

How to Rotate a Video

This wikiHow teaches you how to change a video's vertical or horizontal orientation. You can rotate a video by downloading and using Movie Maker on a Windows computer, QuickTime on a Mac, and free apps on iPhone and Android smartphones....

Method 1 of 4:

Rotating on Windows

1.

Download and install Windows Movie Maker. Windows Movie Maker was discontinued in 2012, but you can still download and install it on Windows 10 by visiting a third-party site and downloading it from there.

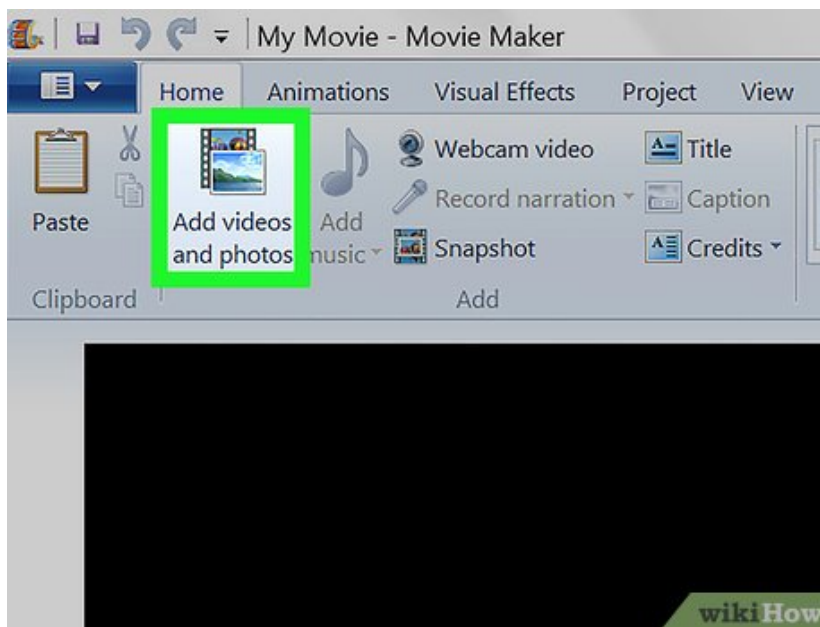

1. While it is possible to use VLC Media Player to rotate a video, doing so will remove the audio from the saved video.

2.

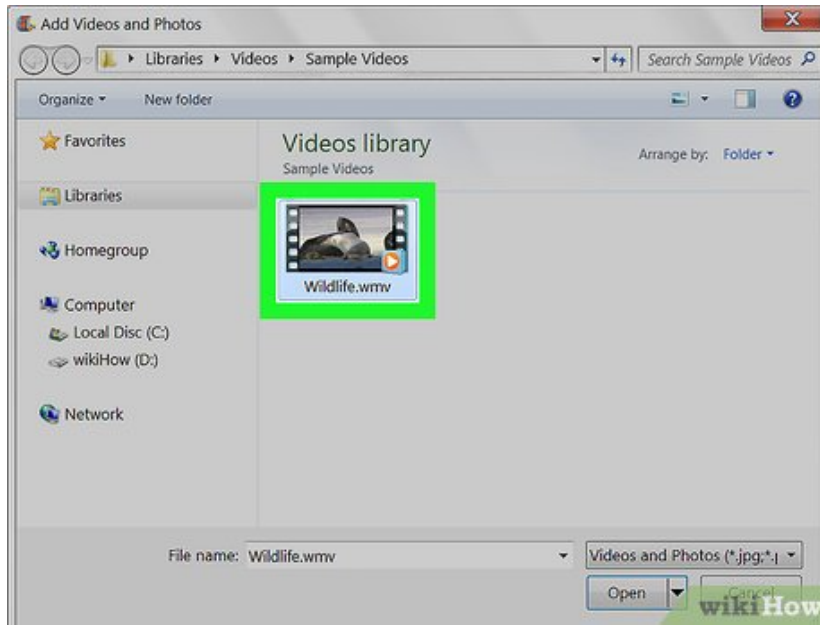

Open Windows Movie Maker. Its app icon resembles a film strip. This will open the project view section of Movie Maker.

3.

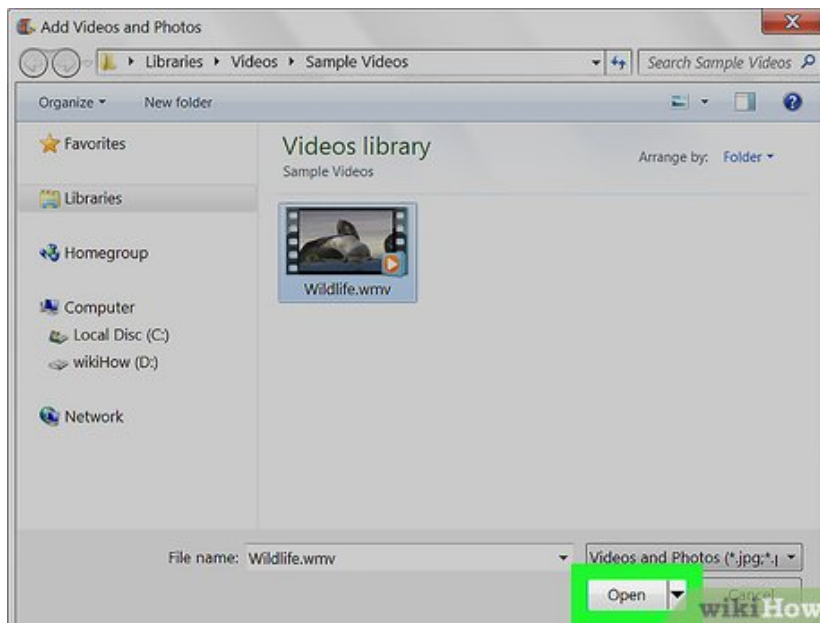

Click **Add videos and photos**. This option is in the upper-left side of the window in the "Add" section. A new window will open.

4.

