

How to save a Web page to the main screen on an iOS device?

If you are using an iOS device (iPhone or iPad, ...) when you browse the Web and you want to save a Web page for later access, you can use bookmark. However, for easy access, you can save the Web site on the home screen.

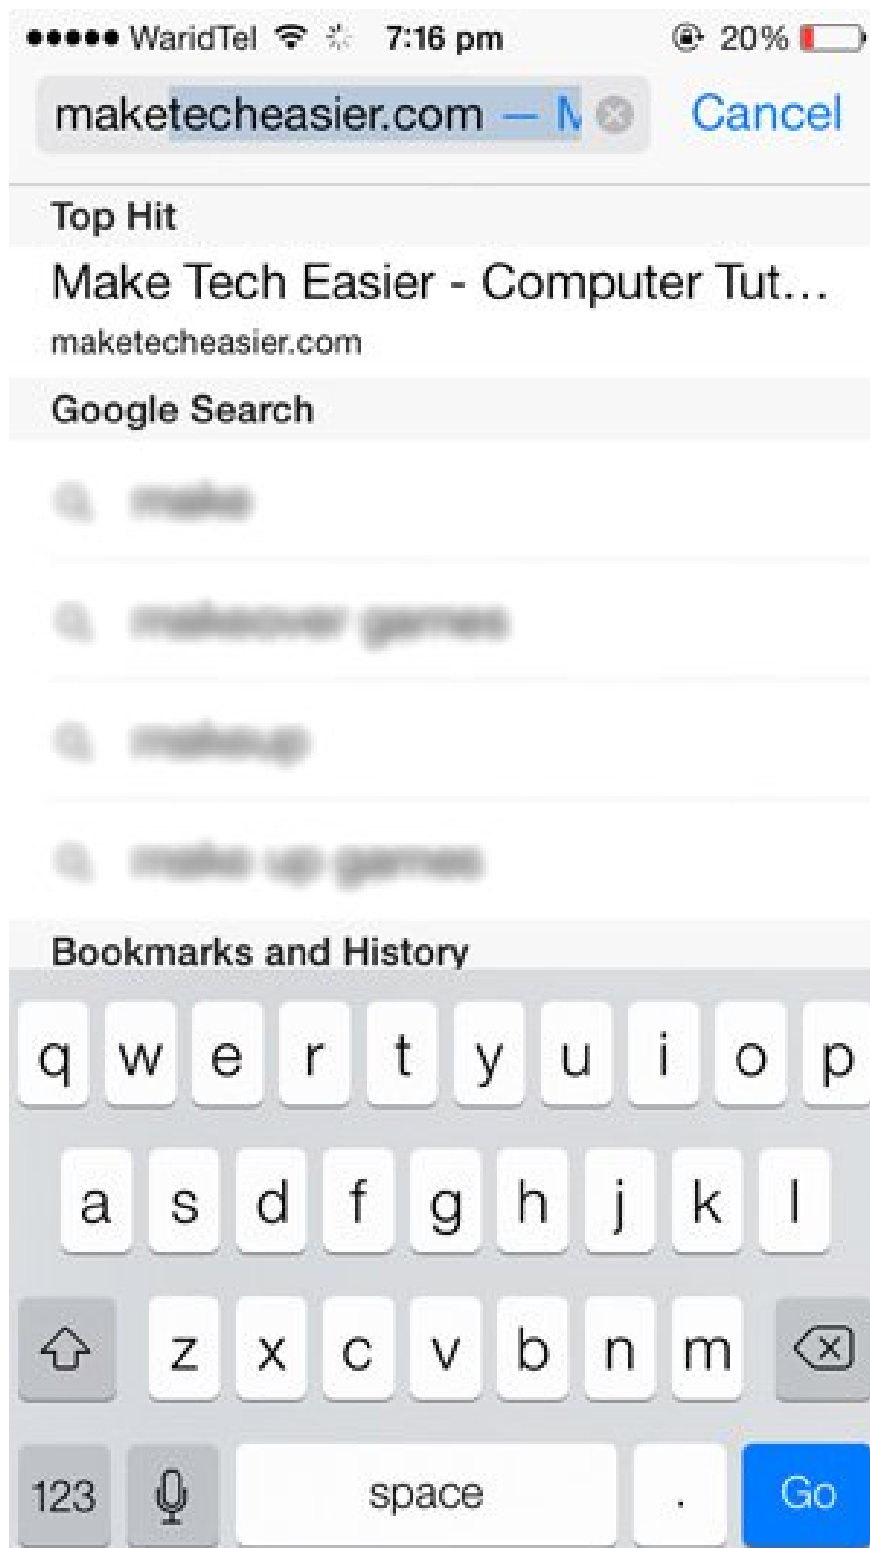

If you are using an iOS device (iPhone or iPad, .) when you browse the Web and you want to save a Web page for later access, you can use bookmark. However, for easy access, you can save the Web site on the home screen.

