

How to rotate Video on iPhone

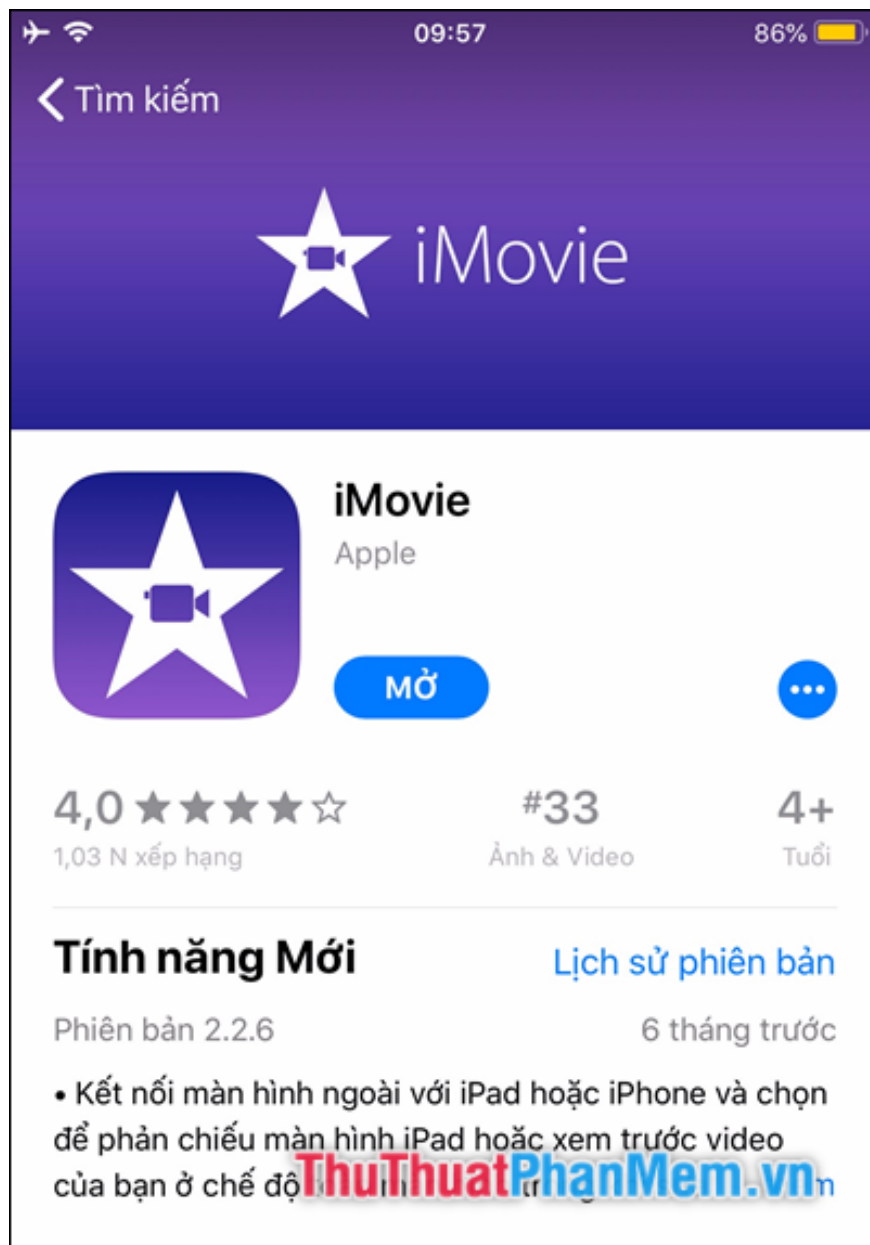

You are trying to rotate the video available on your iPhone but do not know how to do it. In this article, TipsMake.com would like to send you the article on how to rotate videos on iPhone easily and quickly. Let's see what that is!

You are trying to rotate the video available on your iPhone but do not know how to do it. In this article, **TipsMake.com** would like to send you the article on how to rotate videos on iPhone easily and quickly. Let's see what that is!