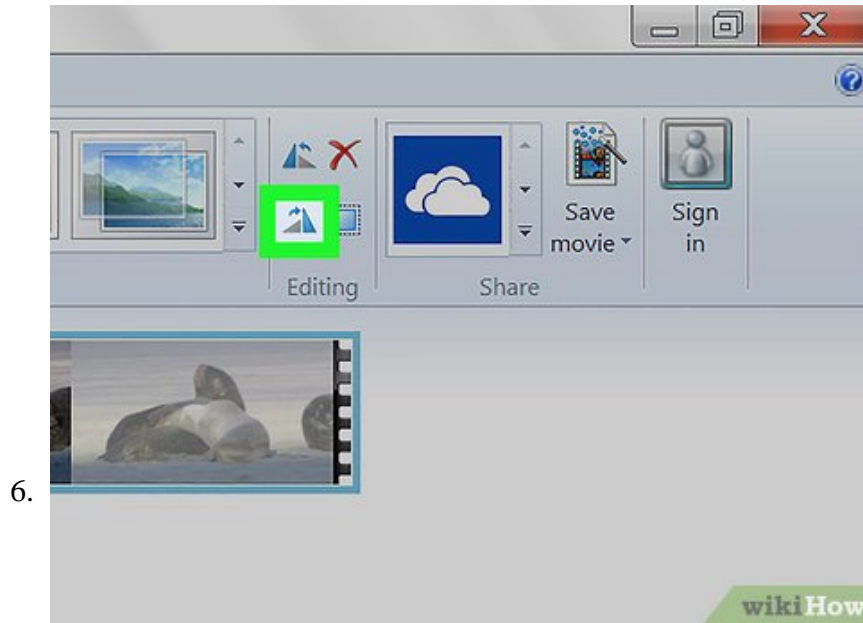

Select your video. Go to the location of the video that you want to rotate, then click the video.

5.

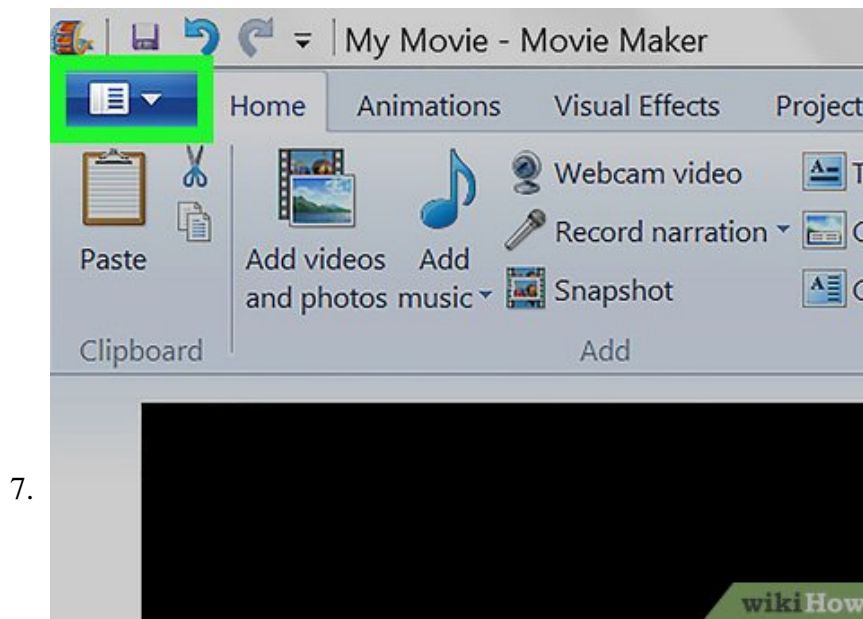

Click . It's in the bottom-right corner of the window. Your video will open in Movie Maker.

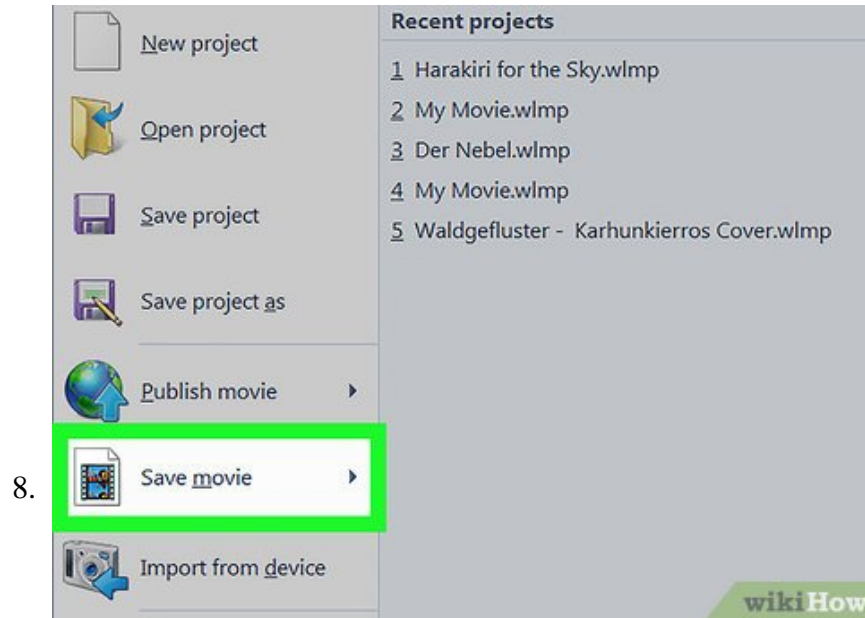

Rotate the video. Click either **Rotate left** or **Rotate right** in the "Editing" section of the toolbar. Your video should rotate accordingly.

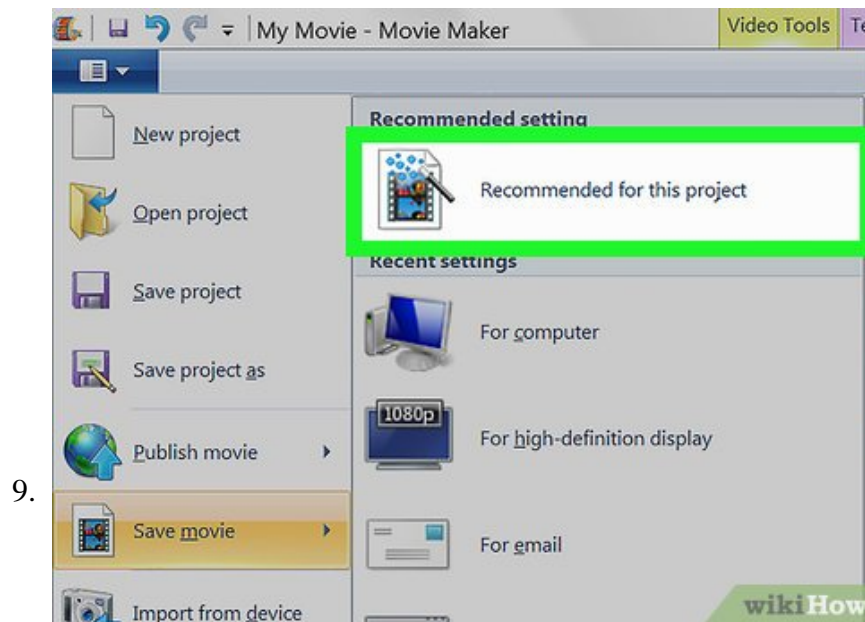

1. You may have to perform this step more than once to get your video to the correct orientation.
2. In some cases, clicking **Rotate left** will result in the video being rotated to the right when it's saved (and vice versa for **Rotate right**).

