

How to Resize photos without software is extremely fast and easy

When we work with images that are too large, resizing them is a smaller thing to do to facilitate manipulation. Normally, Resizing images requires specialized software, but now we can Resize directly without software, just connect to the Internet.

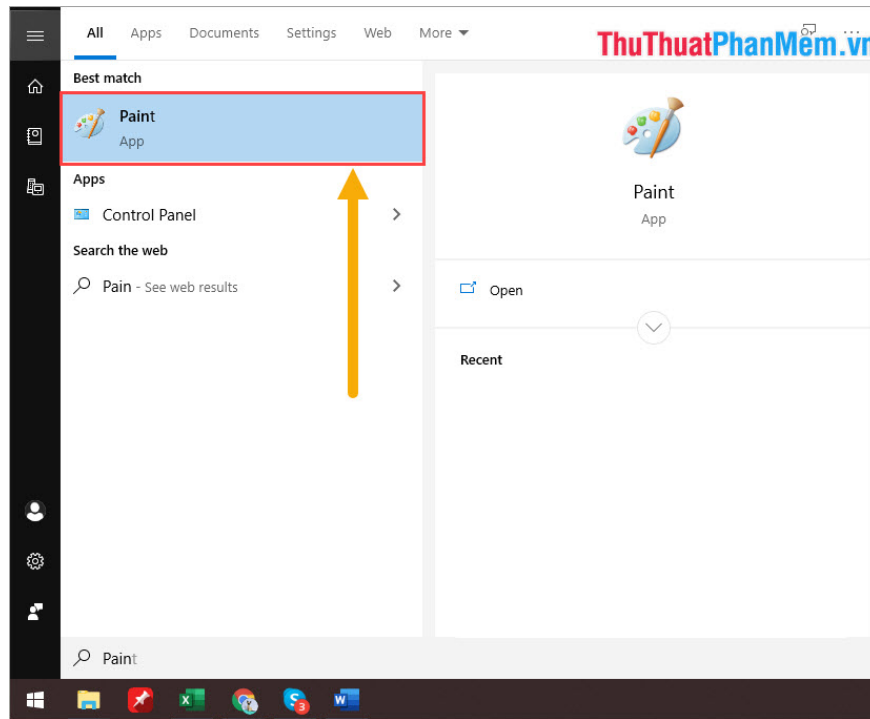

When we work with images that are too large, resizing them is a smaller thing to do to facilitate manipulation. Normally, Resizing images requires specialized software, but now we can Resize directly without software, just connect to the Internet. In this article, Software Tips will guide you how to Resize photos without software very quickly and easily.

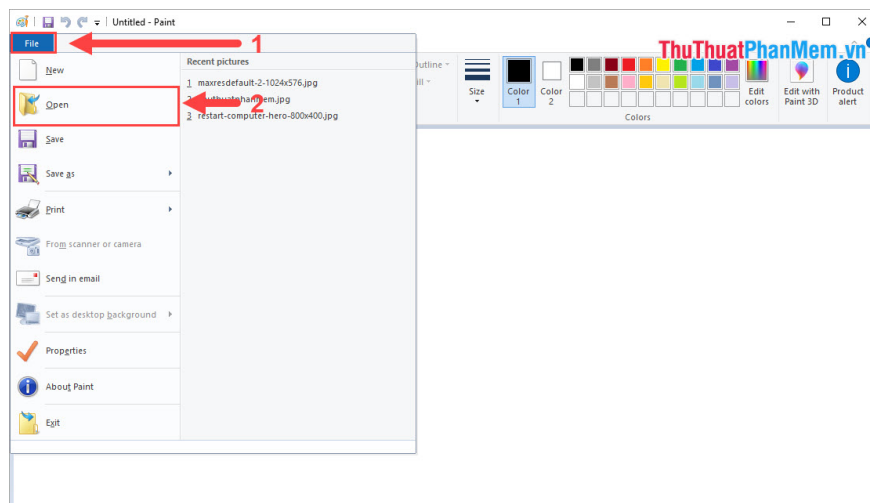

1. Resize the image using the Paint tool

Paint is an image editing tool available on Windows operating system and can be used by anyone.

