

How to remove administrator password in Windows 7

Did you forget the Windows 7 login password? Do you want to remove the administrator password in Windows 7? Do not worry ! I will show you a simple way to remove the Windows 7 administrator password in a moment!

Like some workstations, Windows 7 computers can be used by one or more people, and Windows 7 has been designed to function as a single and multi-user operating system.

Windows 7 is very flexible and can provide support in a variety of scenarios where each user will be given a suitable license and a unique environment. Then all users have to log in with each account, each with their own desktop, Start menu, Documents, History, Favorites folders and customizations.

At some point, If you accidentally forgot the Windows 7 login password or tried to break the Windows 7 password, or you want to remove administrator password in Windows 7.

When encountering these problems, do not worry too much, because in the following article TipsMake will guide you on how to remove Windows 7 administrator password easily and quickly.

PassFab 4WinKey is a simple program whose main purpose is to help you remove Windows 7 administrator password and all other Windows operating systems. This can be achieved in a number of different ways, the two most common of which are to remove a forced password (so the user will have a blank password) or by resetting the password and changing another password. that you want. In addition, PassFab 4WinKey also offers us two other more radical alternatives, such as the ability to delete an account or create a new user account with Administrator rights.

Key Features of PassFab 4WinKey

1. Remove Windows password completely.
2. Reset Windows password .
3. Change your Microsoft password.
4. Delete Windows account even if we don't have permission to do so.
5. Create an administrator account in Windows.
6. In addition, it's compatible with Windows Hello , so we can also break the security of your Face, fingerprint, PIN, security key, and picture password.

You can also watch the video instructions to remove administrator password in Windows 7 below.

PassFab 4WinKey will help you create a standalone bootable recovery disc. This way, instead of breaking Windows passwords from other users, you can do so from before your PC boots. This boot disk can be CD, ISO

or USB.

Different versions of PassFab 4WinKey

This PC password recovery program is available in a number of different versions, which we can choose according to the functions we need.
