

# How to rounded corners of photos in Photoshop

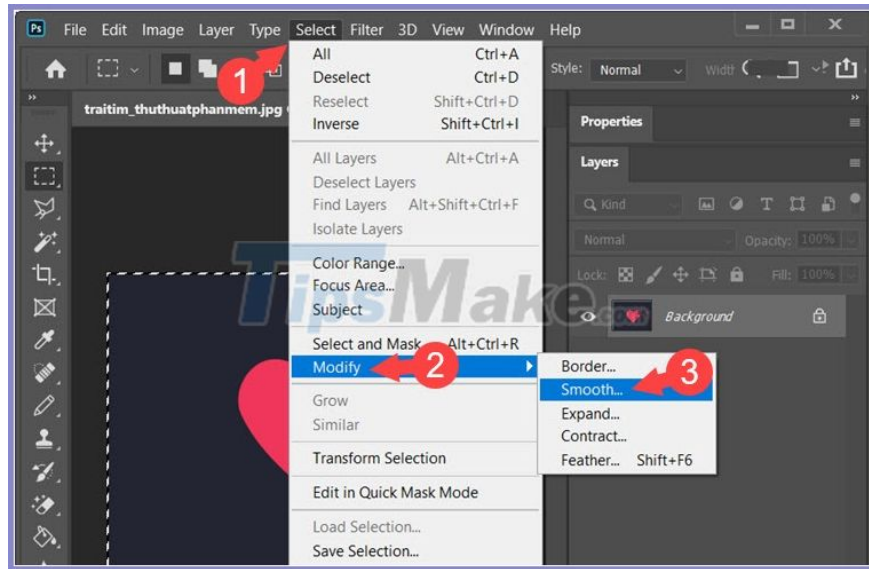

With many of you using Photoshop will not know how to round the corner of the image. In the article below, let's learn how to rounded corners in Photoshop extremely simple below.

## 1. Round the corners of the image with Photoshop

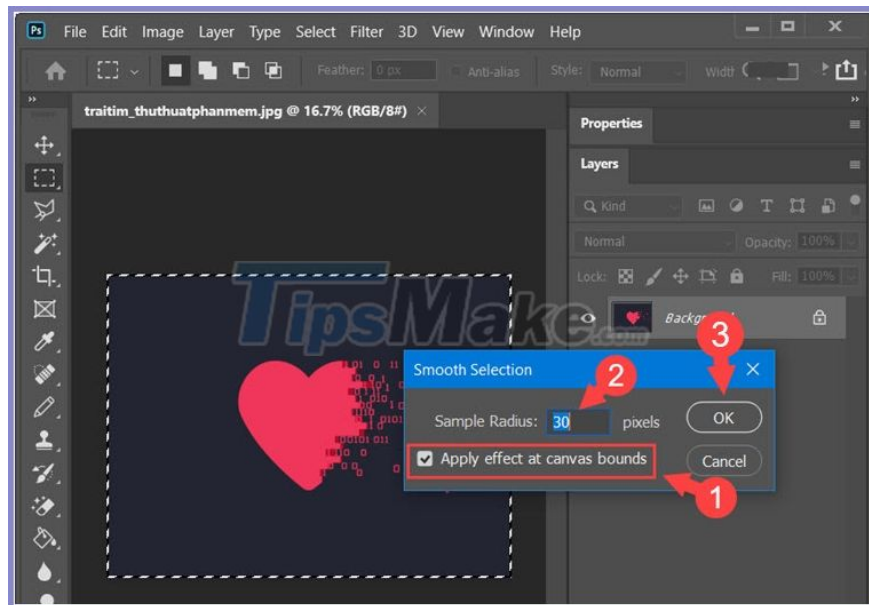

**Step 1:** Open the image with Photoshop. Next, you click on the menu **Select (1)** => **All (2)** or use the key combination **Ctrl + A** to select the entire image area.