Step 1: You proceed to open the **Start Menu** and enter *Paint* -> **Enter** to open the software.

Step 2: Next, select **File -> Open** to open the image I need to Resize.

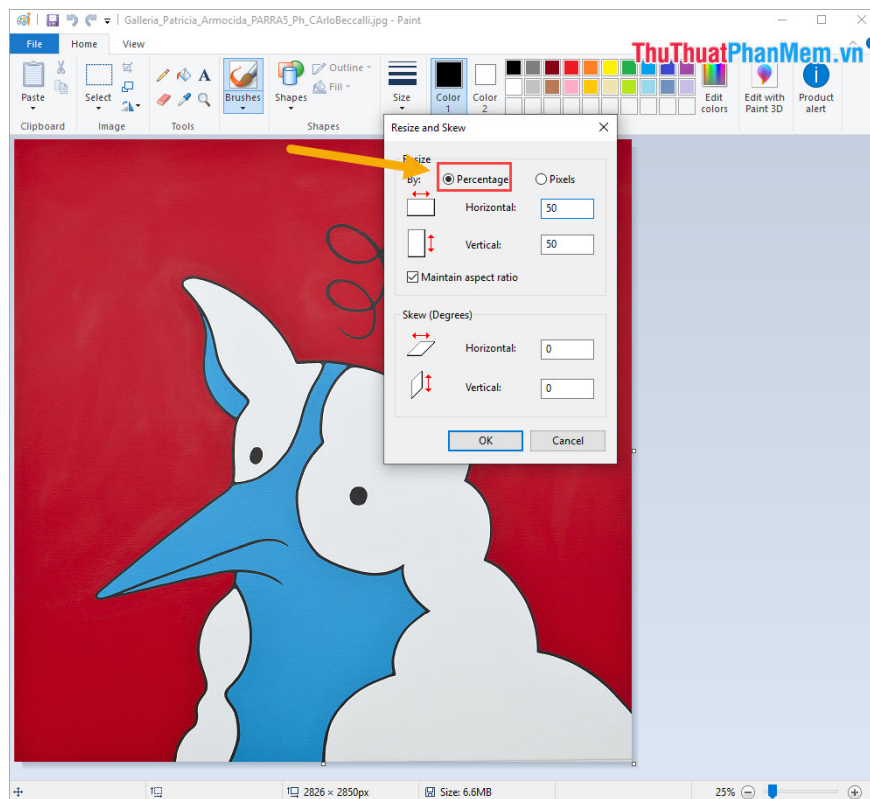

Step 3: Then, you select the **Resize** icon to proceed to set the parameters.

