

# How to rename favorite places on iPhone map

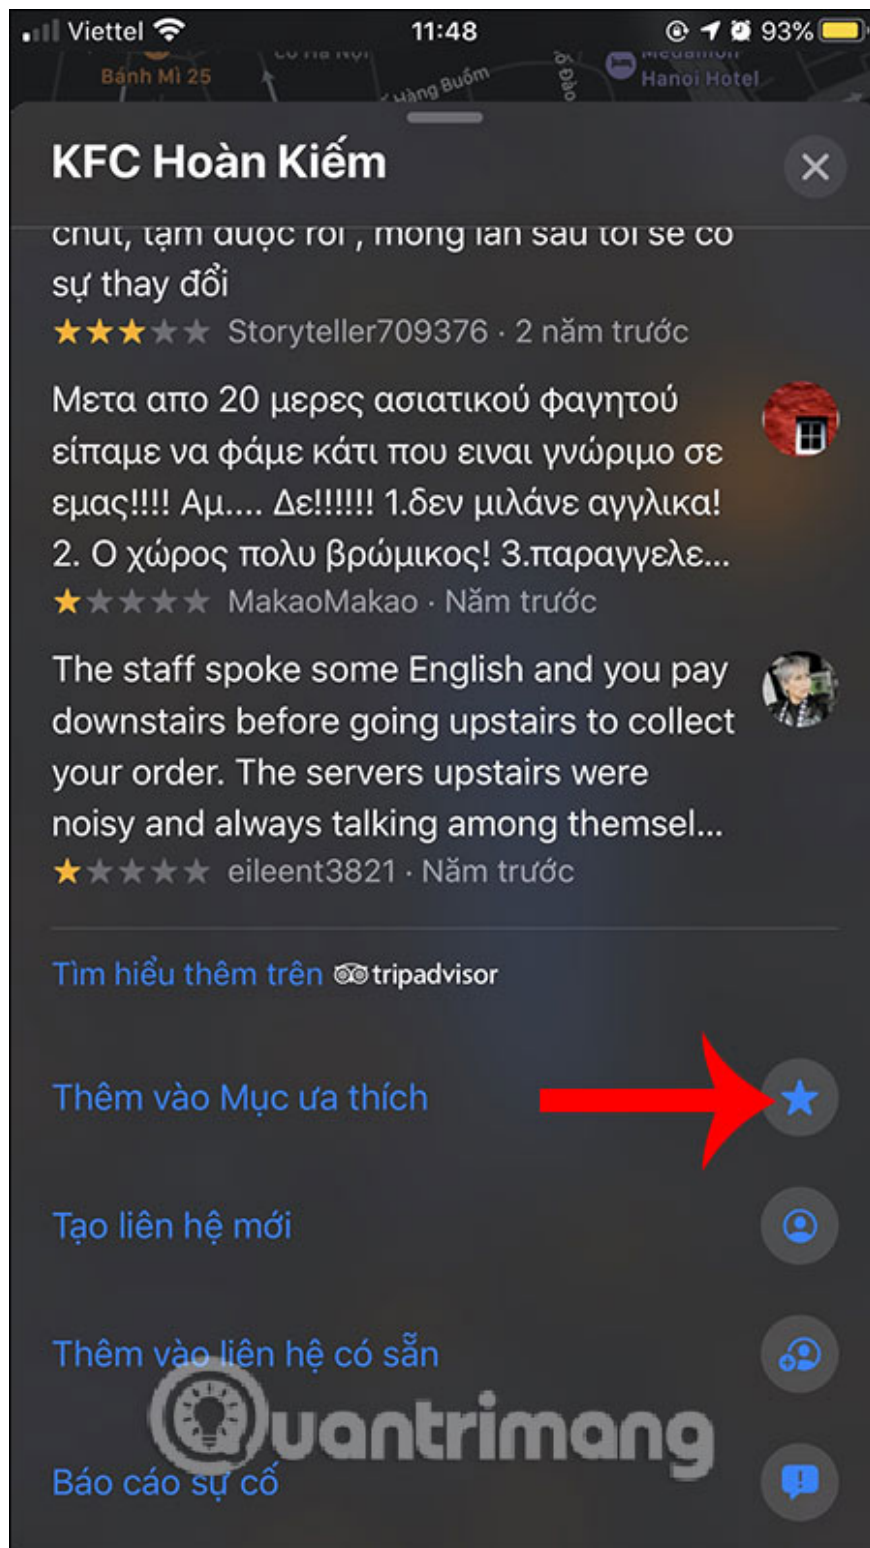

Favorite places on Apple Maps can be changed to different names for users to remember, unlimited number of renaming.

The application available on Apple provides full features to find the way, save different items as Google Maps. The application brings you many interesting features after each update such as creating a collection of maps on the iPhone, or renaming favorite places on Apple Maps. Changing the names of our favorite places will help us change to more familiar, more memorable names. The following article will guide you how to change your favorite places on the iPhone map application.

