

How to save 3G effectively with Opera Max Android

Opera Max is an application that manages data, minimizes unlimited data of applications installed on the device, to help the device save 3G / 4G.

The registration of 3G / 4G packages on smartphones will respond quickly to people's surfing needs. However, the problem is that large files will consume a lot of data. So how to save 3G capacity?

Opera Max is a data management application for Android devices, capable of minimizing unlimited data installed applications, to help users save money for your data package. For example, this application will compress images, videos, and even audio when using live stream services on Youtube. In the article below, Network Administrator will guide you how to save 3G using the Opera Max application on Android.

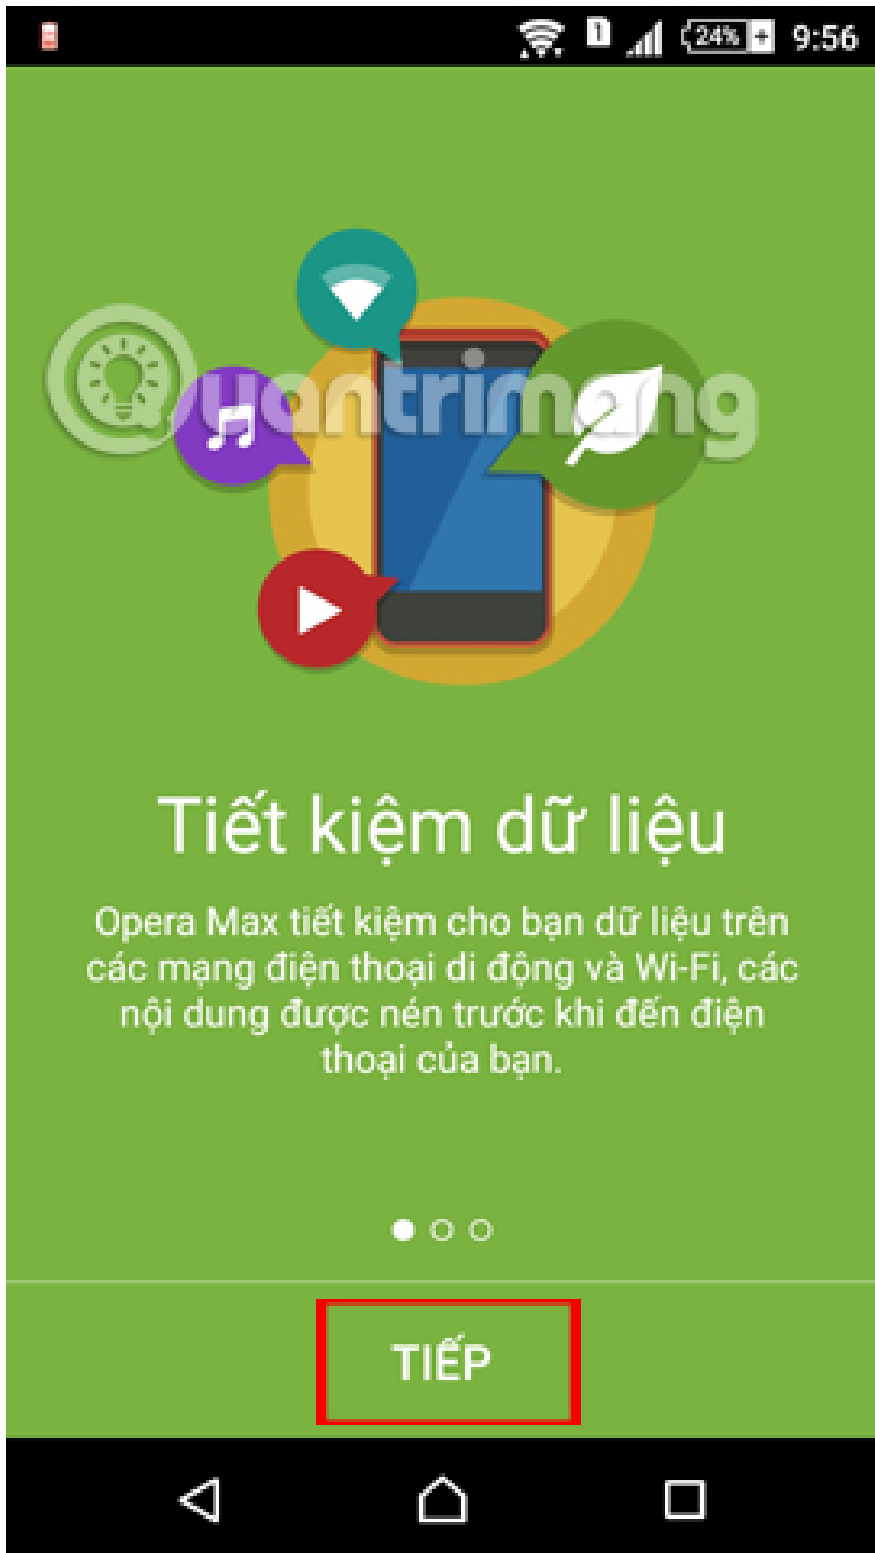

Step 1:

First of all, we will download the Opera Max application for Android devices according to the link below.

1. Download the Opera Max Android application for free

Step 2:

We launch the application after downloading the device. The first interface of the application will be **an introduction to Opera Max features** . Just **press Next** . Finally, we will click on **OK & Continue** to use Opera Max.

Step 4:

To **adjust the data compression level** of images, videos, music when users connect to Wi-Fi or use 3G, you drag to the **Savings** section. We will see 2 items: **Mobile Data Saving** and **Wi-Fi Savings** . By default the application will select the highest compression level.

However, users can adjust by selecting a medium or low compression level. You can even turn off the compression feature when you click Off. If you want to return to the original mode at high level, press **Default** . After adjusting, **press Done** to save.

Step 5:

Next we also swipe the screen from left to right to return to the menu of the application. If you want to **enable Wi-Fi Data Saver mode**, click on that option. Do the same with Mobile Data Saver.

Soon you will receive a notification that saving mode is enabled on the app.