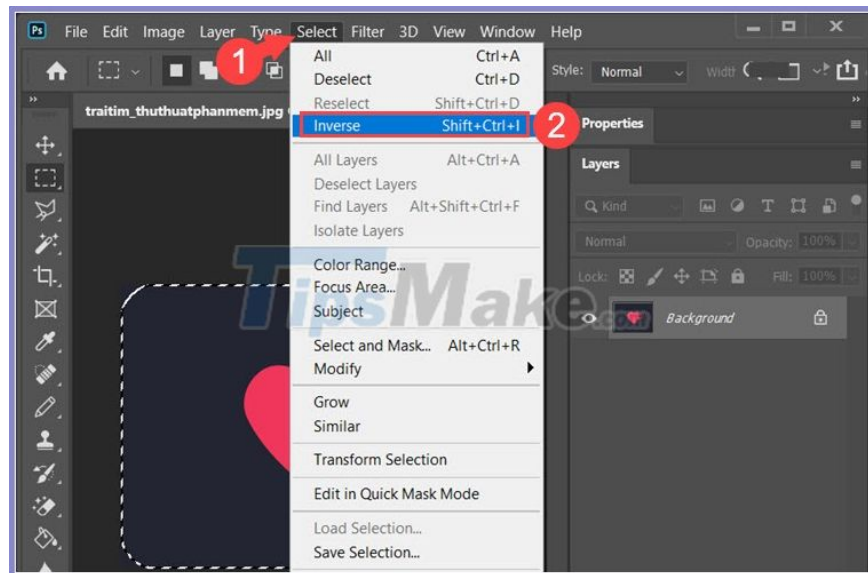

**Step 2:** Go to the menu **Select (1)** => **Modify (2)** => **Smooth (3)** .

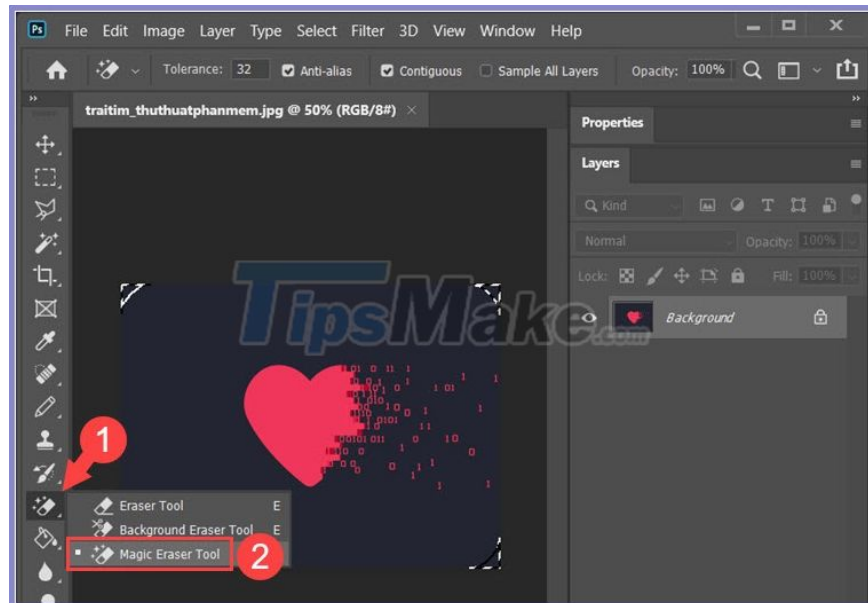

**Step 3:** Check **Apply effect at canvas bounds** (1) before setting pixel parameters (2) . The pixel parameters will depend on the resolution of the image and the image has a large resolution (over 1000 pixels), you can set it at 50 or more, if you do not like it, you can reset as long as is the still image Select area. After completing the setup, click **OK** (3) .