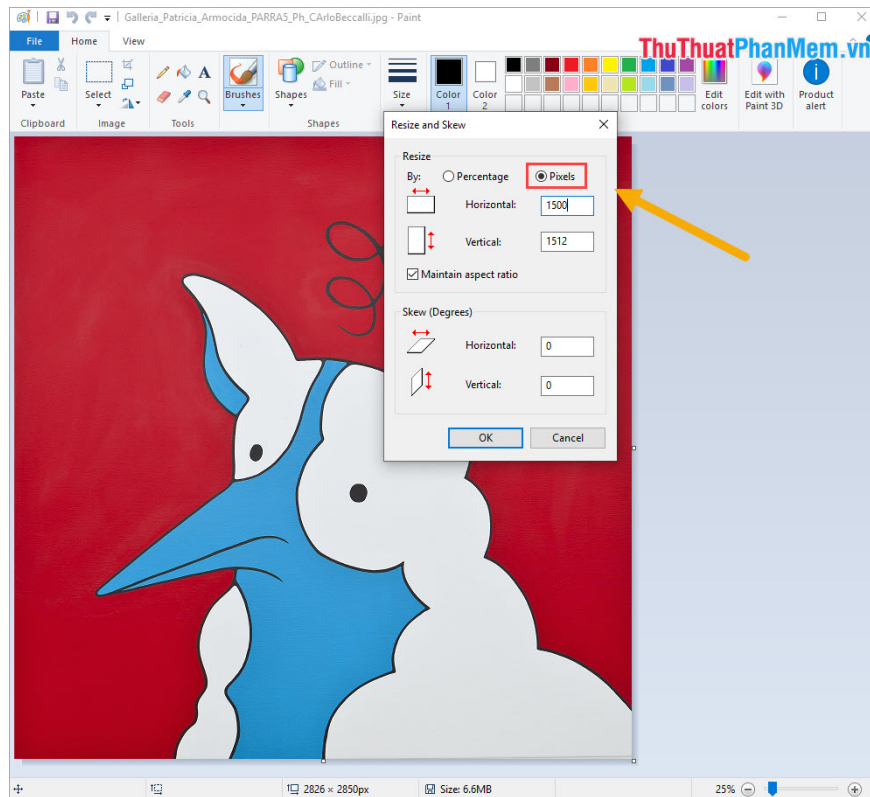

Step 4: For the Resize by Paint tool, you have two ways as follows:

1. **Percentage:** Resize in percentage, enter% you want to Resize and click OK

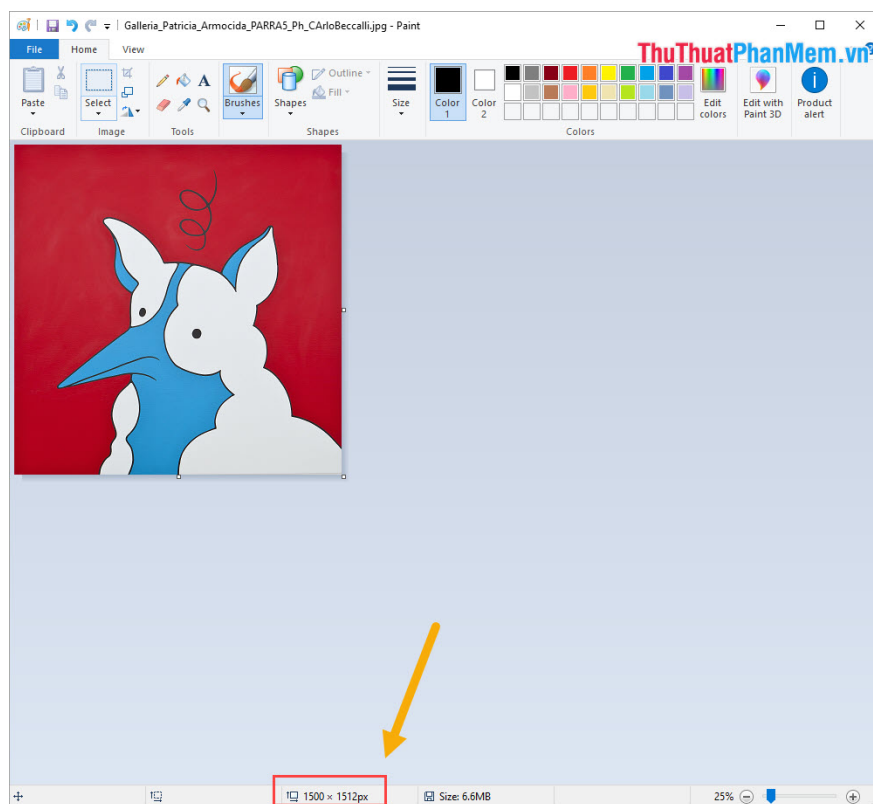

1. **Pixels:** Resize according to the resolution of the image, you can set the size according to the Pixel you want.

