

# How to resize images online

How to resize images online. I Love IMG is known as a useful online image processing toolkit with lots of handy features, especially Resize images. Resize images with I Love IMG retains the image quality, not reduces like other tools.

The online image resource store has a lot of 'oversized' images taken by professional camera equipment or specialized software. Not everyone can take full advantage of the details of those oversized images because they are very heavy. The best way to use them is to resize images so they are smaller and still retain the full content. In this article, Software Tips will guide you how to resize images online.

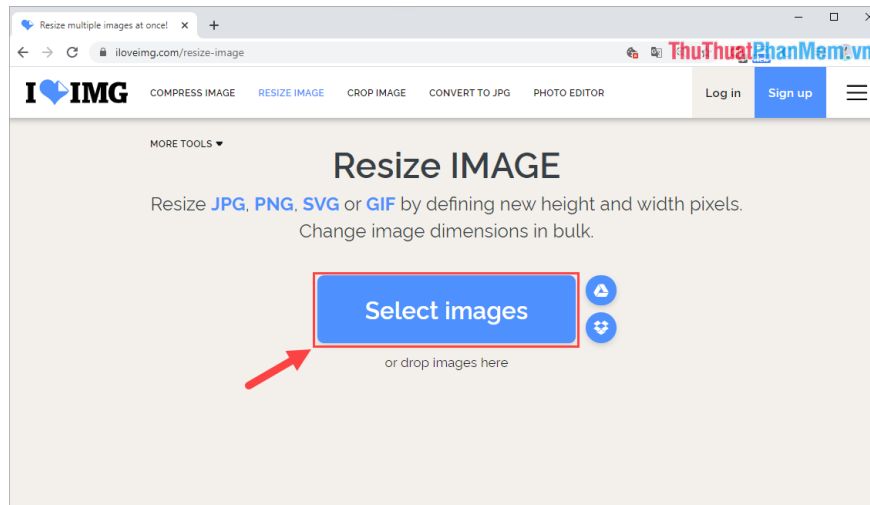

## 1. Reseize photos with I Love IMG

I Love IMG is known as a useful online image processing toolkit with lots of handy features, especially Resize images. Resize images with I Love IMG retains the image quality, not reduces like other tools.

**Homepage:** <https://www.iloveimg.com/>

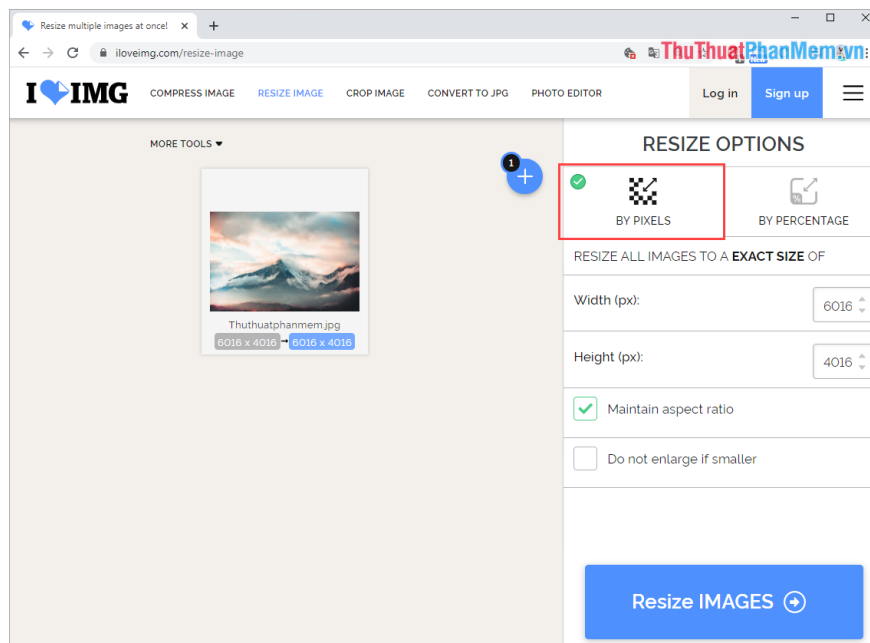

**Step 1:** Go to the homepage and select **Select Images** to upload the image to **resize** from the computer. Alternatively, you can choose Google Driver or Dropbox to select images directly from cloud storage.

**Step 2:** After that, you will be redirected to the Resize interface image. Here, we have 02 Resize options as follows.