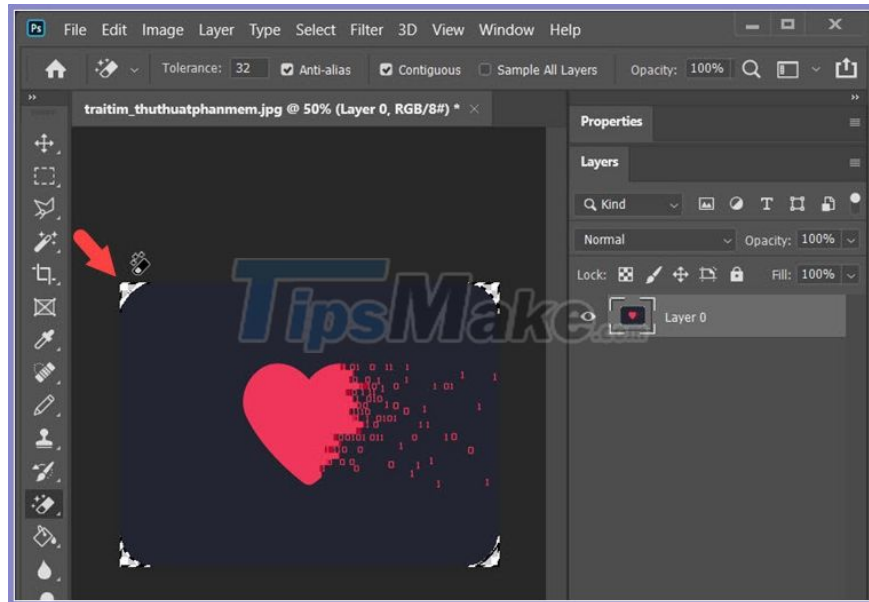

**Step 4:** After having rounded corners, click the **Select** menu (1) => **Inverse** (2) to inverse the selection.

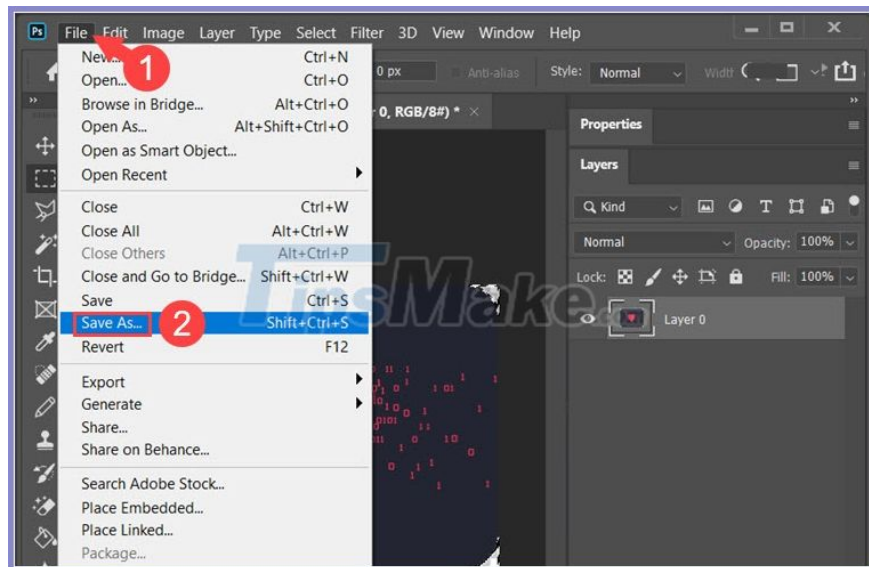

**Step 5:** Click on the **Eraser Tool (1)** => choose the **Magic Eraser Tool (2)** .

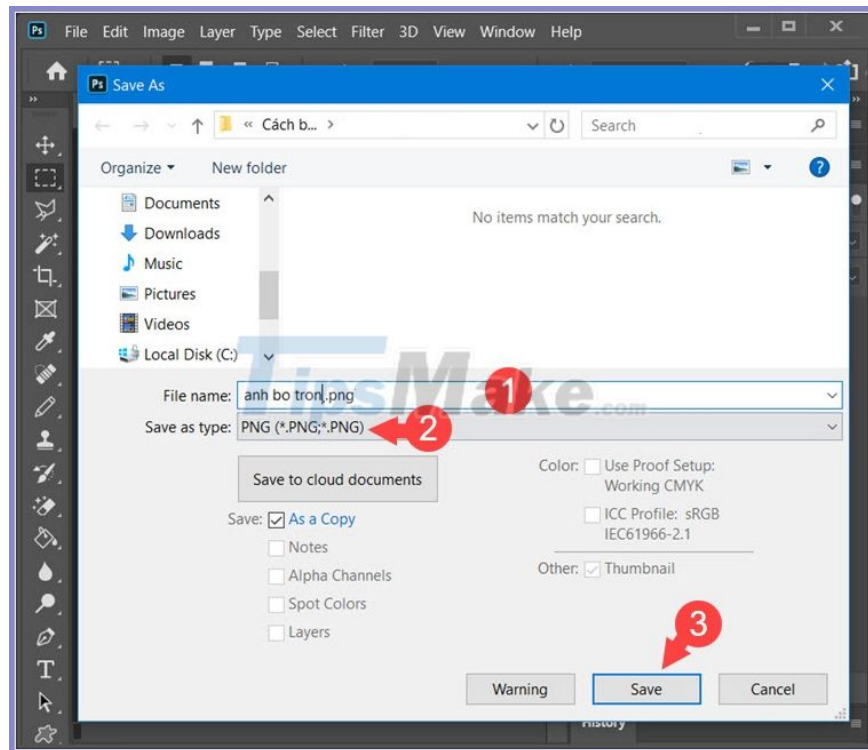

Next, you click on the corners of the image to delete the excess image area.

