

How to remove image background in PowerPoint

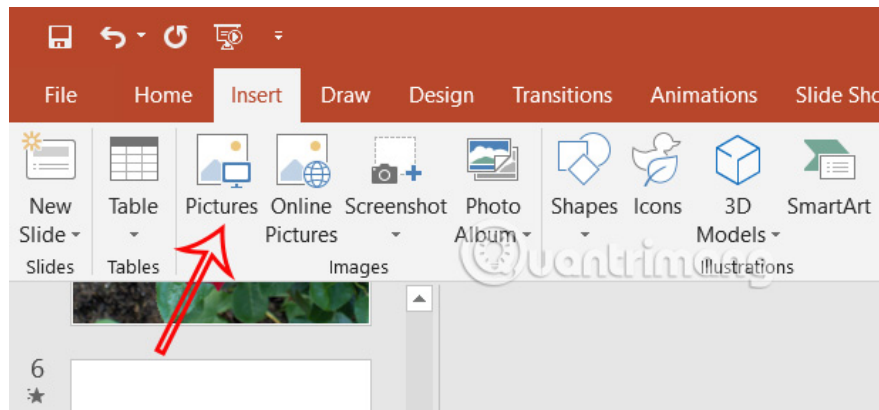

PowerPoint also has basic photo editing options to support users such as removing photo backgrounds in PowerPoint. When removing photo backgrounds, you can easily insert photos into slides without revealing the background image.

PowerPoint also has basic photo editing options to support users in the process of making slides, such as removing photo backgrounds in PowerPoint. When removing photo backgrounds, you can easily insert photos into slides without revealing the background. Below are instructions for removing photo backgrounds in PowerPoint.

Instructions for removing image background in PowerPoint

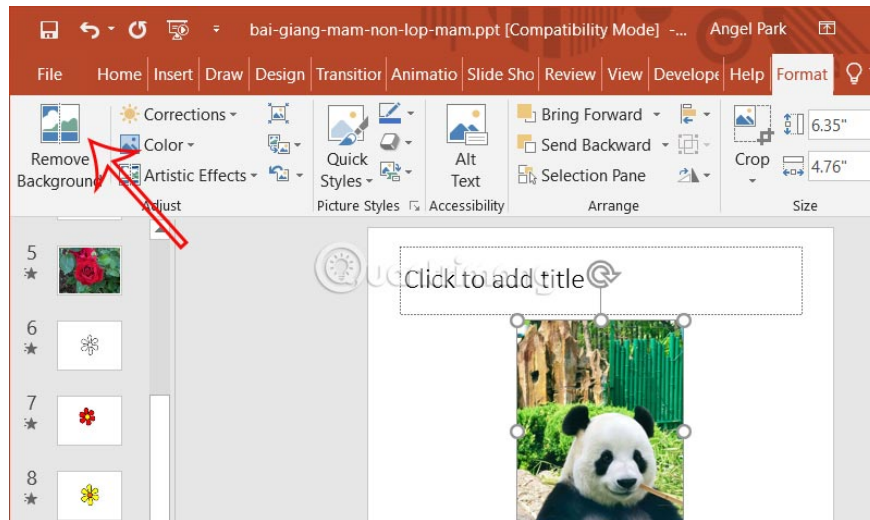

Step 1:

At the PowerPoint slide interface, users **click Insert** and then **select Pictures** to select the image they want to insert.

Step 2:

Double-click on the image inserted in the slide, then click **on the Format tab** and **select Remove Background** to adjust the image background.

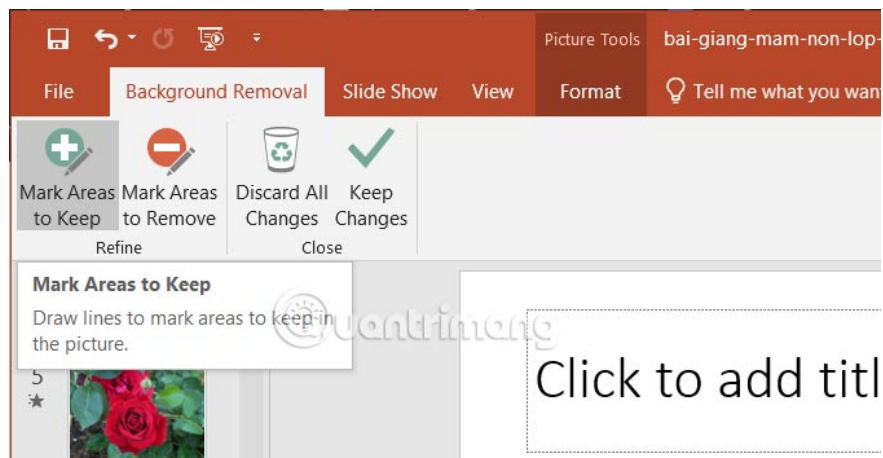

Step 3:

You will then see the image with the background turned purple with the background selected for deletion as shown below.

Step 4:

In case the image background is selected incorrectly, or you want to manually remove the background, look up and you will see the **Mark Areas to Keep** option to select the area you want to keep and **Mark Areas to Remove** to manually remove the image background on PowerPoint.

You will need to circle the area you want to keep or remove in the photo so that the tool can recognize it.

Click to add title

After you select the background to delete, the image has been removed as shown below. You continue to edit the image on PowerPoint as you like.