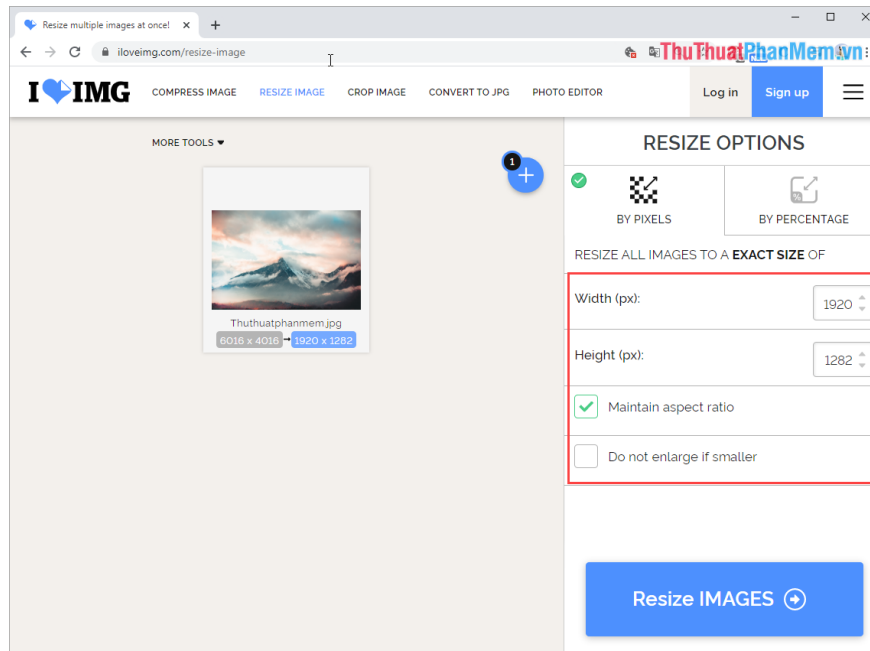

### Resize to specified size (By Pixel)

**Resize By Pixel** mode will allow you to enter the horizontal and vertical parameters to create the right sized image according to the size you require.

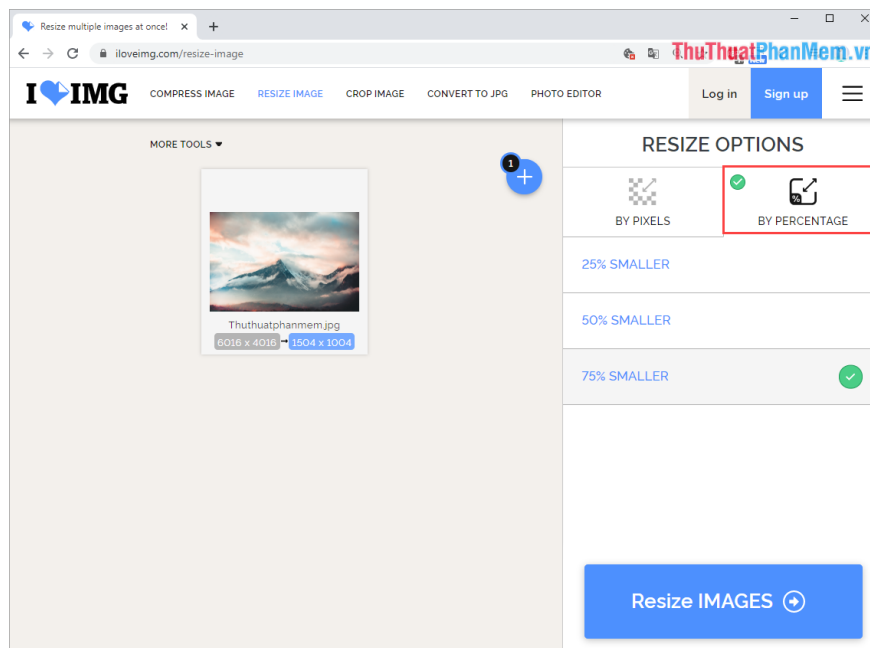

In the Resize By Pixel section, we will have the following content:

1. **Width (px):** Horizontal size (in pixels)
2. **Height (px):** Vertical dimensions (in pixels)
3. **Maintain aspect ratio:** Preserves the image **aspect ratio**
4. **Do not entarge if smaller:** Do not enlarge the image if the original image is not Resize sized

