

How to reset password, Snapchat password on phone and computer

As you know, Snapchat is currently one of the most popular online chat, texting and chat applications in the world, a serious competitor of Facebook social network. And in the following article, please refer to how to reset the password and password of Snapchat account in case of need.

With a rainbow or an interesting effect, Snapchat has created a new wave in the community of people using chat, messaging, social networking applications. While there are not as many feature options as Facebook, Snapchat scores points with a variety of effects, a unique filter that we introduced in the article on how to use Snpchat effects.

Or many other hidden features on Snapchat will bring comfortable leisure time for everyone. Normally after signing up for a Snapchat account, you have a habit of saving your password for later login. However, it is because of this that causes many problems such as unfortunately you forgot your password, or in case anyone is curious about your Snapchat account. So follow the network administrator's post to reset the Snapchat password.

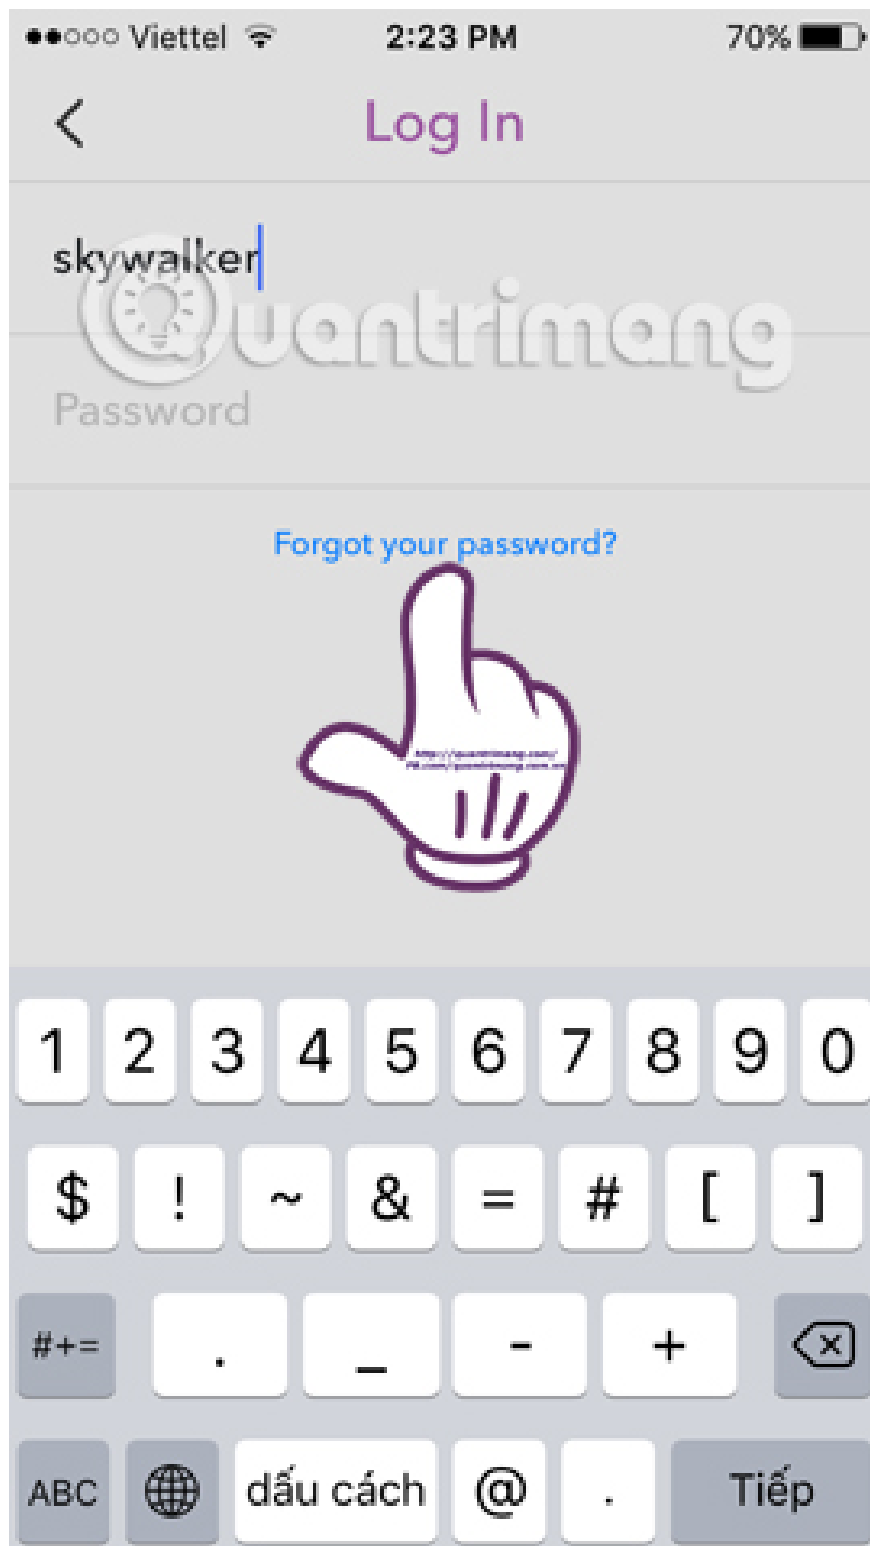

1. How to retrieve Snapchat password on iOS, Android:

We can reset the Snapchat password on the phone using the registered phone number or email account

Reset password via phone number:

Step 1:

You **log into your Snapchat account on your phone** . At the login interface, click **Forgot your password** .

