

**Unlocker** software is one of the software used by many people to remove stubborn files. To remove software that is not in the **Control Panel** , we open the Unlocker software and select the installation software folder and proceed to **delete** them.

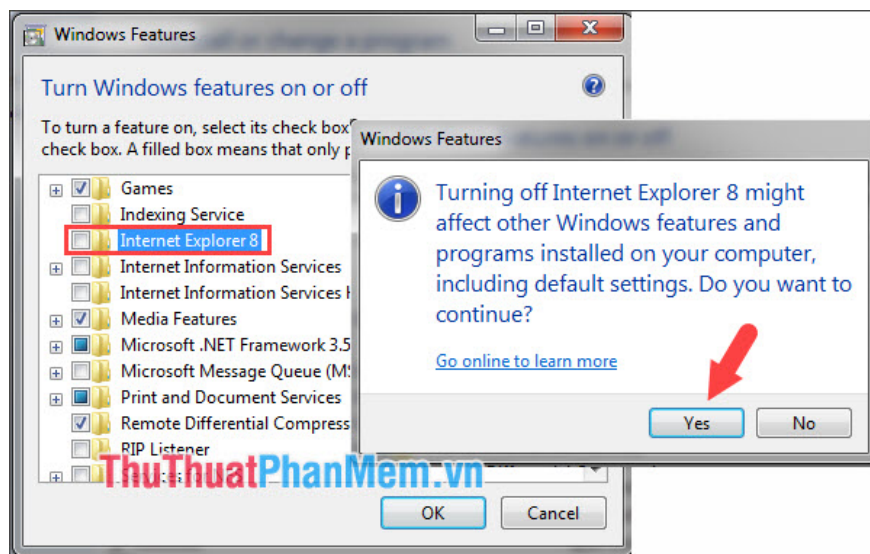

## 2. Uninstall system software in Windows Features

Some system software such as Windows Media Player, Internet Explorer . does not show up in the Uninstall or change a program that we have to install through the following way.

**Step 1:** In the **Programs and Features** menu , we click **Turn Windows features on or off** .

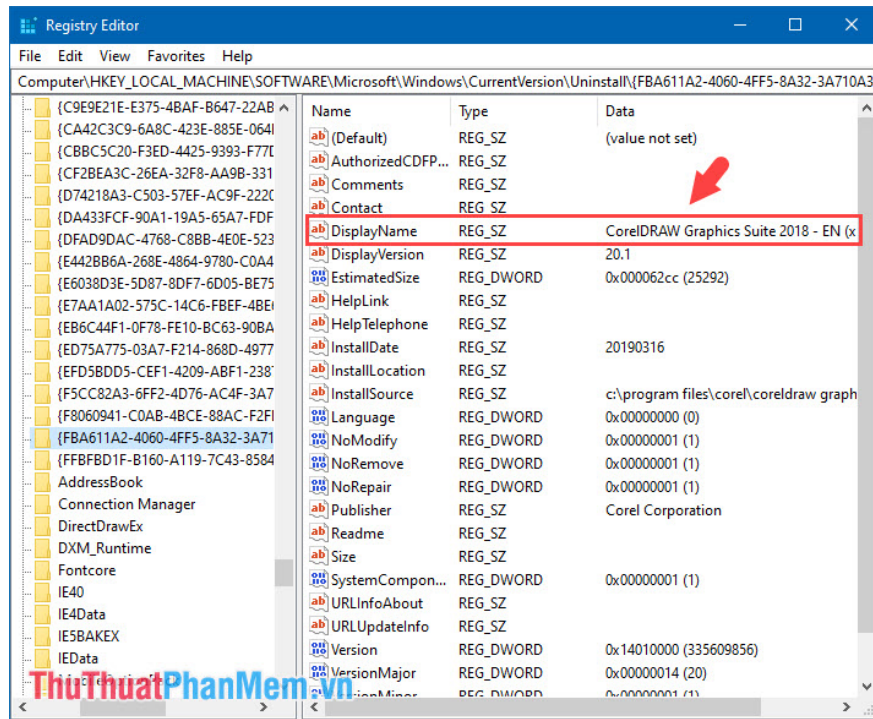

**Step 2:** We put a checkmark in the software we want to delete. I will take for example with **Internet Explorer** software . If a message appears, we click **Yes** and **OK** and restart the computer is complete.