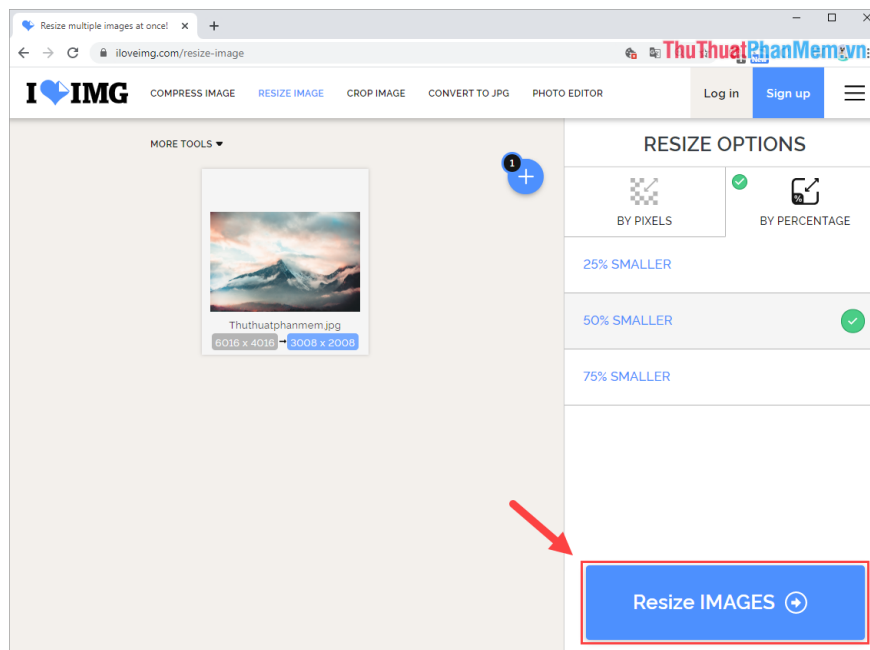

## Resize photos as a percentage (By Percentage)

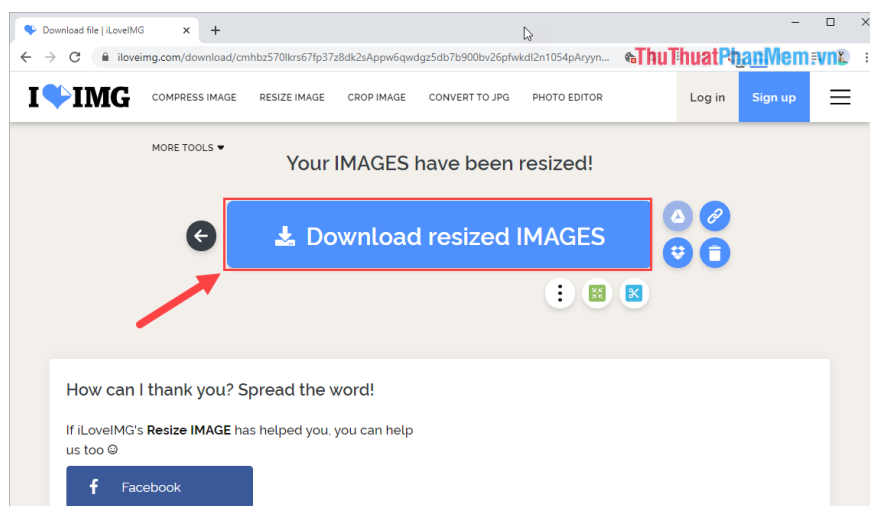

Resize Image Percentage By Percentage will allow you to reduce the length, width by a certain percentage available (25%, 50%, 75%).

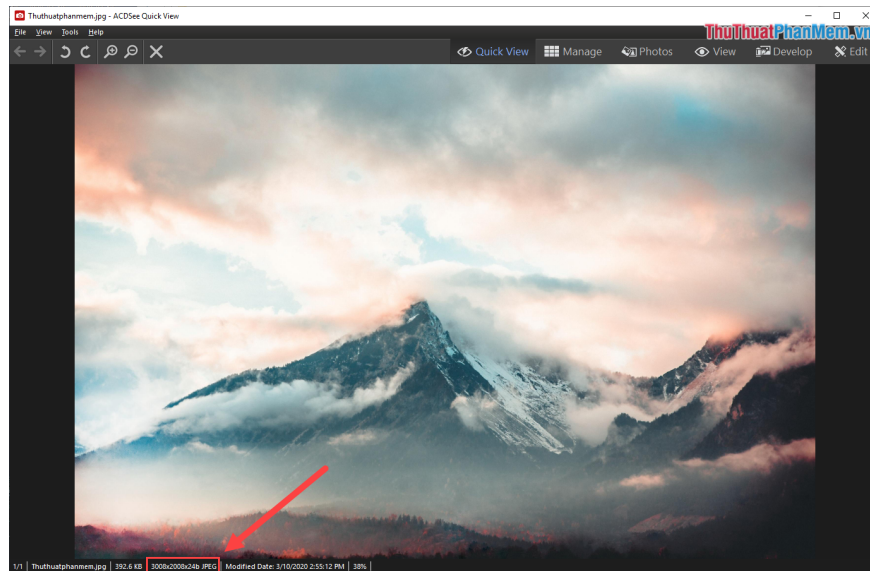

The system will automatically Resize your images based on%, you just need to select% and click **Resize IMAGES** and you 're done.

**Step 3:** Then, you click **Download resized images** to download the **resized** image to your computer.

Let's check the results after Resize is done, the image size has been reduced by 50% compared to the original image.