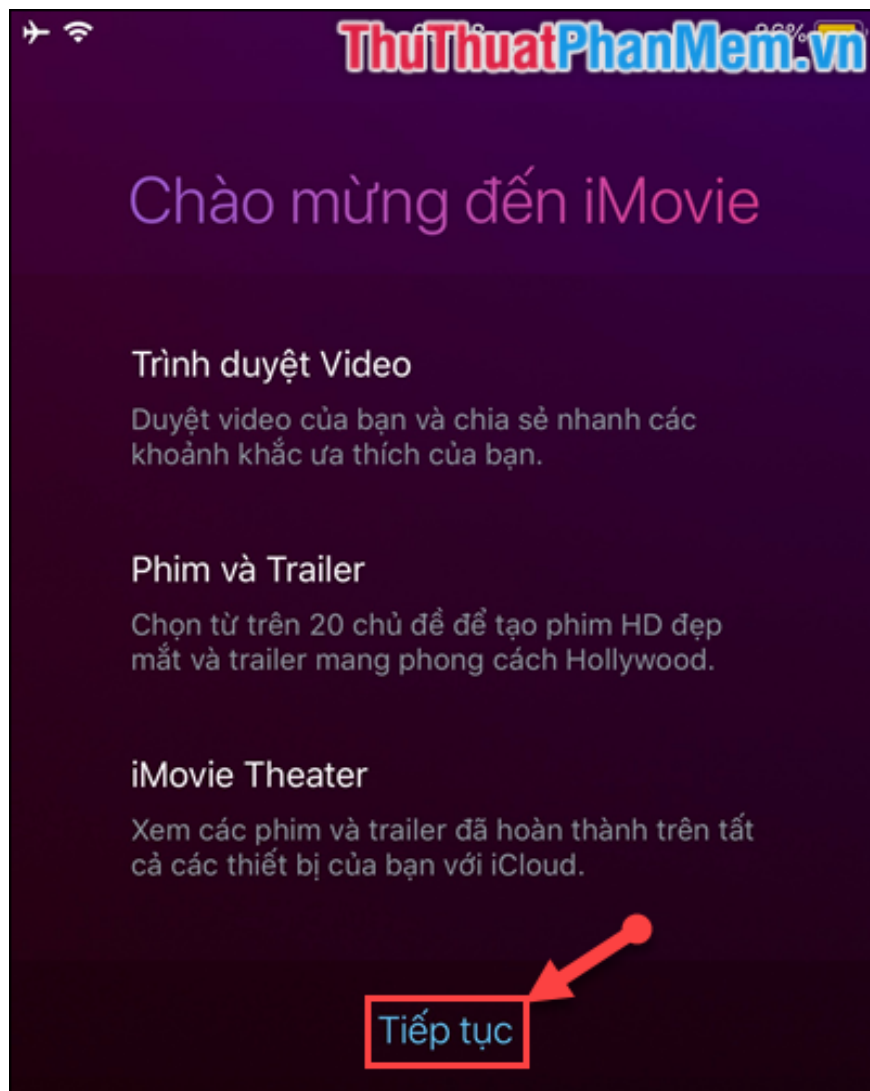

Step 1 : To perform video rotation, you need to download more iMovie applications.

You access the App Store -> type iMovie search -> **Install applications** .