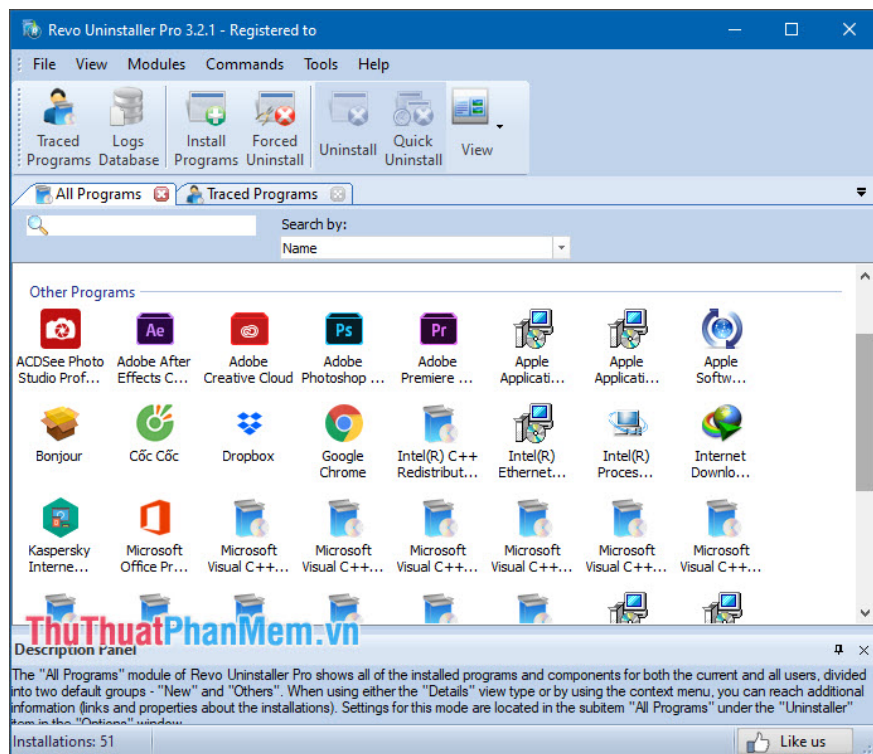

### 3. Delete the Registry of software not shown in the Control Panel

We open **Registry Editor** and access the following path:  
*HKEY\_LOCAL\_MACHINE\SOFTWARE\Microsoft\Windows\CurrentVersion\Uninstall*

Then we click and search the registry keys as shown below. Here, you notice the DisplayName item if it is the correct software we proceed to delete that registry.