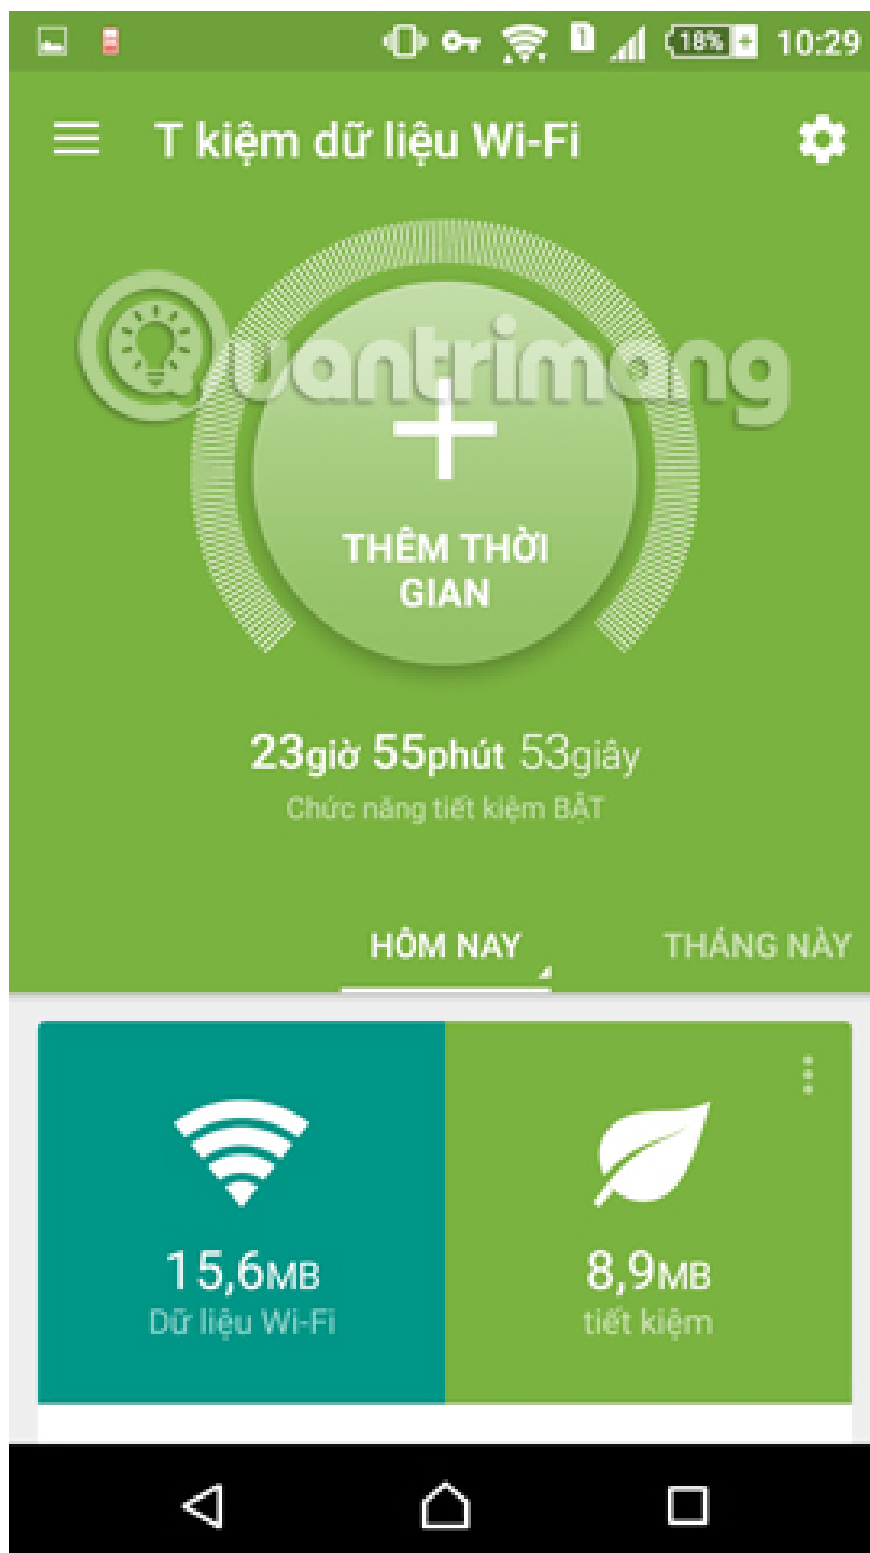

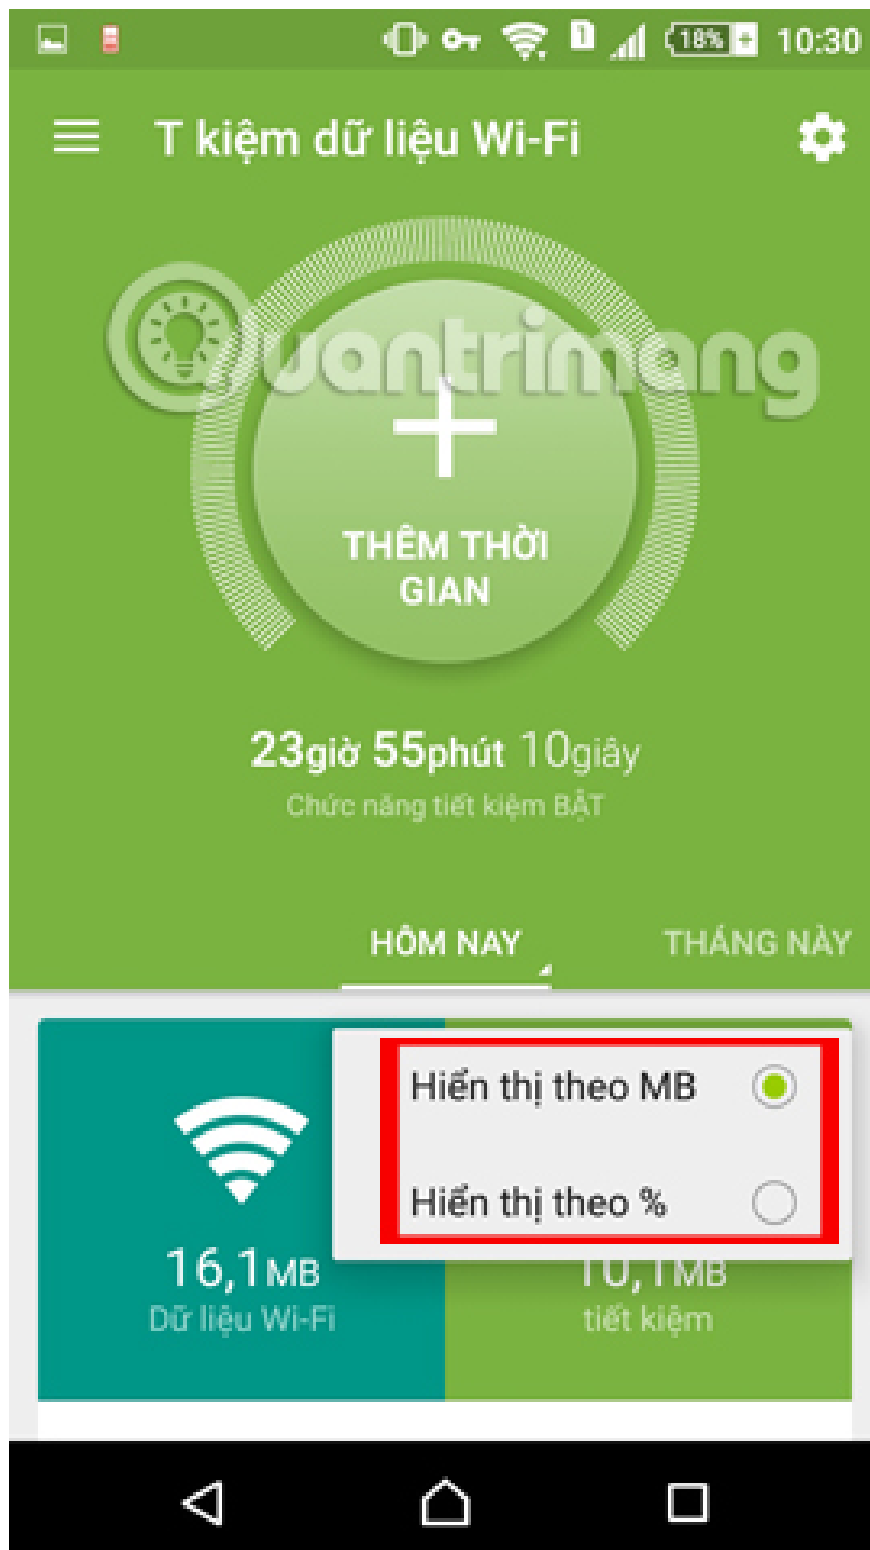

Step 6:

Now we use custom applications installed on the device, listen to music, surf the web, watch videos on Youtube. Then, access the Opera Max application and see how much data has been saved.

Applications that we have accessed on the same day will be listed in Today's section. You will see how much you can save in MB or% if you want.

Scrolling down will be the details of each application's saving data, making it easier for users to manage applications installed on the device. Clicking on each application we will have more detailed information for saving the data capacity of that application.