Click **File**. It's in the upper-left corner of the window. A menu will appear.

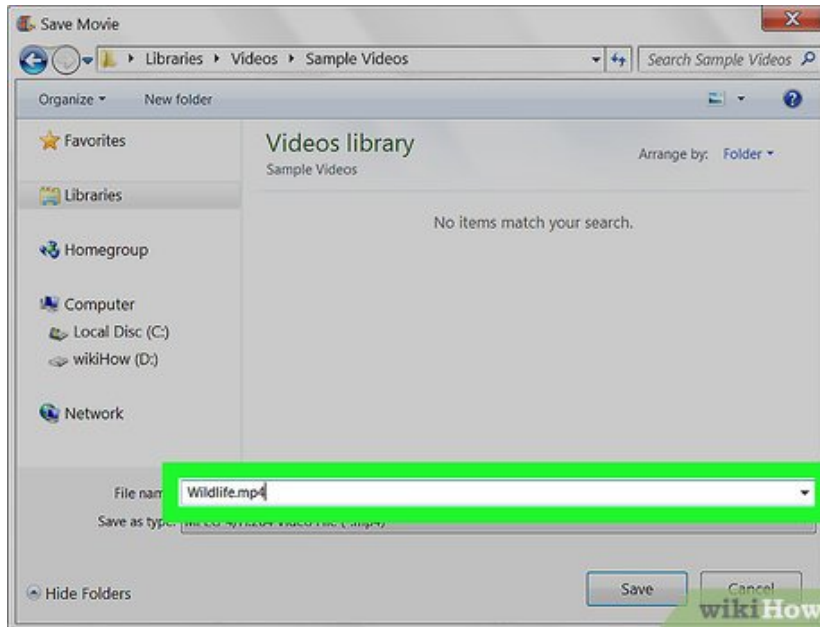

Select **Save movie**. This option is near the middle of the menu. Selecting it will prompt a pop-out window.

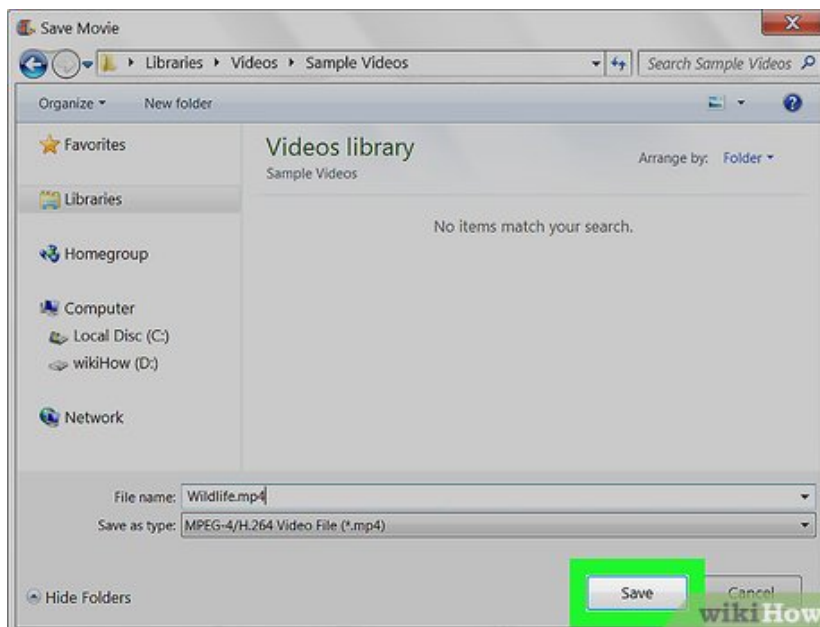

Click **Recommended for this project**. It's at the top of the pop-out window.

10.

Enter a title. Type in the title that you want to use for your movie.

11.

Click **Save**. It's in the bottom-right corner of the window. This will save your video under your specified name. When you play it in any media player, it will be rotated to your liking.

Method 2 of 4:

Rotating on a Mac

1.

Open Spotlight

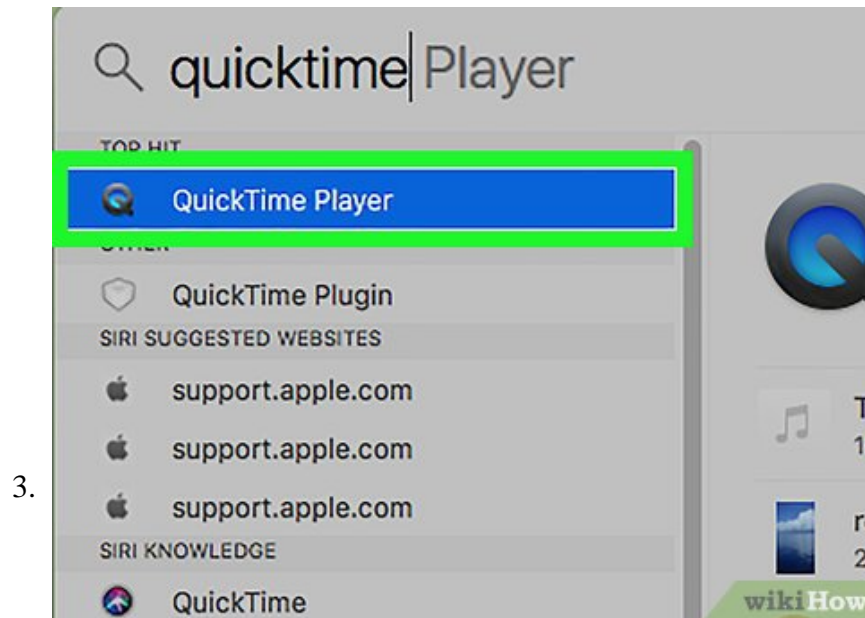

Picture 13 of How to Rotate a Video

. Click the magnifying glass-shaped icon in the top-right corner of your Mac's screen. A search bar will appear.

2.