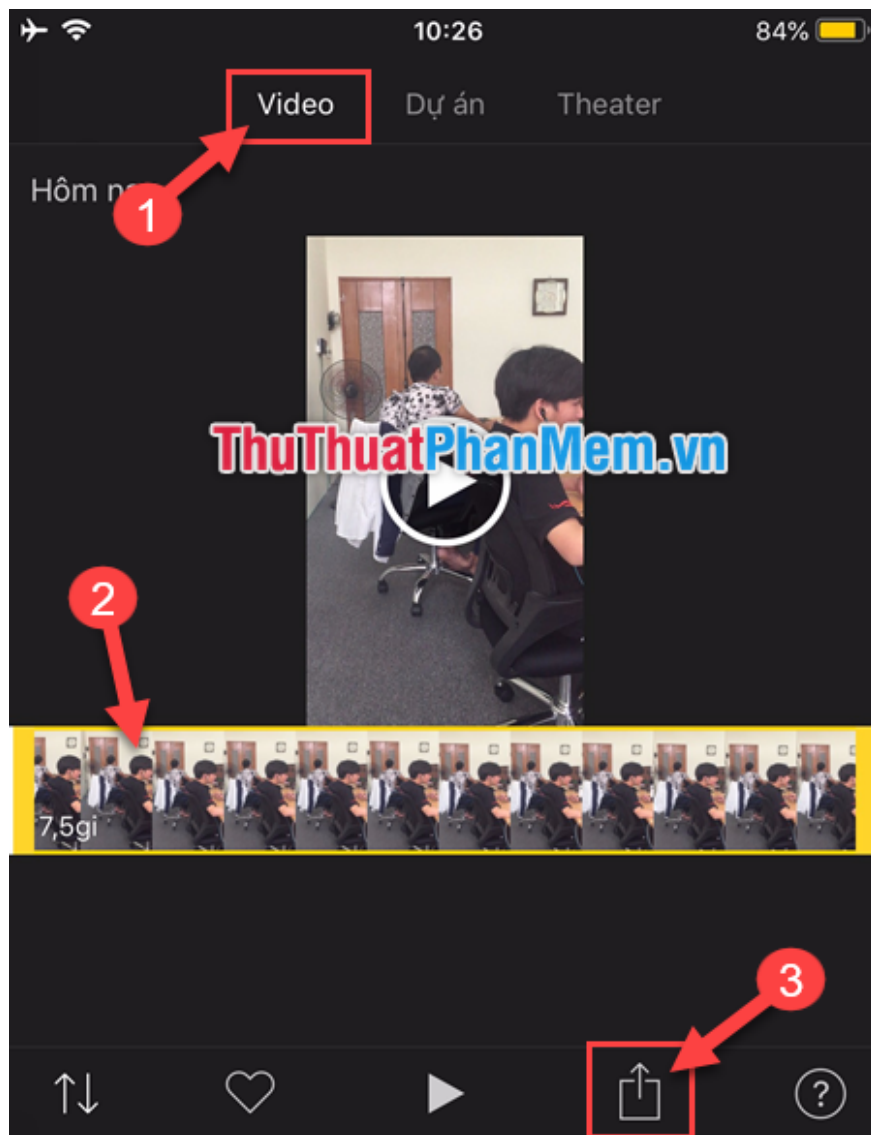

Step 2 : After downloading the application, launch the application. In the application introduction you select *Continue* .

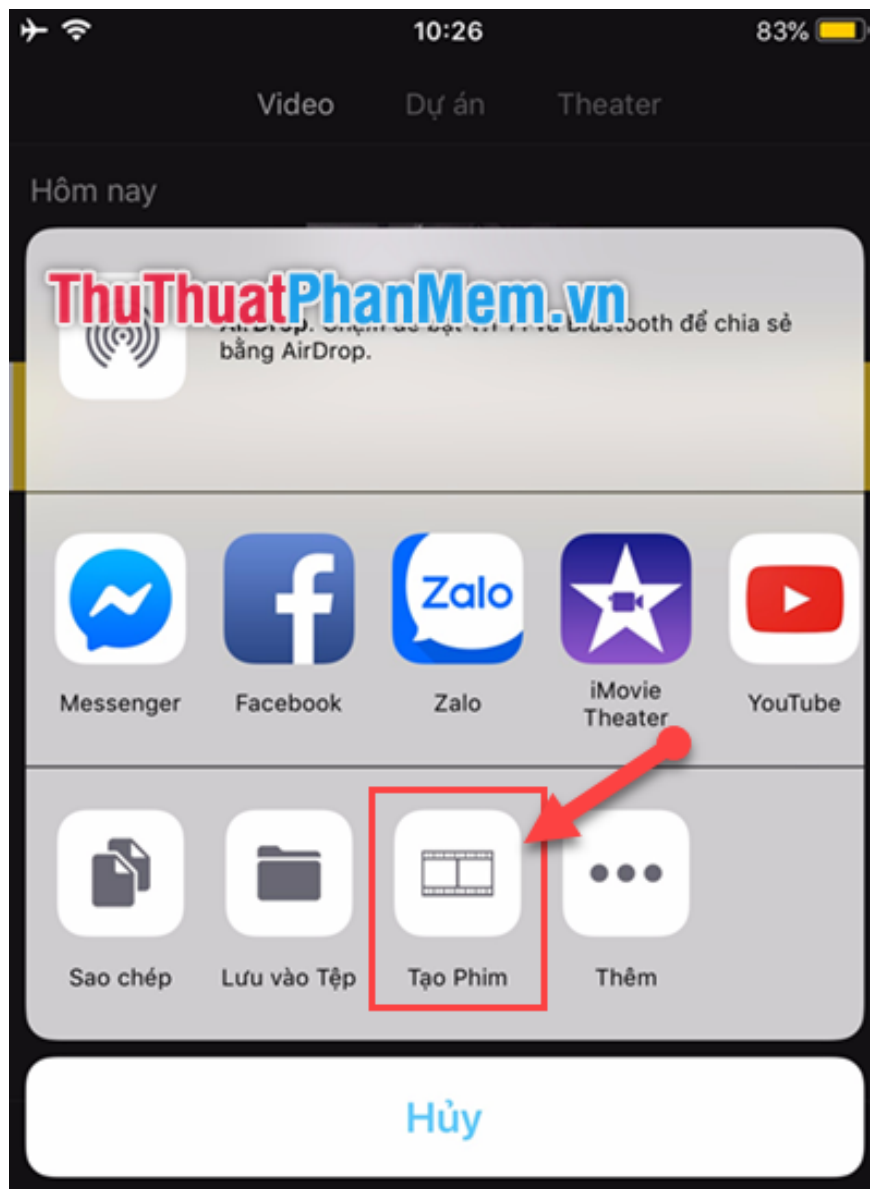

Step 3 : At the application interface:

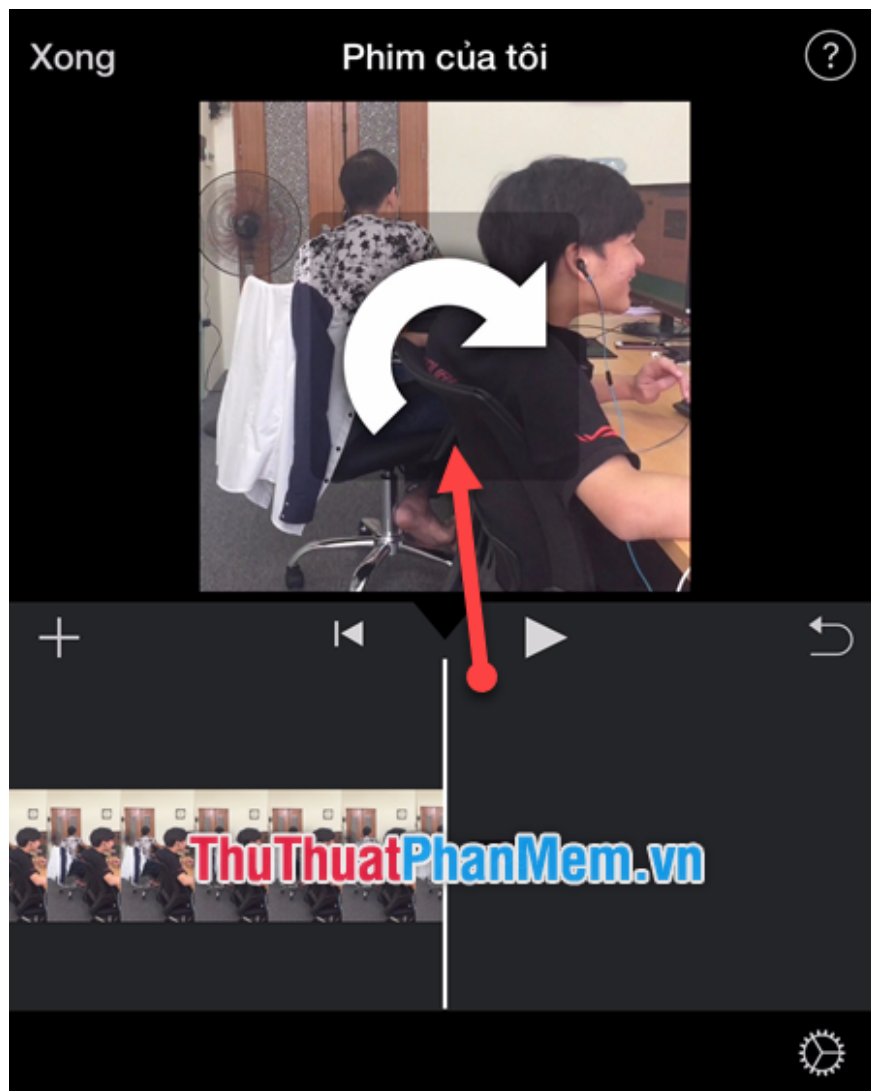

- (1) Select the *Video* item .
- (2) Select the Video you want to make the rotation.
- (3) Then click on the extension icon.