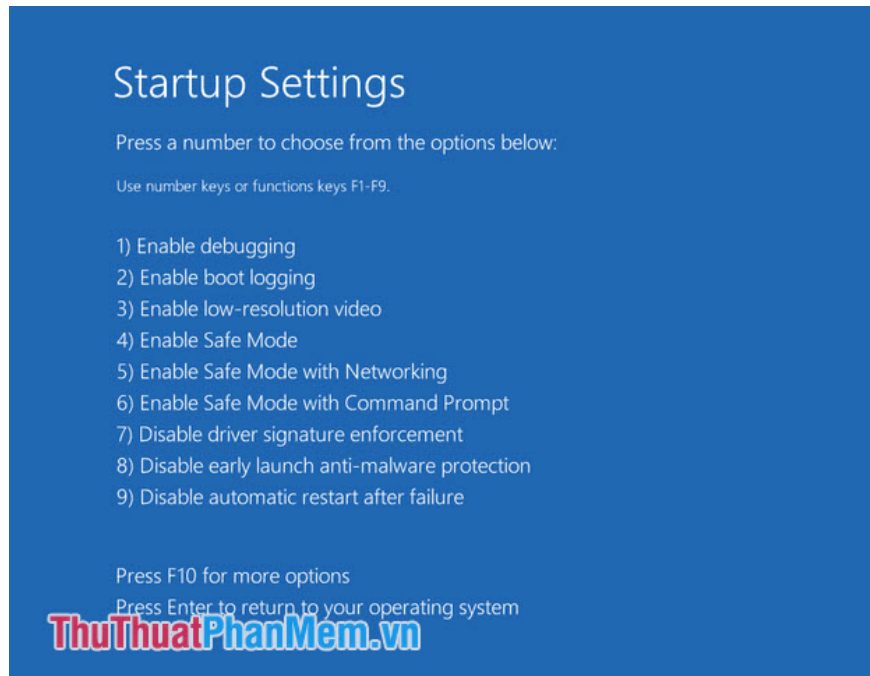

## 4. Use professional file removal software like Revo Uninstaller, IOBIT Uninstaller .

If we cannot uninstall software that is not in the Control Panel, we may need the help of professional uninstall software such as Revo Uninstaller, IObit Uninstaller to scan and uninstall the software. display in Control Panel.

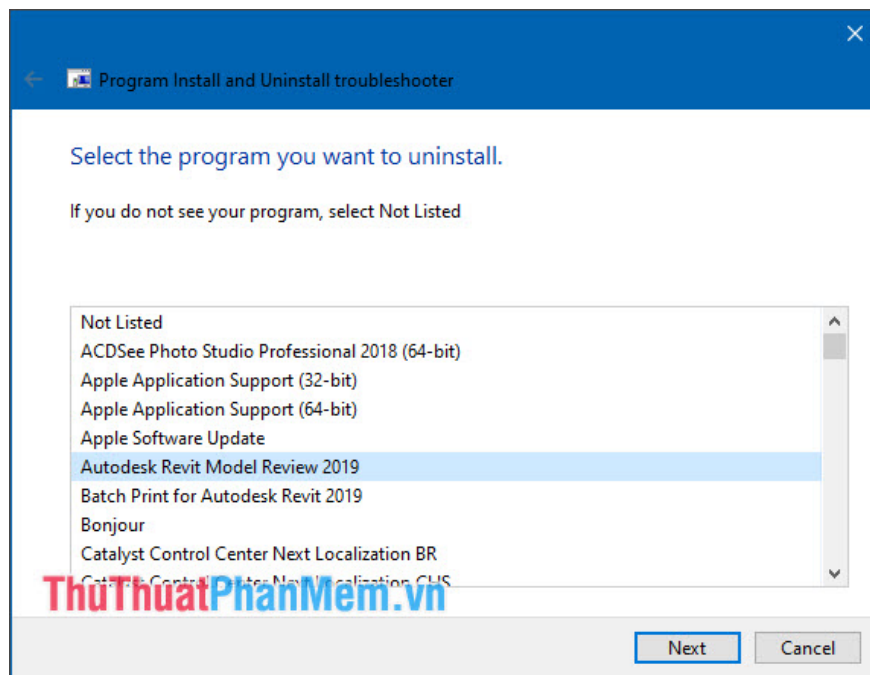

You can download **Revo Uninstaller** here: <https://www.revouninstaller.com/downloads/>  
or **IObit Uninstaller** at the following link: <https://www.iobit.com/en/advanceduninstaller.php>

## 5. Boot the machine in safe mode (Safe Mode)

In Safe mode, Windows allows us to view hidden files and folders. By booting Windows via Safe mode, we can find the installation directory and manually delete the easiest and fastest way.

## 6. Use the Fix it tool from Microsoft

You download the Fix it tool from Microsoft here:

[http://download.microsoft.com/download/7/E/9/7E9188C0-2511-4B01-8B4E-0A641EC2F600/MicrosoftProgram\\_Install\\_and\\_Uninstall.meta.diagcab](http://download.microsoft.com/download/7/E/9/7E9188C0-2511-4B01-8B4E-0A641EC2F600/MicrosoftProgram_Install_and_Uninstall.meta.diagcab)

The Fix it utility or the Program Install and Uninstall troubleshooter allows you to scan and search for installed software but not in Control Panel's list of applications. Just install and click Next, we can easily find and remove software that is not in the list of Control Panel settings.
