

How to RIP a DVD disc on Windows (Free license)

I am a person who is passionate about art and especially has a lot of love for cinema. When traveling in major cities around the world I always choose a DVD for souvenirs, gifts for relatives. However, I encountered many problems

I am a person who is passionate about art and especially has a lot of love for cinema. When traveling in major cities around the world I always choose a DVD for souvenirs, gifts for relatives. However, I have a lot of problems using my DVDs. The first difficulty I encountered was that I lived in the United States but the DVDs I bought came from many different countries such as England, Japan, Hong Kong, . so those discs could not be used. This problem arises due to DVD region code protection, disabling DVD viewers in different regions and regions. So is there a way to play DVDs without decoding it?

I am very fortunate to have found a good way to convert the contents of my DVDs into videos. This not only bypasses the DVD decoding process, but also helps me to create many different DVD copies for convenient storage as well as in case of DVD failure. On the market today there are many software capable of ripping DVDs into Videos. Among them, WinX DVD Ripper Platinum is one of the best software I would recommend for you. I have tried several times with Windows DVD ripper before making conclusions. As I see it, an excellent DVD ripping software will perform well the process of processing, decoding DVD and create videos with high quality equivalent to the quality on the original DVD. WinX DVD Ripper Platinum meets all these requirements.

As I mentioned at the beginning of this article, I have a wide range of DVD collections full of genres from the 1990s Hollywood DVDs, training DVDs and newly released Disneys for for my sons. WinX DVD Ripper handles data very well thanks to the DVD title checking and analysis algorithm, it can intervene and extract all kinds of DVDs easily. My DVD collection is published from different countries and each DVD is region-coded in that country. WinX DVD Ripper passes protected region code during data extraction on DVD. Or more difficult is that CSS-encoded DVDs and other types of DVD protection, WinX DVD Ripper can also decode DVDs quickly, with WinX DVD Ripper I can turn commercial DVDs into videos easily. easy.

The second advantage of WinX that I want to talk about is the video quality after ripping. You will never experience Video quality issues after being ripped down. WinX takes full advantage of the interwoven algorithms and technologies to keep the quality of the output video up to 98% higher than the original DVD.

If you are a person who does not know much about computer and do not know too much knowledge related to DVD copying, you just need to use WinX DVD Ripper Platinum to get the most support. After extracting videos from DVD, you can play them on iPad, iPhone, Android, computer and TV, all with pre-configured configuration in WinX. However, you can freely choose the format for video when exporting, WinX also supports users to rip **DVD** to **MP4** , **MKV** , **MOV** , **FLV** , **AVI** , **MP3** and many other video / audio formats.

The final and best price highlight on WinX DVD Ripper Platinum is its extremely fast processing speed. DVD copying is a time-consuming task if the DVD ripping software is not strong enough and not optimized. Even some software takes up to 5 hours to be able to extract a 2-hour DVD movie. But WinX software developers have created unique Level 3 hardware acceleration technology that can speed up DVD processing. Do you believe it only takes 5 minutes to complete the whole DVD ripping process? I don't know how the manufacturer created the miracle, but it saved me a lot of time to rip out hundreds of my DVDs.

I guess you're expecting to download WinX DVD Ripper Platinum software right now, but what's good is that there's always a certain fee to help developers be more motivated. This is the only drawback of WinX DVD Ripper Platinum software. But don't get discouraged, right now you have the opportunity to get a free \$ 67.95 DVD ripper! Click here to participate in a gifting campaign (limited) organized by software developers. All users participating here can get a copy of the latest version for free. More specifically, the participants had a chance to win a projector to watch DVD movies on the big screen.