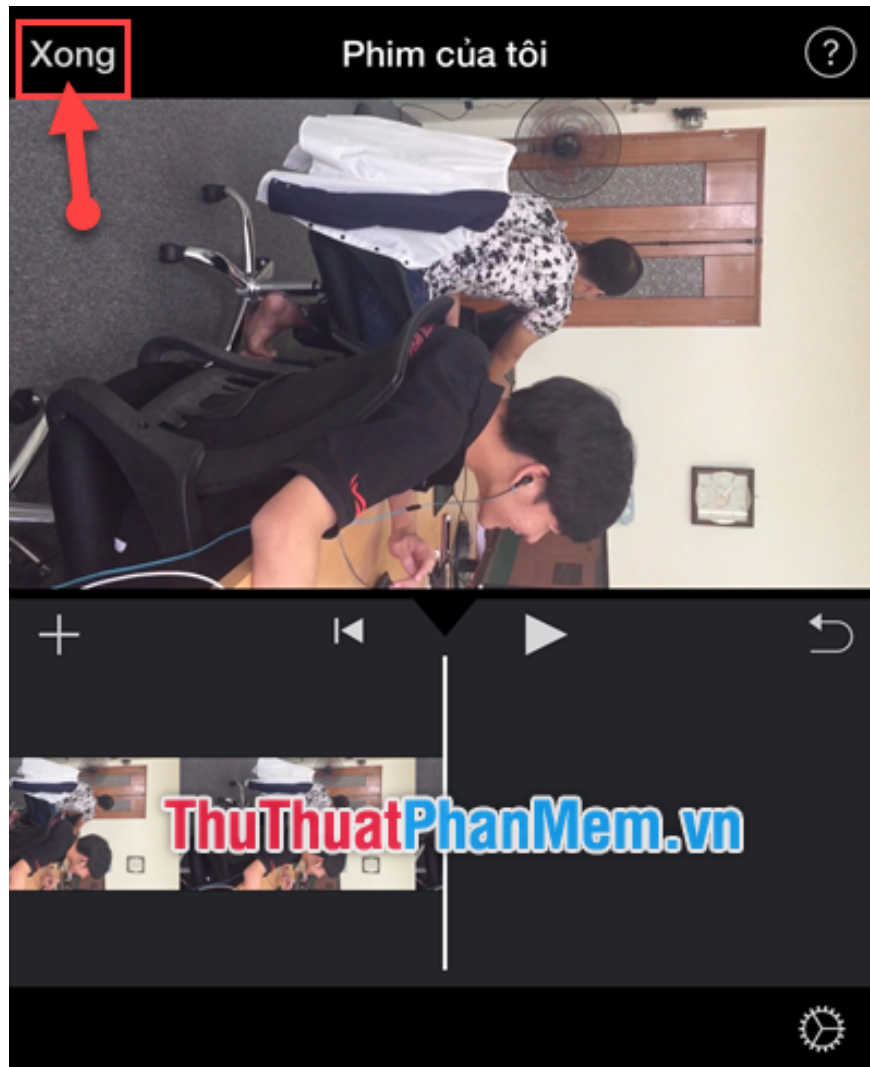

Step 4 : Choose *Create movie* .

Step 5 : Then, use your two fingers to change the direction of the video.