**Step 6:** Please save the image by going to **File** menu (1) => **Save As .** (2) .

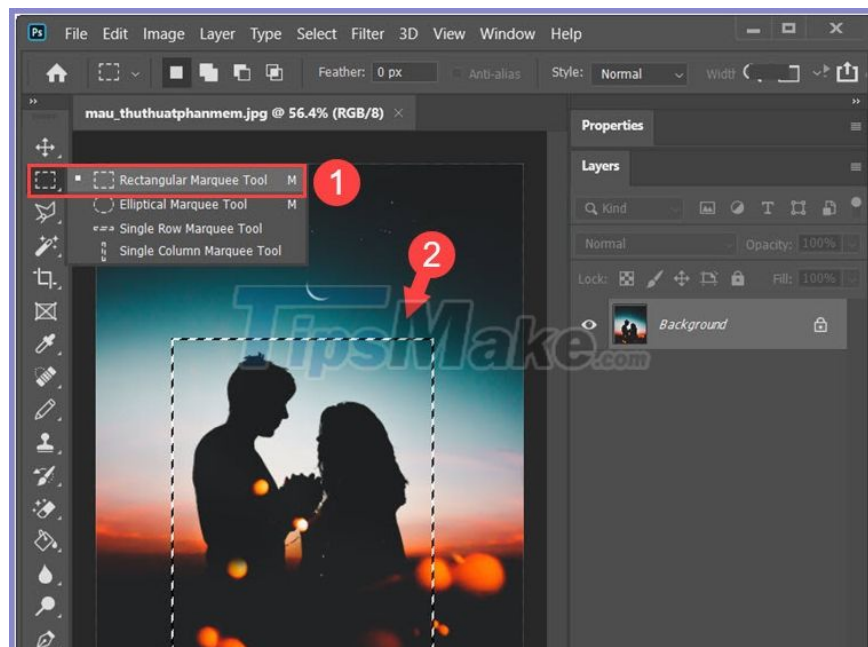

**Step 7:** You name the file (1) and choose the PNG image format (2) so that the rounded border becomes transparent when editing with image processing software. Next, you just need to press **Save** (3) and you're done.