Refer to the steps to save a Web site to the main screen on the iOS device in the following articleb of the Network Administrator.

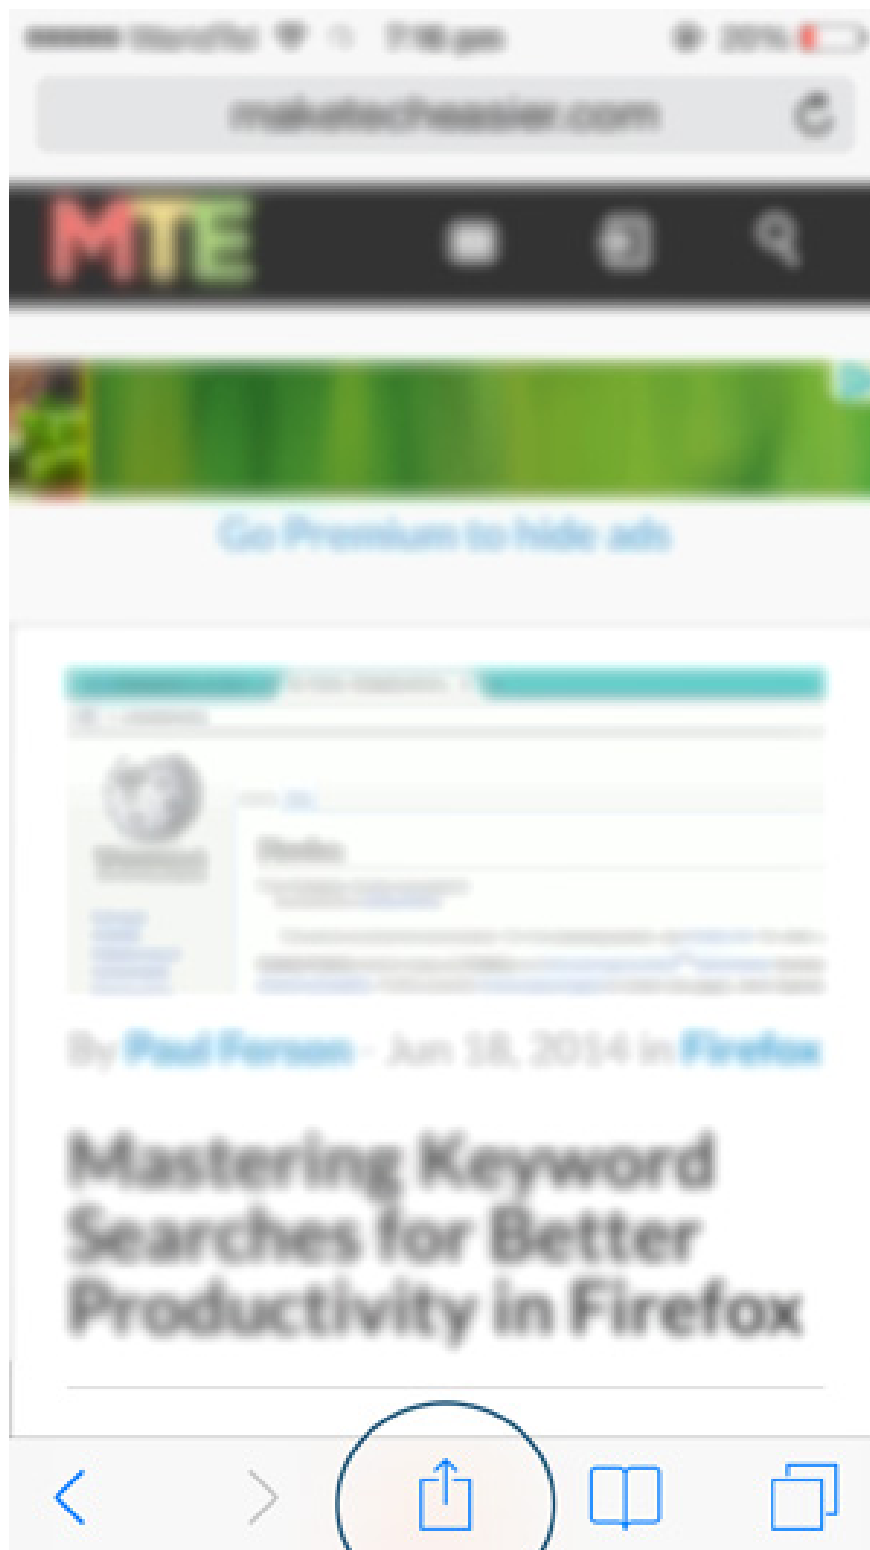

Step 1:

First open the Safari browser, then access the Web site you want to save on your iOS device's home screen.