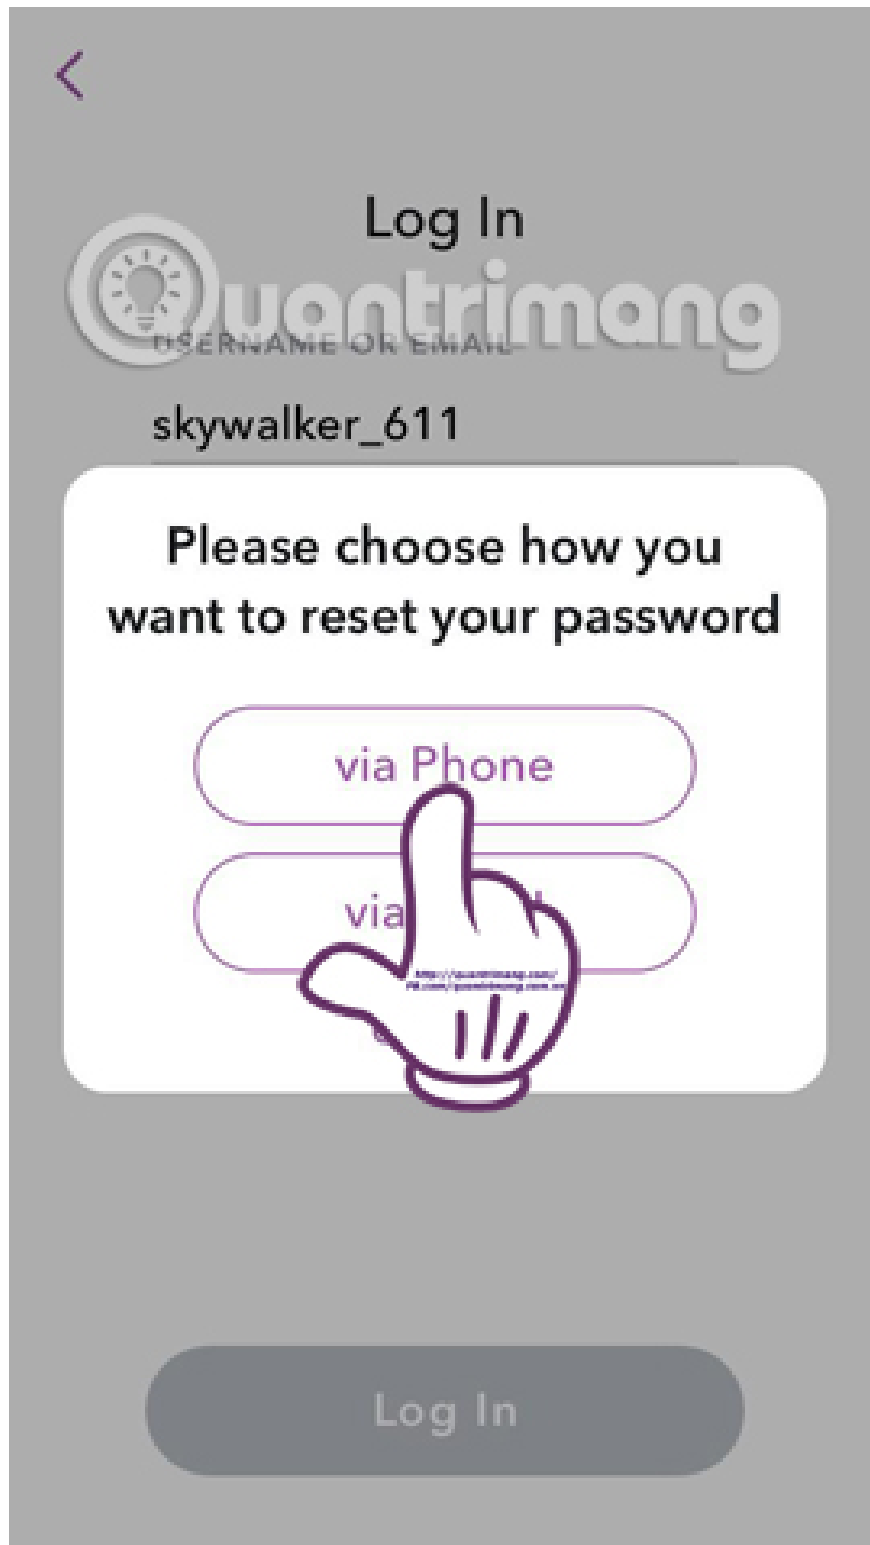

Step 2:

Soon, Snapchat will give us **2 ways to recover the password** .

1. Restore by phone.
2. Restore via registered email address.

We will choose to restore by phone, click **via Phone** . The app will identify users with Snapchat's unbelievable question, picking up images with the Snapchat ghost icon. After selecting, click **Continue** below.

Prove you aren't a robot

Please tap the squares that contain a ghost.

Step 3:

The screen for **entering a phone number** appears. If you register an account at the beginning you have a phone number, you can skip this step. If not, just enter the phone number and click **Continue** to finish.

The application will ask you how to get the verification code:

1. Send code by SMS.
2. Make a call to receive the code.

Here we choose to **receive the code by message** . The message will be sent back to you shortly after. **Enter the verification code** and can change it to another password depending on the user.
