if you don't like it you can remove it by tweaking the Windows Registry.

Windows 11 File Explorer offers many features that allow you to manage your data more easily, including a new user interface, duplicate tabs, and more. Another feature you might consider modifying is the Home page, which you can remove by tweaking the Windows Registry if you don't like it. Here's how to remove the Home button from Windows 11 File Explorer.

## How to Remove Home Button from File Explorer Windows 11

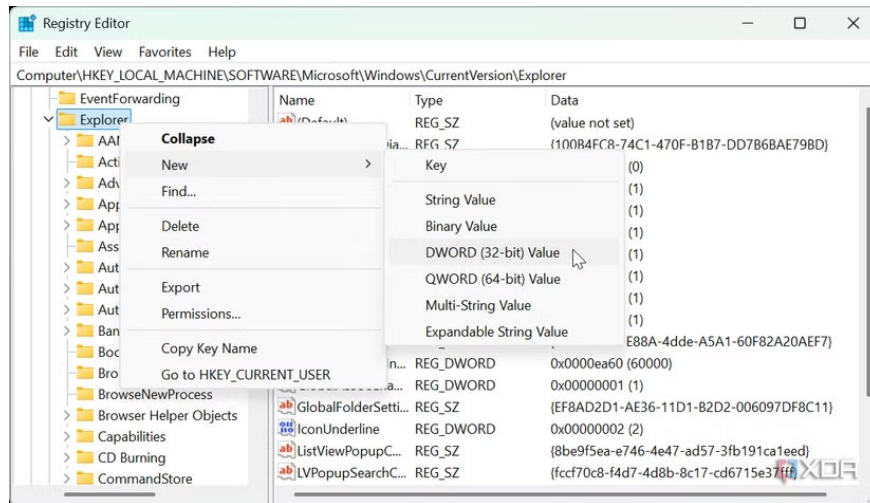

### Step 1:

First, you enter the **Windows + R** key combination to open the Run dialog box, type **regedit** and click OK.

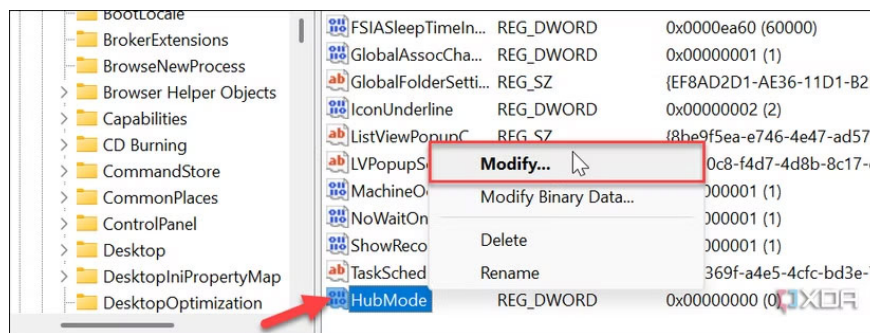

### Step 2:

You access the path **HKEY\_LOCAL\_MACHINE\Software\Microsoft\Windows\CurrentVersion\Explorer**. Next, **right-click on the Explorer key** and select **New > DWORD (32-bit) Value**.

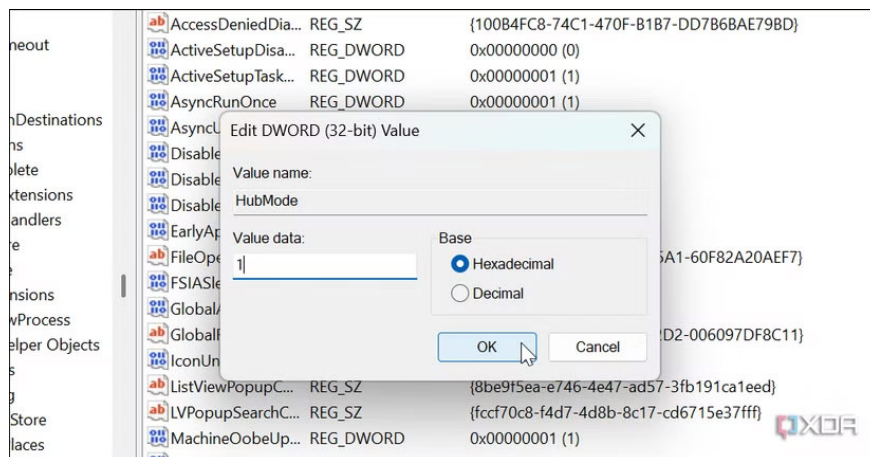

### Step 3:

Name the new value **HubMode** to save it. Right-click the new **HubMode** key and select **Modify**.

Then you need to change the value for the **HubMode** key from **0** to **1** and click OK.

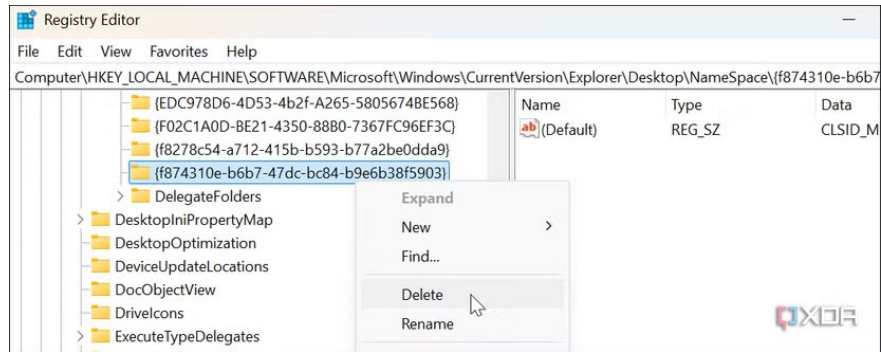

### Step 4:

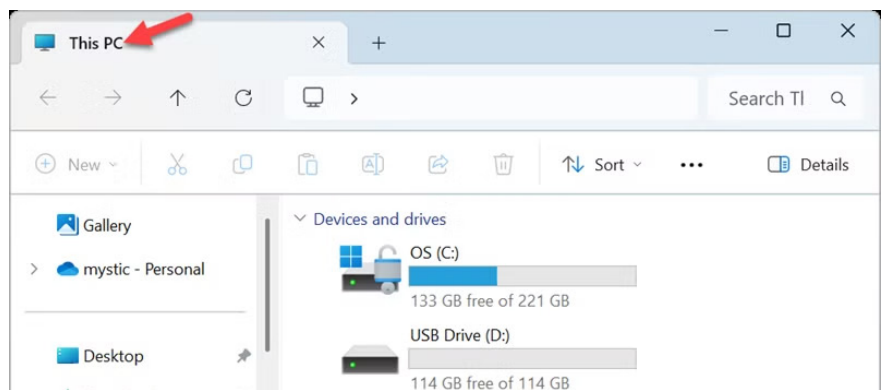

You access

**HKEY\_LOCAL\_MACHINESOFTWAREMicrosoftWindowsCurrentVersionExplorerDesktopNameSpace.**

You find the key {f874310e-b6b7-47dc-bc84-b9e6b38f5903} then right-click and **select Delete** to delete.

You restart File Explorer to apply the changes. Then you reopen File Explorer and the button will no longer appear and the default is This PC view.
