

How to remove words from predictive text on iPhone

While predictive text helps you type faster on your iPhone, it can sometimes be frustrating if the suggested words are different from what you want.

While predictive text helps you type faster on your iPhone, it can sometimes be annoying if the suggested words are different from what you want, especially if they are typos or personal terms that you no longer use. Instead of turning off predictive text on your iPhone, we should delete words from predictive text that we don't want to use, according to the article below.

How to Remove Words from Predictive Text on iPhone

1. Reset iPhone keyboard dictionary

While you can't delete specific words, you can reset your iPhone's entire keyboard dictionary to remove all unwanted words from predictive text. However, this will also delete any predictive text you've set up.

You go to **General Settings > Transfer or reset iPhone > Reset > Reset keyboard dictionary** .

2. Use iPhone text replacement

We will enter the text replacement word to remove the predictive text we want to remove.

You click on **General Settings > Keyboard > Text Replacement** . Next, you click on **the plus icon** and fill in the content in **the Replacement Phrase** and **Shortcut** below.