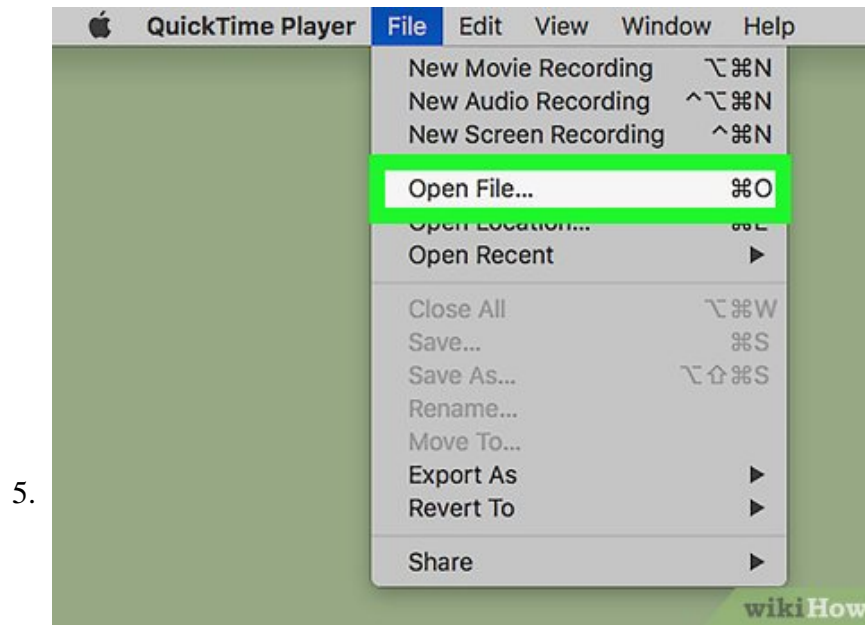

Type in `quicktime` . This will search your computer for the QuickTime app.

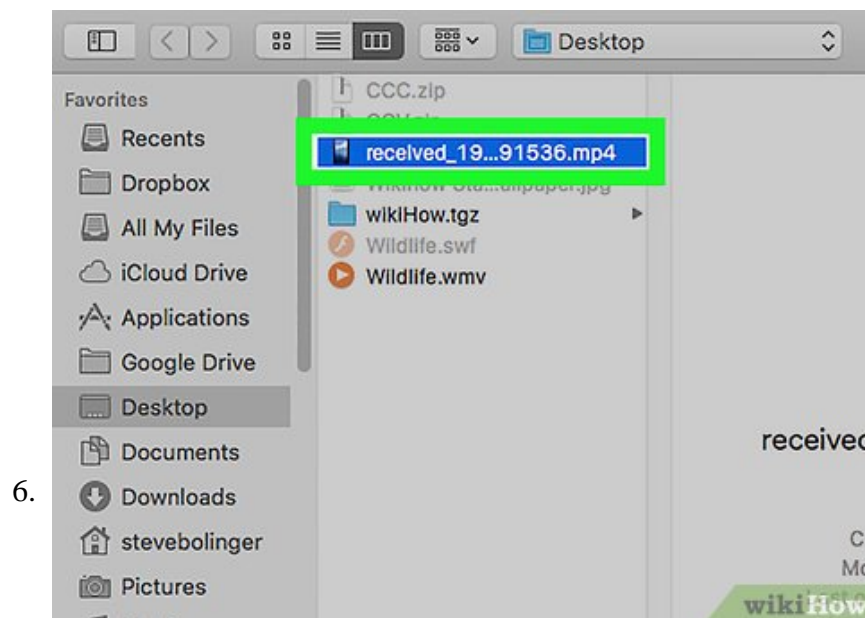

Double-click **QuickTime** . It should be the top result in the Spotlight search. Doing so opens the QuickTime video player.

Click **File** . You'll find this in the top-left corner of your Mac's screen. A drop-down menu will appear.

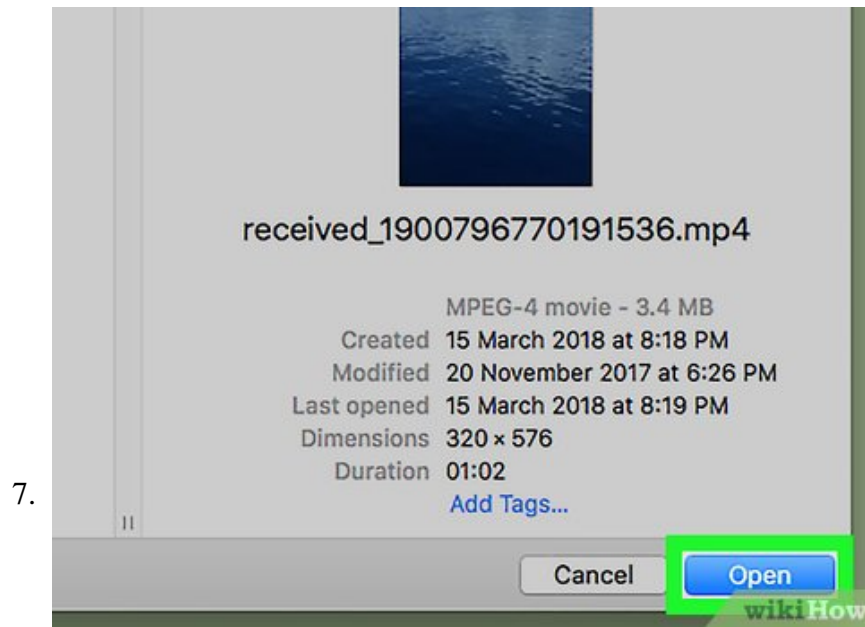

Click **Open File...**. It's near the top of the drop-down menu.

Select your video. Click the video that you want to rotate.

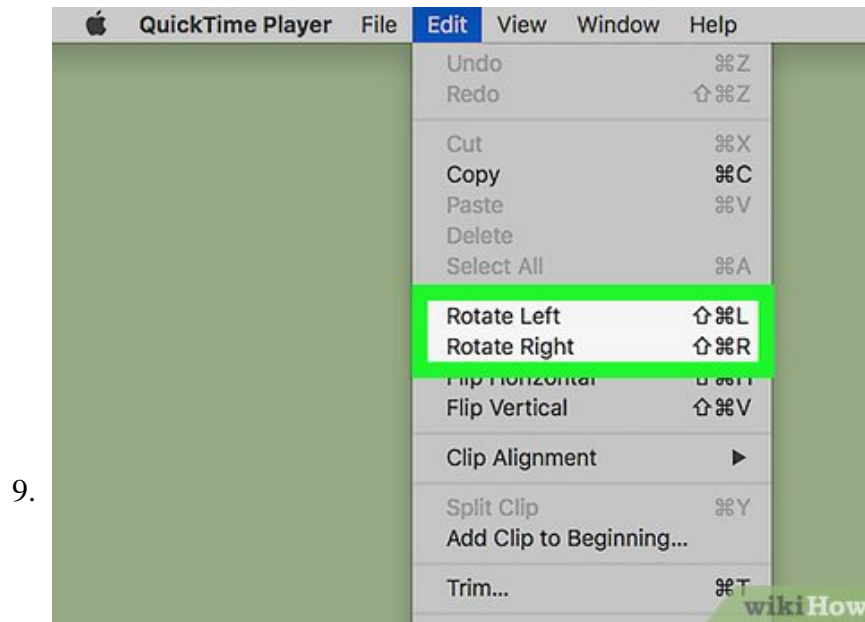

1. You may first have to go to the folder in which the video is stored by clicking the appropriate folder on the left side of the window.

