

How to rotate Windows 10, 8, 7 computer screen quickly

Having your computer screen rotated horizontally or upside down can be frustrating, especially if you don't know how to fix it. This article will show you how to rotate your screen on Windows 10, 8, 7, XP quickly, helping you work more efficiently.

A screen that is rotated sideways or upside down is a common problem and can be fixed in seconds. This article will guide you through the simplest ways to adjust your screen, from keyboard shortcuts to display settings.

How to rotate computer screen

Step 1: First you need to right-click on the computer screen, then select **Screen resolution** .

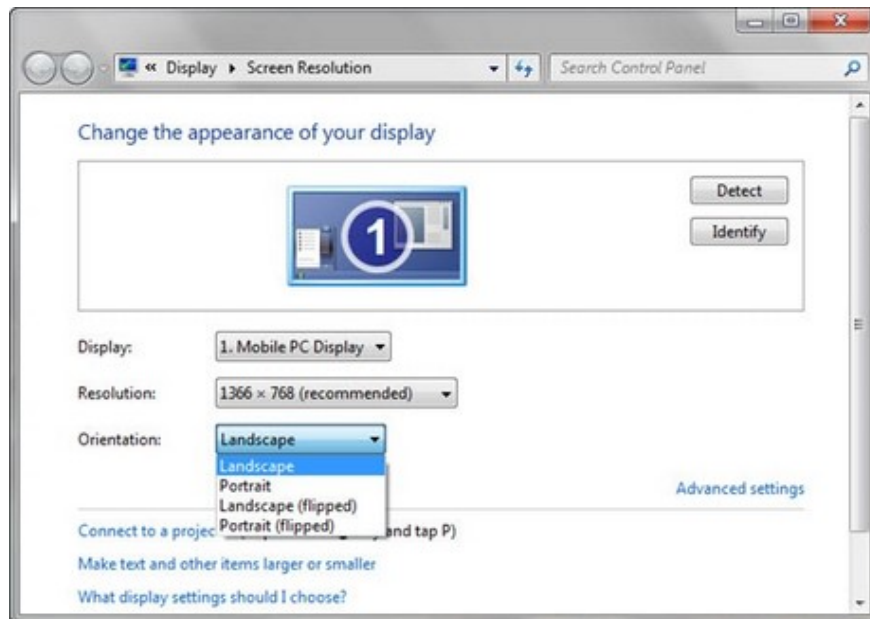

Step 2: Now you need to pay attention to the **Orientation** option , the function of each button is described below.

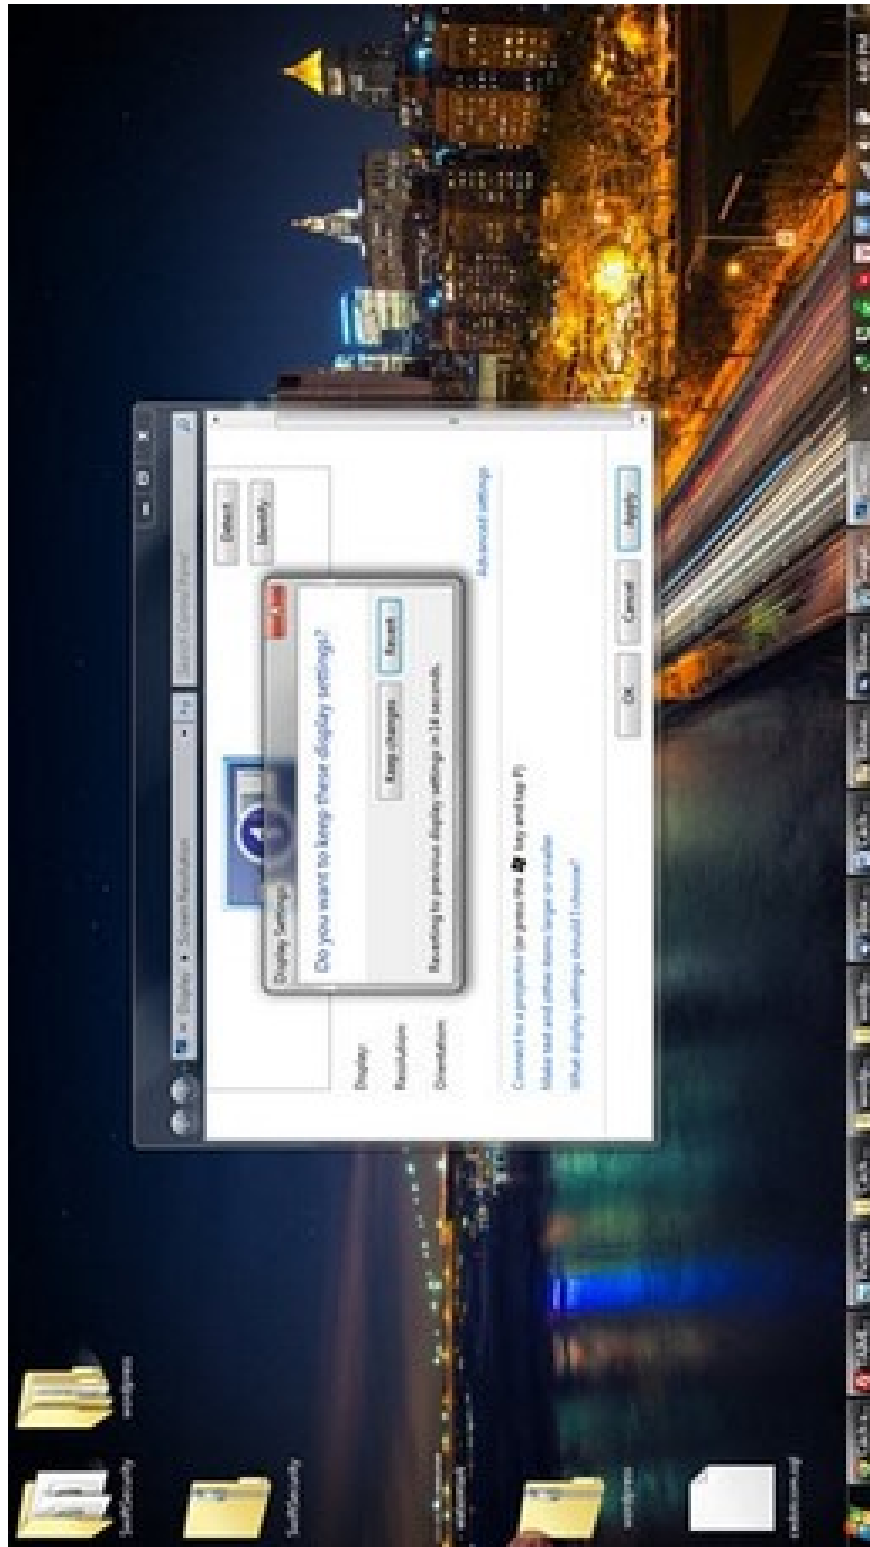

Landscape : Reverse

Portrait : Rotate the computer screen to the left

Portrait (flipped): Rotate to the right.

Demo example of rotating computer screen to the left.

Alternatively, you can use the following keyboard shortcuts:

CTRL + ALT + Up Arrow = Landscape (default)

CTRL + ALT + Down Arrow = Landscape (flipped)

CTRL + ALT + Left Arrow = Portrait

CTRL + ALT + Right Arrow = Portrait (flipped)

Rotating your computer screen on Windows 10, 8, 7, XP is simple with a keyboard shortcut or display settings. If this doesn't work, check your Intel Graphics or AMD Control Panel.
