Recovering your Facebook password with Gmail is one of many ways to help you find your password in case you forget it because you haven't used that Facebook account for a long time or if you forget your password after changing it. The method of retrieving Facebook password using Gmail will be the first choice that TipsMake recommends you use because it is safe and easy to do for anyone.

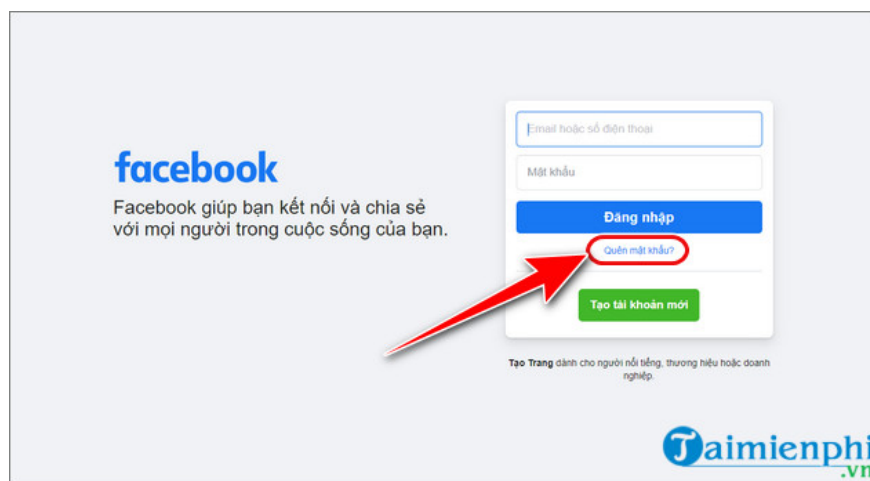

- * For computers: Download **Facebook for PC**
- * For Android devices: Download **Facebook for Android**
- * For iPhone devices: Download **Facebook for iPhone**

1. How to retrieve Facebook password using Gmail on computer

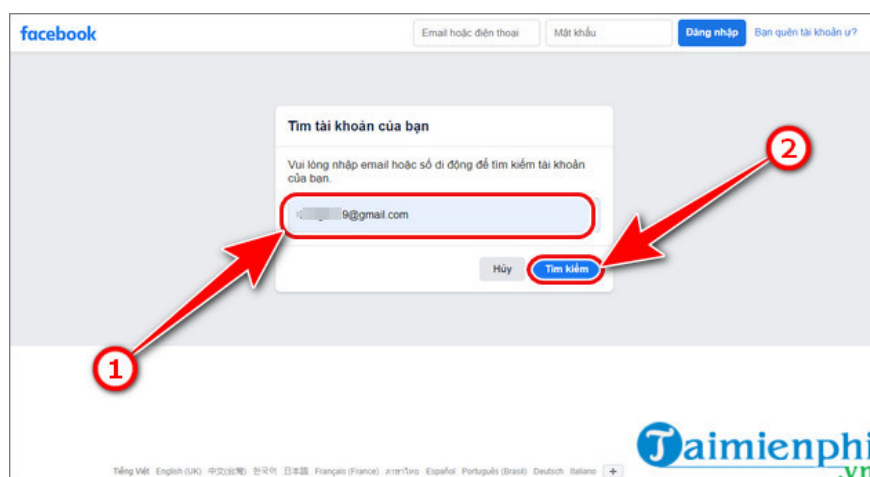

Normally, users often sign up for Facebook with Gmail or personal phone number to easily recover their password. To retrieve your Facebook password using Gmail on your computer, follow these steps:

Step 1: Visit the Facebook homepage **HERE** .

Step 2: Click **Forgot password?** below the **Sign In** button .