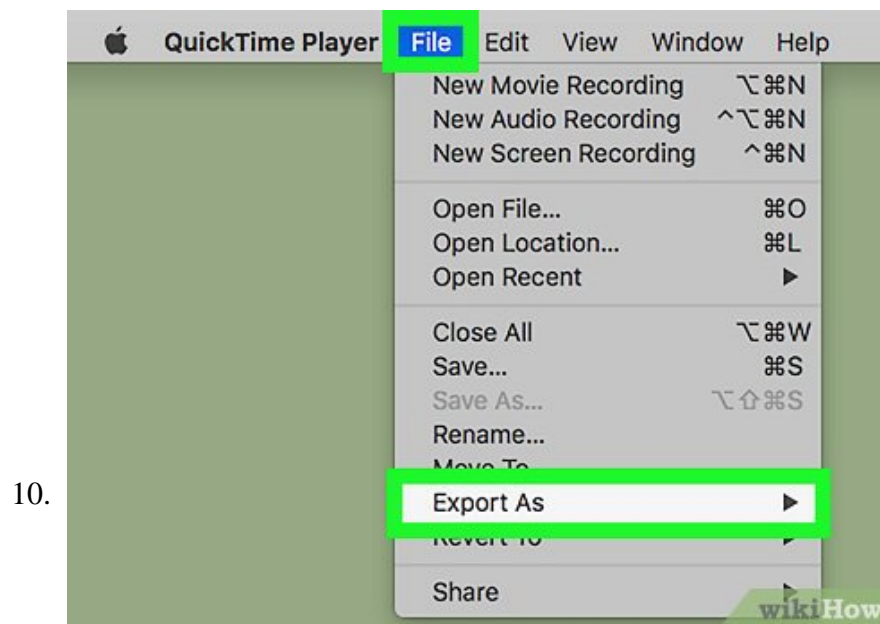

Click **Open**. It's in the lower-right side of the window. Doing so will open the video in the QuickTime player.

Click **Edit**. This menu item is at the top of the screen. A drop-down menu will appear.

Click a **Rotate** option. You'll find several **Rotate** options in the drop-down menu; click the one that you want to apply to your video.

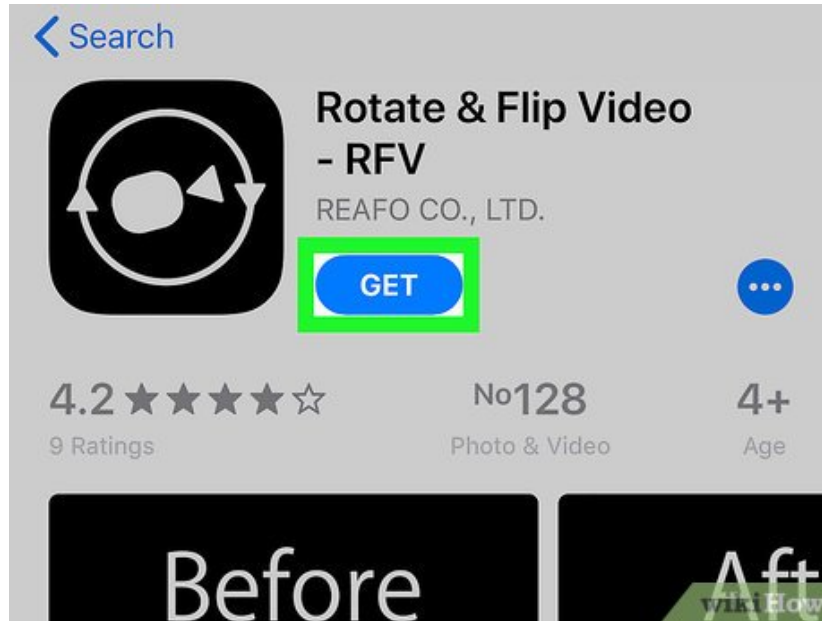

Save your rotated video. To do so:

1. Click the **File** menu item again.
2. Select **Export**
3. Select a quality (e.g., **1080p**).
4. Add a name and select a save location.
5. Click **Save**

Method 3 of 4:

Rotating on an iPhone

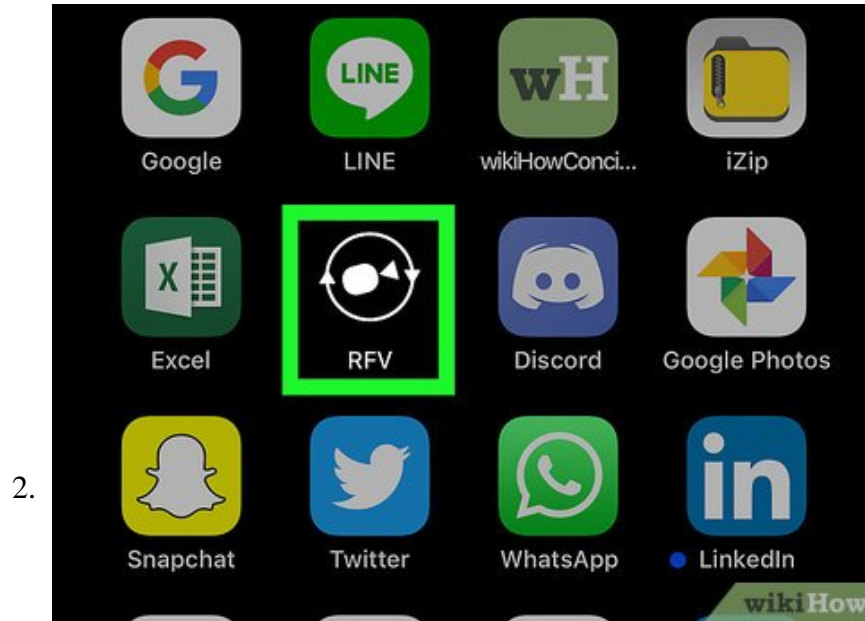

Download the Rotate & Flip Video app. To do so:

