

# How to Restart Windows 8

To restart Windows 8, move the cursor to the upper/lower right corner ? Click ? Click the button ? Click . You can also use an alternate method that uses only the keyboard in situations where you cannot use the mouse. Move your cursor to th...

Method 1 of 2:

## Restarting Normally

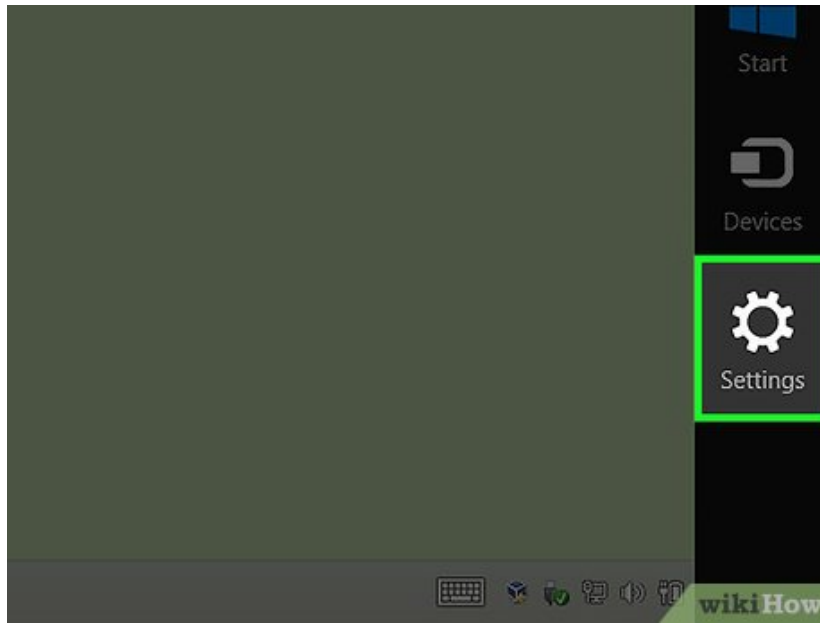

1.

**Move your cursor to the top or bottom right corner of the screen.** appears.

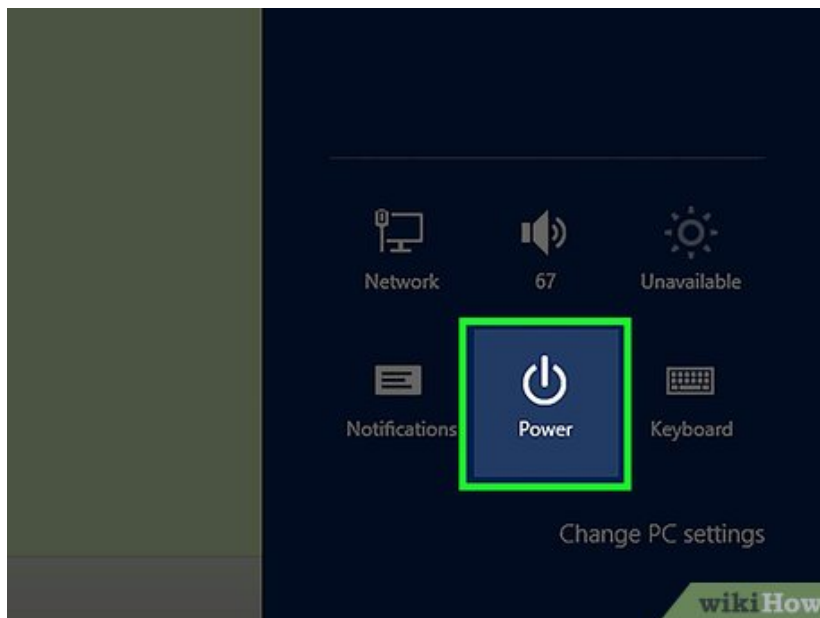

1. The menu that appears is known as the Windows 8 'Charms' bar.

2.

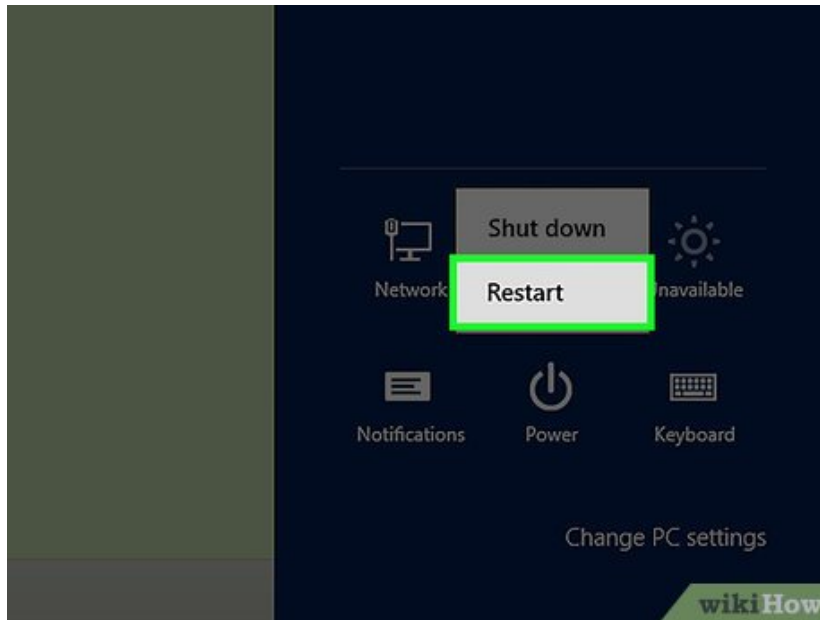

Click **Settings**.

3.

Click the **Power** button.

4.