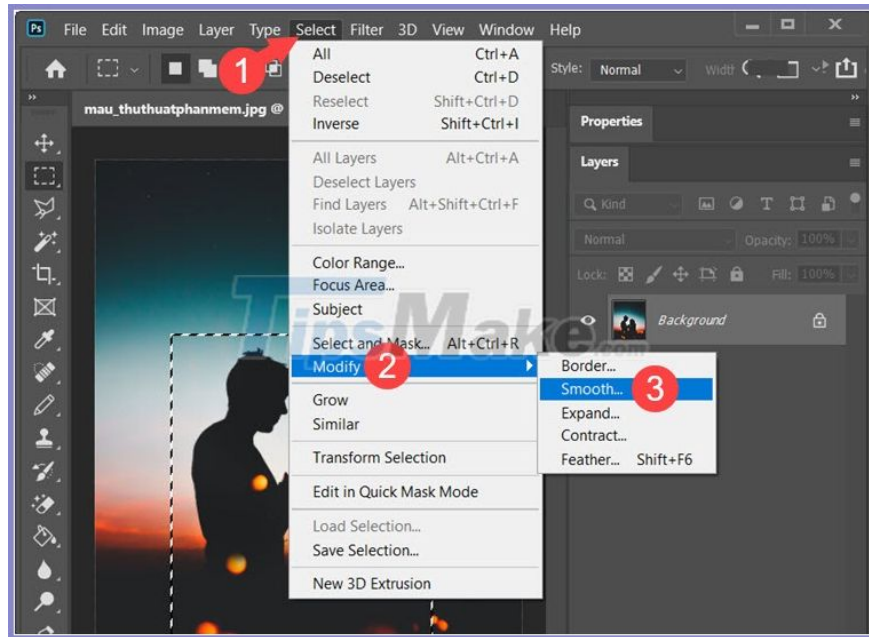

## 2. Round the corners of an image in Photoshop

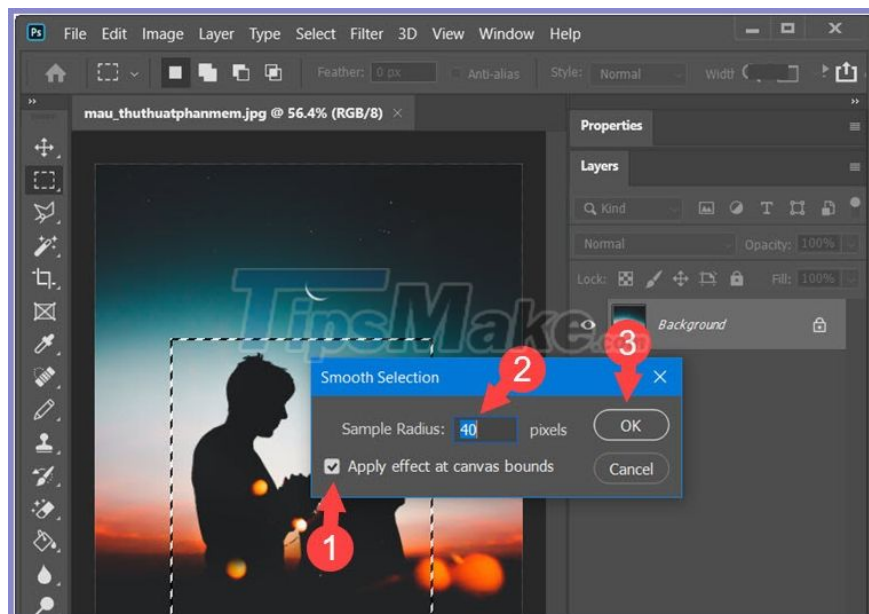

**Step 1:** Click on the **Rectangular Marquee Tool** (1) => circle the image (2) .

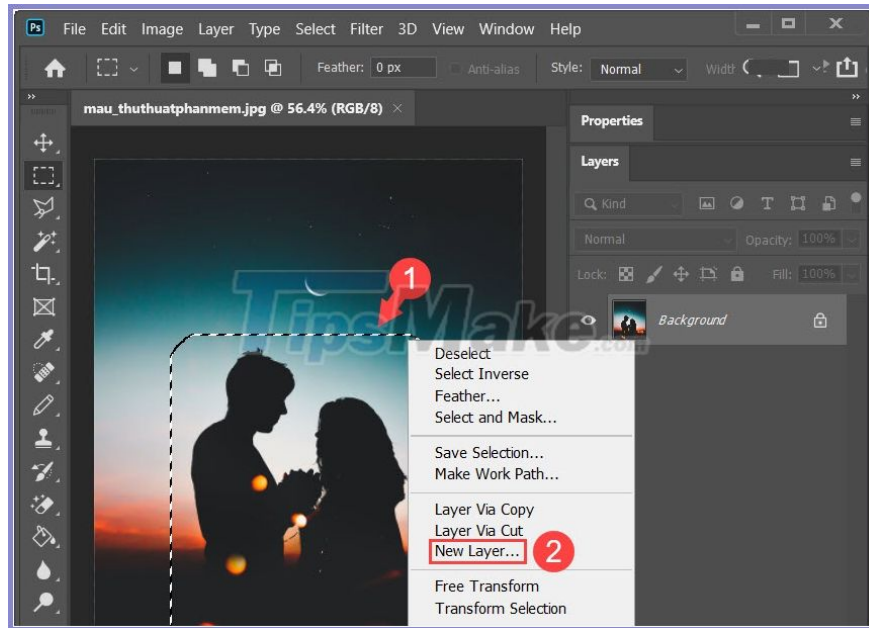

**Step 2:** Go to **Select** (1) => **Modify** (2) => **Smooth** . (3) .

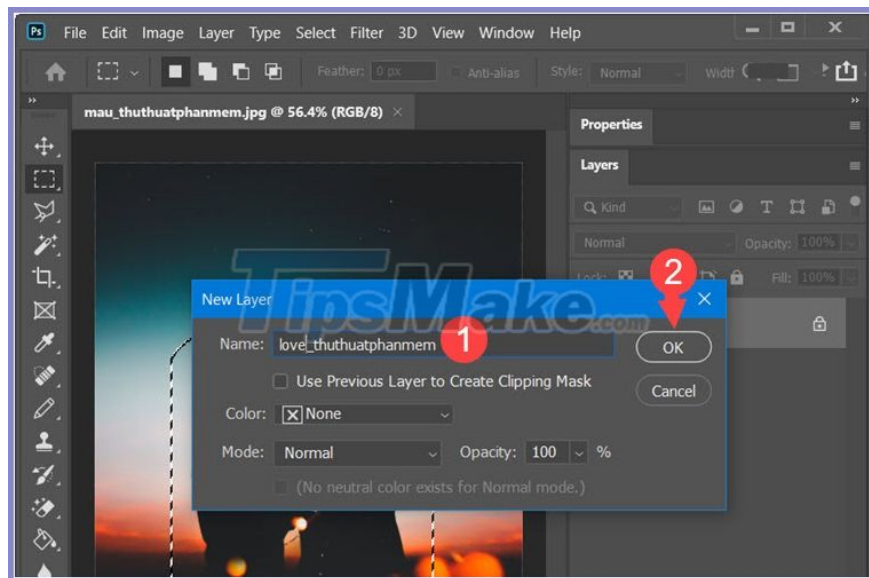