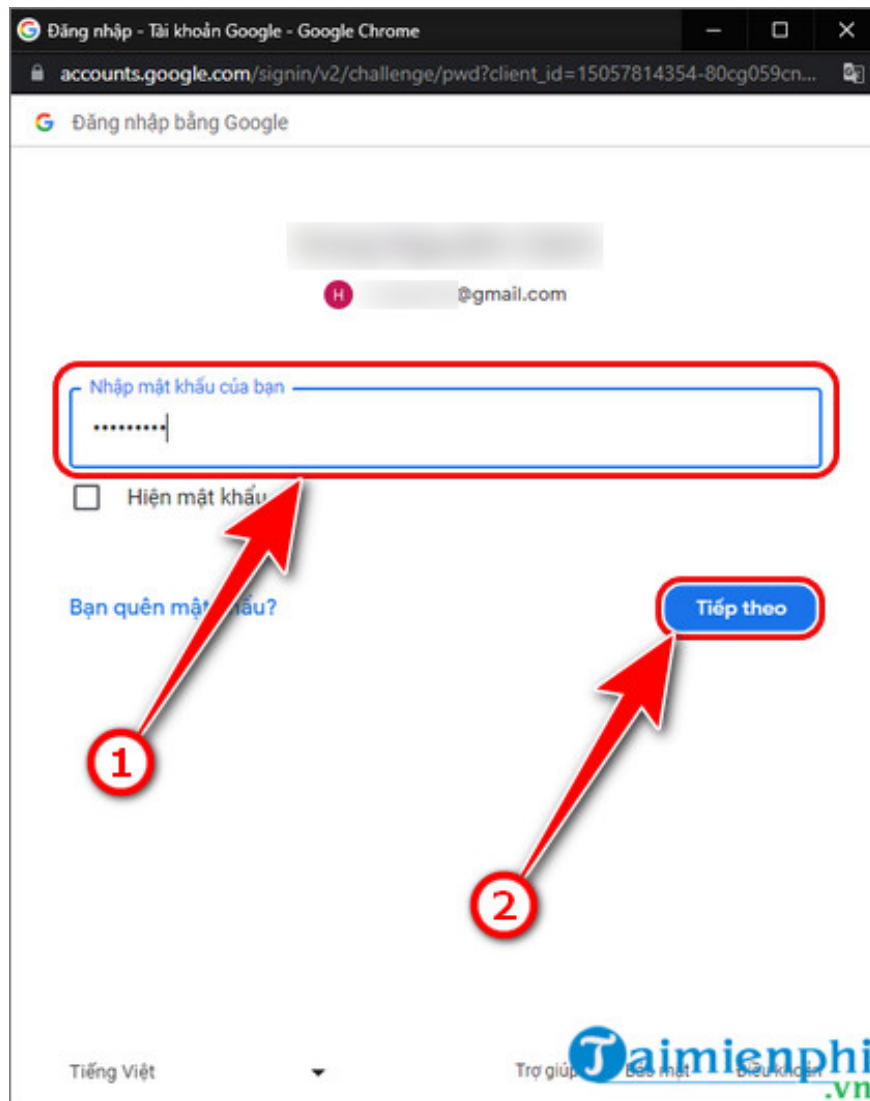

Step 3: After that, an account search notice will appear and you just need to **enter the email address** of the Facebook account you need to retrieve your password and select **Search**.

Step 4: Here, Facebook will give you two options: **Try another way** (receive login code via Gmail) or **Continue** (quickly log in with Gmail account). You can choose one of 2 ways to retrieve your Facebook password.

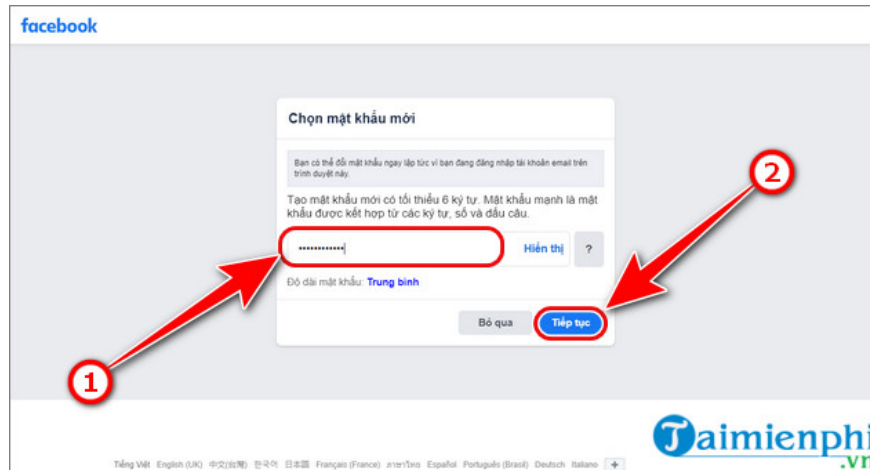

Step 5: If you choose **Continue** , you need to log in to your Gmail account to confirm. Enter your Gmail account password and select **Next** .

Step 6: Facebook will notify you that your email has been verified. Click **OK** to continue.

Step 7: Here, you enter a new password for your Facebook account. Click **Continue** once completed.

Step 8: Facebook will give you the option to log out of devices where you have used your Facebook account before or keep it until you want to log out. To be safe, log out of other devices. Click **Continue** to complete retrieving your Facebook password using Gmail.

So, your Facebook account has been successfully logged in with the newly changed password.

2. Recover Facebook password using Gmail on your phone

Similar to on a computer, you can also retrieve your Facebook password using Gmail on your phone, but the steps to retrieve your Facebook password will be a little different. To do this correctly and effectively, please refer to the instructions here.

Recovering Facebook password using Gmail is one of many ways to retrieve Facebook password that readers can easily do. To increase the security of your account TipsMake recommends that you use Facebook 2-layer security. Enabling Facebook's 2-layer security will help your account be absolutely protected and not be afraid of losing your password no matter where you use Facebook.

So TipsMake has shown **how to retrieve Facebook password using Gmail** according to detailed steps. If you have any questions, please leave a comment in the comment section below.