1. **Maintain aspect ration:** Keep the original aspect ratio of the image, please tick if you do not want your images to be distorted.

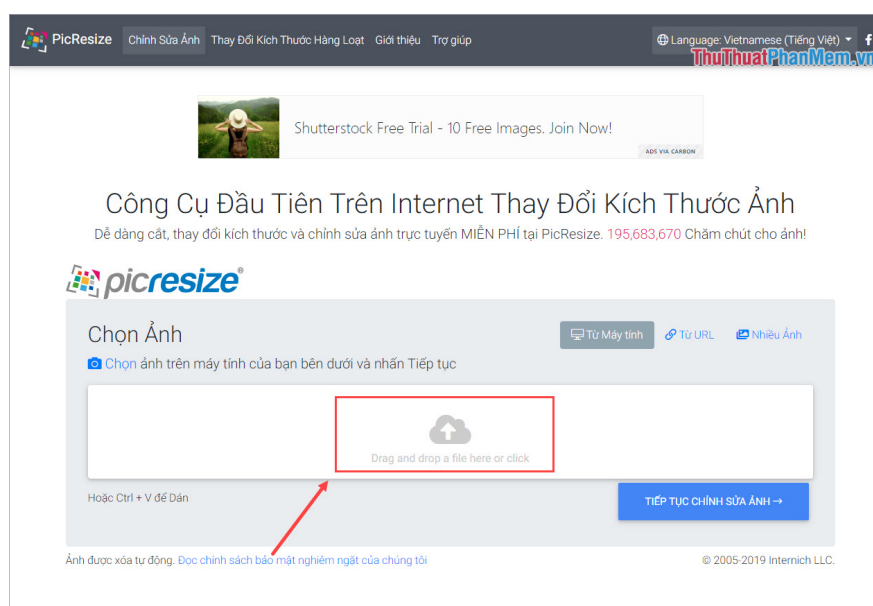

Step 5: After Resize is complete, you will see the image size changes immediately. Now press **Ctrl + S** to save the image and you're done.