**Step 3:** You check the **Apply effect at canvas bounds** (1) => set parameters for border edges (2) => **OK** (3) .

**Step 4:** After creating a border for the object, **right-click** (1) on the border and choose **New Layer** (2) .

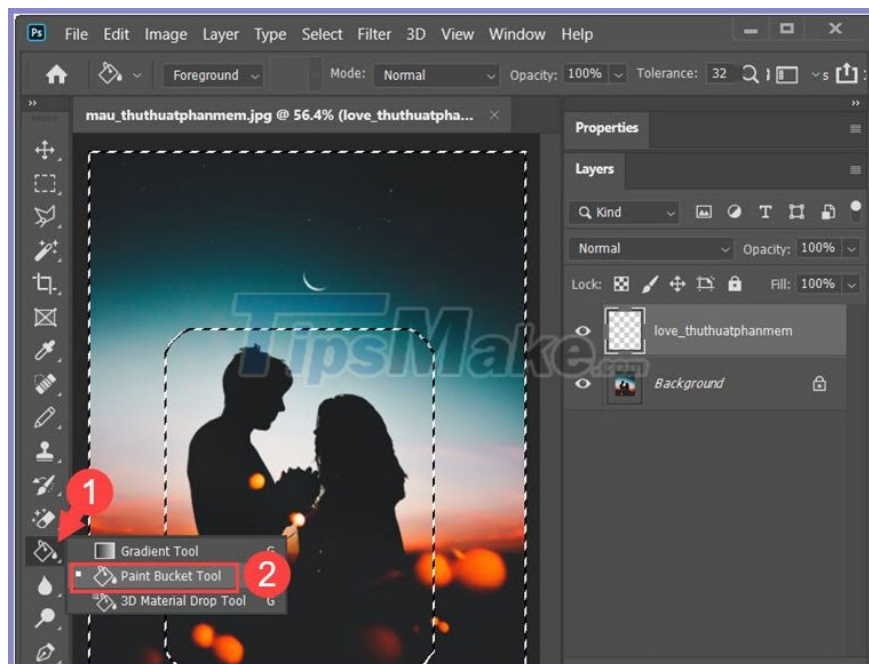

**Step 5:** You name the new layer (1) => **OK** (2) .

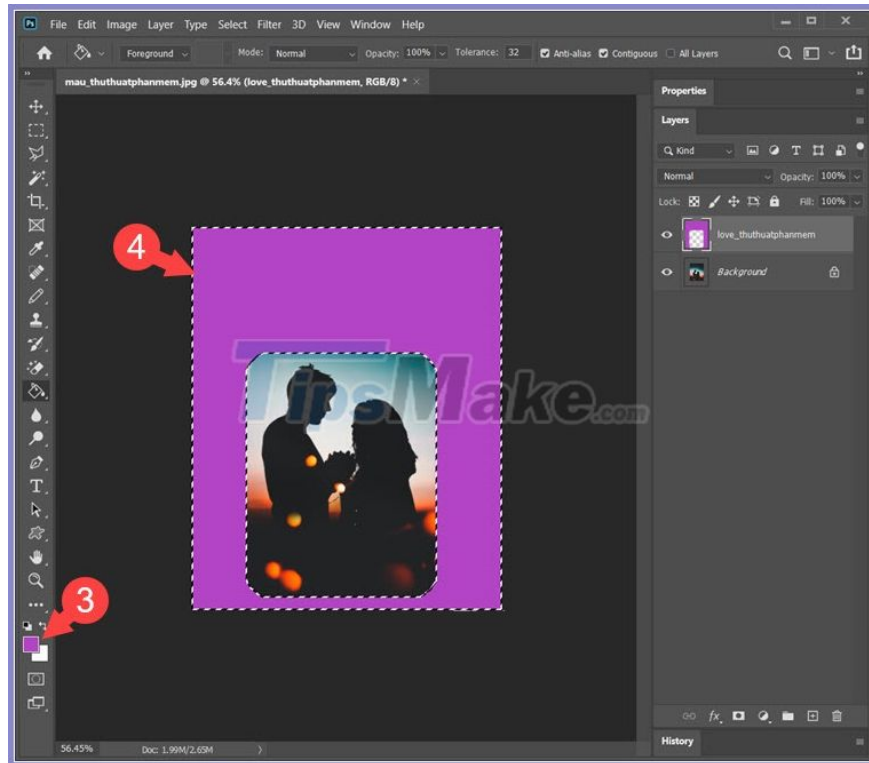

