

How to replace art background image with PicsArt

PicsArt is a photo editing application on your phone, which allows users to freely edit their images, such as splitting background images and integrating images.

PicsArt is one of the many image editing applications that many people seek. This is an application to support young people to create a unique trend of photo transplantation "Duck Up, Duck Duck, Stuck". In addition, PicsArt also gives users a lot of different image editing features, such as splitting wallpaper and incorporating photos together. This feature will help you to remove the wallpaper in the optional image and then merge it into another wallpaper. In the following article, we will show you how to change the background image for the image using the PicsArt application.

Instructions for separating background images with PicsArt

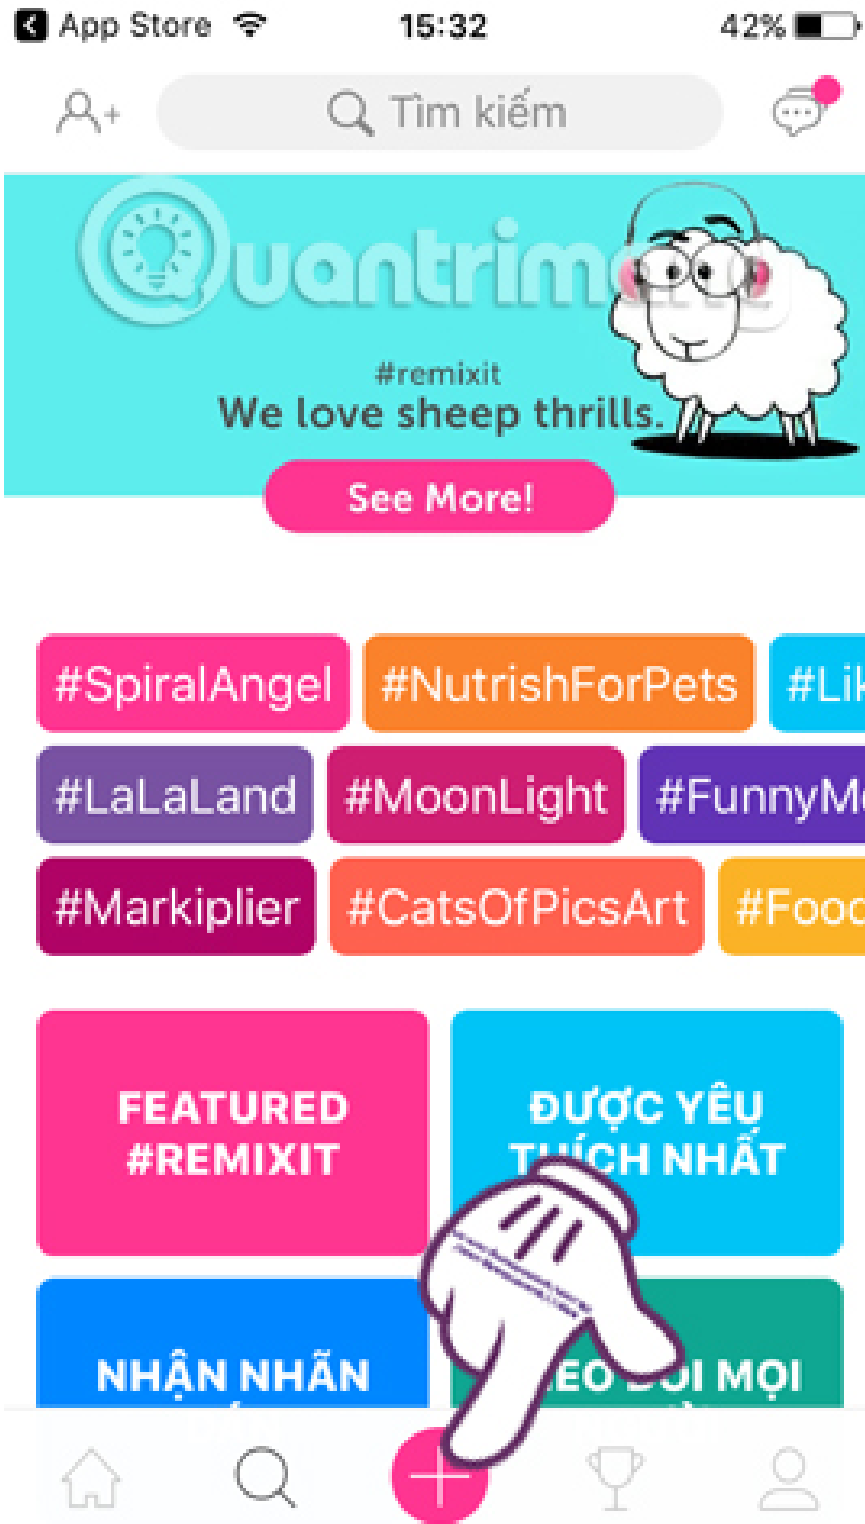

First of all, we download the PicsArt application according to the link below:

1. Download the PicsArt app for Android
2. Download free iOS PicsArt

Step 1:

You proceed to install the application on the device. First interface, PicsArt will ask whether the user wants to receive notifications from the application, click Yes or No. At the main interface, we click **the plus icon** at the bottom of the screen.

Step 2:

Next, we select **the Image Editing** feature. PicsArt will ask users to allow **access to the collection** , click **Yes** . You will find the wallpaper you want to use.

Step 4:

Next, use the **Cut out** item to proceed to crop the background image of the image you want to change. Your next job is to color around the area of the image to be cut. We can adjust the focus by using the Size bar below. Please fill the image area to cut it well. Then press the arrow icon, the top right corner of the interface.

Switch to the new interface, we can use the brush to fill the area to be cut, eraser to erase the area, eye icon to hide or show the area you want to cut. Finally click **Save** .

Note , when clicking on the brush and eraser icon, an adjustment bar appears.

Step 5:

Soon, you will see the cropped image on another wallpaper. We can adjust the size and position of the image to match the selected background image. In addition, you can also use a number of different effects for images. Finally click **Apply** in the upper right corner to save.