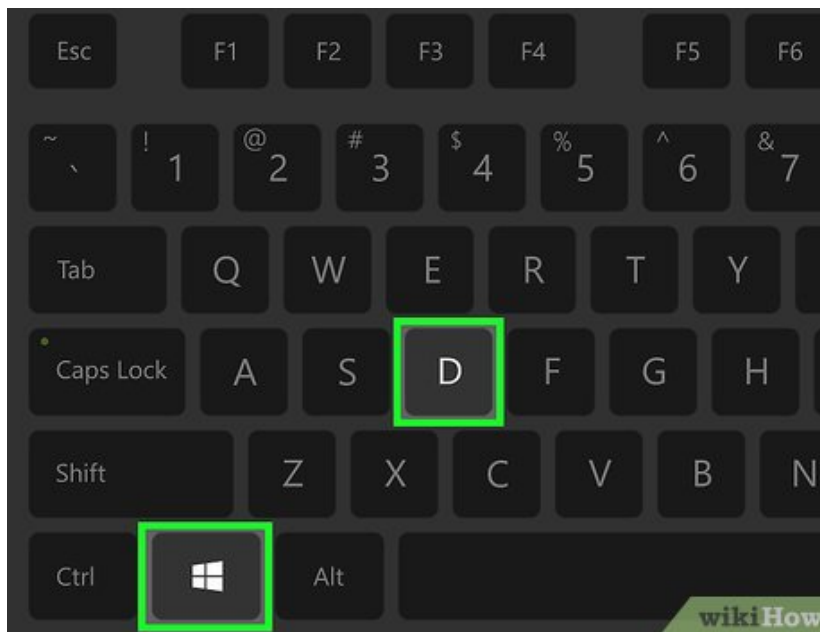

Click **Restart**.

1. If you had other programs running before starting, some may prevent the process from proceeding. If this is the case click the **Restart Anyway** option.

Method 2 of 2:

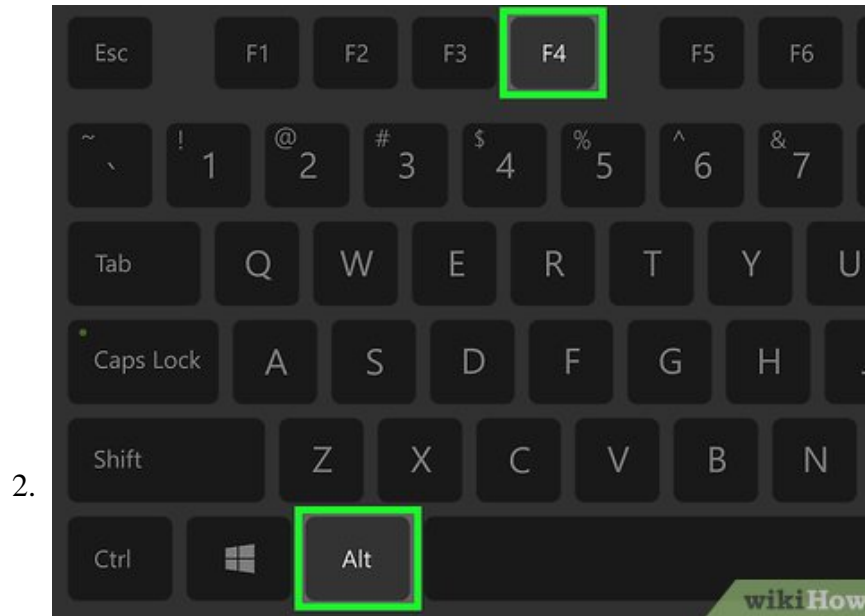

## Restarting With the Keyboard

1.

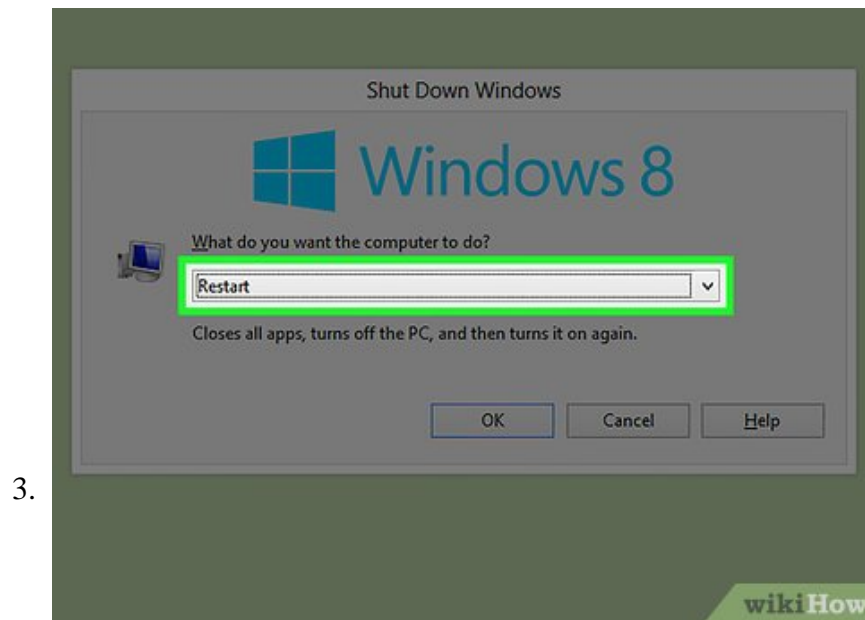

Hit **Win + D**.

1. This keyboard command shows the desktop.

Hit **Alt** + **F4**.

1. Make sure that the desktop is selected. If you have other programs open, this key combination will close whichever window is active.

Select **Restart** with the arrow keys.

4.

Hit **Enter** ..