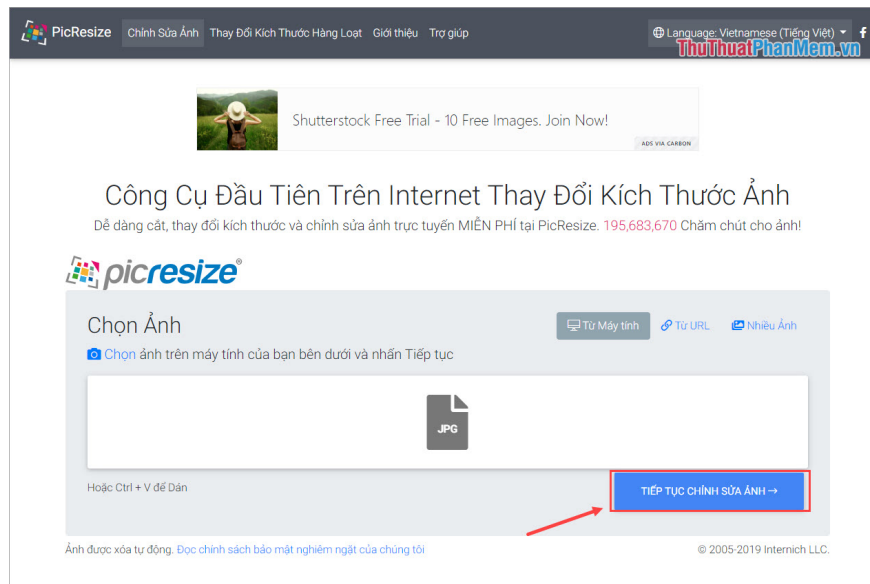

2. Resize Photos Online with PicResize.com

Homepage: <https://picresize.com/en>

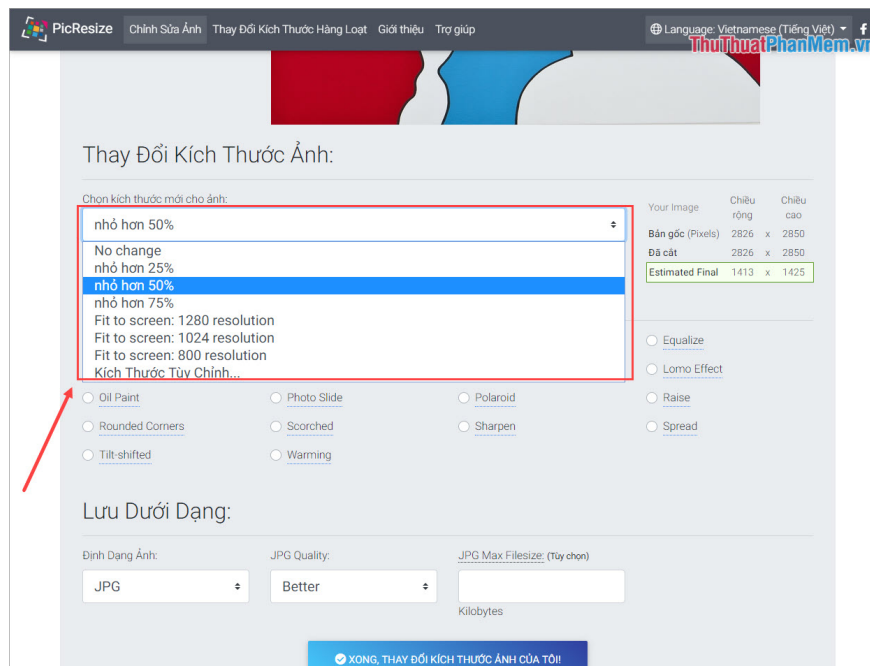

Step 1: You proceed to the homepage and select **Drag and Drop a file here or Click** to select the image to Resize.

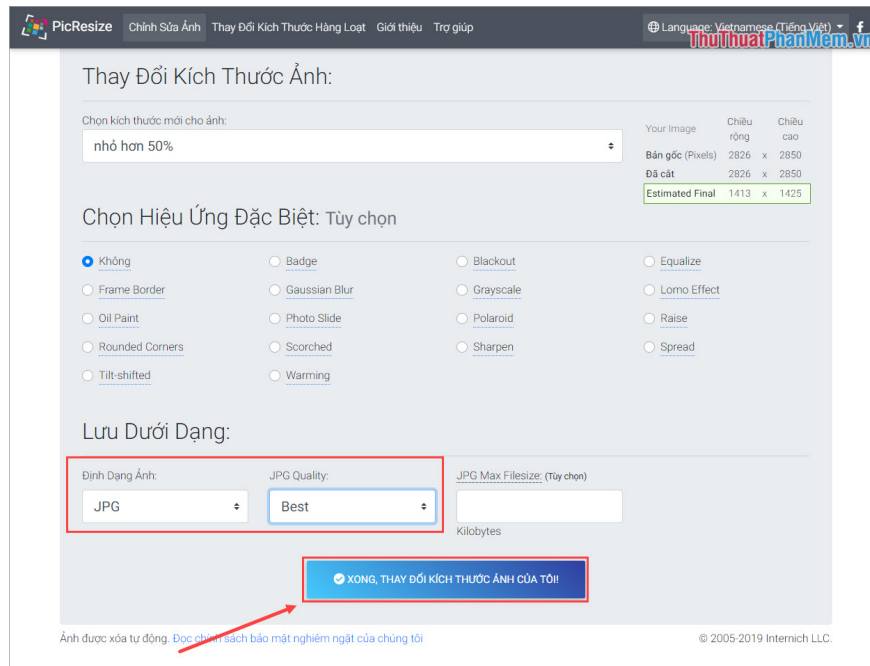

Step 2: After you have selected the image to Resize (can select multiple photos at once), then select **Continue to edit photos** .

