

How to remove nail polish without using toxic acetone

Clean nails with acetone often causing unpleasant odors and harm nails. Don't worry because you can say goodbye to them and replace them with 5 ingredients below.

Nail polish is a way of making girls' rhythms, so changing the paint colors to match the fashion and one thing too normal, every time you want to change the paint color you have to use acetone to **fly the class**. Old **paint**, however, if you abuse too much acetone will lead to bad effects on your health. So you can apply it in other ways to be able to safely clean your nail polish with your own health. Here TipsMake.com please share with you reading 5 ways to clean nail polish with easy-to-find materials but bring high efficiency for your beauty, please consult now.

Wipe your nails with vinegar and lemon juice

This way will fit into a thin nail polish, you only need 1 tablespoon of fresh lemon juice, add a tablespoon of white vinegar to mix these 2 together at a ratio of 1: 1. Soak your fingers for 5-10 minutes in warm water. Now, dip a cotton ball in the mixture of lemon and vinegar and rub on your nail polish gently. Only 10 to 20 seconds for each nail you will completely remove the traces of "ugly" old nails effectively returning you a nice and clean hand.

Bagking soda and warm water

Baking soda not only helps you have a bright white tooth, but it also has a very special use to help you remove nail polish, a very simple way you can take a little bit of baking soda and water. warm to form a paste. Use this mixture to apply on painted parts and leave the mixture on the nail for about 15 minutes. Then use a small brush to gently scrub the tip of the nail to remove the paint completely. Finally, rinse your hands with warm water and clean the cloth with a towel so you have a clean set of nails.

Glass cleaning solution

If you do not want to go out to buy the other ingredients, you can use the right glass cleaner in the home, this is a proven method that is quite effective and can remove nail polish in a good way. and give results immediately. You only need to use a damp cloth to soak into the water solution to wipe the glass and rub gently on the foundation.

Strawberry husband's shaving cream

You will be surprised about the use of nail polish cleaning from strawberry shaving cream. The ingredients in the shaving cream will help remove the nail polish from your hands. In order to be able to purge, you must use a foamy cream that contains a lot of foam, then apply it on the tips of your nails and scrub the circular motion, eventually you just need to clean your nails with warm water that you have a hand beautiful

Wine

Do you believe wine is capable of bleaching yellowed nails even flying nail polish? So take the wine to try it right away if you don't know, just use a cotton swab or cotton ball to soak a little in the wine and gently wipe it on the nail. After about 15 minutes, you can use a warm towel to wipe off the clean foundation, now a warm towel can also easily remove the paint quickly.