1. Open the **App Store**

2. Tap **Search**
3. Tap the search bar.
4. Type in `rotate & flip video`
5. Tap **Search**

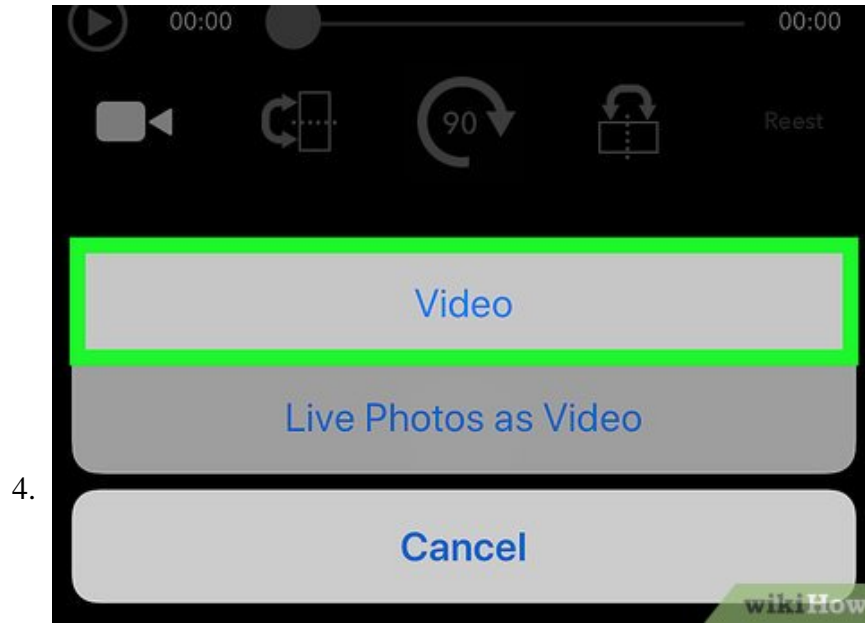

6. Tap **GET** to the right of the "Rotate & Flip Video" heading.
7. Enter your Touch ID, or enter your Apple ID email address and tap **Install**.

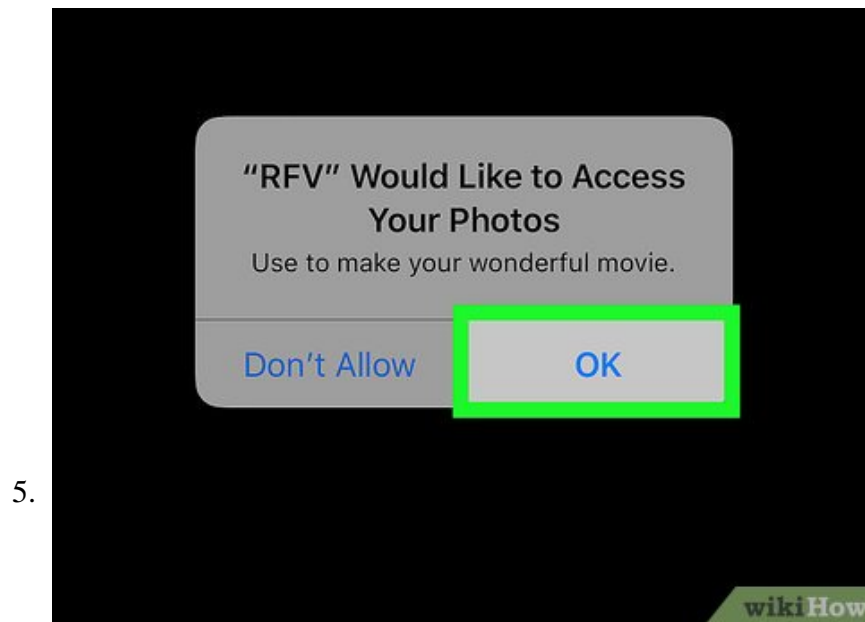

Open Rotate & Flip Video. Tap **OPEN** in the App Store, or tap the Rotate & Flip Video app icon.

Tap the video camera icon. It's in the middle of the screen. Doing so prompts a pop-up menu at the bottom of the screen.

Tap **Video**. You'll find this in the pop-up menu.

Tap **OK** if prompted. This will allow Rotate & Flip Video access to your iPhone's videos.

Select a video album. Tap the album in which your video is located.

1. If you're unsure of what to select here, tap **Camera Roll**.

Select a video. Tap the video that you want to edit.

Tap Select. It's in the bottom-right corner of the screen. Doing so will open your video in the main window.

Rotate your video. Tap the **90** option until your video reaches the orientation that you prefer.

10.

Tap **Save**. It's at the bottom of the screen. Doing so will save your rotated video onto your iPhone's Camera Roll.

1. Once you see an advertisement pop up, you can exit the Rotate & Flip Video app.

Method 4 of 4:

Rotating on an Android

1.

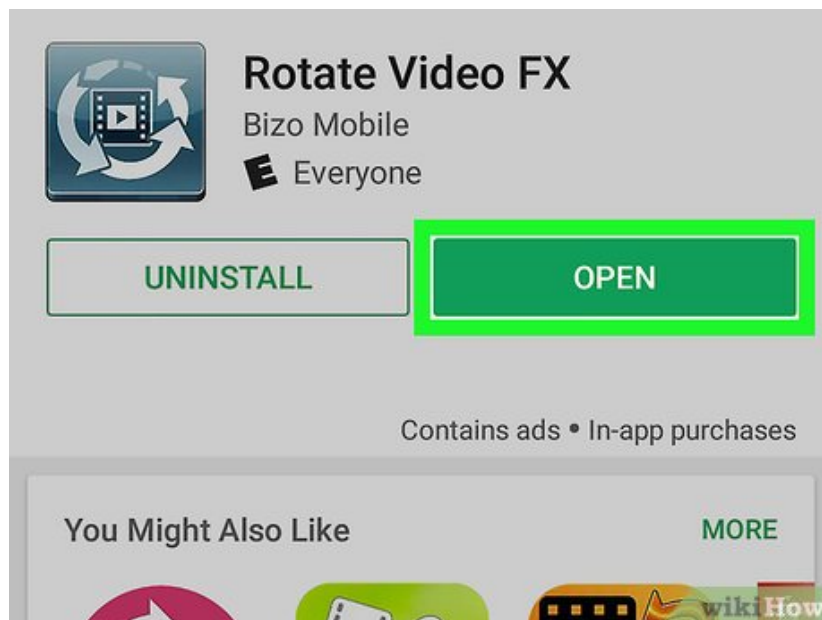

Download the Rotate Video FX app. To do so:

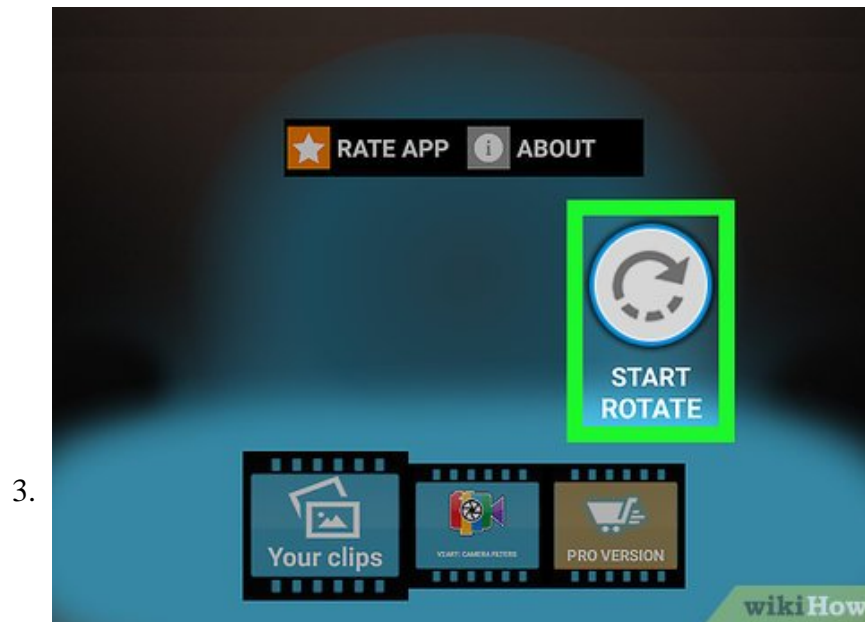

1. Open the **Google Play Store**

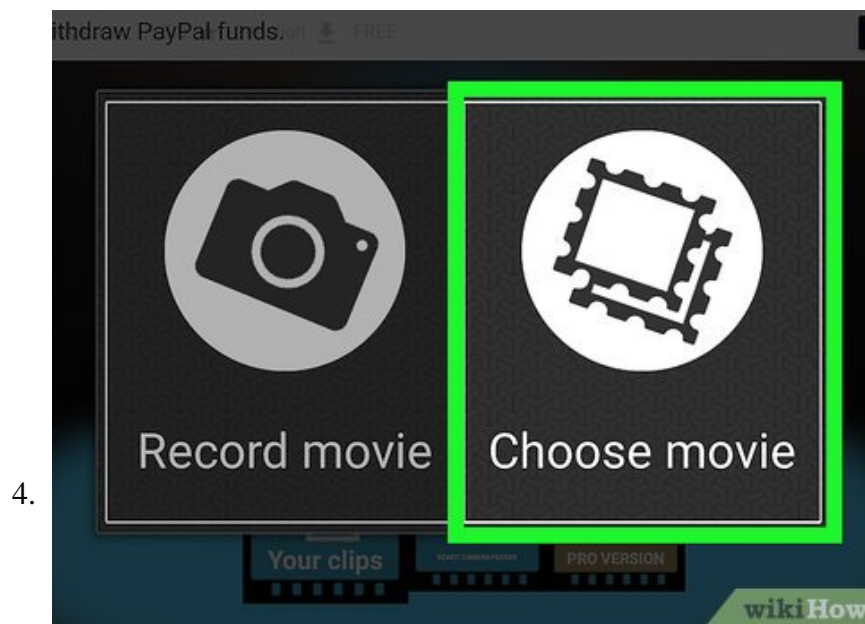

2. Tap the search bar.
3. Type in `rotate video fx`
4. Tap **Rotate Video FX** in the results.
5. Tap **INSTALL**
6. Tap **ACCEPT**

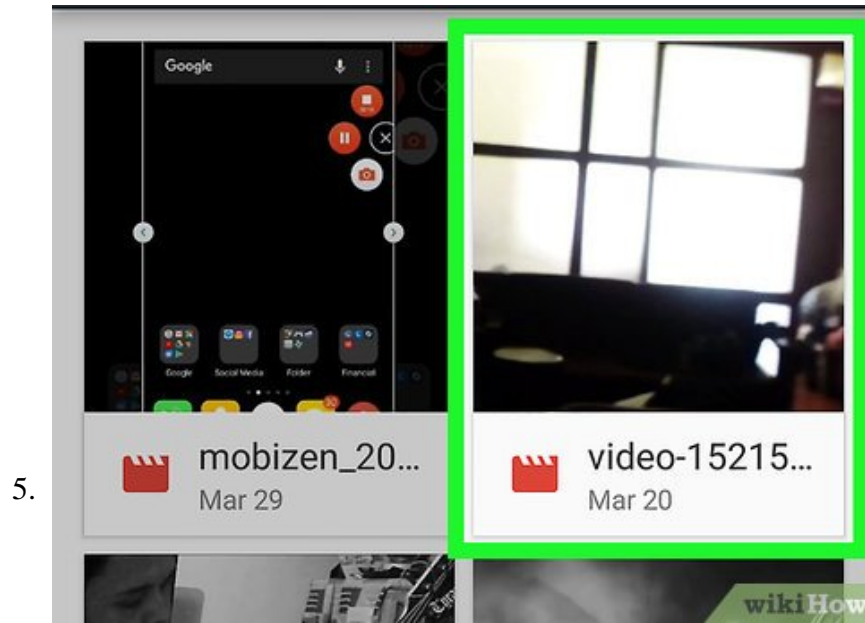

Open Rotate Video FX. Tap **OPEN** in the Google Play Store, or tap the Rotate Video FX app icon.

Tap **START ROTATE**. It's on the right side of the screen.

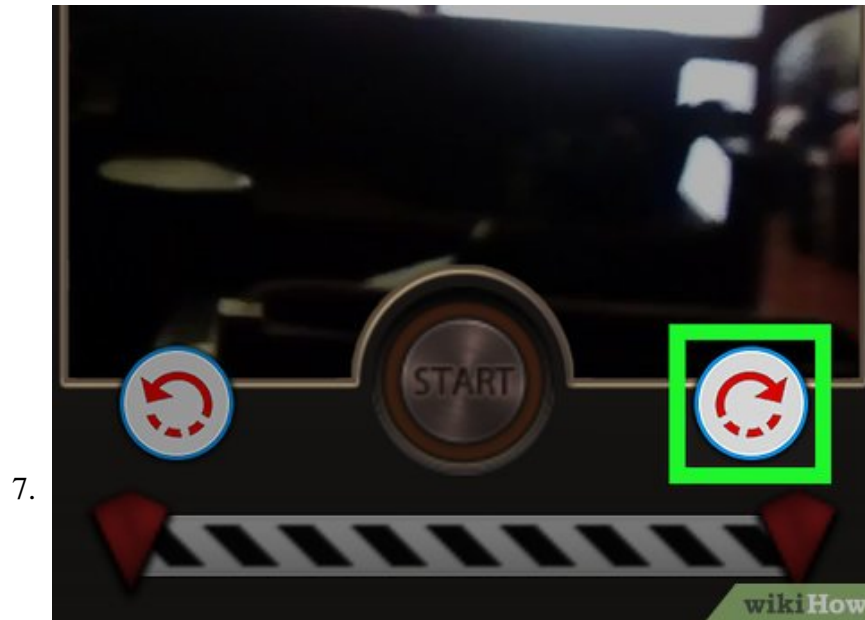

Tap **Choose movie** when prompted. Doing so will open your Android's camera roll.