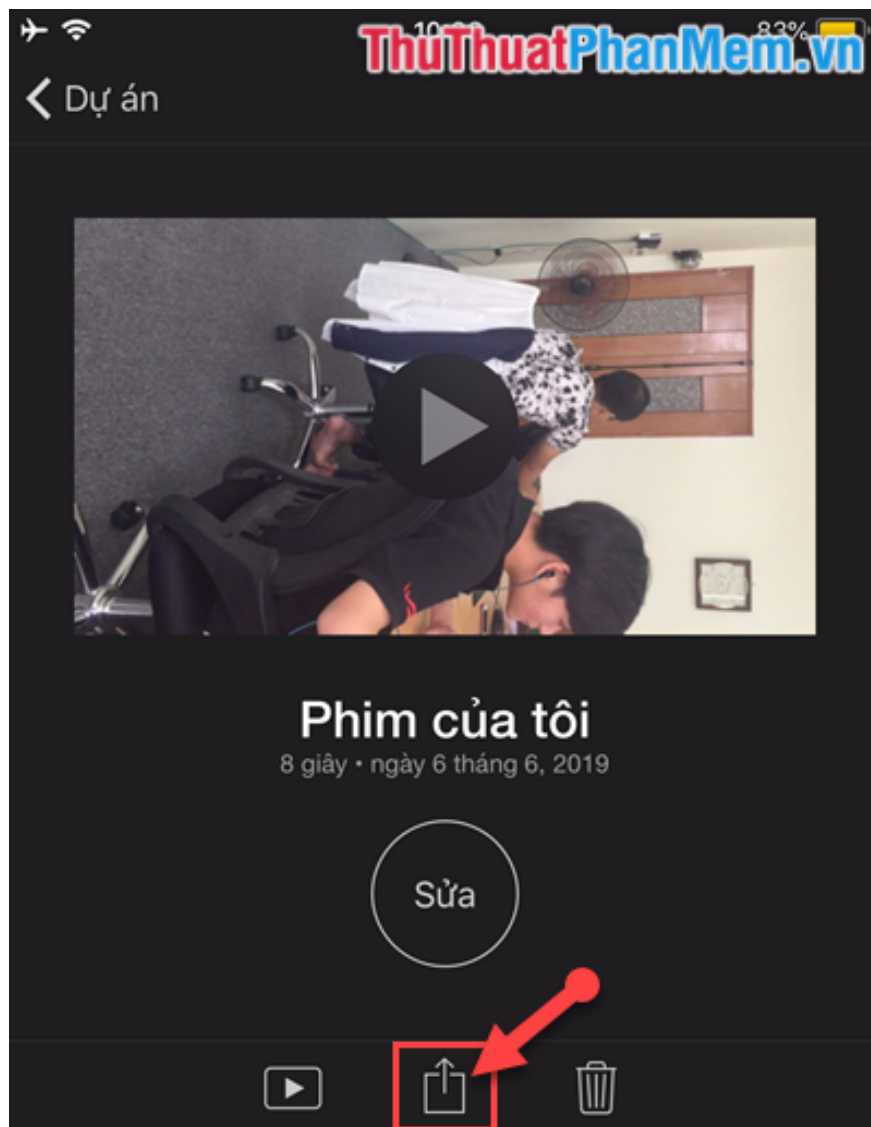

The result we get:

After you have rotated the video to your right, select *Done* .

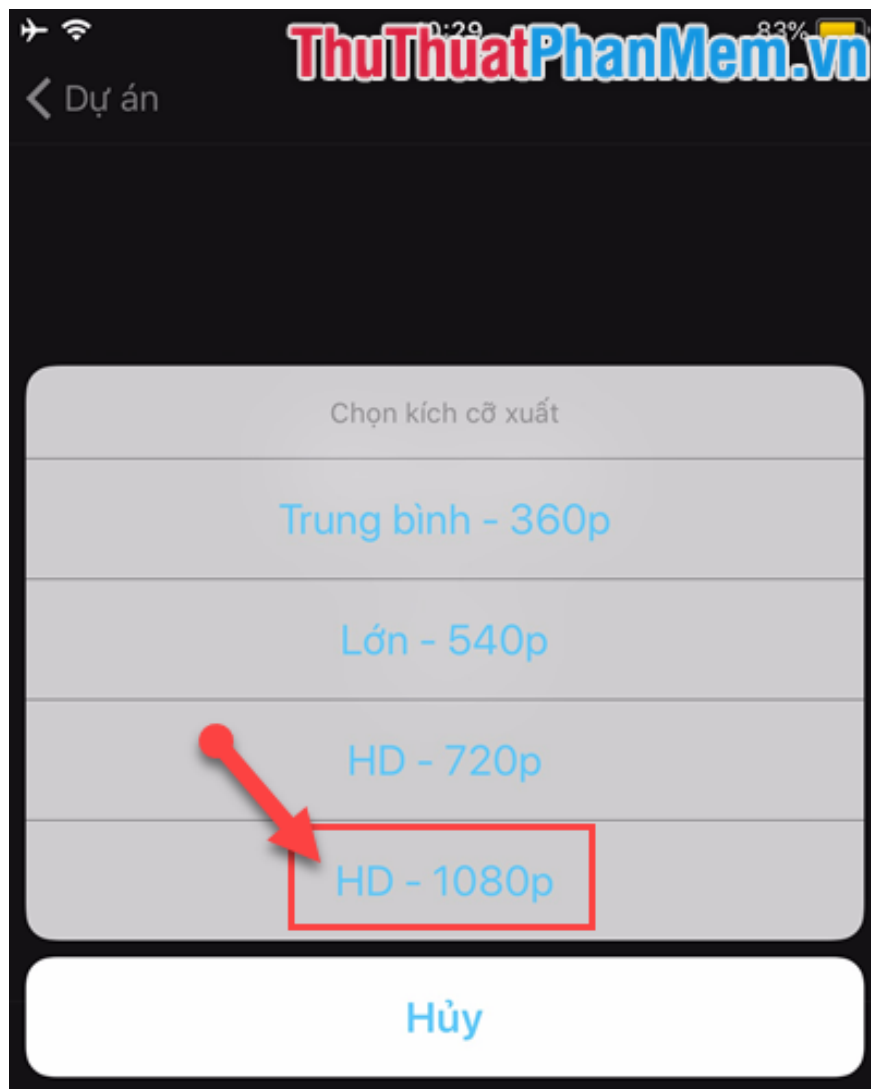

Step 6 : To perform the saved video rotation into your phone, select the extension icon.