## Instructions for renaming favorite places on Apple Maps

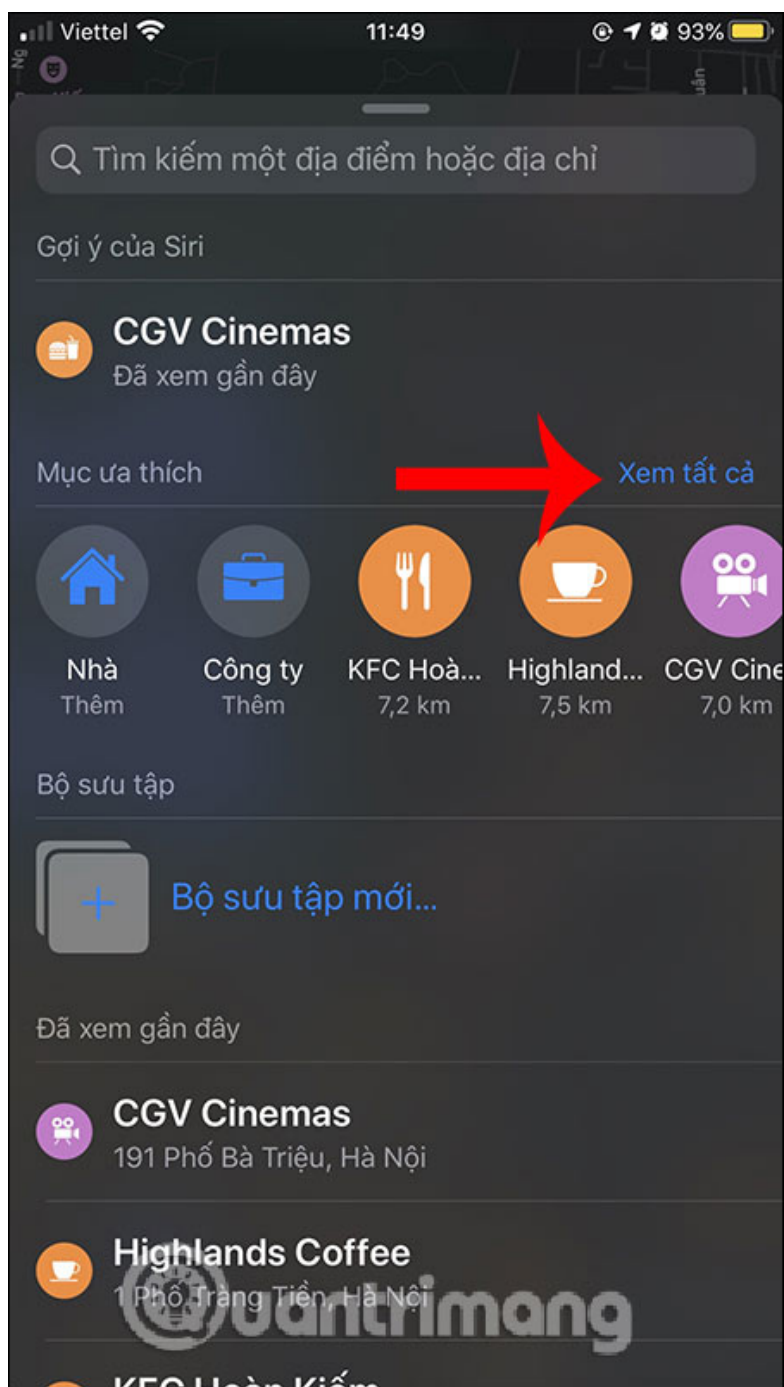

### Step 1:

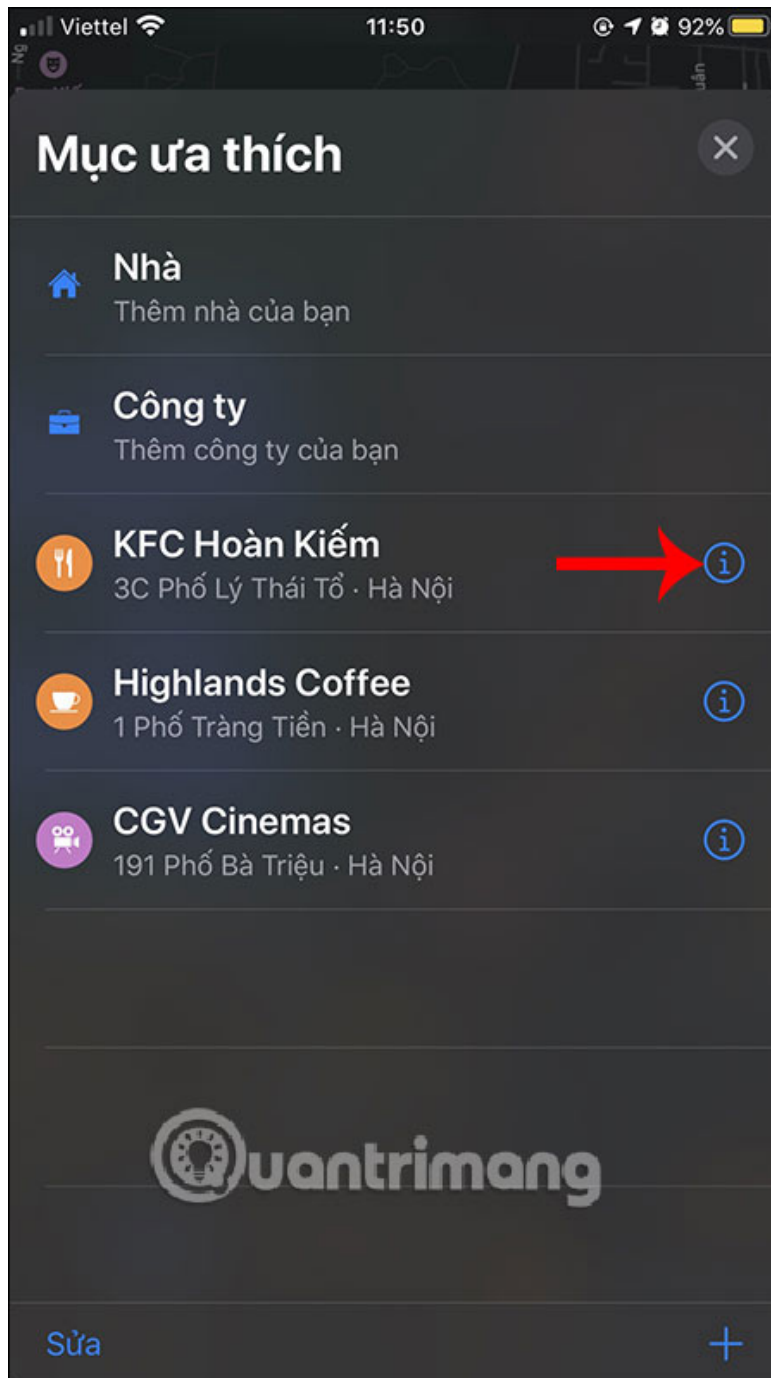

Open the Apple Maps app on iPhone and **navigate to