Step 3: Once the image has been uploaded, you proceed to change the parameters according to the list of available image sizes. If you want to Resize as you like, choose **Custom Size** .

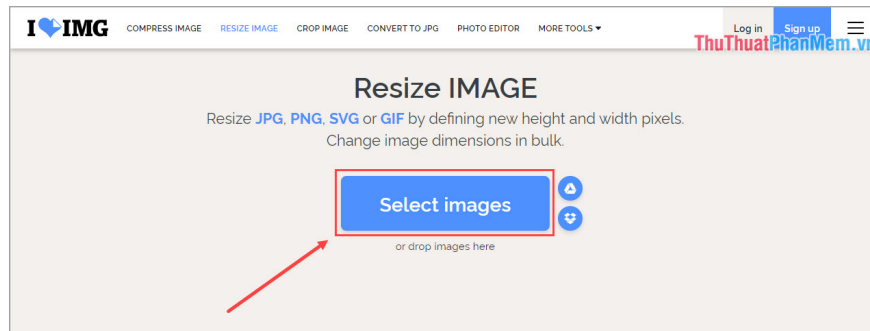

Step 4: After selecting the Resize size, you choose the image format and image quality (for JPG format). Finally, click **Done, resize my image and** the system will automatically convert for you.

3. Resize Photos Online IloveImg.com

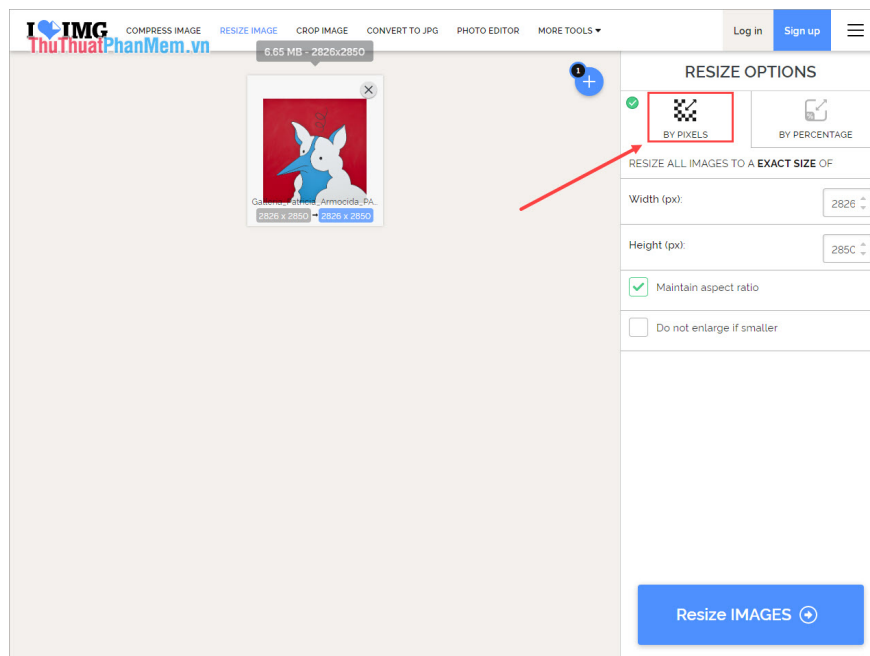

Homepage: <https://www.iloveimg.com/resize-image>

Step 1: You proceed to the homepage and select **Select images** and select the images to **Resize** .