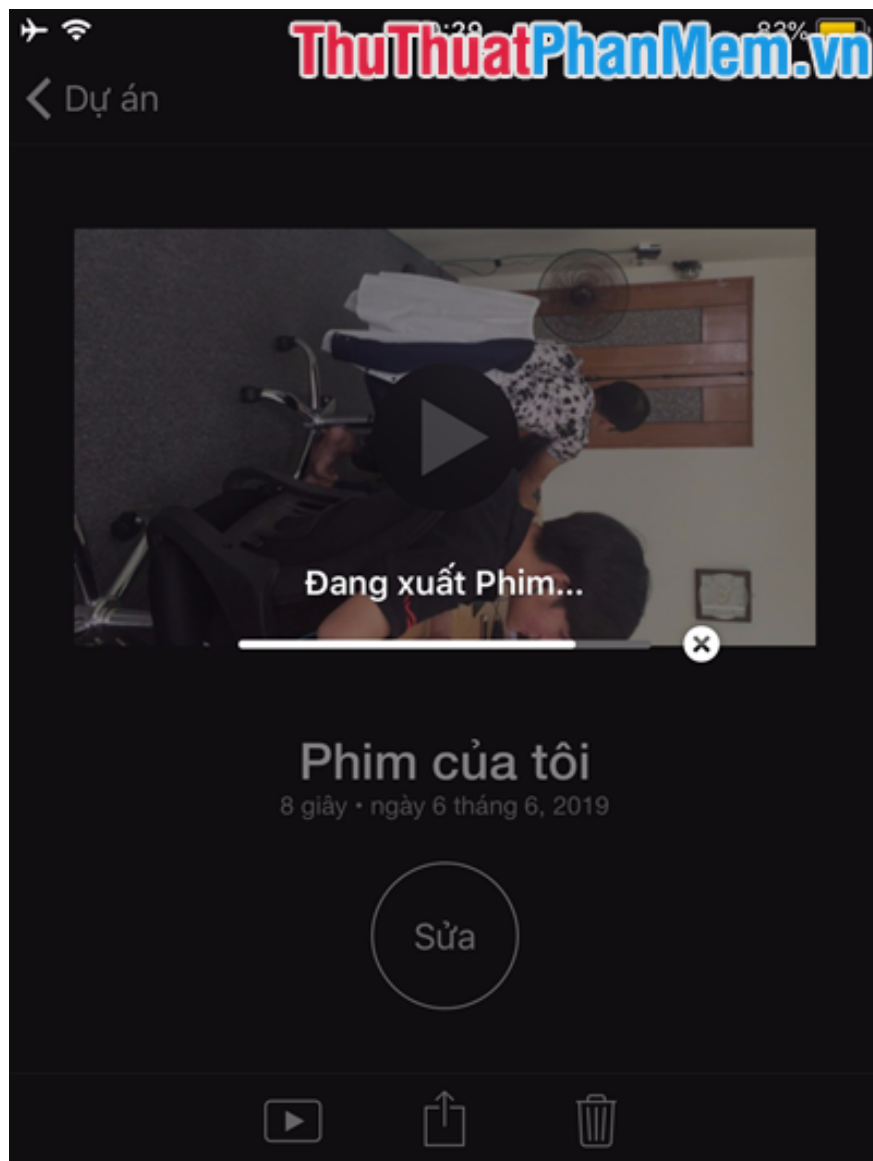

Step 7 : Then select *Save Video* .