your favorite place** on the map. Swipe the map from bottom to top and tap **Add to favorites** . We continue to perform this operation with other locations.

## Step 2:

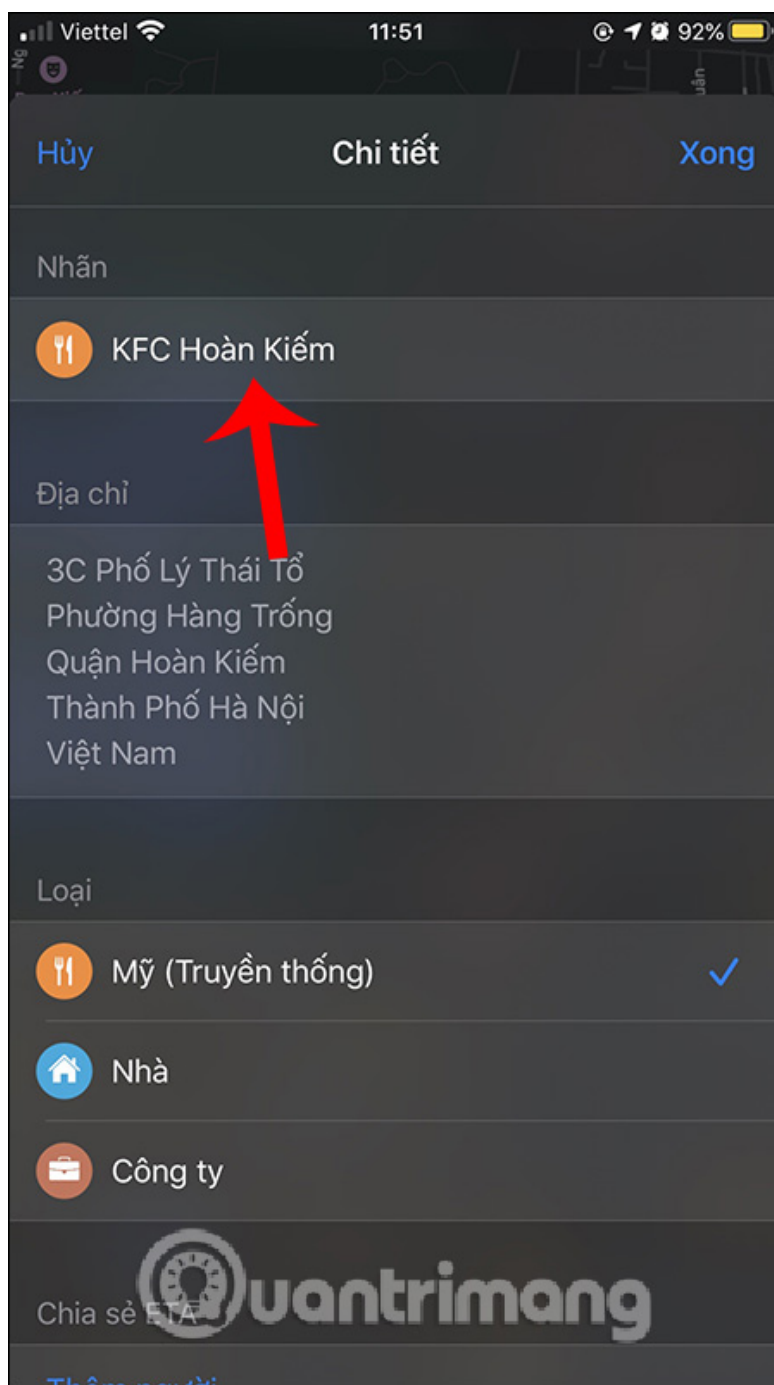

Next, **drag the screen from the bottom to the top** to see **the section you like**. Click **View all** to expand the list. At the list of **favorite places**, click **the i icon** to view information.