Select a video. Tap the video that you want to rotate.

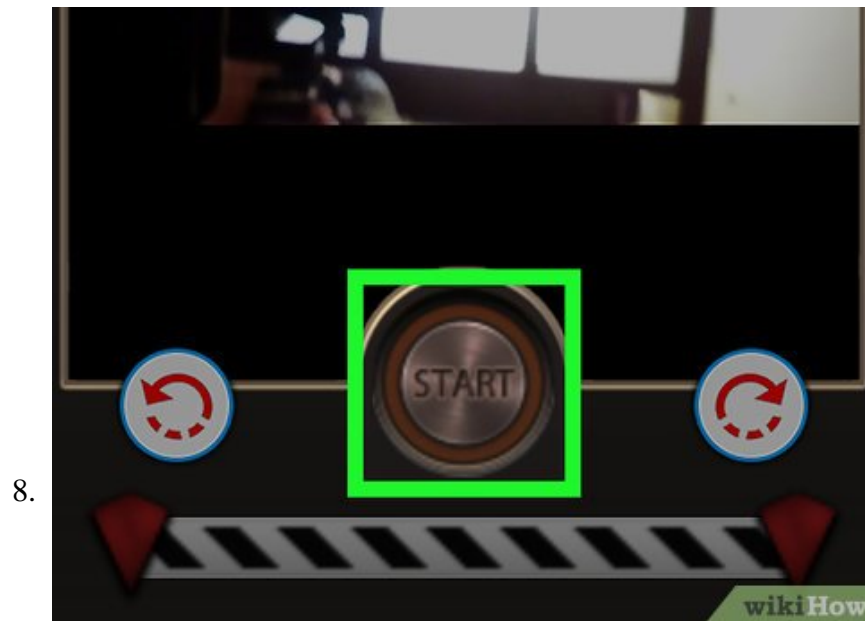

Exit the ad if necessary. After selecting a video, you may have to tap **X** or **CLOSE** on an ad before proceeding.

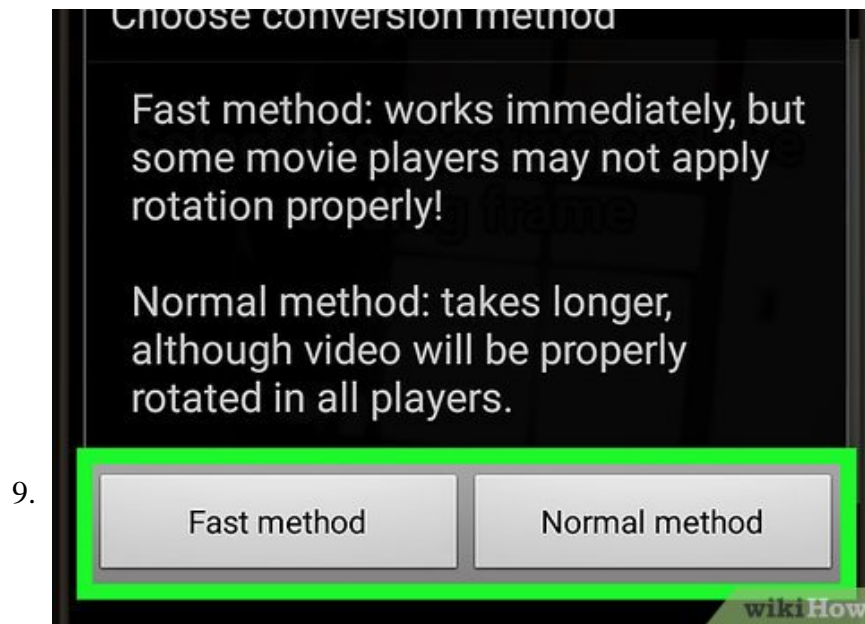

Rotate the video. Tap one of the arrows in the bottom-left or bottom-right corner of the screen to rotate your video 90 degrees left or right.

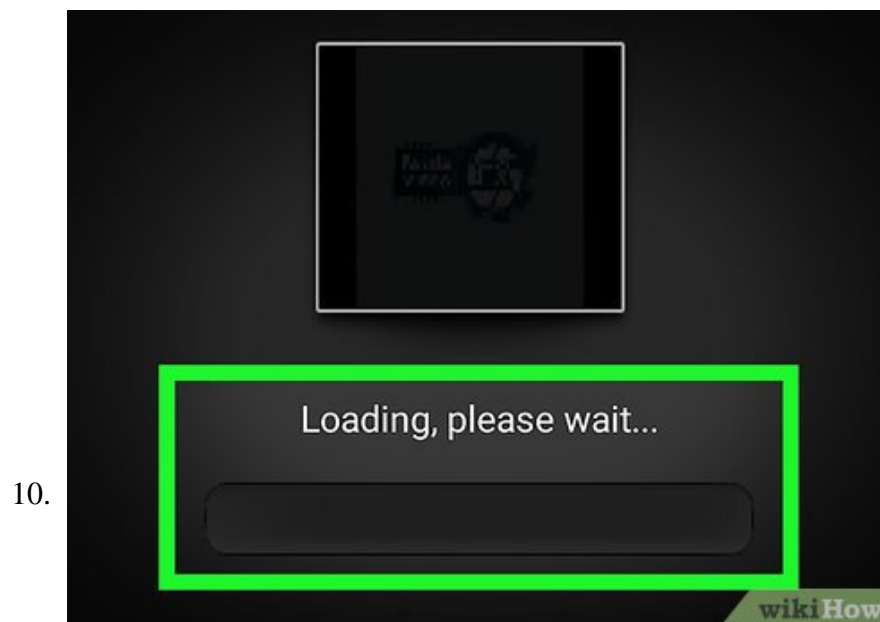

1. If you want to rotate the video 180 degrees, just tap the arrow twice.

Tap **START**. It's at the bottom of the screen.

Select a conversion speed. Tap **Fast method** to flip the video quickly, or tap **Normal method** to make sure that the video will appear rotated in all supported media players.

Wait for your video to finish converting. Once you see the video begin to play, your video has been rotated and saved to your Android's camera roll.