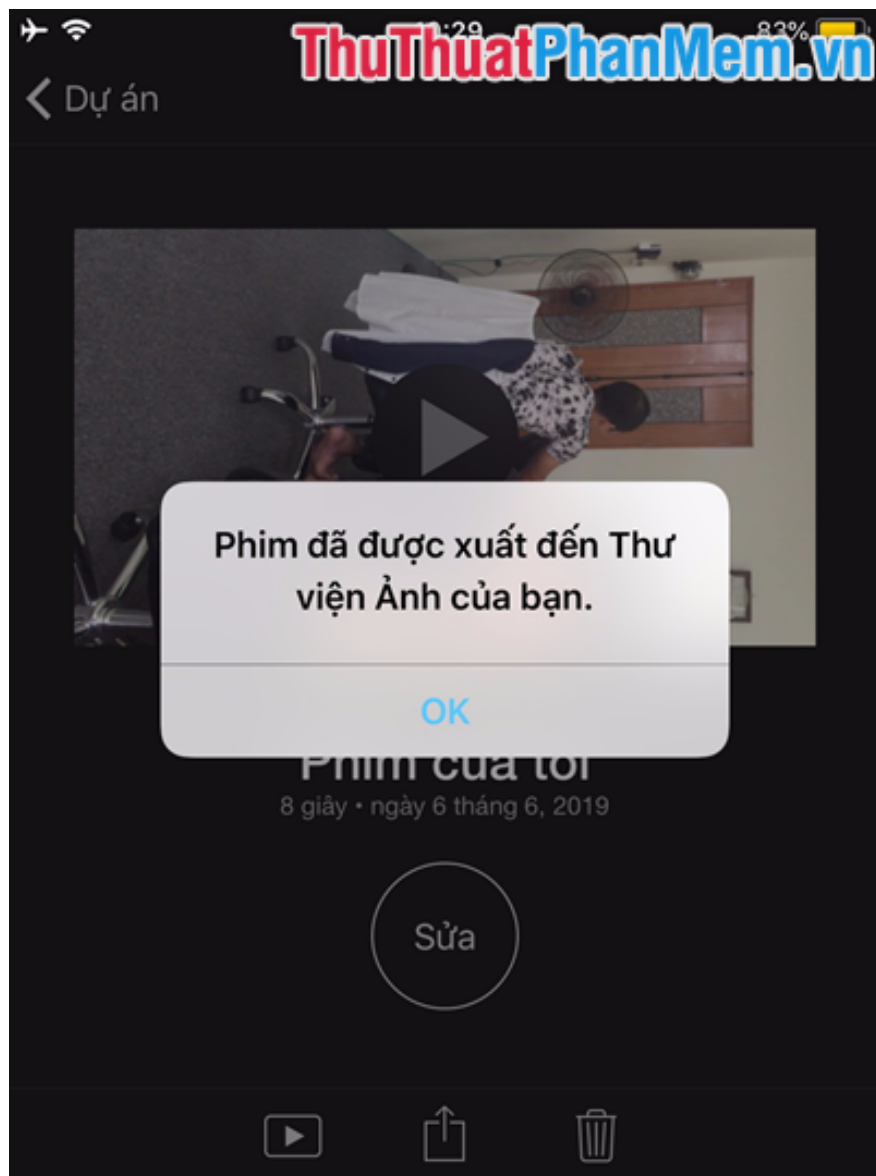

Step 8 : Select the quality of the video. You should choose HD - 1080p quality for the best video quality.

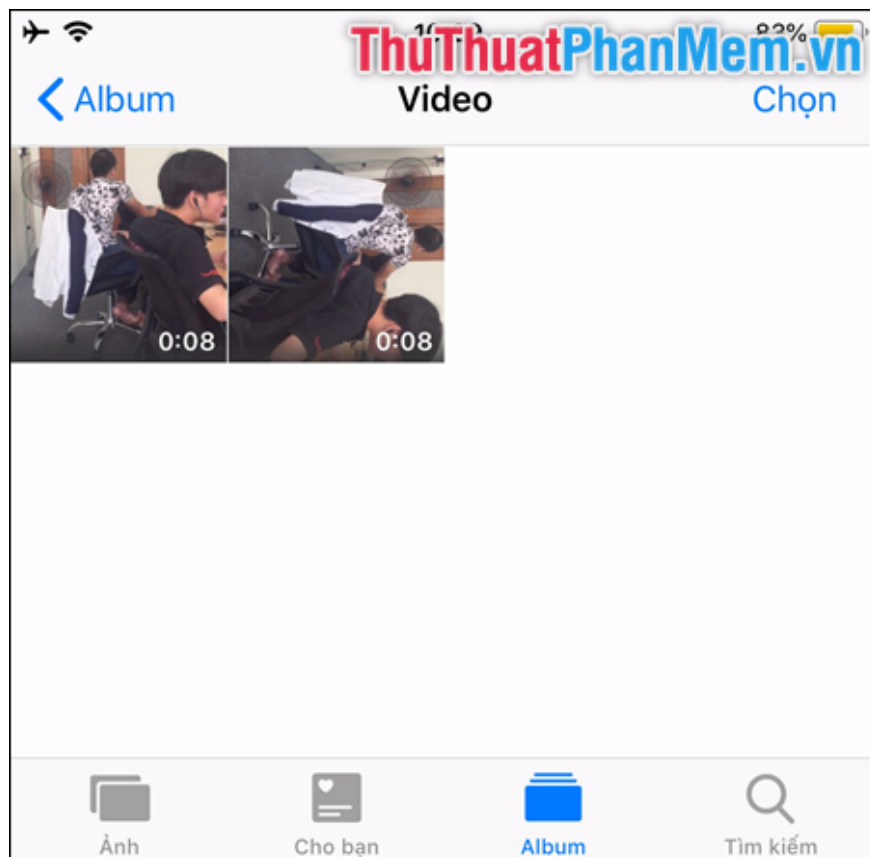

Step 9 : The software will then create a new video for you.

And now notify when finished creating a new video.

Step 10 : Now you go to Library on iPhone -> Select Video to get rotated video.

Very simple and easy to implement right. I wish you successful implementation !!!