Step 2:

Click on the **Action** button as shown below.

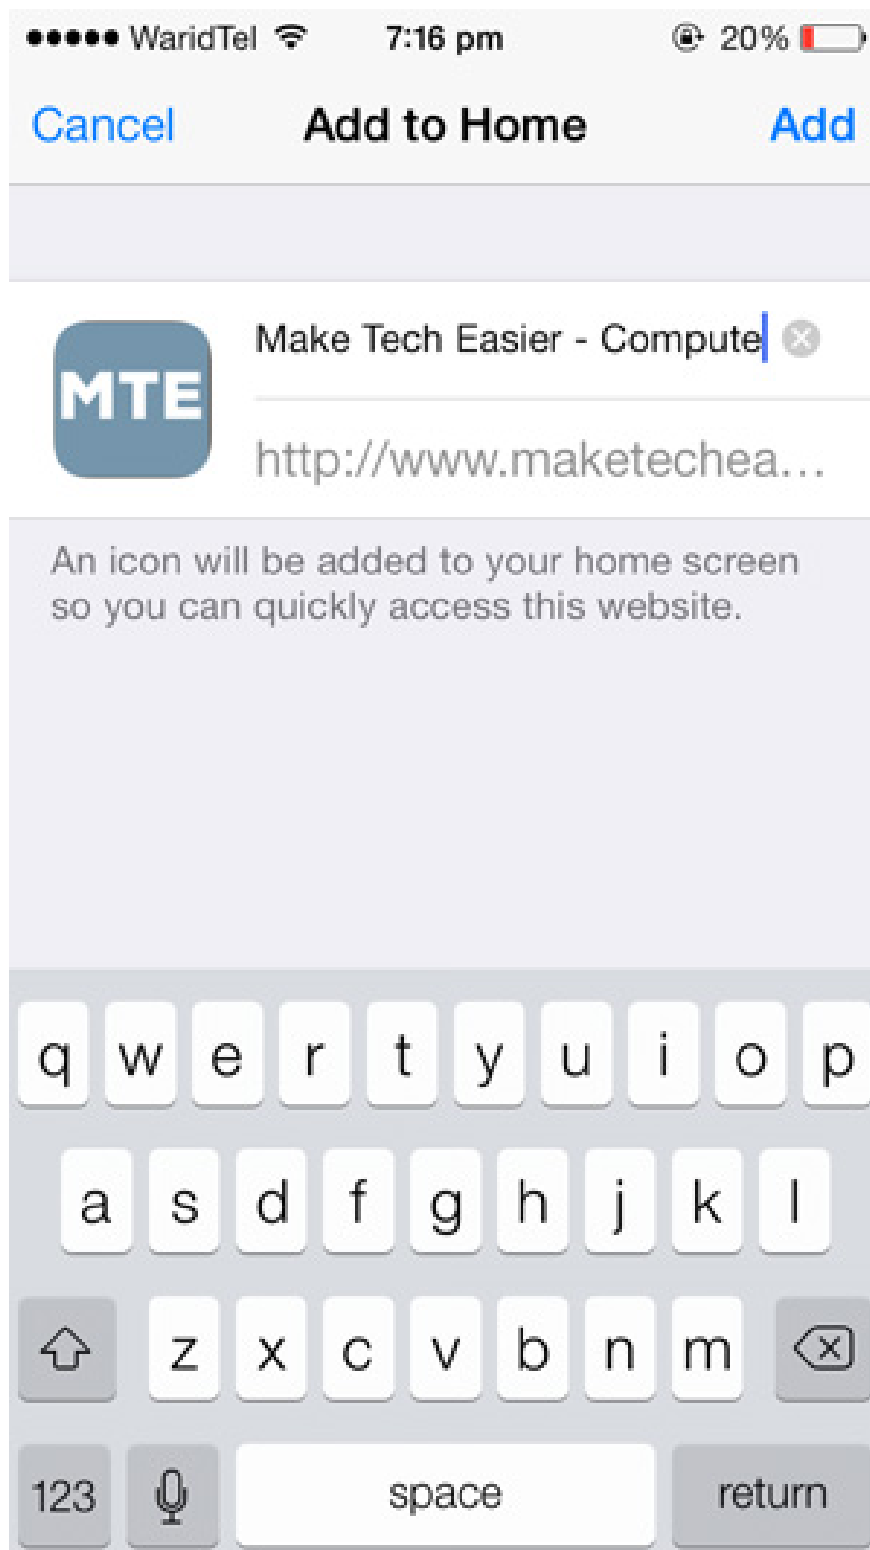

Step 3:

At this time a popup menu window appears, select the **Add To Home Screen** option.