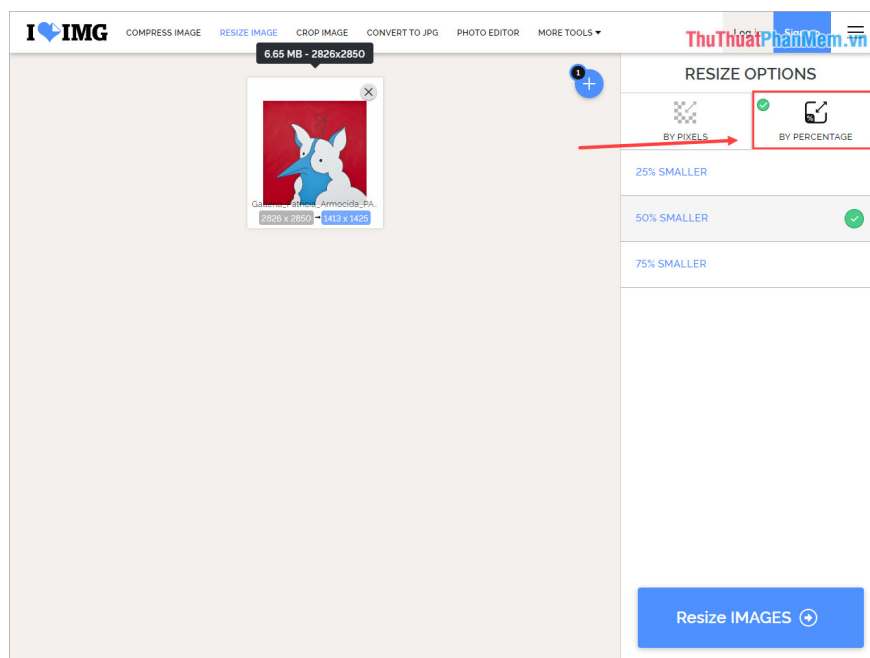

Step 2: With this tool, you have two different **Resize** modes.

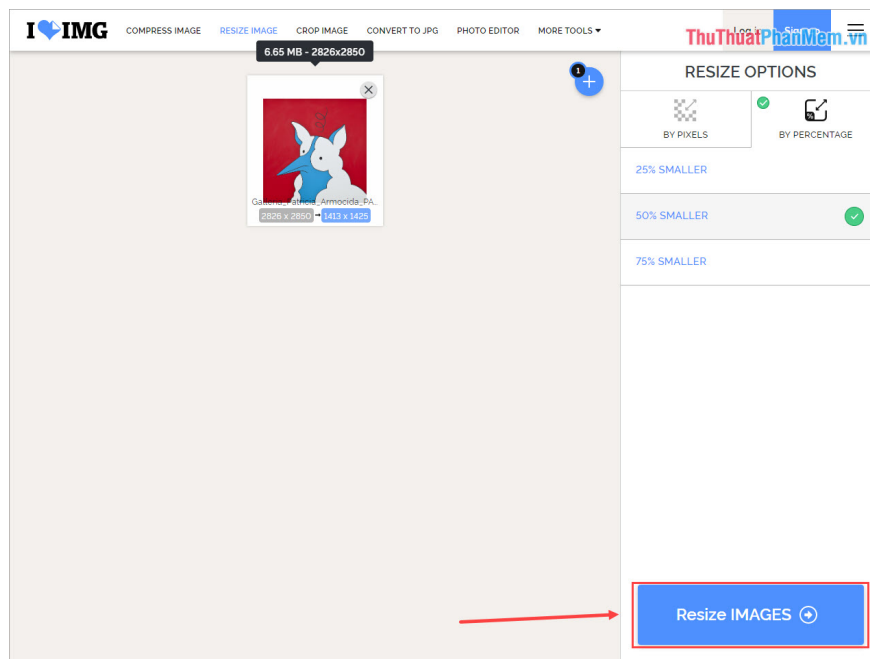

1. By Pixels : You adjust the Resize size according to Pixel, you manually set the horizontal and vertical parameters manually.

2. By Percentage : The resize you resize as %, you are selected according to the % available on the system.

Step 3: After you set up **Resize** is complete, you select **Resize IMAGES** to automatically convert the system, **Resize** for you.