**Step 6:** Click on **Select** (1) => **Inverse** (2) .

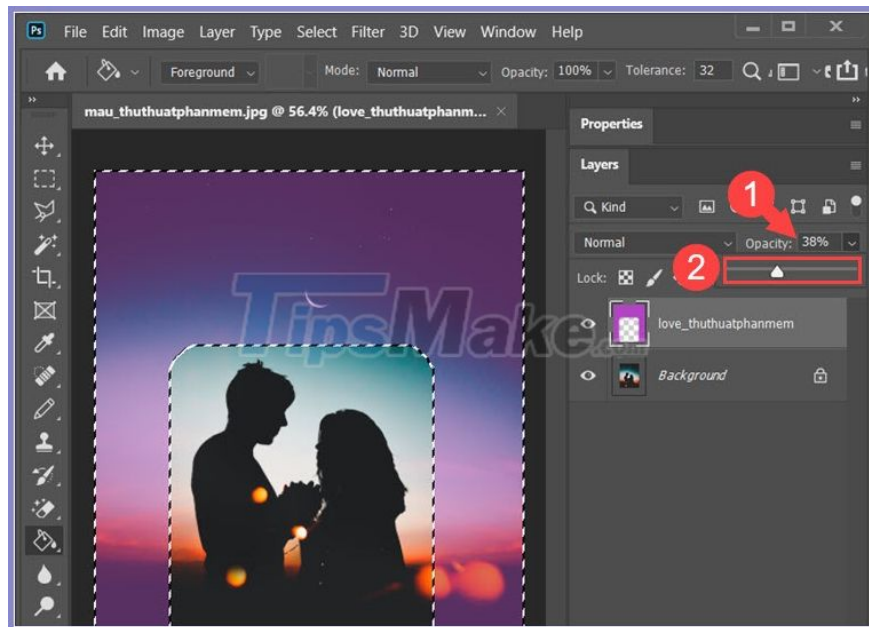

**Step 7:** You choose the fill tool (1) => **Paint Bucket Tool (2)** .

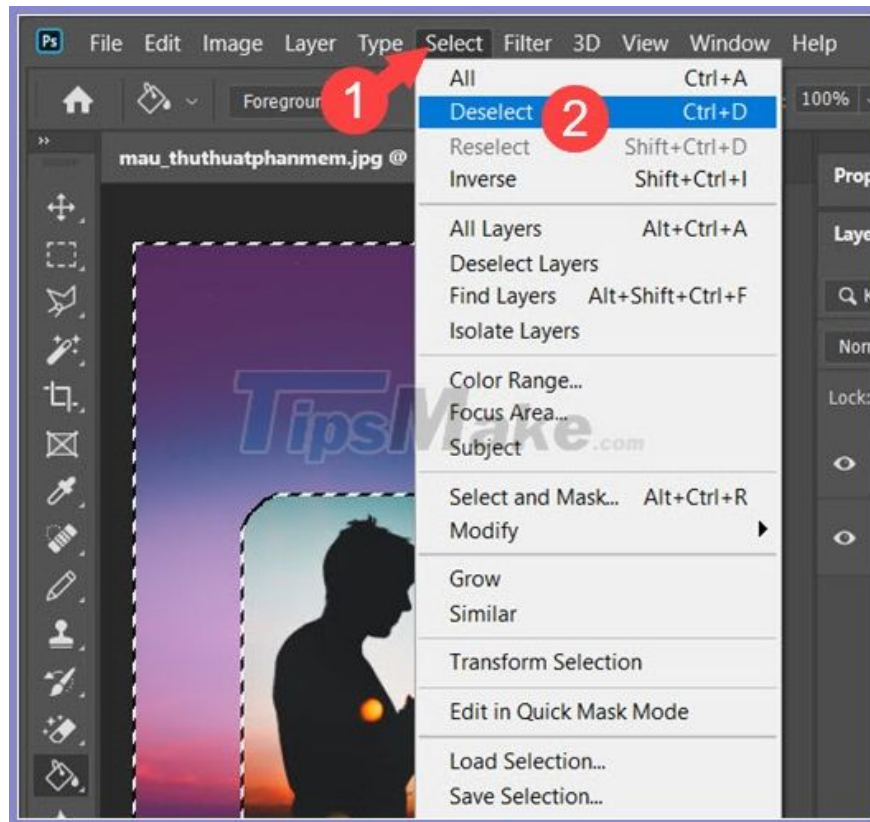

Next, you choose a color (3) => fill the selected image area (4) .

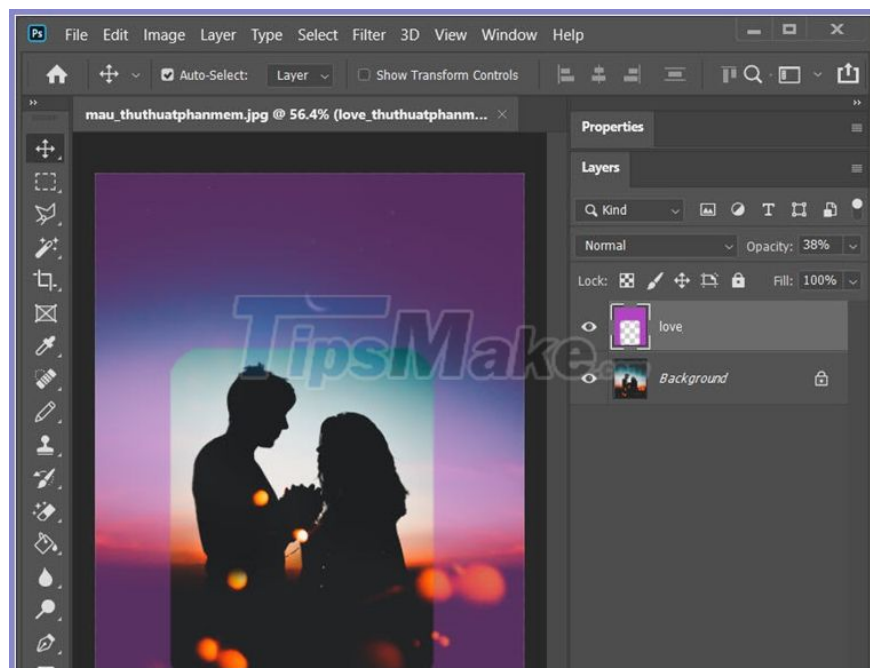

**Step 8:** You click on the **Opacity** (1) and adjust the opacity (2) to suit your taste.

**Step 9:** You go to **Select** (1) => **Deselect** (2) .

And finally you have completed a very unique circular photo composition.

With its unique rounded corners that are easy to operate, you can make monotonous photos more appealing with this way. Good luck!