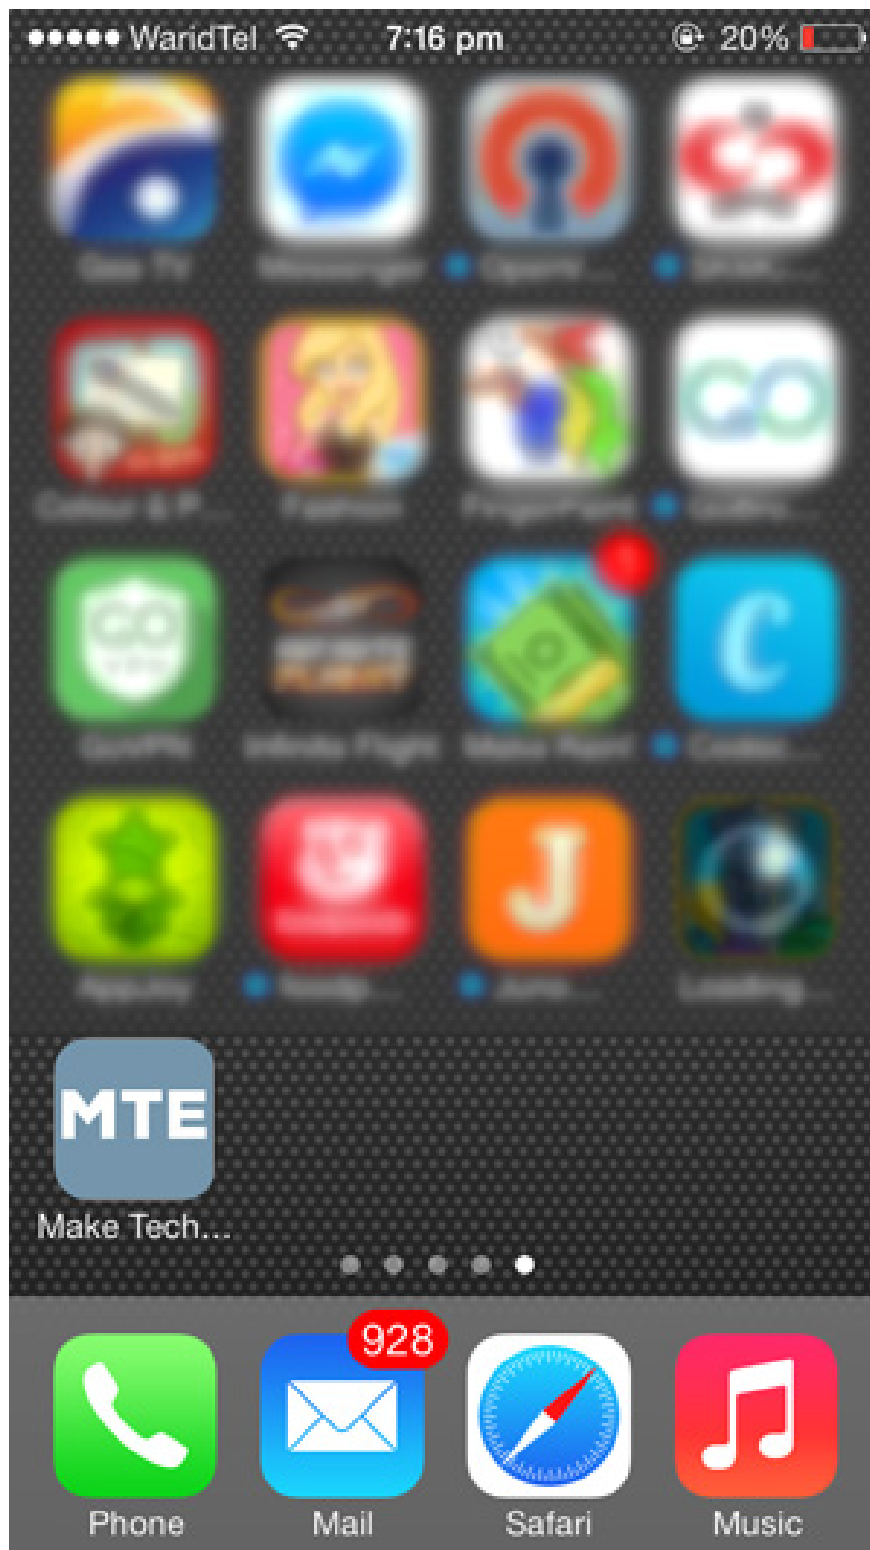

Step 4:

You can rename the title accordingly. After renaming, click on the **Add** button .

Step 5:

Return to the main screen of your iOS device. You will now see the Web page you just added appears on the Home Screen.