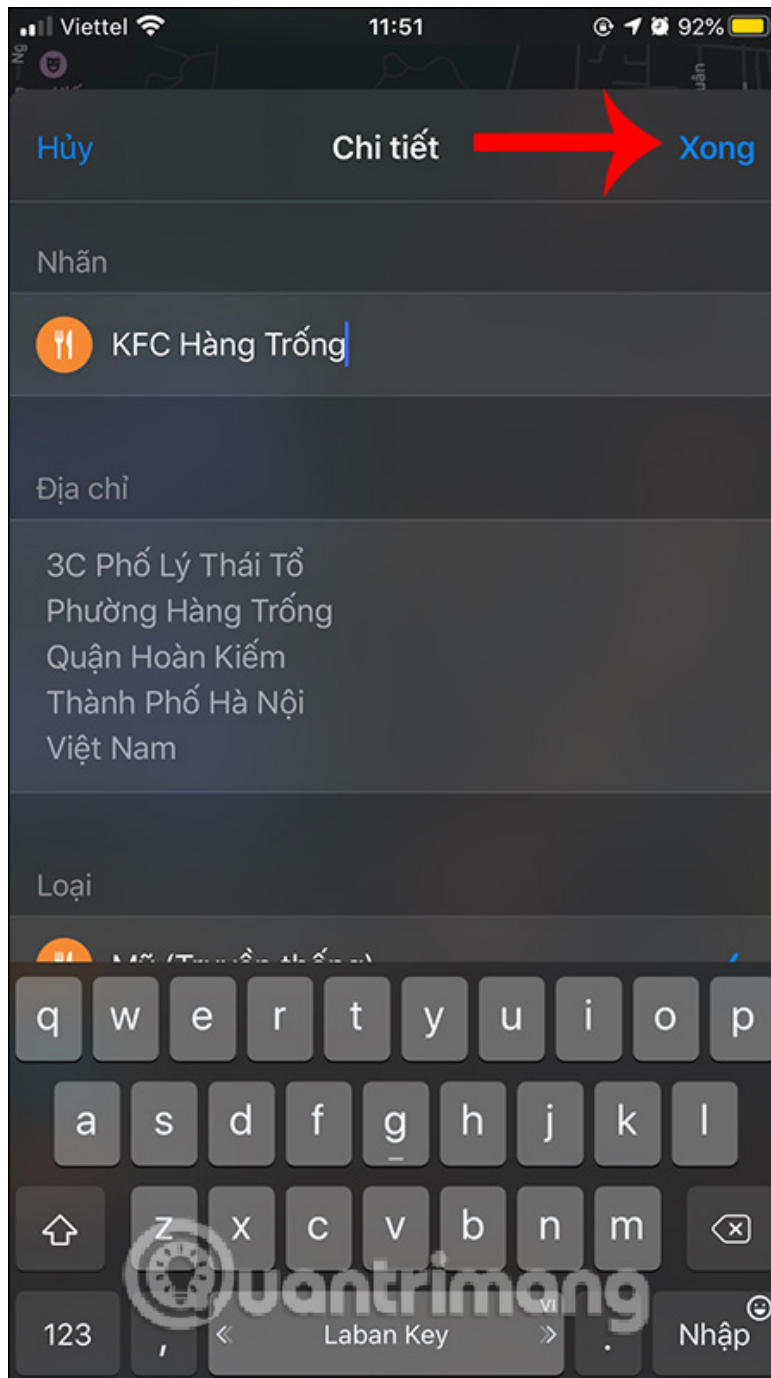

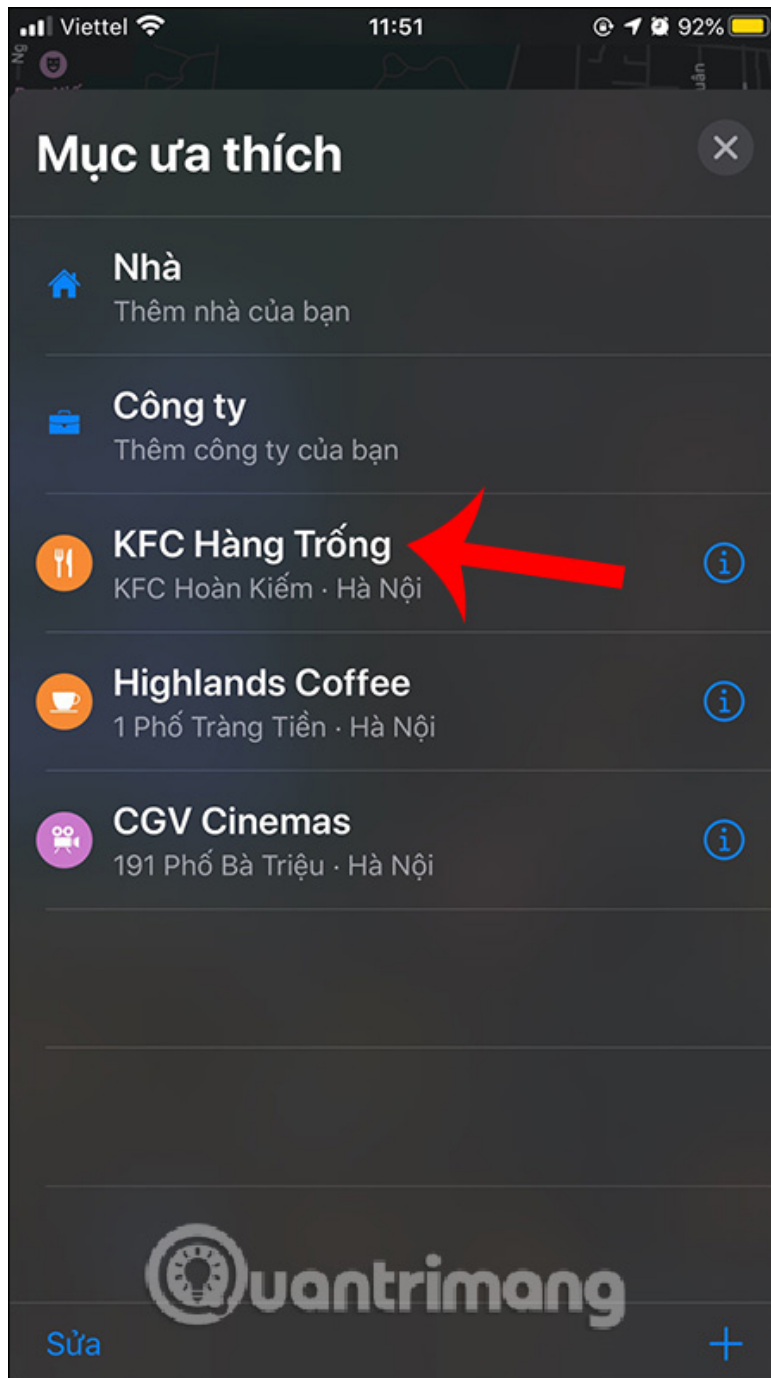

### Step 3:

Here **Label** is the name of the place you like. Click to **rename the location** to the name the user wants to use. After entering the new name, click **the Done button** in the top right corner. The new name result is changed to the location we like.

So we can rename the favorite location on the iPhone map application to any name you like. This location rename feature only applies to iOS 13 only.
